MONUMENTS—**VICTORIA MEMORIAL** in front of Buckingham Palace; **ALBERT MEMORIAL**, South Kensington, AIR, Victoria Embankment; **BALCONSFIELD**, Parliament Square, BELGIAN, Victoria Embankment. **BOADICEA** (more correctly "Boudicca"), Queen of the Iceni, E. Anglia, Westminster Bridge; **BURNS**, Embankment Gardens; **BURGHERS OF CALAIS** (replica of Rodin's statue), Victoria Tower Gardens, Westminster; **CAVALRY**, Hyde Park; **CAVELL**, St. Martin's Place; **CENOTAPH**, Whitehall; **CHARLES I.** (erected Jan. 20, 1675), Trafalgar Square; **CHARLES II.** (Grinling Gibbons), inside the Royal Exchange; **CLEOPATRA'S NEEDLE** (68 ft. high, erected 1878), Thames Embankment (the Sphinx, W. of pedestal, and the surrounding stonework, bear scars from an Air Raid); **CAPTAIN COOK** (Brook), The Mall; **CRIMEAN**, Broad Sanctuary; **OLIVER CROMWELL** (Thornycroft), outside Westminster Hall; **DUKE OF CAMBRIDGE**, Whitehall; **DUKE OF YORK** (124 ft.), St. James's Park; **EDWARD VII.**, Waterloo Place (Mackinnon); **EROS**, (Gilbert) Embankment Gardens; **MARSHALL FOCH**, Grosvenor Gardens; **GEORGE III.**, Cockspur Street; **GEORGE IV.** (Chantrey) riding without stirrups, Trafalgar Square; **GLADSTONE**, facing Australia House; **STRAND GUARDS**, (Cinema) Waterloo Place, (Great War) Horse Guards Parade; **IRVING** (Brook), N. side of National Portrait Gallery; **JAMES II.** (Grinling Gibbons), The Mall; **KITCHENER**, Horse Guards Parade; **ABRAHAM LINCOLN** (St. Gaudens), facing Westminster Abbey; **LONDON TROOPS**, Royal Exchange; **MILTON**, St. Giles's, Cripplegate; **MONUMENT**, THE (see above); **NEILSON** (124 ft.), Trafalgar Square, with Landseer's lions (cast from guns recovered from the wreck of the *Royal George*); **FLORENCE NIGHTINGALE**, Waterloo Place; **"PETER PAN"** (Frampton), Kensington Gardens; **RICHARD CŒUR DE LION** (Marochetti),

Old Palace Yard; **ROBERTS**, Horse Guards Parade; **ROYAL ARTILLERY**, (South Africa) The Mall, (Great War) Hyde Park Corner; **ROYAL MARINES**, The Mall; **SCOTT** (Antarctic), Waterloo Place; **SHAKESPEARE** (Fontana), Leicester Square; **GEORGE WASHINGTON** (Houdon), Trafalgar Square; **WELLINGTON**, Hyde Park Corner; **WELLINGTON** (Chantrey) riding without stirrups, Royal Exchange; **JOHN WESLEY**, City Road; **WOLFELEY**, Horse Guards Parade.

PATENT OFFICE (including PUBLIC LIBRARY), 25 Southampton Buildings, W.C. 2.—In 1931, the Patent Office sealed 21,540 patents and registered 17,683 designs and 6,016 trade marks. The library (245,500 volumes) is open to the public daily from 10 a.m. to 9 p.m.

PEOPLE'S PALACE, Mile End Road, E. 1.—The Queen's Hall was destroyed by fire on February 25, 1931, and no decision has yet been arrived at as to rebuilding. **Small Hall**—Dances and concerts. **Social clubs**, hard tennis courts, **Padminton courts** and indoor cricket pitches. **Hall** can be hired.

PORT OF LONDON—The Port of London comprises the tidal portion of the River Thames from Teddington to the sea, a distance of 69 miles and five dock systems covering an area of 4,203 acres, of which 722 acres are water. The governing body is the Port of London Authority (see pp. 215-6) whose Head Offices in Trinity Square, E.C. 3, were designed by Sir Edwin Cooper, A.R.A., F.R.I.B.A. The value of the overseas trade of the Port, including transshipments under bond in 1931 was £505,180,000 and represents over one-third of the overseas trade of the United Kingdom. Particulars of the docks are as follows:—**London & St Katharine Docks**, E. 1.—Area 123½ acres including 45 acres water. Chief commodities handled are Wool, Ivory, Spices, Shells, Tea, Rubber, Wine, Marble, Canned Goods, Hides, Perfumes, &c., and general cargo from Continental and coastwise ports. **Surrey Commercial Docks**, S.E. 16.—Area 38½ acres, including 133 acres water. The chief centre of the London and Provincial Softwood Trade. Also handles Grain, Canadian Dairy Produce, &c. **West India & Millwall Docks**, E. 14.—Area 473 acres including 133½ acres water. Principal commodities handled are Rum, Sugar, Grain, Hardwood, Fruit, Plywood and Wood pulp. In Millwall Dock a special feature is the Gunniat. **East India Dock**, E. 14.—Area 67½ acres including 31½ acres water. Centre of South African and West India Trade. Special equipment for handling bananas. **Royal Victoria & Albert & King George V. Docks**, E. 16.—Area 1,202½ acres including 246 acres water.—Have special facilities for handling Frozen and Chilled Meat, Grain, Tobacco. Large quantities of Wool, Fruit, Dairy Produce and general cargo are also dealt with. The *King George V. Dock*, opened in 1921, provides accommodation for vessels up to 30,000 tons. **Tilbury Docks**, Essex.—Area 675 acres, including 204½ acres water. These docks are 26 miles below London Bridge and are used principally by vessels plying on the Australian, Indian and other Eastern routes. The Cargo Jetty in the River at Tilbury is available for vessels to discharge or load part cargoes. **Tilbury Passenger Landing Stage** provides accommodation for liners at all states of the tide and adjoins Tilbury Riverside Station, giving direct rail connexion with London, the Midlands and the North.

POST OFFICE.—The "General Post Office" is in King Edward Street, E.C. 1, a handsomely fronted, ferro-concrete building (Tanner), with marble inlaid hall, opened in 1920. The public Hall is open for usual postal business from 6.45 a.m. to 9 p.m. (Sat. 8 p.m.). In the neighbourhood are G.P.O. North and G.P.O. West (the Central Telegraph Office).

PRINCE HENRY'S ROOM, 17, Fleet Street, E.C. 4 (bought by the L.C.C. in 1900, and open free to 104 or 5) is in a timbered 17th century house, and contains a Jacobean plaster ceiling and Jacobean and Georgian panelling. (Available for lettings—Apply Architect, County Hall S.E. 1.)

ROMAN LONDON.—Visible remains of the Roman city are now very few. The most striking is a fine piece of the city wall, including an angle bastion, beneath the pavement of the yard of the General Post Office at Giltspur Street. Other portions of this three mile wall which encircled the city may be seen at Roman Wall House, Crutched Friars, and near the White Tower of the Tower of London. The fragments showing in the churchyards of Cripple-gate, Saint Alphege, London Wall, and All Hallows, London Wall, are medieval reconstructions, the actual Roman masonry of the lower portion being here concealed beneath the soil. Recent excavations have revealed the fact that there is a long stretch of the base of the wall still in existence below the roadway of London Wall between Moorgate and Broad Street. In the basement of the Coal Exchange of Lower Thames Street are the remains of a hypocaust, perhaps once forming part of public baths. The governmental headquarters of the town were a great basilica more than 400 feet long from east to west, the massive walls of which have been encountered, extending from Leadenhall Market across Gracechurch Street as far as St Michael's, Cornhill. Excavations during the past few years have shown that the river front was embanked in Roman times with a construction of huge oak timbers for a considerable distance both east and west of the present London Bridge. Many relics of Roman London may be seen in the Guildhall, British and London Museums (q.v.).

ROYAL EXCHANGE, Cornhill, E.C. 3 founded by Sir Thomas Gresham, 1566, opened by Queen Elizabeth 1571, rebuilt 1667-9 and 1842-1844)—Admission free. Statues of Queen Elizabeth (Charles II., Queen Victoria, Sir Thomas Gresham, Wellington (Chantry), riding without stirrups, Peabody, and others), frescoes in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie and others. The chimes of the Royal Exchange (re-cast 1921) play English, Scottish and Irish melodies at 9 a.m., 12 noon, and 3 and 6 p.m. The building is now occupied entirely by the Royal Exchange Assurance, which has had its head office there since 1790.

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W. 7—Map Room open to public, free.

ROYAL MINT, Tower Hill, E.C. 3 (building erected 1810), where gold, silver, and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri., except Bank Holidays, &c., when the Mint is closed.

ST. BARTHOLOMEW'S HOSPITAL, Smithfield, E.C. 1—Founded A.D. 1122 by Rahere (see St. Bartholomew's Priory, p. 402). Present buildings mainly 18th and 19th centuries; main entrance

1702 The Great Hall contains a series of portraits including Henry VIII., Harvey, Abernethy, Pott, Radcliffe, &c. Hospital for 715 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts; Ingilo Jones was baptised in former church.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, W. 1—Founded in 1733. Hospital for 320 beds. Present buildings date from 1820.

ST. JAMES'S PALACE, in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII. (according to tradition, from designs by Holbein) the Gatehouse and Presence Chamber remain and part of the Chapel Royal. A royal residence from 1568 to 1837. *Royal Levees* held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James," and (by the King's permission) the Conference of the Allies was held there in February, 1918.

ST. JOHN'S GATE, Cockenwell, E.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early 16th century) and choir of Church (15th and 16th century) alone survive. The gatehouse may be inspected by written permission of the Secretary at the Chancery.

ST. THOMAS'S HOSPITAL, Albert Embankment, S.E. 1—Founded 1213. Present buildings (7 red brick houses) by Curry, 1868-71, 1,000 beds.

SMITHFIELD, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor* Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1546), was burned there in the reign of Henry VIII., and under Mary I. (1553-1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggett, Unitarian (1621), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666.

SOMERSET HOUSE, Strand, W.C. 2, and Victoria Embankment, W.C. 2.—The beautiful river facade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers, the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the Board of Inland Revenue and by the Principal Probate Registry and the office of the Registrar-General of Births, Marriages and Deaths. In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C. 2. (Strangers not admitted)—Known in the City as the "House," was founded in 1773 and now consists of about 4,000 members. A dealer ("jobber") does business only with other members, a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls," those for a fall are "bears." *Chairman of the Committee for General*

* The "sword of St. Paul" appears in the 1st quarter of the City Arms, not "Walworth's dagger" as commonly believed, an error still repeated in an inscription in Fishmongers' Hall.

Purposes, Sir Archibald Henry Campbell; **Deputy Chairman**, H. F. Channen; **Secretary**, General Purposes Committee, A. L. F. Green; **Secretary, Trustees and Managers**, R. M. Brydson, Office, 23, Throgmorton St., E.C. 2

THAMES EMBANKMENTS—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Baraigette for the Metropolitan Board of Works, 1860-1870 (the seats, of which the sports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860-1869, the Chelsea Embankment, 1871-1874. The total cost exceeded £2,000,000. Sir Joseph William Bazalgette (1819-1891) also constructed the London main drainage system, 1858-1865, at a cost of £4,600,000. A medalion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Fluminis vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 440 yards, of which 510 yards are under the river. The cost of the tunnel and its approaches was £1,560,041. The *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly $\frac{1}{4}$ miles, of which 407 yds are under the river. The cost of the tunnel with its approaches was about £1,406,000. *Greenwich Tunnel* (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 405 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 500 yards, and its cost was £85,862. The *Thames Tunnel* (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C. 1 and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON, E.C. 3 (built by William the Conqueror, A.D. 1066-1087)—Admission to Jewel House on all week days, 6d.; White Tower and Armouries, including Vaults, 6d.; to Bloody Tower, on all week days, 6d. Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 1 May to 30 Sept., 10 a.m. to 6 p.m.; 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. *Constable*, (vacant); *Lieutenant*, Lt.-Gen. Sir W. Edmund Ironside, K.C.B., C.M.G., D.S.O.; *Major and Resident Governor*, Lt.-Col. Dan Burgess, V.C., F.S.O.; *Keeper of the Jewel House*, Major-Gen. Sir George J. Youngblood, K.C.M.G., K.C.I.B., C.B.; *Curator*

of the Armouries, Charles Boulkes, F.S.A. The Yeoman Warders retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (Edward V. and his brother), Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Sir Walter Raleigh, William Penn, Cranmer, Ridley and Latimer and many others were imprisoned in the Tower.

TRAFALGAR SQUARE, S.W. 1.—This space was laid out in the second quarter of the 19th century. In the Square are the *Nelson Monument* 124 feet high, with Landseer's lions round the base.

WESTMINSTER HALL, S.W. 1 (built by William Rufus, A.D. 1087-1100 and altered by Richard II., 1377-1399), adjacent to and incorporated in the Houses of Parliament—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 1834). The Hall is 200 feet long, 68 feet wide, and 90 feet high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards, S.W. 1.—Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I. was beheaded here.

PARKS, SPACES AND GARDENS.

The principal Parks and Open Spaces in the Metropolitan area are maintained as under—

By the Crown.

BUSHY PARK (2,100 acres), see p. 480.

GREEN PARK (53 acres) W. 1.—Between Piccadilly and St. James's Park with *Constitution Hill*, leading to Hyde Park Corner.

GREENWICH PARK (188 acres), S.E. 10, see p. 481.

HAMPTON COURT GARDENS (54 acres).

HAMPTON COURT GREEN (17 acres).

HAMPTON COURT PARK (615 acres).

HYDE PARK (360 acres)—From Park Lane, W. 1, to Kensington Gardens, W. 8, containing the Serpentine. Fine gateway at Hyde Park Corner, with Apsley House, the Achilles Statue, Rotten Row and the Ladies' Mile. To the west is the *Marble Arch*, originally erected by George IV. at the entrance to Buckingham Palace and re-erected in present position in 1850.

KENSINGTON GARDENS (275 acres) W. 8.—From western boundary of Hyde Park to Kensington Palace, containing the Albert Memorial.

Kew Royal Botanic Gardens (288 acres), see p. 282 and p. 479.

REGENT'S PARK AND PRIMROSE HILL (525 acres), N.W. 1.—From Marylebone Road to Primrose Hill surrounded by the Outer Circle and divided by the *Broad Walk* leading to Zoological Gardens.

RICHMOND GREEN (10 acres)

RICHMOND PARK (2,358 acres).

ST. JAMES'S PARK (63 acres), S.W. 1.—From Whitehall to Buckingham Palace. An ornamental lake of 5 acres is spanned by a suspension bridge built in 1827, from which a magnificent view is obtainable towards Westminster eastwards and westwards to Buckingham Palace. The *Mall* leads from the Admiralty Arch to the Queen Victoria Memorial and Buckingham Palace. *Birdcage Walk* from Storey's Gate, past Wellington Barracks, to Buckingham Palace. *Master Gunner of St. James's Park*, Field-Marshal Sir George F. Milne, G.C.B., G.C.M.G., D.S.O., D.C.L., LL.D.

By the Corporation of London.

BURNHAM BERRCHES and FLEET WOOD (490 acres), see p. 480.

COULSDON COMMON, Surrey (163 acres)

EPING FOREST (3,550 acres), see p. 480.

FARTHINGDOWN, Surrey (121 acres)

HIGHGATE WOOD (70 acres). Highgate Hill is the scene of the Dick Whittington legends.

KENLEY COMMON, Surrey (80 acres)

QUEEN'S PARK, Kilburn (30 acres)

RIDDLSDOWN, Surrey (87 acres)

SPRING PARK, West Wickham (36 acres)

WEST HAM PARK (77 acres)

WEST WICKHAM COMMON, Kent (25 acres)

By the London County Council.

BATTERSEA PARK (200 acres), S. W. 8 to S. W. 11, with *Sub-tropical Garden* (4 acres)

BLACKHEATH (267 acres), S. E. 3—*Morden College*, founded in 1695 as a home for "decayed Turkey merchants," is near the S. E. corner

BOSTALL HEATH and WOODS (134 acres), S. E. 2

BROCKWELL PARK (127 acres), with Brockwell Hall, Heide Hill, S. E. 5

CLAPHAM COMMON (205 acres), S. W. 4

DULWICH PARK (72 acres), with lake, S. E. 22.

FINCHBURY PARK (115 acres), N. 4.

GOLDEN HILL (36 acres), adjoining West Heath, Hampstead

HACKNEY DOWNS (42 acres), E. 5

HACKNEY MARSH (340 acres), E. 8

HAINGUAT FOREST (805 acres), Hainguat, Essex

HAMPSTEAD HEATH and Extension (288 acres), N. W. 3—Hampstead Church contains a bust of Keats, who lived for a time at Lawn Bank (formerly called Wentworth Place)

KEN WOOD (195 acres), adjoining Parliament Hill Fields, and including Nightingale Valley Park purchased in 1922 by public subscription, opened and dedicated by the King, July 18, 1925. Ken Wood contains valuable art treasures (leaving bequest).

MARBLE HILL (66 acres)—Twickenham, Middlesex (opposite Richmond, Surrey)—A beautiful park, running down to the riverside, on the left bank of the Thames, includes a mansion, formerly the residence of Miss Fitzherbert, morganatic wife of George IV. Twickenham contains Pope's Villa (rebuilt) and the poet's tomb in the parish church, near which is York House, where Queen Anne was born. At *strawberry Hill* is Horace Walpole's house with ornamental garden

PARLIAMENT HILL (271 acres)—adjoining Hampstead Heath. A tunnel, popularly known as *Boudicca's Tomb*, is believed to be Roman

PICKHAM RYE (64 acres), S. E. 15, and S. E. 22.

PICKHAM RYE PARK (49 acres), S. E. 15 and S. E. 22

PLUMSTEAD COMMON (103 acres), S. E. 18

RAVENSCOURT PARK (33 acres) Hammersmith

SOUTHWARK PARK (63 acres) near Surrey

Commercial Docks, Rotherhithe, S. E. 16.

STREATHAM COMMON (66 acres), S. W. 16.

TOOTING COMMON (217 acres), S. W. 17

VICTORIA PARK (217 acres), E. 2—The *Bethnal Green Museum* (a branch of the Victoria and Albert Museum) is close by.

WANDSWORTH COMMON (175 acres), S. W. 18.

WANDSWORTH PARK (20 acres), on the right bank of the Thames, opposite the ground of Hurlingham Club.

WATERLOW PARK (26 acres), on the southern slopes of Highgate Hill, N. 6, containing *Lauderdale House*, formerly occupied by Nell Gwynne.

WORMWOOD SCRUBS (215 acres), Hammersmith.

EXHIBITIONS, &c., IN LONDON DURING 1933.

ALEXANDRA PALACE, Wood Green, N. 22—Present building erected in 1875; previous building completely destroyed by fire in June 1873; acquired for the public by the Middlesex County Council and other local Authorities in 1900. The building covers an area of 7½ acres. Nearly 200 acres of beautiful park land are open free to the public daily; extensive views over London, Essex and Hertfordshire can be obtained. The Grand Organ in the Great Hall, recently restored, is the finest concert organ in Europe; recitals every Sunday afternoon. Spacious halls available for Exhibitions, Trade Shows, Conventions and Displays. Promenade Concerts in Concert Hall every Sunday during Winter and in the picturesque Grove in the Summer; roller skating rink open daily; dances in Ball Room on Th and Sat. The Theatre, with the exception of Drury Lane, is the largest in London.

CRYSTAL PALACE, S. E. 19. The Great Pleasure Resort, originally designed for the International Exhibition in Hyde Park (1881), removed and re-erected on the crest of Norwood Hill. Open daily from 10 a.m. Festivals, Shows, Sports Meetings, Speedway Racing, Musical and other entertainments. Firework displays every Thursday at dusk, during August and September. The famous Fine Art Courts and collection of Statuary have been restored. 28 acres of recreation under cover and 200 acres of pleasure park. *General Manager*, Sir Henry Buckland.

MADAME TISSAND'S EXHIBITION, Marylebone Road, N. W. 1. Reopened after fire, 1928. Open daily (including Sunday) from 10 a.m. to 10 p.m. Admission 2s. 6d. (incl. tax), children under twelve, 6d. (including tax)

OLYMPIA, Addison Road, W. 14. Various Exhibitions in 1933, including British Industries Fair (*Secretary*, British Industries Fair, 35 Old Queen Street, S. W. 1), Circus and Fair, Dairy and Ice Cream Convention, Ideal Homes, Furniture Trades, Toffee Club Show, Ladies' Kennel Club Show, Royal Tournament, International Horse Show, Horticultural Exhibition, Confectionery Exhibition; Wireless Exhibition; Commercial Vehicles, followed by Motor and Cycle and Motor Cycle Show in October and November

ROYAL AGRICULTURAL HALL, Upper Street, Islington, N. 1—Cattle Show in December, World's Fair in Dec and Jan., Dog Show in Feb., Horse Shows in Feb and March. Foundry Trades in April-May. Used Motor Car Exhibition and Sale in May. Confectionery and Grocers in Sept.; Shoe and Leather and Dairy in Oct., Brewers' Exhibition and Public Works Exhibition in Nov.

ROYAL BOTANIC GARDENS, Kew—Accessible by railway, omnibus, and tram. Open daily, M., W., Th, Sat., Sun and Good Fri. 1d.; Tu. and Fri (Students' days), 6d. 10 to sunset or 3 p.m. (summer time) (Houses: 1 p.m. to 5 p.m. or sunset). Closed on Christmas Day

ROYAL HORTICULTURAL SOCIETY, Vincent Square, S. W. 1, holds fortnightly exhibitions at its Halls in Greycoat Street and in Vincent Square, S. W. 1, a Spring show at the Royal Hospital Gardens, Chelsea (May), and an Autumn show at Olympia (National Hall) in September.

WHITE CITY, Shepherd's Bush—Various Exhibitions, May to Nov.; Greyhound Racing. ZOOLOGICAL GARDENS, Regent's Park, N. W. 8 (opened A.D. 1828, the King's menagerie transferred from the Tower of London, 1834)—Ad-

mission on weekdays from 9 a.m. till sunset or 8 during "Summer Time" (warning bell is rung 15 minutes before closing time); Mondays 6d. (except Bank Holidays, when ordinary rates); other weekdays, 1s; children under twelve, 6d. Special prices for parties and schools, on application to the Secretary. Open on Thursdays, June to Aug. 31, until 11 p.m. On Sundays admission to the gardens can only be obtained by an order from a Fellow of the Zoological Society. A military band plays on Saturday and Sunday afternoons in summer from 3.30 p.m. An aquarium (admission on Monday, except Bank Holidays, 6d., other days 1s., children under 12, 6d.) was opened in 1924.

In 1931 visitors to the "Zoo" numbered 2,816,052.

Whipsnade Zoological Park. 3 miles from Dunstable (34 from London), opened May, 1931. A country annexe of the Zoo. Open daily 10 to sunset (incl. Sundays), 1s. (children under 12, 6d.)

MUSIC.

ROYAL OPERA, Covent Garden, W.C. 2—Grand Opera during London Season. The (third) Covent Garden Theatre was opened May 15, 1858 (the first was opened Dec. 7, 1732). *Secretary of Covent Garden Opera Syndicate (1930), Ltd., W.V. Barrell*, Royal Opera, Covent Garden, W.C. 2.

BAGH CHORR (Founded 1876)—Fixtures for 1932-33 season. Choral and Orchestral Concert at Queen's Hall, Passon Sunday, April 2, 1933, 11 a.m. and 3.30 p.m. Also Private Invitation Concert at Royal College of Music on Tuesday Dec. 20, 1932, 8.30 p.m., and Brahms Centenary Concert, Feb. 28, 1933, at Central Hall, Westminster. *Musical Director, Reginald Jacques; Secretary, Francis J. Belton, 2 Wontner Road, London, S.W. 7.*

ROYAL ALBERT HALL, South Kensington, S.W. 7—Royal Choral Society, and other Concerts, Meetings, Balls, Bazaars, Boxing Contests, Exhibitions, &c. *Manager, Charles B. Cochran, Secretary, Reginald Askew.*

ROYAL PHILHARMONIC SOCIETY, 19 Berners Street, W. 1—Hon. Sec., Keith Douglas. Series of orchestral concerts commenced 1813 and continued without break to present time. Season, Oct.-Apr. at Queen's Hall.

QUEEN'S HALL, Langham Place, W. 1—Concerts during Winter Season.

KNELLER HALL, Twickenham—Royal Military School of Music. The full band of 160 instrumentalists hold classical military band concerts in the grounds on Wednesdays throughout the summer season. First Wed. of month at 3.30 p.m. all other Wed. at 8 p.m. Particulars of fortnightly winter orchestral concerts can be obtained from the Adjutant.

ENVIRONS OF LONDON.

BARNET AND HADLEY GREEN—Scene of Battle, A.D. 1472. Hadley Woods.

BROOKLANDS, Weybridge—Motor and motorcycle races.

BURNHAM BEECHES AND FLKET WOOD, Bucks.—Magnificent sylvan scenery (425 acres), purchased by the Corporation of London for the benefit of the public in 1879. Fleet Wood (65 acres) presented in 1921. During summer omnibus runs daily, Sundays included, from Slough Station, G.W.R., passing within 250 yards of "Gray's Elegy" Church, see "Stoke Poges".

BUSBY PARK (1,200 acres)—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue

of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about 1st to 15th May. A herd of tame deer is maintained.

CHEQUERS, a country residence for Prime Ministers (from Jan. 2, 1922), was presented to the Nation (with an endowment to maintain the estate, &c.) by Lord and Lady Lee of Fareham, as the official country residence for the Prime Minister of the day, and the gift was approved by Parliament in the *Chequers Estate Act, 1917*. In 1922 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

CHILTERN HUNDREDS (Stoke, Burnham and Desborough, in Buckinghamshire).—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poyning, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1714, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

CUFFLEY, Herts.—Memorial to Capt. W. L. Robinson, 74th, on spot above which the first German Zeppelin (L. 21) was destroyed.

DOWN HOUSE, Downe, Farnborough Kent.—Where Charles Darwin thought and worked for 40 years and died in 1882. Maintained by the British Association. Open free daily (except Good Friday and Christmas Day) 10 to 6, April to Sept., and 11 to 4 Oct. to March.

DULWICH, S.E. 21 (2 miles from London) contains *Dulwich College* (founded by Edward Alleyn in 1519), *Dulwich Picture Gallery*, built by Sir John Soane to house the collection bequeathed by the artist, Sir Francis Bourgeois (open free daily, 10 to 4, 5, or 6, and on Sunday afternoons during the Summer), the *Horniman Museum* (see p. 320), and *Dulwich Park* (72 acres). In *Dulwich Village* the rural characteristics of the pre-suburban period are preserved.

ELTHAM, Kent (10 miles from London by Southern Ry.). Remains of 13th-15th century Eltham Palace, the birthplace of John of Eltham (1326), son of Edward II. The hall, built by Edward IV., contains fine hammer-beam roof of chestnut. In the churchyard of St John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship.

ENFIELD, Middlesex (10 miles from London by L.N.E. Ry.). Parish Church contains well-preserved brasses and monuments.

ENFIELD LOCK, Middlesex. Royal Small Arms Factory may be visited by appointment (intending visitors must be British subjects and should apply beforehand by letter).

EPFING FOREST (5,659 acres, originally purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 22 miles long by 1 to 2 miles wide, about one-tenth of its original area; in 1920 the deer in the forest averaged 126). **LOUGHBOROUGH, BUCKINGHAM HILL, CHINGFORD, HERTS.** on L. & N.E. Railway. Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,114 in Sept. 1928. Buildings date from 1523.

GRAVESEND, a borough and river port, 22 miles from London (Southern Ry.) A favourite resort for Londoners. St. George's Church (1727) contains memorials to Princess Pocahontas, who was buried in the former church in 1617.

GREENWICH, S.E. 10.—A south-eastern metropolitan borough (see p. 683) with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1392-1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI died there. The Painted Hall of Greenwich Hospital (Thorntill), Nelson Relics, &c., open on weekdays (except Friday) from 10 (and on Sundays from 2) till 4 or 6, according to time of year. In the principal quadrangle is a marble statue of George II., by Rysbrack. *Naval Museum*, interesting collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6; admission 6d per person (except Sundays and Bank Holidays)—*bona fide* parties of 20 or more, 3d. per person. *Chapel* open daily except Sundays and Fridays, and after 4 p.m. on Saturdays. *Greenwich Park* (288 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Notre. On a hill in Greenwich Park is *Greenwich Observatory* (founded 1675), the zero meridian of longitude and of "Greenwich Time." Admission to the Observatory (children excluded) only by permission of the Astronomer Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, held for many years at the "Ship" Hotel, was last held in 1864.

HAMPTON COURT.—Sixteenth century Palace built by Cardinal Wolsey, and added to by Sir Christopher Wren for William and Mary, 25 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. The State Apartments and Great Hall are open every week-day from 10 a.m. and on Sundays from 2 p.m. Hours of closing, May to Sept. 6 p.m.; March, April and Oct. 5 p.m.; Nov., Dec., Jan. and Feb. 4 p.m. Admission, Mon., Tues., Wed., Thur. and Fri., 2s.; Sat., 6d. (children half price). Admission to the Tudor Kitchen, Wine Cellars and Great Hall cellars, 3d. (inclusive charge), no half-price. Sun. and Bank Holidays, free. Tickets obtainable at the King's Stables. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—10 miles by Metropolitan and other railways. Large public school (676 scholars in Sept. 1928), founded by John

Lyon in 1571. The "Fourth Form Room" dates from 1608.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn in the farm ground is believed to have been built out of the timbers of the *Mayflower* by the 17th century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KINSTON-UPON-THAMES, Surrey (about 22 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings in the market place.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the home of Queen Mary's mother (the Prince of Wales was born there June 23, 1804). The *Star and Garter Home* for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,358 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMDE—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island* (claimed as the actual site of the sealing) presented to the Nation in 1930 by Lady Fairbairn and her sons.

RYN HOUSE, at Hoddesdon, on the River Lee. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels, Queen Elizabeth's bed; the Great Bed of Waie (mentioned in "Twelfth Night").

ST ALBANS—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1125. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. Ruins of ancient City of Verulam; St. Michael's Church, with tomb of Lord Bacon.

STOKK PAGES (2 miles from Slough station on G.W. Ry.) contains the 14th century church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771.

WALTHAM ABBEY (OF WALTHAM HOLY CROSS), 13 miles from London (L.N.E. Ry.)—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England, dedicated May 3, 1066) and the traditional burial place of King Harold R., 1066, and a Lady Chapel of Edward II., with crypt below. At Waltham

Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain, "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066-1087)—2½ miles from London, by Great Western and Southern Railways. When the Court is not in residence, the *State Apartments* of Windsor Castle are generally open to the public, during His Majesty's pleasure, on every week-day except Friday. The charges for admission are Adults, 2s.; children, 6d. On Bank Holidays half the usual fees are charged; by the King's command, the proceeds to go to local charities. An authorised guide book can be obtained at the office, price 6d. The hours of admission to the State Apartments are from 1 April to 30 June, and 1 to 31 Oct. between 11 and 4; 1 July to 30 Sept., 11 to 5, and from 1 Nov. to 31 March, between 11 and 3. The *Queen's Dolls' House* is open on the same days and hours as the State Apartments, admission 6d. each person. The *Albert Memorial Chapel* is open on the same days and at the same hours as the State Apartments (except between 1 and 2 p.m.), the Round Tower or Keep is open from 1 April-30 Sept. the same days and hours as the State Apartments. The royal stables and riding school may be viewed (daily between the hours of 1 and 3. *St. George's Chapel* may be viewed on week-days (Fridays excepted), between 11 a.m. and 4 p.m.

WOOLWICH.—9 miles from London; (Southern Railway), Dockyard and Arsenal Station for Barracks, Rotunda, &c. *Old Dockyard*; *Extensive Barracks for Royal Artillery, Royal Army Service Corps, &c.* Common for military evolutions. *For Rotunda Museum, see pp. 311-12.*

METROPOLITAN SPORT.

AQUATIC.—The *Oxford and Cambridge Boat Race*, rowed almost continuously since 1826 (first race 1829) takes place about last Saturday in March. The course is 4¼ miles from Putney to Mortlake. *Henley Regatta* occupies four days towards the close of the London season. *Doggett's Coat and Badge* for Thames watermen on Aug. 1, from London Bridge to Chelsea. The *Wingfield Sculls*, amateur championship of the Thames, in July.

ATHLETICS.—The Amateur Championships are generally held on the first Saturday in July at the White City, Shepherd's Bush, the headquarters of the London Athletic Club, under the auspices of the *Amateur Athletic Association* (A.A.A.), 10, John Street, Adelphi, W.C. 2. The *Women's Amateur Athletic Association* (Sec., Mrs. L. Gould, Polytechnic, Regent Street, W. 1) is affiliated to the A.A.A. The *Oxford and Cambridge Sports* are held at the White City, Shepherd's Bush, usually on the Friday before the Boat Race. *Bowling* is managed by the English Bowling Association, Hon. Sec., G. R. Hills, 50 Marlborough Road, Wimbledon Park, S.W. 19. *Amateur Boxing* is managed by the Amateur Boxing Association, 4, Aldgate High Street, E. 1, and Professional Boxing by the National Sporting Club, 43, King Street, Covent Garden, W.C. 2. *Cricket* is governed by the M.C.C. at Lord's (see

p. 486). The grounds of Surrey County Cricket Club at Kennington Oval and of Essex County at Leyton are also easily accessible. The *Croquet Association* (Sec., Charles Crawley) are at 4, Southampton Row, W.C. 1. *Rugby Football* in the Metropolitan area is played by amateurs only, the International home matches taking place at Twickenham. The Oxford and Cambridge match is also played at Twickenham. The principal Metropolitan Clubs are Blackheath ("The Club," Rectory Field), the Harlequins (Twickenham), Richmond (Athletic Ground), London Scottish and Rosslyn Park (Old Deer Park, Richmond). *Sec. of the Rugby Union*, Commr. S. F. Cooper, R.N. Office, Twickenham. Association Football is principally professional, the leading Metropolitan clubs being Arsenal (Highbury, N.), Chelsea (Stamford Bridge), Clapton Orient (Millfields Road, Homerton, E. 9), Fulham (Craven Cottage, S.W. 6), Millwall (New Cross, S.E. 14), Queen's Park Rangers (Shepherd's Bush, W.), Tottenham Hotspur (Tottenham, N.), and West Ham United (Upton Park, E.) *F.A. Office*, 22, Lancaster Gate, W. 1. The governing bodies for *Amateur Gymnastics* are the Amateur Gymnastic Association of England, 53 Victoria Street, S.W. 1 (Hon. Sec., E. B. Widdowson), Scotland (Hon. Sec., W. C. Young, The Lodge, Belford Park, Edinburgh), Wales (Hon. Sec., P. Clarke, 5 Hafod Lane, Hopkinstown, Pontypridd); *Ulster* (Hon. Sec., W. V. McQuoid, 3 Finvoy Street, Belfast). *Lawn Tennis* Championships are decided at Wimbledon early in July (or late in June). The controlling body is the *Lawn Tennis Association*, 22 Essex Street, W.C. 2. *Polo* is played at Hurlingham Club (Wulham, S.W. 6), and at Ranelagh Club (Barnes, S.W. 13). *Tennis* is played at Queen's Club, Prince's Club, and Lord's, and there is a Tennis Court at Hampton Court Palace (built by King Henry VIII. in 1536).

RACE MEETINGS.—Flat Racing is under the rules of *The Jockey Club*, Newmarket. *Steeple-chasing* under the rules of *The National Hunt Committee*. The *Derby* is run at Epsom (14 miles from London). The *Calcutta Sweep* (on this race for the Derby) is promoted annually by the Royal Calcutta Turf Club. The Sweep is confined to Members; tickets are of the value of Rs 10 (Ten Rupees). *Ascot Week* at Ascot Heath, near Windsor, about a fortnight after the Derby. The principal flat races are on *Newmarket Heath*, meetings near London are Sandown Park (Esher), Kempton Park (Sunbury), Hurst Park (W. Molesey), Gatwick (Southern Ry.), Lingfield (E. Grinstead); *Goodwood Races*, which mark the close of the London Season, are held in the Duke of Richmond's Park, near Chichester, Sussex, in July. The *Grand Military Steeplechase* is at Sandown Park. The *Grand National Steeplechase* (the principal race of the steeple-chasing season) is held at Aintree, near Liverpool, about the last Friday in March. The *Waterloo Cup (Coursing)* is won at Aitcar, near Liverpool. *Greyhound Racing*, with a mechanical hare, is held several evenings weekly at Wembley, the White City, Harringay, Wimbledon, Clapton and West Ham. All the London greyhound tracks, with the exception of Clapton, are now supplemented by a dirt track for motor cycle racing, and speedway meetings are held on some evenings when there is no greyhound racing. There are also speedways at Lee Bridge and Clapton.

MOTOR CABS.

FARE payable.—

- (a) Not exceeding two-thirds of a mile, or for a period of time not exceeding s. d.
seven and a half minutes 0 6
- (b) Exceeding do.—
- (1) For each third of a mile, or time not exceeding three and three-quarter minutes 0 3
- (a) For any less distance or time 0 3
- In addition to the above the driver is entitled to charge the following extra payments—
- (x) Luggage.—For each bicycle, child's mail cart, or perambulator, 6d., for each package carried outside 0 3
- (*) Extra persons.—When licensed to carry more than two persons—for each additional person beyond two, the whole journey 0 6
- Provided that one child or two children under the age of ten years shall count as one person

HORSE VEHICLES.

Exclusion of the cab 6d., author. used by Home Secretary

FARMS BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter). If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles 1 0

The driver may notify, by means to be approved by the Commissioner of Police, that he is willing to accept a fare of 6d. for any journey not exceeding a mile s. d.

For every additional mile or part of a mile 0 6

If hired *outside* the Four Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, ss.; exceeding one mile, then for each mile *ended* within the circle, 6d.; and for each mile or part of a mile *ended* outside 1 0

FARMS BY TIME *Inside* the Four Mile Circle Four-wheeled Cabs, for one hour or less, ss.; two-wheeled Cabs 2 6

If above one hour, for every quarter hour of the whole time and for any less period, four-wheeled Cab, 6d.; if two-wheeled Cab 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less whether a four-wheel or a hansom 2 6

If above one hour, then for every quarter hour of the whole time and for any less period 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS—*Hires of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE or BY TIME, or whether within or without the radius.

LUGGAGE—For each bicycle, child's mail cart, or perambulator, 6d., for each package carried outside the carriage 0 2

NOTE—Luggage carried on the footboard of a hansom-pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause

EXTRA PERSONS—For each above two (one child or two children under 10 years of age count as one person) 0 6

WAITING—When hired by distance, and at the request of the hirer made to wait for every 15 minutes completed—if hired within the Four-Mile Circle, 4 wheels, 6d.;

2 wheels 0 8.

If hired without Circle, 2 or 4 wheels 0 8

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance, but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance

AGREEMENT to pay more than legal fare is not binding. If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare, or, fraudulently endeavours to avoid payment of a fare, or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at any Police Station within twenty-four hours, if not sooner claimed by the owner, such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, 209, Lambeth Road, S E 1; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office (see p. 484).

PUBLIC CARRIAGE, STATIONERS.

During 1898 there were licensed public carriages.—Hansoms, 4; clarences—animal 47;

mechanical 8,152; omnibuses—animal 22; Short stage Carriages 5,666; Motor Coaches, 3,377; tramway cars—mechanical 2,745; trolley vehicles 59; total, 20,290. Drivers and conductors:—Cab drivers—animal 69; mechanical 11,080; stage drivers—animal 21; Short Stage Carriage 18,395; composite licences (stage driver and conductor)—animal 21; mechanical 1,945; Motor Coaches 1,798; conductors, 20,937; total, 54,224.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1931, 458 applicants for cab drivers' licenses passed the examination as to knowledge of London and its environs 21,122 separate examinations were held.

LOST PROPERTY

Of lost property, 174,629 articles were deposited, of which 65,715 were claimed by the owners. The number of awards paid to drivers, &c., was 54,568.

Enquiries as to property left in a London omnibus, tram-car, or cab should be made at the **Lost Property Office**, 209, Lambeth Road, S.E. 1. Office hours, 10 to 4 (Saturdays, 10 to 2). The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays. For property left in a motor coach, enquiry should be made at the office of the coach company concerned.

LIGHTING-UP TIME.

By the Road Transport Lighting Act, 1927 (17 and 18 Geo. 5, (h. 37) "every vehicle on any road shall during the hours of darkness carry—

- (a) two lamps, each showing to the front a white light visible from a reasonable distance,
- (b) one lamp showing to the rear a red light visible from a reasonable distance,

and every such lamp shall, while the vehicle is on any road during such hours as aforesaid, be kept properly trimmed, lighted and in efficient condition, and shall be attached to the vehicle in such position and manner as the Minister (of Transport) may by regulations prescribe.

It shall be the duty of any person who causes or permits a vehicle to be on any road during the hours of darkness to provide the vehicle with lamps in accordance with the requirements of this Act and of any regulations made thereunder" (Sec. 1 (2).)

(Regulations have been made and are contained in S.R. & O. No. 723 of 1929.)

Whole or partial exemption may be given to vehicles used for naval, military or air force purposes (Sec. 1 (3) (b)), vehicles carrying inflammable or explosive goods of a nature specified in the regulations; vehicles when standing on places specially set aside for the purpose; vehicles drawn or propelled by hand, save as provided (Sec. 1 (4)).

The Minister may by regulation require or permit, on conditions, distinctive lamps to be carried displaying coloured lights on vehicles used as Hackney Carriages or public service vehicles or vehicles used for naval, military, or air force, or police purposes, or as ambulances.

The "hours of darkness" are defined thus:—

- (a) As respects the period of summer time, the time between one hour after sunset and one hour before sunrise.
- (b) As respects the remainder of the year the time between half an hour after sunset and half an hour before sunrise.

Bicycles (pedal and mechanical solo), pedal tricycles, and invalid carriages, require a single white light to the front.

Pedal bicycles and tricycles need not show a red light to the rear if they have attached an unobscured and efficient red reflector.

Pedal bicycles and tricycles and solo motor cycles need not carry a lamp if being wheeled by a person on foot as near as possible to the near or left hand edge of the carriage way.

House Vehicles—A separate lamp showing a red light to the rear shall not be required to be carried if the lamps showing a light to the front also show a red light to the rear visible from a reasonable distance and no part of the vehicle or load extends more than 6 feet behind such lamps.

Any vehicle carrying a load overhanging laterally more than 22 inches from the centre of the nearest side lamp must have either an additional lamp on the sides where the load overhangs or the position of the one lamp must be such that no part of the load projects outwards more than 22 inches beyond a vertical line drawn through the centre of the substituted or additional lamp.

On any vehicle carrying a load more than 6 feet behind any lamp showing a red light to the rear carried in accordance with the Act, an additional or substituted lamp shall be carried so that such load shall not project more than 6 feet beyond such additional or substituted lamp.

Certain vehicles engaged in agriculture are exempt from carrying lamps.

ON TOW.

There are special provisions as to vehicles towing and being towed. A lamp showing a red light need not be carried by the drawing vehicle; no lamp showing a light to the front need be carried on any vehicle being drawn; a lamp showing a red light need not be carried on any vehicle being drawn except the rearmost vehicle. Provided—if the distance between any such vehicles exceeds 5 feet, each vehicle shall be required to carry the same lamps as if it were not a drawing vehicle or a vehicle being drawn, and if a drawn vehicle carries a load that projects laterally more than 22 inches beyond the outermost of the lamps showing a white light to the front, an additional lamp shall be carried on the projecting load so that no part projects more than 22 inches beyond a vertical line through the centre of such lamp.

INSIDE LIGHTING.

Public Service Vehicles must, in compliance with the requirements of The Public Service Vehicles (Conditions of Fitness) and (Equipment and Use) Provisional Regulations, 1931, be adequately lighted inside, and, in the case of double-decked vehicles fitted with a permanent top, also lighted outside at all times during the hours of darkness when carrying passengers.

Number of Ambulance calls in 1915, 2,405; 1920, 19,414; 1925, 35,265; 1926, 39,447; 1927, 40,233; 1928, 43,413; 1929, 43,567; 1930, 43,930; 1931, 42,679.

The Service is established for the conveyance to hospital of persons suffering from accident or sudden illness in the streets or public places, or from accident in private houses. It is not, in ordinary circumstances intended for the removal of persons suffering from illness in private houses. Urgent parturition cases are removed to hospitals on the application of a duly qualified medical practitioner or a certified midwife, provided that either a certified midwife or doctor accompanies the case. Calls for ambulances are made by means of the telephone, the operator being asked for "Ambulance." When communication is established the location of the accident should be given.

General Ambulance Section.

Ambulance Stations.

Eastern Ambulance Station, Brookshy's Walk, Homerton, E.9 (near Homerton Railway Station).

North-Western Ambulance Station, Lawn Road, Fleet Road, Hampstead, N.W.3 (near Hampstead Heath and Belsize Park Railway Stations).

Western Ambulance Station, Seagrave Road, Fulham, S.W.6 (near West Brompton Railway Station).

South-Western Ambulance Station, Lander Road, Stockwell, S.W.9 (near Clapham Road and Clapham North Railway Stations).

South-Eastern Ambulance Station, New Cross Road, S.E.14 (near Old Kent Road Railway Station).

Brook Ambulance Station, Shooters Hill, Woolwich, S.E.18 (nearest Railway Station, Blackheath).

Ambulances Supplied on Payment.

The ambulances for general service are available, when not required for public purposes, for the conveyance, on payment, of private maternity, mental, medical and surgical cases, at any time of the day and night. Applications for ambulances should be made to the Headquarters, County Hall, Westminster Bridge, S.E.1 (Telephone: City 7200) when the actual charge for any proposed removal can be obtained.

In addition to the above service and to that of the St. John Ambulance and Brigade, Ambulances are maintained by the City of London.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of nine Colonial companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter I.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1931.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsurance parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading,

because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is without deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H= and O=, and the corresponding Tables H=(*) and O=(*) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O= and O=(*) tables in conjunction are more stringent than the O= table alone, the H= is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, *1s. 6d.*

Household goods therein, usually *2s.*

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from *2s.*

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from *2s.*

Most fire insurance companies transact accident and miscellaneous business, and if a strong

company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of *5s. per £100* of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

PRINCIPAL LIFE ASSURANCE COMPANIES.

* *Norw.*—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation.

Abstainers and General.—Three years ended December 31, 1929.

Atlas.—One year ending December 31, 1931

British General.—Three years ending December 31, 1929

Castleman.—Three years ending December 31, 1930.

Clerical, Medical and General.—Four and one-half years ending December 31, 1930.

Confederation.—Anticipated Specimen Annual Bonuses payable in 1935.

Ecological.—Five years ending February 28, 1929.

Equitable.—Four years ending December 31, 1930.

Life Association of Scotland.—Three and three-quarter years ending December 31, 1930.

London and Manchester.—One year ending March 24, 1930.

National Mutual of Australasia.—Three years ending September 30, 1931. Bonuses allotted at distribution as at September 30, 1931.

National Provident.—Three years ending Dec 31, 1929.

Scottish Equitable.—Five years ending March 1, 1929.

Scottish Insurance.—Three years ending Dec 31, 1929.

Southern Life.—Three years ending December 31, 1929.

Standard.—One year ending November 25, 1930.

Sun Life.—These Bonuses have been allotted in respect of year 1929 only, as result of 1932 valuation Quinquennial distribution postponed. Surplus £3,032,790 carried forward.

United Kingdom.—Three years ending Dec 31, 1929.

University Life.—Period ending Dec 31, 1929.

REPAYMENTS OF INCOME TAX ON PREMIUMS.

The amounts repaid by the Income Tax Commissioners on account of Life Insurance Premiums during the years 1924-25 to 1929-30 are shown below. These amounts repaid are additional to the allowances made on assessment.

Year	Number	Amount.	Year.	Number	Amount.
1924-25	24,948	£144,185	1929-30	—	£670,337
1925-26	25,005	179,678	1930-31	83,281	784,433
1926-27	34,908	343,189	1931-32	83,886	810,464
1927-28	37,999	527,761	1932-33	—	633,997
1928-29	37,980	551,073	1933-34	—	536,396
1929-30	36,797	585,637	1934-35	—	513,178

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price"

system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually

high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

† Offices thus marked have a plan for accepting Assurances without medical examination, but in the majority of cases there is a limit to the amount that can be assured under this arrangement.

Abstainers and General—General section.

African Life—These rates are for the first 30 years and are then reduced and carry a guaranteed Bonus.

General Life—Rates reduced by 1/6 per cent. for sums assured of £1,000 or by 2/- per cent. for £2,500 and over.

London Life—Allowance is made for quarter-years in ages at entry.

Manufacturers—Rates are for age nearest birthday.

Natl. Mut. of Aust.—Rates are for age nearest birthday.

Prudential—A reduction in the rate is made for Assurances of £1,000 or over, up to £5,000, and a further reduction for over £5,000. Royal—Rates reduced by 2/- per cent. for Assurances of £1,000 and over. Scottish Life—Rates reduced by 1/- per cent. for Assurances of £1,000 and over on medically examined lives. Scottish Temperance—Rates for abstainers are 10 per cent. less, limited to 9/- per £100. Sun Life—Reductions granted to total abstainers.

University Life—Total Bonuses guaranteed to amount to at least 20/- per cent. per annum for first 20 years and 25/- per cent. per annum thereafter.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the end of 15, 20 and 25 years, or at death, if previous.

Notes for page 534—

- * Australian Mutual Co-operative, London Life and Mutual and Citizens' Rates are for quarterly payments.
- * Equitable—In actual quotations either Annuity or Consideration is taken to the nearest 1/4.
- * London Life Rates are for exact age stated, but are apportioned for actual age at time of purchase.
- * London Scottish—These rates are under revision.
- * Sun Life of Canada—Rates for exact ages.

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty [For Notes see page 534.]

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

ADVICE REGARDING LIFE ASSURANCE.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding in amount one-sixth of their income, where the death risk is involved.

The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed with in the case of new proposals, but policies in these instances are sometimes subject to certain restrictive conditions.

In view of the fact that life assurance premiums are governed by age, it is advisable to procure a birth certificate or other satisfactory evidence of this, when effecting a Policy. It is not always asked for then but is required by the offices before the policy monies are paid.

INQUIRIES—On receipt of an inquiry containing particulars of requirements (accompanied by 2s.) addressed to "The Insurance Editor, 12, Warwick-lane, E.C. 4," advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the date of birth of the person who requires the Insurance. The following are suggested as the policies most likely to be required:—

- (a) *Whole Life*—With and without profits.
- (b) " " —With limited number of payments.
- (c) " " —Reduced premium for first 5 years.
- (d) *Endowment*—With and without profits.
- (e) " " —Reduced premium for first 5 years.
- (f) *Family Income Policies*.
- (g) *Children's Insurances*—Educational, &c.

HOW TO ASSIGN

When a Policy is assigned by way of Mortgage, it is better to employ a solicitor; but when the Assignment is absolute, i.e., when a Policy is sold out and out, his services may be dispensed with.

The Assignment may be in the following form, and the document must be stamped by the Inland Revenue Stamp Office:—

I, (name)....., of (address)....., in the County of....., (occupation)....., in consideration of the sum of (pounds)..... paid to me by (name)..... of (address)....., in the County of....., (occupation)....., the receipt of which I herewith acknowledge, do hereby, as beneficial owner, assign unto the said....., his Executors, Administrators and Assigns, all that Policy of Assurance on my life for £..... effected with the (name of Company)..... numbered....., and dated....., and all monies assured by or to become payable thereunder. *And I hereby certify that the

A LIFE POLICY.

transaction hereby effected does not form part of a larger transaction, or of a series of transactions, in respect of which the amount or value, or the aggregate amount or value, of the consideration exceeds five hundred pounds.* In witness whereof I have hereunto set my hand and seal this..... day of....., 19....

Signed, sealed and delivered by the above-named, in the presence of—
Name.....
Address.....

Notice of the Assignment should be sent, in duplicate, to the Head Office of the Company immediately on execution. The Company is entitled to charge a fee of five shillings for registration, and will retain one copy and the other will be returned with acceptance of service endorsed thereon.

* This paragraph should be omitted when not applicable.

Friendly Societies.

At the end of 1930 the *voluntary* membership for Great Britain of registered Friendly Societies (other than Collecting Societies) was 7,572,093 and their relative funds, £208,591,648. Following are particulars of some of the principal societies of various types. Names are in some instances abbreviated :—

Established	Name of Society.	Funds*	Voluntary* Membership
	"Orders," i.e. Societies with Branches—		
1830	Independent Order of Oddfellows, Manchester Unity	20,861,967	746,087
1834	Ancient Order of Foresters	12,935,917	555,929

* Figures given as at end of 1932, except for Orders which are for 1930. Figures in membership column for "Collecting Societies," represent numbers of assurances.

† Annual Division of Sick Fund about £25,000.

‡ Annual Division of Sick Fund about £24,000.

†† Collecting Societies, although registered under the Friendly Societies Acts, are also subject to the Industrial Assurance Acts.

Building Societies.

541

Building Societies are for the most part associations incorporated with limited liability under the Building Societies Acts. The exceptions are a few societies established prior to 1857, which have chosen to remain unincorporated. The object of building societies is to assist their members in acquiring dwelling houses, business premises, or other freehold or leasehold property, for occupation or investment. Members' subscriptions are accumulated in a fund which may be augmented by deposits and loans, and advances are made from the fund to assist members in the purchase of properties. Security for advances is given by a mortgage upon the property purchased. Many, if not most, of the earlier societies were *terminating*. In these societies the share subscriptions were accumulated until there was sufficient capital to make an advance to a member upon mortgage, and the right to an advance, or as it was called an "appropriation," was conferred upon the fortunate member as a result of a ballot among the members who had not already received advances, or by sale to the member bidding the highest premium for the privilege of the appropriation. By later legislation, however, balloting for advances was prohibited for new societies. The Acts define a *terminating* society as one in which the rules provide for the ter-

mination of the society at a fixed date, or when a result specified in its rules is attained. Usually the rules provide that a society shall terminate when all the members have received advances. *Terminating* societies are rapidly being replaced by the permanent societies, some of which have become very wealthy and important financial institutions.

All building societies are required to register their rules and file their accounts with the Registrar of Friendly Societies, who is also Registrar of Building Societies.

Following the announcement of the War Loan Conversion Scheme in 1932, there was a move on the part of some of the large building societies towards restriction of new share investment accounts and reduction of the rate of interest payable to new depositors, and in some instances new share investors. The possibility that this move would be followed by a reduction in mortgage interest rates was suggested in the press, but there is as yet no indication that any action in this direction is contemplated by societies generally. The interest rate charged to borrowers is said to average 5 6 per cent. per annum, and the rate allowed to investors and depositors 4 36 per cent. per annum.

The following is a summary of particulars extracted from the Registrar's Report. —

BUILDING SOCIETIES, GREAT BRITAIN, 1931.

Class	Number.	Share Investors	Advances during Year.	Share Capital.	Due to Depositors and other Creditors	Balance Profit and Reserve	Mortgage Assets.	Other Assets.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916 66, or 22 carats; 220 troy ounces of standard gold are coined into 92½ sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17s 10½d., and one ounce of pure gold, on the same basis, £4 4s. 2½d. During 1932 the average market price of gold fluctuated in accordance with the sterling exchange, being 129/10 on October 15. *Bar Gold*—The "bar" as purchased in the bullion market, is 200 oz. troy (except for the Far East, which requires 10 oz bars).

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, 500; 22 troy ounces of 500 fineness are coined into 66 shillings + [Another Standard, called the "New Sterling" or Britannia, of the fineness 22 oz. 10 dwt. (958 33), is practically obsolete. It is occasionally used, however, for high-class plate.]

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last twelve years was as follows:—1920, 57½d.; 1921, 61½d.; 1922, 36½d.; 1923, 34½d.; 1924, 34d.; 1925, 31½d.; 1926, 31½d.; 1927, 31½d.; 1928, 26½d.; 1929, 24½d.; 1930, 17½d.; 1931, 14½d. On Oct. 15, 1932, the price of silver was 17½d. per oz.

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number and decimal fraction and then multiply by 2.592; to express a United States price on the English system, multiply the cents by 0.4566.

Bronze is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part, or of copper 95½ parts, tin 3 parts and zinc 1½ parts.

* Issued on special occasions.

† By law a shilling weighs one sixty-sixth of 20 oz. troy; 20 oz. of pure silver would be used in coining 78 shillings of 925 fineness and 220 of 500 fineness.

‡ The legal weight of a penny is one-third of the halfpenny one-fifth, and of the farthing one-fourth of an ounce avoirdupois; the halfpenny is one sixth in diameter.

§ Discontinued

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £50.

Melting of Coins.—The melting of British gold and silver coin is prohibited.

Light Gold.—Any person to whom it is tendered should break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of March 26, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of 20s., £1, £5, £10, £20, £50; also for £100, £500, and £1,000.

Treasury Notes of the value of £1 and 10s. were replaced by Bank of England notes as from November 28, 1928.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn: they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches.

Legal Tender of Money.—Bank of England Notes of £1 and 10s. are legal tender in Great Britain and Northern Ireland for the payment of any amount, those of the higher denominations are legal tender in England and Wales only. Change cannot be demanded except from the Bank of England. Gold, if of or above the least current weight, is legal tender to any amount. Silver is legal tender for sums up to £2, and bronze up to 12d.

British Coinage Statistics.—During 1930 the number of coins struck at the Royal Mint was 185,090,208, of which 73,847,176 were Imperial, 27,797,032 Colonial, and 83,446,000 Foreign.

BRITISH DOMINIONS.

Imperial Sterling Coins are the sole legal metallic currency in:—

NEW ZEALAND. FALKLAND ISLANDS.

FIJI. GIBRALTAR. ST. HELENA.

WEST INDIES. See also JAMAICA, below.

Special Coins are current in addition to the Imperial series in:—

AUSTRALIAN COMMONWEALTH.—Special florins, shillings, sixpences, and threepences in silver, and pence and half-pence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs, while the silver coins are of 500 fineness.

UNION OF SOUTH AFRICA.—Silver and bronze coins, bearing special designs, and corresponding to Imperial coins in denominations, weights and composition, except that the fineness of the silver is 800. Currency Bill of 1932 provides for a florin and cent. currency.

BRITISH GUIANA.—A special groat or four-pence.

BRITISH WEST AFRICA.—Silver and also "alloy metal," 2s., 1s., 6d., and 3d., One penny, one halfpenny, and one-tenth penny (nickel-bronze).

GUERNSEY.—Eight doubles (= 1 penny), 4s., and 2 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY.—Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing (bronze).

HALL MARKS ON PLATE.*

Assay Office Marks—Official marks stamped on gold and silver plate at Assay Offices:—

Assay Office ... Distinguishing Mark.
London (Goldsmiths' Hall) Leopard's Head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1700 this mark was not used in London.

Birmingham... Anchor.
Chester City Arms (3 Garbs and a Sword).
Sheffield Crown.
Edinburgh..... Castle.
Glasgow Tree, Fish & Bell.
Dublin Harp crowned.

The Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark (instituted in 1478-9).—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted, in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "I" is omitted from the alphabet; at Glasgow all the letters are employed in a 26-year cycle.

The Sovereign's Mark.—The "lion passant," for silver articles only, was first used in 1544, and has been in use ever since (except during the *Higher Standard* period, 1697-1700). From 1544-9 it was crowned, since then, uncrowned.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784-1820-21. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On gold articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1700, since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 10 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The relative values of the various standards is shown below:—

S. & d.	3rd Stand.	S. & d.
Pure gold, 24 c. 4 11 1/2	15 c. 2 13 1	
Standard, 22 c. 3 17 1/2	4th ditto, 12 c. 2 5 1/2	
and ditto, 20 c. 3 3 1/2	5th ditto, 9 c. 1 11 1/2	

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

London (Goldsmiths' Hall) Date Marks
From 1438 to 1936.

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, e.g.:

An article marked with the letter F 1752-5 can be distinguished from letter F 1802-5 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1882-5 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1802-5); the absence of crown on leopard's head, and the presence of the Queen's vice the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 22, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Aorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Boujet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

The Periods of English Architecture.

Date.	Style.
I. Before B.C. 55	Ancient British.
II. B.C. 55 to A.D. 410	Roman Period.
III. A.D. 410 to Norman Conquest (1066) ..	Anglo-Saxon.
IV. 1066-1154 (i.e. to end 12th cent.)	Norman.
V. 1154-1307 (i.e. 13th cent.)	Early English (Lancet, or Geometrical).
VI. 1307-1377 (i.e. 14th cent.)	Decorated (or Curvilinear).
VII. 1377-1485 (i.e. 15th cent.)	Perpendicular (or Rectilinear).
VIII. 1485-1558 (i.e. first half 16th cent.) ..	Tudor.
IX. A.D. 1558-1603. Early Renaissance	(Elizabethan (A.D. 1558-1603).
X. A.D. 1603-1625. Late Renaissance	(Jacobean (A.D. 1603-1625).
	(Stuart (A.D. 1625-1702).
	(Queen Anne and Georgian (A.D. 1702-1830).
	(William IV. (A.D. 1830-1837).
	(Victoria (A.D. 1837-1901).
	(Edward VII. (A.D. 1901-1910).
	(George V. (A.D. 1910-).
Modern Architecture } (The Age of Revivals) }	19th cent. to present time

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Notes.—The first portion (I-VIII) of this table is based upon that given on p. 347, Parts IX and X on p. 777, and "Modern" on p. 89a, of "A History of Architecture on the Comparative Method" (9th ed.), by Sir Banister Fletcher, F.R.S.E., F.S.A. (Batsford.)

MARKS ON PORCELAIN.

POTTERY or porcelain usually bear distinctive marks either painted on or stamped into the bottom of the article. These marks may indicate the factory, the potter, or the decorator, and in the case of Chinese or Japanese were the dynasty at the date of manufacture. In the factory at Sévres the practice of marking the date by letters was also followed, and this has led to the forging of many bogus pieces. The factories in Europe generally indicate the place of origin only. Special knowledge is therefore required of the collector, and the learned amateur notes not only the mark, but the material, the colouring, and the decoration of the article, and frequently has to compare it with one that is unquestionably genuine. The following hints will, in the absence of the more learned dissertation of Mr. Chaffers, serve as a guide to the ordinary possessor or purchaser.

In the manufacture of porcelain, two main varieties of paste are used, termed respectively hard and soft; or, as the French have it, *pâte dure* et *pâte tendre*. The hard paste contains more alumina and less silica than the soft. When baked, it is translucent, hard, and sonorous on being struck; it has a white, milky colour, and can sustain, without injury, sudden alternations of high and low temperature. Its essential constituent is pure white kaolin, a variety of clay which is exceedingly scarce in England and other parts of Europe, but of comparatively common occurrence in many districts of China and Japan. The soft variety has an unctuous, cream-like enamel, and is soapy to the touch, it is lighter than the other kind, and less hard (a knife will scratch it), and does not require so great a heat for solidification.

The manufacture of hard, and what is often considered the only true, porcelain, was invented by the Chinese about 280 B.C., and attained its greatest perfection at the beginning of the 15th century. The secrets of the art were, in 1522, carried over to Japan, whose inhabitants soon became formidable rivals to the older makers. Specimens of this eastern ware had, from a very early date, occasionally found their way into Europe, but no regular importation took place until the middle of the 16th century, when a small settlement was formed on the Japanese coast by some enterprising traders from Portugal. It was from them that the ware first received the name it now bears, its translucence probably reminding them of the cowrie-shell which, from a supposed resemblance to the shape of a young pig, had been termed, in their language, *porcellana*.

In 1641 the Japanese authorities, having viewed with strong disapproval the many conversions to Christianity effected by the Portuguese missionaries, expelled the settlers from the island, and gave to the Dutch, who could always be trusted to refrain from proselytizing, the exclusive privilege of trading with them. Although the commercial industry of the Hollanders supplied England and the Continent with comparatively large quantities of the Oriental porcelain ware, the finer specimens were eagerly sought after, and, by Queen Anne's time, all classes seem to have become infected by a collecting mania. The high prices

they fetched naturally led to many attempts at imitation, which, owing to the difficulty in finding a suitable clay, all resulted in more or less marked failure, nothing but the inferior *pâte tendre* being produced.

The first successful experiment was made, with the kaolin from Aue in the Erzgebirge, by J. F. Böttcher, who had accidentally gained a knowledge of its valuable properties. In consequence of the discovery, Augustus, Elector of Saxony, was induced to set up a porcelain factory near Dresden, with Böttcher as director, and, in 1715, the latter succeeded in producing an almost perfect imitation of the hard, white porcelain of the East. The most elaborate precautions were taken to prevent the secret of its manufacture getting abroad, but a very few years later, a heavy bribe extracted it from one of the workmen, and a rival factory was established at Vienna. The works at Berlin, Baden, and other towns in Germany all owed their origin in the same way to the dishonesty of different employés. The decorations of the earlier German productions were merely imitations, in blue and white, of the Chinese and Japanese; but towards the middle of the 18th century elaborate miniature paintings of flowers, insects, and copies of well-known pictures became fashionable. The best statuettes and groups were made between 1731 and 1756, the finest of these are in plain glazed white, though many are gaily decorated, and the dress richly ornamented with fine lace.

Of the factories in England, it is doubtful which has best claim to be termed the oldest; both the Chelsea and the Bow works were established before 1750, and those of Derby and Worcester very shortly after that date. Though at first counting themselves to imitations of the simple Oriental models, the English makers soon attained great perfection in the German and French styles, and, after the discovery of the Cornwall kaolin in 1755, their best productions ranked, in every respect, very little lower than the masterpieces of Dresden and Sévres.

In France, a factory for the soft variety had been set up at St. Cloud as early as 1695, and some excellent work was produced there. In 1753, works under royal patronage were set up at Vincennes, and, three years later, removed to Sévres. The best productions were sent out during the nine years which followed the purchase of the manufactory by Louis XV. in 1760. At the end of this period the discovery of kaolin near Limoges led to a discontinuance of the manufacture of *pâte tendre* in favour of the more highly valued *pâte dure*. Sévres porcelain, made for use, is usually painted with flowers or figure-subjects on a plain white ground. The purely decorative pieces have panels with pictures on a white ground surrounded by frames of gold scroll-work, the main body of the piece is covered with one deep or brilliant colour.

The following are the chief marks used in the more important European manufactories. The description of the appearance of the various porcelains may be found useful in the detection of forgeries, spurious pieces being unfortunately almost as abundant as genuine specimens:—

GERMANY—(Hard Paste).

DRESDEN.—The porcelain has a cold white, almost bluish, tint. The marks are always in blue.

1709-1712.—The initials of Augustus Rex.

1712-1720.—The wand of Æsculapius.

1721, with intervals to present time.—The crossed swords.

1731-1733.—The same, with a dot between the handles.

1736-1814 (Marcolini period).—The same, with a star between the handles.

Scratches across the mark show there is some defect in the piece

Sometimes the handles meet, and cause a slight variation in the appearance of the mark.

K. P. M. was painted in italics on pieces intended for royal use.

VIRNNA.—The porcelain has, generally, a greyish tint. The usual mark is a shield, in blue.

BERLIN.—The porcelain closely resembles that of Dresden. In 1761 the manufactory was made a royal establishment. The marks are generally in blue, though a brown sceptre is occasionally found.

1751-1761.—A capital W, with two of the strokes crossing.

1761 onwards.—A sceptre. Occasionally there are two sceptres, crossed to imitate the Dresden mark. At the present day the porcelain is stamped with the Prussian eagle, encircled by the words KÖNIGL. PORZELLAN MANUFACTUR.

ENGLAND—(Soft Paste, till 1753).

CHELSEA.—The porcelain is of a pure white colour, with a tint almost equal to that of the hard kind. The mark is an anchor, in gold for the best, in red for the second quality.

Bow.—The porcelain is of a fine milky white. In 1750 the works received the name of New Canton; and in 1775 were transferred to Derby. The marks are very various, and often not distinguishable from those of Chelsea. We give two varieties, which generally occur in blue.

DERBY.—The porcelain is very transparent, and of a good white colour. In 1769, the proprietor of the factory, W. Duesbury, purchased the kilns and moulds of the Chelsea works. The marks are in pink, violet, or gold. The earliest mark was an italic *D*.

After 1769, the same, crossed with an anchor (DERBY-CHELSEA).

After 1775, the date of the first royal order, a crown with crossed daggers, or a *D*, or an anchor (CROWN-DERBY).

WORCESTER.—The porcelain is not of a very good colour, but is tolerably transparent.

The earliest mark was a W or a crescent, in blue. Crossed arrows, and imitations of Chinese and Dresden marks are also found.

FRANCE—(Soft Paste till 1770).

VINCENNES and SEVRES.—The porcelain is remarkable for its creamy softness of colour. The Sevres period dates from 1756, when the factory was removed thither from Vincennes.

1745-1753.—Two italic *L*'s crossed.
1753-1756.—The same, with a letter in the centre. The letters A-Z denote the years 1753-77. The Sevres period begins with D.

1776-1795.—The period of double letters AA-EE.
1795-1800.—R F., the initials of République Française.

From 1800 to the present time, the mark has varied with each change of sovereign or government, and is, generally, self-explaining.

The Weights and Measures Act of 1876, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1876 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

- 20 grains = 1 scruple (℥) (= 1.296 Grammes).
3 scruples = 1 drachm (℥) (= 3.888 Grammes).
8 drachms = 1 ounce (= 31.1035 Grammes)

Measures of Capacity

- 60 minims (min.) = 1 fluid drachm (= 3.552 Millilitres).
8 fluid drachms = 1 fluid ounce (= 28.4123 Centilitres).
20 fluid ounces = 1 pint (= 0.568 Litre).
8 pints = 1 GALLON (= 4.545963 Litres).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to two Avoirdupois drams.

Approximate Equivalents:—

- 1 "table-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ¼ fluid oz.; 1 "tea-spoon" = ⅓ fluid oz.

Avoirdupois Weight.

- 7000 grains (gr.) = 1 pound (lb.).
16 drams (dr.) = 1 ounce (oz.) (= 28.350 Grammes).
16 ounces = 1 POUND (= 0.45359243 Kilogram).
14 pounds = 1 stone* (= 6.350 Kilograms).
28 pounds = 1 quarter (of a cwt.) (= 12.70 Kilograms).
100 pounds = 1 cental (= 45.35924 Kilograms).
4 quarters (112 lb.) = 1 hundredweight (cwt.) (= 50.8023 Kilograms).
20 hundredweight (2,240 lb.) = 1 ton (= 1.016 Tonnes or 1016.0 Kilograms).

Troy Weight.

- 24 grains = 1 pennyweight (dwt.) (= 1.555 Grammes).
20 dwt. = 1 ounce (= 31.1035 Grammes).
For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains (31.1035 Grammes) in weight. There is no Troy POUND.

Jewellers' Weight.

The metric count of 200 milligrammes is the legal standard of weight for precious stones and pearls.

* The Smithfield stone (for dead meat) is 14 lb. only.

Measures of Capacity.

- 4 gills = 1 pint (= 0.568 Litre).
2 pints = 1 quart (= 1.136 Litres).
4 quarts = 1 GALLON (= 4.545963 Litres).
1 gallon = 277.274 cubic inches.
2 gallons = 1 peck (= 9.0919 Litres).
8 gallons = 1 bushel (= 3.637 Dekalitres).
3 bushels = 1 quarter (= 1.260 Hectolitres).
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

- 12 inches (in.) = 1 foot (ft.) (= 0.3048 Metre).
3 feet = 1 yard (yd.) (= 0.914399 Metre).
6 feet = 1 fathom (= 1.828 Metres).
5½ yards = 1 pole (= 5.0292 Metres).
22 yards = 1 chain = 100 links (= 20.1168 Metres).
10 chains = 1 furlong (= 201.168 Metres).
8 furlongs = 1 mile = 1,760 yards (= 1,609.344 Metres).
3 miles = 1 league (obsolete). [Kilometres].
A Cricket Pitch is 22 yards (one chain) between the stumps.

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A Badminton Court is 44 × 29 ft., with net 30 ins. deep and 5 ft. high at centre.

A Polo Ground is 300 × 160 yds.

A Football Ground (Association) is 120 × 80 yds. (full size); (Rugby) 110 × 75 yds. (full size).

Birmingham Gauge.

The equivalent of an inch is 25/6 B.G. The numbers proceed by units down to 1/6 B.G., which = 0.3937 inch, and from 1 B.G. (.3937 inch) by units to 52 B.G. (.0005 inch).

Square or Surface Measure.

- 144 sq. inches = 1 sq. foot (= 9.2903 Sq. Decimetres).
9 sq. feet = 1 sq. yard (= 0.836126 Sq. Metre).
36¼ sq. yards = 1 perch, or rod, or pole (= 25.293 Sq. Metres).
40 perches = 1 rood (= 0.10117 Hectare).
4 roods = 1 acre (= 0.40468 Hectare).
10 square chains = 1 acre. (metres).
640 acres = 1 square mile (= 2.58 Sq. Kilo-).

Dimensions of an Acre.—The acre = 4,840 sq. yards, or 220 × 220 yards. The length of a side of a square acre is 66 yds. An area 110 × 220 yards (or 220 × 110 yards) would be half an acre; an area 55 × 220 yards (or 110 × 110 yards) would be one quarter of an acre, and so on.

Cubic Measure.

- 1,728 cubic inches = 1 cubic foot (= 0.028317 Cubic metre).
27 cubic feet = 1 cubic yard (= 0.764555 Cubic metre).

Angular or Circular Measure.

- 60 seconds (") = 1 minute (').
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 signs (4 quadrants) = 1 circumference.
Diameter of circle × 3.1416 = circumference.
Diameter squared × .7854 = area of circle.
Diameter squared × 3.1416 = surface of sphere.
Diameter cubed × .5236 = solidity of sphere.
One degree of circumference × 57.3 = radius.
Diameter of cylinder × 3.1416; product by length or height, gives the surface.
Diameter squared × .7854; product by length or height, gives solid content.

Note.—A circumference of 7 yards diameter has, in practice, a circumference of 22 yards = 2 chains.

Miscellaneous Weights and Measures.

Apples (Bushel) = 37 to 43 lb. (average 40 lb.).
Ballast (Pig) = 56 lb.
Beef (Barrel) = 300 lb.
Biscuits (Bag) = 100 lb.
Blacklead (Cask) = $1\frac{1}{2}$ cwt.
Butter (Barrel) = 4 firkins = 224 lb.
Camphor (Box) = 1 cwt.
Cloves (Matt) = 80 lb.
(Chest) = 200 lb.
Coal (Sack) = 224 lb.
(Bushel) = 80 lb.
(Chaldron) = 85 bushels.
(Ton) = 20 sacks.
Cocoa (Bag) = 112 lb.
(Cask) = 1 cwt 28 lb.
Coffee (Bag) = 140 to 168 lb.
(Bale of Mocha) = 224 to 280 lb.
(Barrel) = 112 to 168 lb.
(Tierce) = 5 to 7 cwt
Cotton (U.S. Bale) = 450 to 550 lb
(Egyptian Bale) = 700 to 740 lb.
(Indian Bale) = 400 lb.
(Tinivelly) 500 lb
Currants (Carotee) = 5 to 9 cwt.
Flour (Peck) = 14 lb.
(Bag) = 140 lb.
Glass (Seam) = 24 stones of 5 lb = 120 lb.
Gunpowder (Barrel) = 100 lb.
Hides (Last) = 12 dozen.
Honey (Gallon) = 12 lb.
Hops (Bag) = 280 lb.
(Pocket) = $1\frac{1}{2}$ to 2 cwt.
Lead (Fodder) —
London and Hull = $29\frac{1}{2}$ cwt.
Derby and Newcastle = $22\frac{1}{2}$ cwt.
Meat (Stone) = 8 lb.
Nuts (Barcelona, Bag) = 126 lb.
Oats (Barrel) = 14 stone
Pepper (Bag of black) = 316 lb.
(Bag of white) = 168 lb.
Pork (Barrel) = 224 lb
Potatoes (Sack) = 112 lb. (since 1923)
Raisins (Barrel) = 112 lb
Rice (Bag) = 168 lb.
Sago (Bag) = 112 lb
Saltpetre (Bag) = 168 lb.
Soft Soap (Barrel or Pack) = 256 lb.
(Firkin) = 64 lb.
Steel (Faggot) = 120 lb
Sugar (Bag) = 112-126 lb
(Hogshead) = 13 to 16 cwt.
(Tierce) = 7 to 9 cwt.
Tar (Barrel) = 26½ gallons.
Tea (Chest) = 84 lb.
Tobacco (Hogshead) = 12 to 18 cwt.
Turpentine (Barrel) = 224 to 280 lb.
Wood (Cord) = 128 cubic feet.
Wool (Sack) = 364 lb.

Wheat, Corn, and Flour.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.

100 lb. flour produces 130 lb. bread.

A quartern loaf = 4 lb.

A last of grain = 80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 bushels. A quarter of English wheat is reckoned as 504 lb. weight. On the Winnipeg Grain Market the standard *bushel* of oats is reckoned at 34 lb.; in U.S.A. at 32 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load of hay or straw = 36 trusses.
Ton of hay = 36 trusses.
An acre of grass should yield 2 to 2 tons of hay.

Sizes of Barrels and Bottles. Gals.

Firkin or Quarter Barrel.....	9 = 9 × 1
Kilderkin, Bundlet, or ½ Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (1½ barrels)	54 = 9 × 6
Punchon (2 barrels).....	72 = 9 × 8
Butt of Ale (3 barrels).....	108 = 9 × 12

An *Anker* = 10 gallons; a *Tierce* = 42 gallons;
a *Pipe* of Port or Masdew = 115 gals.; *Teneriffe*
= 100 gals.; *Marsala* = 93 gals.; *Madeira*
= 92 gals.; *Sherry* and *Tent* = 108 gals.;
Butt of Lisbon and *Bucellas* = 117 gals.; *Atun*
of Hock and *Rhenish* = 30 gals.; *Hogshead* of
Brandy, 60 gals.; *Claret*, 46; *Port*, 57; *Sherry*, 54;
Madeira, 46 gallons; *Punchon* of Brandy or
Rum = 120 gals.

Bottles.—The customary glass bottle of wine
or spirits should contain one-sixth of a gallon
= 26½ fluid ounces.

In the drug trade two large bottles are used:—

Corbyn..... = 40 fluid oz. (quart).

Winchester quart = 80 " (½ gallon).

Water.

Cubic inch = 252.458 grains

Gallon (277.274 cub in.) = 10 lb (distilled).

Cubic foot = 62.321 lb.

35.943 cubic ft (224 gals) = 1 ton.

Water for Ships: Tun, 210 gals., Butt 120, Pun-

cheon 72, Barrel 36, Kilderkin 18 gals.

An *Inch* of Rain on the surface of an acre
(43,560 sq. feet) = 3,630 cubic feet = 100 993
tons

Cisterns A cistern 4 feet by 2½ and 3 deep will
hold brimful 186.963 gallons, weighing 16 cwt.
a qrs. at 6 lb. in addition to its own weight.

Railway Gauges.

In Great Britain = 4 ft. 8½ in.

Ireland = 5 ft. 3 in.

U S A. = 4 ft. 8½ in.

The 4 ft. 8½ in. gauge is also used in
Canada, France, Germany, Netherlands,
Belgium, Denmark, Austria, Hungary,
Italy, Switzerland, Sweden and European
Turkey

Australia:—

N S W. = 3 ft. 6 in. and 4 ft. 8½ in.

Victoria and South Australia = 5 ft. 3 in.

Queensland and Western Australia =

3 ft. 6 in.

New Zealand = 3 ft. 6 in.

India = 2 ft. 6 in., 3 ft. 3 in. and 5 ft. 6 in.

South Africa = 3 ft. 6 in.

Egypt = 4 ft. 8½ and 3 ft. 6 in.

Ceylon = 5 ft. 6 in.

Japan = 3 ft. 6 in.

Spain and Portugal = 5 ft. 6 in.

U S S R. = 5 ft. 6 in.

Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in. gauge requires
12 ft. of roadway; a double track requires 23 ft.
of roadway.

Electrical Measures.

It is customary to express electrical measure-
ments in terms of the centimetre, the gramme,
and the second (C.G.S. units), and the value of

the units has been fixed by international agreement. The principal units are as follow:—

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14.4521 grammes in mass, of a constant cross-sectional area, and of a length of 106.3 centimetres.

As a unit of current, the international *Ampere*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0.001118 of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere, and which is represented sufficiently well for practical use by $\frac{1}{1000}$ of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15°C. , and prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampere in one second.

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals $3,600$ joules.

As the unit of power, the *Watt*, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is $1,000$ watt-hours, or $3,600,000$ joules, or $1\frac{1}{2}$ horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampere per second.

Builders' Measurements.

Stock or kiln bricks	$8\frac{1}{4}$ inches	$\times 4\frac{1}{2}$	$\times 2\frac{1}{2}$
Wich fire-bricks	9	$\times 4\frac{1}{2}$	$\times 2\frac{1}{2}$
Paving bricks	9	$\times 4\frac{1}{2}$	$\times 1\frac{1}{2}$
Square tiles	$9\frac{1}{4}$	$\times 9\frac{1}{4}$	$\times 1$
"	6	$\times 6$	$\times 1$
Dutch linker bricks	9	$\times 3$	$\times 1\frac{1}{2}$

A Rod of Brickwork $16\frac{1}{2}$ feet $\times 16\frac{1}{2}$ feet $\times 1\frac{1}{2}$ brick thick = 365 cubic feet, or $11\frac{1}{2}$ cubic yards, and contains about 4,300 bricks with about 75 cubic feet of mortar. The rod being 3 British metres, a rod of brickwork is 25 square metres. $2\frac{1}{2}$ bricks thick = very nearly 20 cubic metres.

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton 21 cwt. 2 q.

A Piece of machine printed Wall Paper is $12\frac{1}{2}$ yd. long and 21 in. wide; of Hand printed 12 yd. long \times 21 in. wide. French wall papers are usually 9 yd. \times 18 in.

Timber and Wood.

100 superficial feet = 1 square of flooring.

50 cubic feet of planks = 1 load.

40 do. timber = 1 shipping ton.

100 do. do. = 1 stack.

120 do. do. = 1 cord.

A standard hundred of deals contains 100 pieces.

The Petrograd standard consists of 200 cubic feet, or 120 pieces $1\frac{1}{2}$ in. \times 12 in. \times 12 ft., or 120 pieces 3 in. \times 12 in. \times 6 ft.

A Batten is not more than 7 inches wide; a Deal not more than 9 inches; Planks are 2 to 4 inches thick, and 30 inches and up in width.

Sizes of Staves.

	in. in		in. in
Empress	26×16	Ladies	16×10
" Small	26×14	" Small	16×8
Princesses	24×14	" Large	14×12
Duchesses	24×12	"	14×8
Marchionesses	22×12	Plantation	13×11
" Small	22×11	Doubled	13×10
Countesses	20×10	"	13×7
" Wide	20×12	Smalls	12×8
Viscountesses	18×10	Ditto	12×6
" Small	18×9	Ditto	$11 \times 8\frac{1}{2}$

Specific Gravities.

Weight of any volume of following substances compared with the weight of the same volume of water.

Alcohol	0.79	Mercury	13.60
Aluminium	2.67	Milk	1.03
Basalt	2.86	Olive Oil	0.92
Beer	1.02	Petroleum	0.86
Blood	1.06	Platinum	21.45
Brandy	0.84	Portland Stone	2.70
Brass	8.00	Sand, river	1.90
Chalk	1.08	" pit	1.60
Cider	1.02	Shingle	1.60
Clay	1.90	Silver	10.50
Coal, Welsh	1.60	Sodium	0.97
" Newcastle	1.24	Steel	7.75
Copper	8.94	Thames ballast	1.80
Cork	0.24	Tin	7.29
Earth	1.60	Turpentine	0.87
Glass	2.50	Urine	1.00
Glycerine	1.26	WATER	1.00
Gold	19.32	Wine, Bordeaux	0.99
Gravel, coarse	1.85	Wood:—	
Gunpowder	0.93	Ash	0.84
Honey	1.45	Beech	0.84
Ice	0.92	Cedar	0.68
Iridium	22.36	Cherry	0.70
Iron, cast	7.70	Ebony	1.21
" wrought	7.79	Mahogany	1.00
Ivory	1.83	Oak	1.55
Lead	11.35	Poplar	0.58
Limestone	2.50	Walnut	0.67
Marble	2.70	Zinc	7.12
Marl	1.90		

To find the weight of a cubic foot, multiply 62.35 lb by the specific gravity. To find the number of cubic feet in one ton, divide 2240 lb by the specific gravity.

Fish.

In Scotland, and at certain places in England and Wales at which the Oram Measures Act, 1908, has been put into operation, fresh herrings must be sold by the Oram, containing 37 lb.

imperial gallons, or *Quarter Cran* of $9\frac{3}{4}$ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Mazz*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 126 = 10 Hundred = 1 Thousand, 1,260 = 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be $2\frac{1}{2}$ imperial gallons, or in half-barrels of $1\frac{1}{4}$ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1873, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 112 lb.; a barrel of anchovies = 30 lb.; a "box of fish" is about 90 lb.; a Newfoundland "box of fish" contains 100 lb., 112 lb., or 128 lb., to suit the requirements of the different markets.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England). The *Date or Calendar Line* is shown on p. 153.

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

Measures of Heat.

The comparisons in col. a. are of Thermometers constructed by Fahrenheit, Celsius and Réaumur. *Gabriel Daniel Fahrenheit*, F.R.S. (1686-1736), was born at Danzig, and lived a great part of his life in England and the Netherlands. He was elected a Fellow of the Royal Society in 1724. *Anders Celsius* (1710-1744), inventor of the Centigrade Thermometer, was born at Upsala, Sweden, and was for many years Professor of Astronomy at the University of Upsala. *René Antoine Ferchault de Réaumur* (1683-1757), was born at La Rochelle, France, and became known as "The Pliny of the XVIIIth Century" on account of his work as a Natural Historian.

Thermometer Comparisons.

Comparison between Scales of Fahrenheit, Réaumur, and Centigrade.

CONVERSION.
Let F = Fahr.
" C = Cent.
" R = Réaumur.
NOTE.—The normal temperature of the human body is $98\frac{4}{5}^{\circ}$ F., or 37° C., or 30° R. Freezing point = 32° F. = 0° C. = 0° R.; Boiling point = 212° F. = 100° C. = 80° R. "Absolute" Temperature is Temperature reckoned from "Absolute Zero," which is at 273° C. below 0° F., and $218\frac{4}{5}^{\circ}$ below 0° R. and is denoted by the letter "K."

Nautical Measures.

6 feet = 1 fathom.

100 fathoms = 1 cable length.

100 cables = 1 nautical mile.

60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=182·77 metres), but it is strictly 606·97 feet (=185 metres). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables, assumed at 6,000 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude. **Ship Measurement.**

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (q.v.).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (q.v.), i.e., it is the weight of vessel and contents in tons.

Load water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Bells and Watches on Board Ship.

Bells—Time is kept by means of a bell, which is struck every half hour. Anyone who, in an effort to terminate his watch prematurely, strikes the bell early, is accused of "warming the bell," an expression which has grown to include the doing of anything before the appointed time.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the **Starboard* (right side, looking forward) and the **Port* (left). The day commences at noon, and is thus divided.—

Watch.

Bells (in ½ hours).

Afternoon.....	noon to 4 p.m., 1 to 8.
First Dog.....	4 p.m. to 6 p.m., 1, 2, 3, 4.
†Last or §Second	
Dog.....	6 p.m. to 8 p.m., 1, 2, 3, 8.
First.....	8 p.m. to midnight, 1 to 8.
Middle.....	midnight to 4 a.m., 1 to 8.
Morning.....	4 a.m. to 8 a.m., 1 to 8.
Forenoon.....	8 a.m. to noon, 1 to 8.

* See also p. 373.

† Last = Royal Navy.

‡ Second in Mercantile Marine.

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon the day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

For TIME AT SEA see p. 128.

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 48 knots in land (statute) miles per hour:—

Knots	Miles	Knots	Miles	Knots	Miles
1	1·1515	15	17·2727	39	33·2039
2	2·3030	16	18·4242	40	34·5484
3	3·4545	17	19·5757	41	35·6969
4	4·6060	18	20·7272	42	36·8484

14	16·1212	28	32·2424	42	48·3636

Measures of Energy, &c.

In Physics the unit of force is the *dynes*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal*, which in one second gives one pound a velocity of one foot per second. One *poundal* = 13,825 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 dynes (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*.

Horse power is energy exerted at the rate of 550 foot-pounds per second; an alternative unit is the *kilowatt* (1000 kilogram-meters per second) = 737·56 foot pounds per second.

Thermal Unit.—The British Thermal Unit (B.Th.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B.Th.U. If *V* = on ft. consumed, *H* = declared heat value of the Company's gas (in B.Th.U. per cu ft.), *P* = cost of therm in pence, *B* = total bill in pence—then $B = V \times H \times P + 100,000$, whence equivalent cost (in pence) per 1,000 cu. ft. = $B \times 1,000 + V = H \times P + 100$.

Yarn Measures.

Cotton and Spun Silk Count.—

Thicad = 1½ yards.

Lea or Skoin, *sku* = 120 yards.Hank, *hk* = 7 skeins, or Leas = 840 yards.Spindle, *spd.* = 16 Hanks.

(Counts = the number of Hanks in 1 lb.

Bundle Hanks, either of 5 lb. or 10 lb.

Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.

Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, 80 yards; Hank = 800 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

Wool of England Count.—The Hank is 300 yards, and the number of hanks in 1 lb. is the count of the yarn.

Paper and Book Measure.

Writing Paper.

24 sheets = 1 quire.
20 quires = 1 ream.

Printing Paper.

256 sheets = 1 ream.
8 reams = 1 bundle.
5 bundles = 1 bale.

Regular Sizes of Printing Paper.

Foolscap	=	17	×	13½	inches.
Double Foolscap ..	=	27	×	17	"
Crown	=	20	×	15	"
Double Crown	=	30	×	20	"
Post	=	19½	×	15½	"
Double Post	=	31½	×	19½	"
Double Large Post ..	=	33	×	21	"
Sheet and ½ Post ..	=	23½	×	19½	"
Demy	=	25½	×	20½	"
Double Demy	=	35	×	22½	"
Music Demy	=	20	×	15½	"
Medium	=	23	×	18	"
Royal	=	25	×	20	"
Super Royal	=	27½	×	20½	"
Elephant	=	28	×	23	"
Imperial	=	30	×	22	"

NOTE.—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 240 pages will therefore require 5 sheets of quad crown, and a ream will provide 200 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams) "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

Sizes of Writing and Drawing Papers.

Emperor	=	72	×	48	inches.
Antiquarian	=	53	×	26½	"
Double Elephant	=	40	×	24	"
Grand Eagle	=	42	×	26½	"
Atlas	=	34	×	26	"
Colombier	=	34½	×	23½	"
Imperial	=	30	×	22	"
Elephant	=	28	×	23	"
Cartridge	=	26	×	21	"
Super Royal	=	27	×	19	"
Royal	=	24	×	19	"
Medium	=	22	×	17½	"
Large Post	=	21	×	16½	"
Copy or Draft	=	20	×	16	"
Demy	=	20	×	15½	"
Post	=	19	×	15½	"
Pinched Post	=	18½	×	14½	"

Sheet and ½ Foolscap ..	=	24½	×	13½	"
Double Foolscap	=	26½	×	16½	"
Double Post	=	30½	×	19	"
Double Large Post	=	33	×	21	"
Double Demy	=	35	×	22	"
Brief	=	16½	×	13½	"
Port	=	15	×	12½	"

Sizes of Brown Papers.

Casing	=	46	×	36	inches
Double Imperial	=	45	×	29	"
Elephant	=	34	×	24	"
Double Four Pound	=	39	×	21	"
Imperial Cap	=	29	×	22	"
Haven Cap	=	26	×	21	"
Bag Cap	=	24	×	19½	"
Kent Cap	=	21	×	18	"

Sizes of Bound Books.

Demy 16mo	=	5½	×	4¾	inches.
Demy 18mo	=	5½	×	3¾	"
Foolscap Octavo (8vo) ..	=	6½	×	4¾	"
Crown 8vo	=	7½	×	5	"
Large Crown 8vo	=	8	×	5½	"
Demy 8vo	=	8¾	×	5½	"
Medium 8vo	=	9½	×	6	"
Royal 8vo	=	10	×	6½	"
Super Royal 8vo	=	10½	×	6½	"
Imperial 8vo	=	11	×	7½	"
Foolscap Quarto (4to) ..	=	8½	×	6½	"
Crown 4to	=	10	×	7½	"
Demy 4to	=	11½	×	8½	"
Royal 4to	=	12½	×	10	"
Imperial 4to	=	13	×	11	"
Crown Folio	=	15	×	20	"
Demy Folio	=	17½	×	21½	"
Royal Folio	=	20	×	22½	"
Music	=	14	×	10¾	"

Sizes of Type.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

All Founders cast their type to one uniform height ("type high"), which is 1½ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each fount. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points = 1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names and sizes of the various founts are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 124 lines, and about 7,500 letters.

Diamond (4½ point) is the next size; the column would contain 107 lines, and about 6,000 letters.

Pearl (5 point), 95 lines, 4,370 letters—Printing is the art of producing impressions from characters or figures.

Ruby (5½ point), 87 lines, 3,740 letters—Printing is the art of producing impressions from characters or figures.

Nonpareil (6 point), 75 lines, 3,000 letters—Printing is the art of producing impressions from characters or figures.

Minton (7 point), 64 lines, 2,350 letters—Printing is the art of producing impressions from characters or figures.

Brevier (8 point), 58 lines, 1,970 letters—Printing is the art of producing impressions from characters or figures.

Bourgeois (9 point), 53 lines, 1,590 letters—Printing is the art of producing impressions from characters or figures.

Long Primer (10 point), 47 lines, 1,360 letters—Printing is the art of producing impressions from characters or figures.

Small Pica (11 point), 43 lines, 1,200 letters—Printing is the art of producing impressions from characters or figures.

Pica (12 point), 37 lines, 890 letters—Printing is the art of producing impressions from characters or figures.

English (14 point), 34 lines, 680 letters—Printing is the art of producing impressions from characters or figures.

Great Primer (18 point), 27 lines, 430 letters—Printing is the art of producing impressions from characters or figures.

Double Pica (22 point), 22 lines, 280 letters—Printing is the art of producing impressions from characters or figures.

Printing is the

CORRECTING FOR THE PRESS.

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

¹/₂ The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a ² ~~dear~~ sufficient number of any particular book are printed, so ⁴ ~~#~~ as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three copies or four, only of any production, the cost of printing would be greater than the cost of transcribing.

¹¹ ~~must be~~ It is when hundreds, and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. It is probable that the first printers did not take off more than two or three hundred, if so many, of their works, and, therefore, the earliest printed books must have been still dear, on account of the limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a cautious printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submyself (submitted) myself to translate into

English the Saint's Legend,' called 'Legenda aurea' in Latin; and William, Earl of Arundel, sent me a worshipful gentleman, promising that my said lord should, during my life, give and grant to me a yearly fee, that is 10 marks, a buck in summer and a doe in winter.

¹² ~~to take a reasonable quantity of them, and~~

- 1 Is the mark for changing the wrong letter in the word process.
- 2 To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (*dele*, blot out) a superfluous letter or word.
- 9 12 and 22 Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph
- 11 To substitute a comma for a full-point or period
13. To commence a new paragraph
14. 19. 21 and 27. To insert points and marks of quotation.
- 15 To have any particular part printed in Italic.
- 16 To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. *Sic* is the Latin for "let it stand."
18. Points out a letter which does not match with the others; a 'wrong fount.'
20. and 23. To have certain parts printed in small or full capitals.
- 25 To set straight whatever may stand crooked
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres	= 1 centimetre	= 0.39370113 inch.
(mm.)	(cm.)	
10 centimetres	= 1 decimetre	= 3.9370113 inches.
	(dm.)	
10 decimetres	= 1 METRE (m.)	= 39.370113 yards.
10 metres	= 1 dekametre	= 10.936143 yards.
	(dam.)	
10 dekametres	= 1 hectometre	= 109.36143 yards.
	(hm.)	
10 hectometres	= 1 kilometre	= 0.62137 mile.
	(km.)	

A kilometre is approximately five eighths of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

2.—MEASURES OF WEIGHT.

10 milligrams	= 1 centigram	= 0.15432 grains.
(mg.)	(cg.)	
10 centigrams	= 1 decigram	= 1.5432 "
	(dg.)	
10 decigrams	= 1 gramme	= 15.4323 "
	(gm.)	
10 grammes	= 1 dekagram	= 5.6438 drams.
	(dag.)	
10 dekagrams	= 1 hectogram	= 3.5274 oz.
	(hg.)	
10 hectograms	= 1 KILOGRAM	= 2.2046223 lb.
	(kg.)	
10 kilograms	= 1 myriagram	= 22.046223 lb.
10 myriagrams	= 1 quintal (q.)	= 1.10231 cwt.
10 quintals	= 1 tonne (t.)	= 0.9842 ton.

3.—MEASURES OF CAPACITY.

10 millilitres	= 1 centilitre	= 0.0704 gill.
(ml.)	(cl.)	
10 centilitres	= 1 decilitre (dl.)	= 0.17598 pint.
10 decilitres	= 1 LITRE (lit.)	= 1.7598 pints.
10 litres	= 1 dekalitre.	= 2.1997 gals.
	(dal.)	
10 dekalitres	= 1 hectolitre	= 2.7497 bushels.
	(hl.)	

1 cubic cm. (water) = 1 gram; 1,000 cubic cm (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF LAND.

100 sq. metres	= 1 are (a.)	= 0.0968 rood.
100 ares	= 1 hectare (ha.)	= 2.4721 acres.
100 hectares	= 1 sq. kilometre	= 0.3861 sq. mile.

NOTES.

1 hectolitre	= 2.75 bushels.
1 hectolitre per hectare	= 1.12 bushels per acre.
1 quintal	= 3.75 bushels.
1 quintal per hectare	= 1.49 bushels per acre.
1 franc a hectolitre	= 3.6d. a bushel (par).
1 " a quintal	= 4.3d. a cental (par).
1 " a quintal	= 1.12d. a quarter (par).
7 francs " (duty)	= 12s. 6d. a quarter (par).

THE UNITED STATES.

Weight.—In the short ton of 2,000 lb., the Cental of 100 lb. takes the place of the Cwt. in the long ton. There are two tons, therefore, the long ton of 2,240 lb., the short ton of 2,000 lb.

Capacity.—For grain, the old bushel of 2,150.48 cubic inches; its gallon = 231 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the British gallon and = 8.33773 grains of water. It is divided into 8 pints = 7.5697 grains of water = 16.6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455.6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS.

Australia and New Zealand.—Same as British Canada.—Same as British but with short ton of 2,000 lb., as in U.S.A.

Newfoundland.—Same as British.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the cental of 100 lb. being used as well as the cwt. of 112 lb. The Old Island Measures are as follows:—

Vergée (Normandy)	Jersey	Guernsey.
rood	= 0.44 acre	0.4 acre.
Bushel	= 8.9 gallons	5.8 gallons
Pound	= 7.561 grains	7.623 grains
Cwt.	= 112.3 lb	(100 lb.) = 108.9 lb

British India.

Ungul	= 0.75 inch.
Guz, usually 33 inches; also the yard.		
Koss	= 2,000 yards
Bigha (Bengal) usually =	0.685 acre.
Cawny (Madras)	= 1.33 "
Tola (rupee-weight)	= 180 grains.
Chittak	= 2.0571 oz.
Seer, 16 chittak, or 80 tolas	= 2.0571 lb.
Maund, 40 seers	= 82.284 lb.
" (Bombay)	= 87.864 lb.
" (Madras)	= 84.68 lb.
Seer (Liquid)	= 1.760 pints.
Candy	= 500 lb.
Visham = 3 lb.; Dargali	= 3 pints.
Parah	= 15 gallons.
Catty (Singapore)	= 1.75 lb.
Pikul 100 catties =	133 lb.

Irish Free State.—Same as British.

Malta.

The Metric System.

Old Maltese Measures.

1 Palmo	= 10.3125 inches.
8 Palmi	= 1 canna = 6 ft. 10.5 inches
1 sq. Canna	= 47.26 sq. feet.
256 sq. Canna	= 1 tumulo = 6 mondelli = 12.700 sq. feet.
1 mondello	= 20 misura.

1 acre = 3 tumuli, 3 mondelli, 6 misura.

Sudan.—See Egypt.

South Africa.

The Metric System is compulsory in the case of chemists, and is permissible (along with British weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure*: Leaguer = about 128 Imperial gallons; half aum = 15½ Imperial gallons; anker = 7½ Imperial gallons. *Capacity*: Muid = 3 bushels. The general surface measure is Morgen, equal to 1.1365408 acres; 1,000 Cape lineal feet are equal to 1.233 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except *Great Britain*) and is *permissive* in all countries.

China.

Tael weight = 1'33 oz. Ch'lh = 1'75 feet
Catty " = 1'33 lb. Chang = 11'75 feet.
Picul " = 133'33 lb. Li = 2,115 feet.
Ta'un, = 1'41 inches.

Egypt.

The *Metric System of Weights and Measures* and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the *Metric System* is little known except in the large towns.

The Weights and Measures in common use, with their British equivalents, are as follows:—

Length—

Dira Baladi (used for piece goods) = 29'83 inches
Dira Mamari, or Plo (used by architects) = 29'53 inches
Qassaba (used for agricultural land) = 11'65 feet

Area—

1 Qirat = 209'3 sq. yards; 1 Feddân (= 24 qirats) = 1'038 acres.

Capacity—

1 Kêla = 0'454 bushel; 1 Ardeb (= 12 kêlas) = 5'444 bushels.

Weight—

1 Rotl = 0'99 lb.; 1 Oke = 2'75 lb.; 1 Qantar (= 100 rotls) = 99'05 lb.

A Qantar of unginned cotton = 315 lb., of ginned cotton = 100 lb.; an Ardeb of wheat = 150 kilogrammes, of barley = 120 kilogrammes, of beans = 135 kilogrammes, of maize = 140 kilogrammes, of whole lentils = 157 kilogrammes, of split lentils = 132 kilogrammes.

Germany.

The *Metric System*.

Old Prussian Land Measure.

Morgen (3050 sq. yds. or 0'63 English acre) is still in general use.

Greece.

1 oque = 2'84 lb. 1 livre = 1'1 lb.
1 quintal = 132'2 lb. 1 drachma = 0'11 oz.

Japan and Formosa.

The *Metric System* from July 1, 1904.

Old Japanese Measures.

Shaku (10 Sun) = 11'92 inches.
Ken (6 Shaku) = 1'984 yards.
Ri = 2'4403 miles.
Square ri = 5'9553 sq. miles.
Cho = 5'423 chains.
Square cho = 2'4507 acres.
Tsubo = 3'9538 sq. yards.
Liquid koku = 39'7033 gallons.
Dry koku = 4'9629 bushels.
Koku of capacity = 0'1 ton.
Liquid sho = 1'5888 quarts.
Dry sho = 0'1985 pecks.
Kin (160 Momme) = 1'3228 lb.
Kwan (1000 Momme) = 8'2673 lb.

U.S.B.R.

The *Metric System* from Jan. 1, 1907.

Old Russian Measures.

Standard of length the *Sajen*, equal to seven British feet; standard of weight the *Funt* = 0'6028 lb.

Length.

16 vershok = 1 arshin.
3 arshin = 1 sajén.
500 sajén = 1 verst.
1 verst = 1166'66 yards (0'6628 mile).

Surface.

1 sq. vershok = 3'0409 sq. inches.
1 sq. arshin = 5'4444 sq. feet.
1 sq. sajén = 5'4444 sq. yards.
1 sq. verst = 0'4394 sq. miles.

Weight.

1 zolotnik = 65'8366 grains.
1 zolotnik = 1 loth.
32 loth = 1 funt.
40 funt = 1 pood (35'1228 lb.).
20 poods = 1 berkovatz.

Capacity.

1 toharka = 0'2164 pint.
1 shottof (10 toharkas) = 1'0828 quarts.
1 vedro (10 shottofs) = 2'705 British gallons.
1 chetvert (8 chetveriks) = 5'777 British bushels.

Siam.

Niu = 0'83 inch.
Ru'p = 10 inches.
Sen = 44'4 yards.
Roéneng = 3'525 miles.
Tael = 93'25 Tr. gr.
Chang = 2'075 lb. —

Turkey.

Oke = 400 drams = 2'8264 lb.
Batman = 6 okes = 16'958 lb.
Cantar = 44 okes = 124'3616 lb.
Cheki = 195 okes = 551'128 lb.
Kileh = 0'9120 bushel.
Muscal (Eas. of Rose) 15 drams = 74'172 grains.
Arshin (cloth) = 26'96 inches.
Endaze = 25'355 inches.
Arshin (land) = 29'830 inches.
Deunum = 1098'765 sq. yards.
Djerib (hectare) = 2'47 acres.

OLD MEASURES.

Old British and Irish Measures.

Hand (horses) = 4 inches.

The following are obsolete:—

Cubit = 18 inches.
English Ell = 45 inches.
Scottish Ell = 37'2 inches.
Scottish mile = 1,984 yards.
Irish mile = 2,240 yards.

Note. The mile in Northern Ireland and in the Irish Free State is 1,760 yards, as in Great Britain.

Scottish acre = 6,150'4 sq. yards.
Cunningham acre = 6,250 sq. yards.
Irish acre = 7,240 sq. yards.
Cheshire acre = 10,240 sq. yards.
Hide = 120 acres (average).
Yard of land = ¼ of a hide.

Old French Measures.

Toise of 6 feet; Foot = 12'789 in.
Aune (ell) of 4 Roman feet = 46'77 in.
League, 3,000 toises = 3'6 miles.
Perch, 22 feet or 6 aunes = 23'44 feet.
Arpent, 100 sq. perches = 1'26 acres.
Pound = 7,554 grains. Setier = 34'317 gallons;
Boisseau (½) = 2'86 gallons. Pinte = 1'76 pinta.

Old Hebrew Measures.

Talmud Cubit = 21'914 in.; Egyptian Cubit = 18'24 in.
Cubit of Ezekiel = 25'26 in.; Reed = 151'6 in.
Kikkar (Alexandrian talent) = 50 minas of 60 shekels.
Shekel = ¼ oz., of 8 gerah, or (Shekel of the Sanctuary) of 2 beka, 4 reba, 20 gerah.
Bath (fluid), Ephra (corn) of 6 hin, 18 cab, 72 log = 6'477 British gallons.
Cor or Homer (20 ephas) = 8'251 bushels.

EQUIVALENT INVESTMENTS.

Examples — To ascertain the yield of Consols at a price of £57 10s. od. look in the column headed $\frac{2}{5}\%$ Pr. Ct. for 57½, and it will be seen that the yield (column headed Return Per Cent.) is 4 6s. 11d. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £105, will yield £5 14s. 3d per cent., while 5 per cent. shares at £97½ yield £5 2s. 7d per cent.

Return Per Cent	$\frac{2}{5}\%$ Pr Ct	$\frac{3}{5}\%$ Pr Ct	3 Pr Ct	$3\frac{1}{2}\%$ Pr Ct	$3\frac{3}{4}\%$ Pr Ct	4 Pr Ct	$4\frac{1}{2}\%$ Pr Ct	5 Pr Ct	$5\frac{1}{2}\%$ Pr Ct	6 Pr Ct	7 Pr Ct	$7\frac{1}{2}\%$ Pr Ct	8 Pr Ct	9 Pr Ct	10 Pr Ct

IN PERPETUITY

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £200, interest being reckoned at 4 per cent? **ANSWER.**—19 14 years purchase or £2,194.

EXAMPLE 2.—A man, aged 54, in receipt of a pension or annuity of £200 a year, net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? **ANSWER.**—Looking at the Table of Expectation of Life (*qv*), it will be seen that the expectation for age 54 is about 17 years, and

from the above table an annuity certain for 17 years interest at 5 per cent, is worth 27 years purchase. The present payment required would therefore be £2,127 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives at a given present age, when properly calculated according to a given mortality table and a given rate of interest are always somewhat less than those given by the method used in this example.

REPAYMENT OF PUBLIC LOANS.

SUMS needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 5 to 80 years. If the loan be for £1,000, each annual instalment must be multiplied by 10, and so on. Thus, a Municipal Loan of £1,000,000 at 5 per cent., repayable in 80 years, would cost the ratepayers £51,031 5s. annually for that period, and would then be extinguished.

REDEMPTION OF CAPITAL
BY ANNUAL PAYMENTS.

THE following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £100 in return for so many annual premiums, e.g., an Insurance Company will undertake to pay £100 on Midsummer Day, 1951, in return for the payment of £5 5s. 2d. on Midsummer Day, 1923, and each year afterwards until 1950, or 28 payments in all; for £1,000 the annual premium would be £22 11s. 8d., and so on. This table is of particular interest to purchasers of *Leasehold* property, as it enables such purchasers to see, at a glance, the amount to be paid out of the income from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired.

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
If you bear to the left you are sure to go right,
If you bear to the right you go wrong.
But in walking the streets 'tis a different case,
To the right it is right you should steer,
On the left should be left enough of clear space
For the people who wish to walk there.

THE WALKER'S MAXIMS.

(From *The Times*, April 9, 1930).
Two rules the walker must obey
If he would reach his home to-day—
On Roadway always keep the Right
On Footpath just the op-po-site

G BUCKSTON BROWN.

THE RULE OF THE ROAD AT SEA.

1. *Two steamships meeting*
When both side-lights you see ahead,
Port your helm, and show your RED.

2. *Two steamships passing*
GREEN to GREEN, or RED to RED,
Perfect safety—Go a-head!

3. *Two steamships crossing.*
If to your starboard RED appear,
It is your duty to keep clear,
To act as Judgment says is proper.—
To Port—or Starboard—Back, or Stop her.
But when upon your port is seen
A Steamer's starboard light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.
Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

The 1921 Census in Scotland showed longevity both of males and females less than England and Wales at all ages, ranging from 25 1/2 years and 3 1/2 years at birth to fractions of a year at later ages, but while at every age women's longevity exceeds that of men in Scotland the excess is much less marked than in England.

In Ireland up to 1911, when the last Census was taken of the whole country as one, the longevity of males up to 25 and over 25 years was less than in England, but between ages 25 and 85 was greater than in England. Of females the Irish longevity was consistently less than that of England, except for the ages 55 to 75, when they exceeded the English averages. The Census taken in Northern Ireland in 1926, after 15 years interval, and five years later than the English Census, showed remarkable improvements over that of 1911 as regards longevity, and again high figures for males of 55 and over were repeated, though less prominently, England having improved in the decade of years 1911-1921.

TABLE FOR CONVERTING AN AREA, WHICH IS SHEWN DECIMALLY, INTO ROODS, POLES AND SQUARE YARDS, AND CONVERSELY FOR SHEWING AN AREA IN DECIMAL PARTS OF AN ACRE.

	Roods	Poles
100	0	16
200	0	32
300	1	3
400	1	24
500	2	0
600	2	16
700	2	32
800	3	8
900	3	24

Example.—An Area is shewn as 10 1/2.

Acres	A.	R.	P.	Sq Yds.
0'800	=	0	3	8
0'061	=	0	0	9

Therefore 10 1/2 = 10 3 17 25

Conversely.—An Area is 6 1 15 10

A.	R.	P.	Sq Yds.
6	1	15	10
0	1	8	0
0	0	7	10

Therefore 6 1 15 10 = 6 3 16

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less £1, must be taken. Thus, for £1 at 4 per cent for 25 years, take 26 years, £1.02, and deduct £1—£1.02 = £1.02.

TWENTY-THREE LARGEST WILLS, 1931-32.

Earl of Incheape, d. May 23, 1932	£1,124,706	Lord Merthyr of Senghenydd, d. Mar. 20, 1932	556,139

THE BRITISH ISLES.

THE KING AND COURT.—(1931) **Nov. 3.** The King received South African Rugby team at Buckingham Palace. **4.** Prince of Wales visited port and docks of Liverpool and presided over banquet of Honourable Company of Master Mariners. **5.** Indian Round Table Conference delegates were among guests of King and Queen at tea party at Buckingham Palace. **10.** King opened new Parliament in State. **11.** Owing to cold weather, the King did not attend Armistice Day ceremony at the Cenotaph, his wreath being laid by Prince of Wales. In evening King, Queen and Prince were present at British Legion Festival of Remembrance at Albert Hall. **16.** Dissolution Honours consisted of viscounty for Mr. Snowden, baronies for Sir Robert Newman and Sir Martin Conway, and Knighthoods for Mr. G. M. Gillett and Mr. J. C. Watson. **27.** Prince of Wales inaugurated Burma Round Table Conference to evolve new constitution for Burma. **Dec. 2.** Prince of Wales confined to his bed with slight chill. **4.** The Queen also suffering from a cold. **11.** Prince of Wales announced that annual distribution by King Edward's Hospital Fund for London was £294,000. **16.** Addressing the Travel Association, the Prince of Wales said travel and trade were international and it was only by free exchange of goods, services and visits that Britain and the world could live in comfort, peace and mutual understanding. Queen opened Salvation Army women's hostel in Whitechapel. **22.** King and Queen went to Sandringham for Christmas. **24.** Prince of Wales, Duke and Duchess of York, Duke of Gloucester and Prince George joined their Majesties at Sandringham for Christmas. **(1932) Jan. 1.** Princess Mary received title of "Princess Royal" in New Year Honours, which included viscounty for Lord Sankey and five baronies. **5.** Prince George suffering from a chill. **13.** Crown Prince of Ethiopia visited King and Queen. **15.** Prince George visited the Clyde and inspected factories and works. **16.** Prince of Wales fulfilled several engagements at Swansea. **27.** Addressing the Youth Rally organised by National Council of Social Service at Albert Hall, Prince of Wales appealed to the nation for a greater spirit of unselfish and adventurous helpfulness, and for a fight against depression and apathy. **Feb. 8.** Duke of Connaught left Sidmouth for the south of France. **11.** The King visited Prime Minister in nursing home. **14.** King and Queen inspected the French Art Exhibition at Burlington House. **22.** Duke of York at British Industries Fair dinner urged industry to give young men a chance. **Mar. 1.** Duke of York began three days tour of industrial Lancashire, visiting Stockport, Manchester, Bury, Rochdale and Bolton. **10.** Prince of Wales unveiled in Royal Gallery of House of Lords memorial to peers and officers of that House and their sons who fell in the war. King and Queen gave afternoon party at Buckingham Palace. **11.** Duke of York began tour of industrial works in Huddersfield area. **13.** King received Mr. MacDonald after his rest. **24.** For first time for 220 years the King in person distributed the Royal Maundy in Westminster Abbey. **April 14.** Prince of Wales was present at Pilgrims' dinner to Mr. Mellon, new American Ambassador. **18.** King and Queen attended wedding at Westminster Abbey of Lord Hyde and Hon. Marion Glyn.

22. King and Queen saw training of troops at Aldershot. **23.** Prince of Wales opened new Shakespeare Memorial Theatre at Stratford-on-Avon. King and Queen witnessed the Cup Final at Wembley. **27.** Prince of Wales, speaking at Newcastle, reaffirmed his appeal for personal service to help "our fellow men." **May 5.** Duke of Connaught returned to London from the Riviera. **8.** King and Queen paid private visit to Royal Academy. **11.** King and Queen held first Court of the Season. **12.** Second Court held. **15.** Duke of York addressed British Legion conference at Portsmouth. **19.** Duke of Connaught, at Olympia, by electricity laid Stone of Dedication of Freemasons' Hospital and Nursing Home at Ravenscourt Park. **20.** Prince of Wales, addressing Sales Managers' Association, said "Buy British" campaign should be accompanied by well planned and persistent effort to "Sell British" at home and abroad. **24.** Prince received Miss Earhart, American trans-Atlantic aviator. **26.** King and Queen attended concert in aid of Musicians' Benevolent Fund at Albert Hall. **30.** They were present at music hall Command Performance at Palladium. **June 1.** Their Majesties saw the Derby at Epsom. **3.** King's birthday honours included viscounty for Lord Buckmaster and baronies for Sir Robert Hutchison and Mr. H. N. Gladstone. With the Queen, His Majesty drove to Epsom to see the Oaks. **4.** King took salute at Trooping the Colour. **8.** His Majesty unveiled memorial to Queen Alexandra at Marlborough House. King and Queen of the Belgians arrived in London and dined with King George and Queen Mary. **14.** King and Queen attended Ascot Meeting. Princess Beatrice successfully underwent operation for cataract. **23.** Third Court of the Season. **24.** Prince of Wales unveiled the Warriors' Chapel, near Unknown Warrior's Tomb, in Westminster Abbey. Fourth and last Court held. **25.** Duke of York attended R.A.F. Display at Hendon. **27.** The King went to Lords to see Test Match between England and India. **30.** Prince of Wales, in speech read by Prince George owing to his brother's slight illness, at dinner to Ottawa Conference delegates, said every effort should be made to put heart into the world. **July 2.** Ex-King Manoel of Portugal died suddenly at his home at Twickenham. **11.** King, Prince of Wales and Prince George, joined Home Fleet at Weymouth on royal yacht. **12.** Prince of Wales, while flying out at sea, sent message to the Fleet from the King, who on deck of H.M.S. *Nelson* took salute of detachments of officers and men. **14.** King took the Home Fleet into action in mimic battle, and congratulated whole personnel on their efficiency and keenness. **15.** His Majesty returned to London. **19.** King, who was accompanied by the Queen, opened new Lambeth Bridge and drove across it. **20.** Duke of Connaught represented the King at burial of Lord Plumer by side of the Unknown Warrior in Westminster Abbey. Second stage in operation for removal of cataract from Princess Beatrice's right eye successfully performed. **21.** Their Majesties gave garden party at Buckingham Palace. **25.** Duchess of York suffering from slight chill. **26.** King and Queen went to Cowes, staying on the Royal yacht. **28.** Prince of Wales attended centenary dinner of British Medical Association at Albert Hall. Lady May Abel Smith, the Queen's niece, gave

birth to daughter at Kensington Palace. **28.** King sailed *Britannia*, which won Royal Albert Yacht Club's race. **Aug. 1.** *Britannia*, with the King aboard, won race at Royal London Yacht Club regatta. **3.** Duke of York visited his camp of boys at Southwold and spent night under canvas. **8.** King and Queen returned to London from Cowes. **13.** Prince of Wales and Prince George flew from Venice and joined the Mediterranean Fleet at Corfu, boarding *Queen Elizabeth*. **14.** Duke and Duchess of York attended celebration of 800th anniversary of foundation of Fountains Abbey. **15.** Prince of Wales and Prince George inspected number of ships. **18.** They arrived at Malta with the Fleet. **22.** King and Queen, after staying at Harewood House, arrived at Balmoral Castle. **Sept. 8.** Bad weather prevented King and Queen from attending the Braemar Gathering; but Duke and Duchess of York were present. **14.** Prince of Wales returned home. **22.** He left Croydon by air for Copenhagen. **30.** Prince George left Croydon for Stockholm. **Oct. 12.** Duke and Duchess of York received honorary degree of Doctor of Laws at Glasgow University. **13.** Prince George arrived back at Croydon. **15.** Prince of Wales arrived home after brief stay in Amsterdam. Queen visited Norfolk Hospital and opened Queen Alexandra Memorial Nurses' Home. **25.** Duke of Connaught went to Sidmouth for first part of the winter. Prince George elected Bencher of Lincoln's Inn. **27.** Princess Ingrid of Sweden arrived in England by air from Brussels. **28.** Prince of Wales opened new bridge across the Severn at Worcester.

IMPERIAL POLITICS.

(For Parliament see pp. 256-260).

(1931) **Nov. 3.** Sir Austen Chamberlain resigned any claim he might have to a post in new Government in favour of younger man. New Parliament met and re-elected Capt. E. A. Fitz Roy as Speaker. **4.** Sir Herbert Samuel appointed leader of Liberal Parliamentary Party in place of Mr. Lloyd George. **5.** New Cabinet of 20 Ministers was announced, Mr. Neville Chamberlain becoming Chancellor of Exchequer, Sir John Simon, Foreign Secretary, and Mr. Runciman, President of Board of Trade. **9.** Prime Minister at Guildhall Banquet asked for City's confidence in new Government and said the £ would be stabilised on definite basis as soon as practicable. **10.** Mr. Lloyd George left England for health voyage to Ceylon. **20.** First anti-dumping Order was issued few hours after passage of bill authorising the duties, 50 per cent. tariff being placed on long list of foreign goods. **25.** The new tariffs came into force. Viscount Snowden introduced in House of Lords. **26.** Mr. MacDonald entertained to dinner by Scotsmen in London and told stories of his hardships as a youth. **30.** Second anti-dumping order issued. **Dec. 1.** Indian Round Table Conference ended, Prime Minister announcing the Government's policy. This included plan for an All-India Federation and responsibility for Central and Provincial Legislatures, with safeguards during a transitional period. **3.** Government obtained majority of 266 after debate on its India policy in House of Commons. **4.** Speaking at Aberdeen, Mr. Baldwin declared that result of election was a national and not a party victory. **5.** Gandhi left England on his

way home. **8.** Chancellor of Exchequer announced suspension of valuation of land for land tax purposes. **10.** It was announced that work on new Cunard liner being built at Clydebank was to be suspended, over 3,000 men being affected. Labour vote of censure defeated in Commons by 439 to 44. **17.** Third anti-dumping order included cotton-piece goods. **29.** First list of fruit and vegetables to bear import duties was issued. **30.** Home Secretary visited Dartmoor Prison. (1932) **Jan. 7.** Majority report of Licensing Commission recommended creation of commission with power to reduce number of public-houses, more rapid reduction of licences, general closing time, and special hotel and restaurant licences. Mr. Lloyd George arrived home. **8.** Death of Mr. William Graham. **12.** Burma Round Table Conference in London concluded after Mr. MacDonald had expressed Governments' readiness to set up new constitution if Burmese people voted in favour of separation from India. **22.** Cabinet found it impossible to reach a unanimous conclusion on the tariff recommended by Committee on the Balance of Trade, but to maintain national unity Ministers unable to support conclusions of majority of their colleagues were given liberty to speak and vote as they wished instead of resigning. Ministers concerned were Sir Herbert Samuel, Sir Donald Maclean, Sir Archibald Sinclair and Lord Snowden, and they accepted compromise. **25.** Sir William Jowitt resigned office of Attorney-General, and was succeeded by Sir Thomas Inskip, Sir Boyd Merriam becoming Solicitor-General. **Feb. 3.** Operation performed on Prime Minister's left eye in private hospital. **9.** Conservative majority in bye-election in South Croydon fell from 39,722 to 9,937. In New Forest majority was reduced from 28,424 to 18,192. **11.** Import Duties Bill, imposing 10 per cent tariff on nearly all imported goods issued. **14.** Prime Minister ordered three week's complete rest. **23.** Attempts by unemployed to enter House of Commons were frustrated. **March 1.** Sir George May appointed chairman, and Sir Sydney Chapman and Sir Allan Powell members of Import Duties Advisory Committee. **2.** Mr. Chamberlain announced Britain was paying to United States £30,000,000 of £40,000,000 borrowed in preceding August to support the pound. He also stated restrictions on export of capital abroad had been withdrawn. **7.** Naval Estimates showed reduction of £1,228,000, and Army Estimates one of £3,442,000. **12.** Prime Minister returned to London after holiday at Newquay, his left eye being in satisfactory condition but still needing rest. **16.** Mr. Lloyd George made his first speech since his illness and reaffirmed his Free Trade principles. **17.** He took his seat in House of Commons. **31.** Financial year closed with Budget surplus of £364,000, notwithstanding that only £12,750,000 instead of £23,000,000 was taken from Dollar Exchange Account. **April 3.** M. Tardieu, French Premier, arrived in London to discuss European problems with British Ministers. **4.** Discussions on Danubian States, war debts and disarmaments between the two Premiers concluded. **6.** Four-Power Conference to consider economic crisis in the Danubian States opened in London, representatives of Britain, France, Italy and Germany being present. **8.** Conference ended without result. **18.** Mr. Chamberlain declined offer by Lady Houston of £200,000 towards cost of national

defence. **19.** Announced that condition of Prime Minister's right eye had not been maintained and he was ordered to rest his eyes for three hours a day. **21.** Treasury Order issued, based on Advisory Committee's recommendations, placed additional duties of from 5 to 20 per cent. on large variety of manufactured goods entering Britain and 33 per cent. tariff on semi-finished steel for three months. Labour candidate, Mr. Arthur Greenwood, gained Wakefield by majority of 344. **23.** Capt Cunningham Reid, unofficial Conservative, defeated official Conservative in Marylebone by 1,023. National Liberal Conference at Clacton carried resolution reaffirming its Free Trade principles. **29.** The Conference proclaimed independence of Liberal Party and freedom from any obligation to support Government's policy. **May 5.** Operation successfully performed on Prime Minister's right eye. **13.** King visited Mr. MacDonald at his nursing home. **25.** Mr. Lloyd George addressed Welsh Liberals at Llandudno. **June 3.** After conference with iron and steel trade representatives, Import Duties Advisory Board extended 33 per cent. duties until the industry was reorganised by a national committee which was formed. **15.** Sir Donald Maclean, President of Board of Education, died suddenly. **17.** Mr. Lloyd George, in first speech in present Parliament, supported Government's attitude on Irish trouble. **30.** Chancellor of Exchequer announced gigantic conversion scheme to reduce £2,000,000,000 of 5 per cent. War Loan into 3½ per cent. stock. **July 7.** Mr. Baldwin in Commons announced Britain's disarmament proposals and declared they were inspired by same purpose as those of President Hoover although they differed in some respects. **10.** Mr. MacDonald greeted with enthusiasm on his return from Lausanne. **12.** Liberal National Council formed by Sir John Simon's supporters. **13.** Sir John Simon announced that declaration to preserve spirit illustrated at Lausanne and to apply it to other problems had been signed by Britain and France. Delegates to Ottawa Conference left Southampton. **14.** Italy and Belgium announced their adherence to the declaration arising out of Lausanne. **15.** Lord Irwin appointed President of Board of Education. **27.** Labour captured Wednesbury from the Conservatives. **Aug. 8.** Treasury Orders made permanent the duties on luxury fruits, flowers and vegetables. **17.** Sir Arthur Salter's Rail and Road Transport Committee recommended higher taxation of commercial motor vehicles, and regulation of licences to enforce payment of reasonable wages and good conditions. **22.** Report of Lord Bridgeman's Committee contained criticism of the Post Office, recommending abolition of the secretariat and substitution by Board of practical departmental chiefs, and that Treasury should receive fixed contribution instead of all the profits. **26.** Ottawa delegates arrived back in London and were greeted by Mr. MacDonald and other Ministers. **30.** Treasury announced intention to repay on Dec. 1 the 4½ per cent. War Loan and 4½ per cent. Treasury Bonds amounting to over £153,000,000. **Sept. 9.** By repaying loan to France, Britain discharged all the foreign credits obtained during the crisis. **16.** Conservatives retained Twickenham, but majority fell from 45,308 to 4,307. **18.** Britain issued statement on Germany's arms claim, declaring no countenance could be given to disregard of Treaty obligations. **20.**

Prime Minister's daughter, Dr. Joan MacDonald, married to Dr. Alastair Mackinnon at Wendover, reception being held at Chequers. **23.** Viscount Snowden, Sir Herbert Samuel and Sir Arthur Sinclair resigned from Cabinet, with eight Junior Liberal Ministers, owing to Ottawa decisions. Sir John Simon and his followers continued to support the Government. Sir John Gilmour appointed Home Secretary, Mr. Walter Elliot Minister of Agriculture and Sir Godfrey Collins Scottish Secretary. **28.** Mr. Baldwin combined offices of Lord President and Lord Privy Seal and Mr. Hore-Belisha became Financial Secretary to the Treasury. **30.** Officially announced that of the £2,025,000,000 of 5 per cent. War Loan, only 8 per cent. (£165,000,000) would have to be repaid in cash, proving huge success of conversion scheme. Ban on new issues was removed with small exceptions. **Oct. 6.** Conservative Party Conference opened at Blackpool. **7.** Mr. Baldwin, at Blackpool, said he regretted nothing that took place at Ottawa. **10.** Government announced £150,000,000 loan at record low rate of 2 per cent., into which holders of £140,000,000 4½ per cent. Treasury Bonds could convert, saving £2,625,000 a year. **12.** Text of the Ottawa Agreements and the schedules detailing new scales of Import duties in the Dominions were issued. Duties on many United Kingdom goods were either abolished or reduced. Liberal meeting in Queen's Hall addressed by resigned Ministers, Sir Herbert Samuel repudiating the Agreements. **13.** M. Herriot, French Premier, consulted with Mr. MacDonald and other Ministers at Downing Street on Disarmament Conference deadlock. **14.** As result of discussions, Britain proposed meeting with France, Germany and Italy at Geneva to overcome the difficulty. Germany objected to selection of Geneva. **18.** Parliament reassembled to pass legislation necessitated by Ottawa Agreements. Mr. Thomas announced that Government had denounced trade pact with the Soviet. **20.** Prime Minister received deputations from the Churches and from literature and science on importance of world disarmament. **21.** Mr. MacDonald said that changes in administration of the Means Test would be made, and appealed for co-operation of all parties. Duties on imported iron and steel were extended for two years to assist reorganisation of the industry. **22.** Mr. Chamberlain, at Birmingham, said rising toll of unemployment had been arrested. **25.** Labour vote of censure on Government defeated in House of Commons by 462 to 35. **31.** Announced that State subsidy for opera had been suspended.

MUNICIPAL—(1932) Nov. 2. Labour heavily defeated in municipal elections, both in London and the provinces, 400 seats being lost. **(1932) Jan. 26.** Sir Percy Simmons informed London County Council that slight subsidence had occurred at four piers of Waterloo Bridge. **Feb. 16.** London County Council decided to rebuild Waterloo Bridge to take six lines of traffic at estimated cost of £1,225,000. **Mar. 8.** Mr. Angus Scott elected chairman of London County Council and Dame Beatrix Hudson Lyall vice-chairman. **June 1.** House of Commons rejected L.C.C.'s scheme for demolishing Waterloo Bridge and building a new one by 225 to 154. **Sept. 14.** Barnes became municipal borough. **29.** Sir Percy Greenaway elected Lord Mayor of London. **Oct. 3.** New borough of Heston and

Isleworth received its charter of incorporation from Duke of Gloucester. **18.** Brentford and Chiswick became a borough. **19.** First poll under Sunday Entertainments Act taken at Maidstone, and resulted in majority for Sunday cinemas.

ACCIDENTS AT SEA.—(1931) Nov. 12. H.M.S. *Petersfield*, minesweeper, wrecked on island north of Foochow, with Admiral Sir Howard Kelly, Commander-in-Chief of China Station, on board, no lives being lost. **19.** Serious damage caused by fire in 19,000 tons motor liner *Bermuda* in Belfast Harbour, which became total loss. **27.** L.M.S. Irish Channel steamer *Duke of Lancaster* seriously damaged by fire in Heysham Harbour. **Dec 3.** Cross-Channel steamer *Vernailles* towed back to Newhaven with damaged rudder. **11.** Newcastle trawler *Venus* sank after striking rocks off Norwegian coast with loss of 11 lives. **18.** Hull trawler *Girdleness* wrecked off Faroe Islands with loss of 11 lives. **28.** Tug sank after collision with American steamer in Thames below Woolwich, 8 of crew of 9 being drowned. **(1932) Jan. 26.** British submarine *M 2*, carrying 6 officers and 54 men, was lost with all of crew while exercising off Portland. **May 15.** British steamer *Rounellian* and French steamer *S. Nazaire* in collision off the Needles, former's passengers being taken off. **16.** New French liner *Georges Philyppe* destroyed by fire off the Gulf of Aden while on her maiden voyage. Large number of passengers and crew rescued from boats and rafts were picked up by other vessels, but about 50 lives were lost. **June 8.** Spanish liner *Teide* wrecked off West Africa, passengers and crew being rescued by British steamer *Appam*. **17.** Explosions and fire on Liverpool tanker *Cymbeline*, being repaired in dock at Montreal, killed 13 persons and injured 63. **28.** Weymouth pleasure steamer was in collision with submarine *Rainbow* at entrance to Portland Harbour and passengers were transferred to submarine. **30.** Famous windjammer *Melbourne* sank off Irish coast after collision, 11 of the crew being drowned. **July 8.** Ramsgate trawler sank with four of crew after collision with Glasgow steamer near Lundy Island. **26.** German naval training ship *Nobe* foundered in squall off Island of Fehmarn, 50 cadets and 19 others being drowned. **Aug. 5.** Great Western Railway mailboat *St. Patrick* went on rocks off Corbiere Point, Jersey, during fog, the 314 passengers being landed by tug. **Sept. 15.** Submarine *H 33* and H.M.S. *Dundalk* were in collision near Portland Bill, only slight damage being caused. **Oct. 9.** Norwegian ship sank after being in collision with British steamer *Arctic Star* off Folkestone, crew and passengers being rescued. **10.** British liner *Laconia*, while on Mediterranean cruise, received S.O.S. from Belgian steamer, steamed to the spot, and rescued crew in heavy seas. **16.** Cromer lifeboat, after being at sea 27 hours, saved 29 men of Italian steamer wrecked on Halsboro Sands, remaining four of crew being picked up by another boat.

ACCIDENTS GENERAL.—(1931) Nov. 19. Explosion followed by fire occurred at Bentley Colliery, near Doncaster, while hundreds of men were below. Rescue parties showed great heroism, but 45 miners lost their lives. **Dec. 18.** During thick fog, passenger train ran into part

of goods train which had been broken in half near Dagenham, guard of goods train and a passenger being killed (former in attempting to prevent accident) and about 30 injured. **20.** Two women and two children killed in fire at their home at Toxteth, Liverpool. **28.** While investigating Frickley Colliery Yorkshire, for gas, 5 men were overcome and died. **(1932) Jan. 28.** Following explosion in pit in Rhondda Valley, 4 miners were killed. **May 23.** Explosion in lead mine at Youlgrave, near Bakewell, caused heavy fall of roof, and 8 men were killed, 3 of them in attempting a rescue. **June 18.** Explosion in fireworks factory at Forest Hill killed 2 women workers. **17.** L.M.S. express from Crewe to Birmingham derailed at Great Bridgeford, near Stafford, and plunged into embankment, 4 persons being killed and 20 injured. **July 20.** Empty Bournemouth Corporation tramcar crashed through railings on the front and fell on to sands below killing two women and injuring two other persons. **Aug. 26.** Cable of tramcar on Great Orme, near Llandudno, broke and car crashed into wall, driver and girl being killed and 11 passengers being injured. **Oct. 8.** Landslide near Inverness Castle demolished new mission hall. **10.** Cage in which miners were descending colliery at Leigh, Lancs, crashed through platform at foot of shaft, 19 men being drowned in sump hole.

AVIATION.—(1931) Nov. 5. Miss Peggy Salaman and Mr Gordon Stone landed at Capetown 5 days 6 hours 40 mins after leaving Lympe, beating the record by a day. **9.** Mr. A. C. Butler landed at Port Darwin, having flown from Lympe in 9 days 2 hours 29 mins. and beaten C. W. A. Scott's record. **13.** J. A. Mollison left Lympe on attempt to beat Miss Salaman's time, but had to land at Foggia, Italy. **14.** Mollison was forced down about 150 miles past Cairo through broken petrol tank and he abandoned flight. **26.** Australian Christmas air mail for Britain crashed 60 miles from Penang. Bert Hinkler landed at Bathurst, British Gambia, after flying from Port Natal, Brazil, in just over 22 hours, first west to east flight across South Atlantic. **Dec 7.** Hinkler landed at Hanworth after easy stages from Africa. **16.** Kingsford-Smith arrived at Croydon with Australian air mail from machine which crashed near Penang. **(1932) Jan. 16.** Capt R. H. Macintosh and Mrs Westerna arrived in England after flight to South Africa and back in 27 flying hours. **18.** Air Ministry announced that, owing to necessity for economy, work on giant six-engined flying boat at Southampton had been stopped. **19.** Kingsford-Smith landed at Port Darwin with air mail from Britain after flight of 12 days. **20.** First regular air mail to Capetown left Croydon. **Feb 21.** G. A. Sclly killed near Marseilles during attempt to fly from Ireland to Ceylon. **March 24.** Mr. J. A. Mollison started his flight to the Cape from Lympe and landed at Colomb in the Sahara the same evening. **26.** He arrived at Niamey, French West Africa. **27.** He reached Loanda. **28.** Mollison crashed on beach near Capetown after passing over aerodrome. He was unhurt but machine was damaged. He beat record by 15 hours 18 mins. **April 19.** Mr. C. W. A. Scott left Lympe on flight to Australia and arrived at Brindisi in 13 hours, a record. **20.** Capt. Goulette and Lieut. Salel arrived at Capetown 92 hours after

leaving Paris. **24.** Scott arrived at Rangoon. **25.** He reached Singapore. **28.** He landed at Port Darwin after flight of 8 days 20 hours 44 mins., lowering Butler's record by 5 hours 45 mins. **May 13.** Lou Reichers left Harbour Grace for Europe on attempt to reach Paris. **14.** Reichers came down in sea near Irish coast and was taken on board liner bound for New York. **20.** Miss Amelia Earhart left Harbour Grace alone in monoplane for Europe. **21.** She landed near Londonderry, her time being fastest for Atlantic flight, and stated that she had flown blind for considerable part of journey. **22.** Miss Earhart was piloted to Hanworth and was greeted by American Ambassador. **June 3.** Stanley Hauser, a Polish-American, left Bennett Field, New Jersey, for Europe. **12.** After hope had been abandoned, Hauser was picked up alive but exhausted by British tanker 500 miles west of Portuguese coast. **July 2.** Graf Zeppelin left Hanworth for 24 hour tour round Britain. **5.** Capt. Bennett Griffin and Lieut. James Mattern left Harbour Grace for Europe. **6.** They set up new record by flying direct to Berlin in 18 hours 40 mins., crossing Atlantic in 10 hours 50 secs. They left again the same night for Moscow. **7.** They made forced landing near Minsk, plane being wrecked and occupants slightly injured. **9.** Prince of Wales's plane finished second in race round England for the King's Cup, won by Capt. W. L. Hope. **22.** Capt. von Gronau and three companions left Burkom Island, Germany, to fly to Chicago. **26.** They arrived at Montreal after flight via Iceland and Greenland. **27.** During storm explosion occurred in aeroplane containing Mrs. Alfred Bosson, wife of M. P. Mr. Bruce Bosson, her son, and Prince Otto Erbach-Kurstenau, and it crashed near Hindhead, the three occupants being killed. **Aug. 18.** Professor Auguste Piccard, accompanied by M. Max Cosyns, reached height of 16,700 metres (nearly 10½ miles) in cylinder attached to balloon, ascending at Zurich and landing on shores of Lake Garda. **J. A.** Mollison left Portmarnock, near Dublin, alone in his monoplane to cross Atlantic. **19.** He landed at Pennfield Ridge, New Brunswick, having flown alone 2,500 miles across Atlantic in record time of 30 hours 15 mins., latter part of journey in fog. **21.** Mollison flew to New York and was greeted tumultuously. **24.** The "Flying Family" consisting of Mr. and Mrs. George Hutchinson, their two daughters and crew of four, attempting to fly to England by easy stages, flew from St. John's, Newfoundland, to Anticosti Island. **25.** Clyde Lee and John Boelton left Harbour Grace with intention of flying to Oslo, but were lost. **28.** Mollison left New York and owing to fog landed 18 miles from St. John, New Brunswick. **29.** He arrived at Sydney, Nova Scotia. **30.** The "Flying Family" landed in Labrador. **31.** Mollison abandoned plan for return flight to Britain. **Sept. 3.** The Hutchinsons arrived in Greenland. **11.** They made forced landing in sea near Angmagssalik on coast of Greenland, British trawler picking up their S.O.S. but failing to find them. **13.** Trawler *Lord Talbot* rescued the eight persons on the Hutchinsons' plane. Aeroplane containing Dr. Leon Pisculi, Miss Edna Newcomer and William Ulbich left New York for Rome. After being sighted 600 miles out, they were lost. **16.** Capt. Cyril Uwins set up new world's altitude record of 43,976 feet, which was officially recognised.

CRIMES AND TRIALS.—(1931) Nov. 5. At Lincoln Assizes, Harold Smith, aged 26, was found guilty of murder of his aunt at a farm by shooting her and was sentenced to death, but sentence was commuted two days later. **28.** Yaroslav Charles was sentenced at Old Bailey to 15 years' penal servitude for shooting at constable with intent to murder at Thames Ditton. **Dec. 16.** Body of an 11 year old girl, Vera Page, who had been missing for 36 hours and for whom S.O.S. was broadcast by B.B.C., was found in garden in Addison Road, Kensington, child having been strangled and brutally ill-used. Police charged Congress demonstrators, 200 persons being injured. **Feb. 2.** Australia won fourth test match at Adelaide by 10 wickets. **3.** Commonwealth issued writ against New South Wales Government to recover £950,000 interest due on overseas loan. **6.** Girl student fired five shots at Sir Stanley Jackson, Governor of Bengal, at Calcutta University, but he escaped injury. **11.** Unemployed raided Council Chamber at St. John's, Newfoundland, during Cabinet meeting, and Premier, Sir R. A. Squires, was bruised and cut. Royal Commission on Malta criticised the Governor and recommended restoration of Parliamentary government. **15.** Girl who fired at Sir Stanley Jackson sentenced to nine years' rigorous imprisonment. **16.** Police fired on crowd which attacked district magistrate at Tarapur, 8 Indians being killed. **18.** Miss Slade, Gandhi's disciple, sentenced at Bombay to three months' simple imprisonment for defying order to leave Bombay. **20.** Officially announced that De Beers and Premier diamond mines would

close down **Mar. 2.** Mrs. Gandhi released Restoration to Malta of its suspended constitution announced. **12** To forestall seizure of State revenue, Mr. Lang withdrew £1,000,000 from the banks. **15** Mrs. Gandhi arrested at Bardoh and sentenced to six months' rigorous imprisonment. **18** Mr. Lang declared open Sydney Harbour Bridge. A man, in military uniform, belonging to anti-Communist body, cut the ribbon with sword as protest against Mr. Lang's policy and was arrested. **20** Consultative Committee of Round Table Conference in India announced inability to settle problem of communal representation and asked Imperial Government to decide. **28.** Lord Willingdon opened session of Chamber of Princes at Delhi, and expressed determination to secure and maintain peaceful relations. **31.** Work ceased in diamond mines of De Beers and Pretoria. **April 1** Chamber of Princes at Delhi supported plan for an All India Federation. Governor of Kenya commuted death sentences passed upon 60 natives for murder of woman accused of witchcraft. **5** Sir Richard Squires, New South Wales Premier, and his Cabinet, besieged in Assembly Chamber by rioters following presentation of demand that charges against Premier and Colonial Secretary should be investigated. **6** Australian High Court ruled Financial Agreement (Enforcement) Act valid. **8** Mr. Lang, New South Wales Premier, locked up offices where income tax assessment papers were stored as reply to sequestration of part of State revenues by Federal Government. **11.** Regulations issued by Australian Government empowered Commonwealth to seize any relevant documents. **13** Labour Government of Victoria defeated on resolution of no confidence. **14** British blue jackets were landed at Auckland, New Zealand, to assist police in quelling riot of unemployed who caused considerable damage to property. **15** Rioting and looting at Auckland renewed and a church was fired. **19** Lord Willingdon inaugurated newly-elected Legislative Council of North-West Frontier Province and read message from the King-Emperor. **24.** Over 600 arrests made in effort to prevent annual Congress meeting being held. **30** District magistrate of Midnapore shot in his office by two Bengalis and died. **May 2** Mr. Lang, New South Wales Premier, abandoned opposition to Federal Government and surrendered income tax documents. **13.** Sir Philip Game, Governor of New South Wales, dismissed Mr. Lang's Ministry for refusing to withdraw instructions to State employees to disobey the Federal law. **15** Labour Government in Victoria defeated in State election by United Australia party. **18** Racial riots lasting many days in Bombay caused large loss of life. **29.** Riots broke out again in Bombay, 6 persons being killed and 63 injured. **June 2.** Report of Franchise Committee of Round Table Conference recommended increase in electorate from 7,000,000 to 36,000,000 and enfranchisement of 6,600,000 women. **3** Dispute between the State and the Roman Catholic Church in Malta was settled following apology by Lord Strickland, head of the Ministry. **12** Labour Party led by Mr. Lang severely defeated in New South Wales general election, losing 30 seats. In Queensland, Labour defeated Government Party. Opposition won election in Newfoundland. **July 1.** After many days' communal rioting in Bombay, troops had to be called out. **17.** Goods train containing dynamite blew up 40 miles from Klerksdorf, Western

Transvaal, 8 persons being killed. **19.** British delegates to Economic Conference arrived at Ottawa and were welcomed by Canadian Premier and other Ministers. Sir Henry Thornton resigned Presidency of Canadian National Railways. **21** Imperial Economic Conference inaugurated at Ottawa by Governor-General and opening speeches delivered by leaders of delegations. Five committees were set up on different aspects. **Aug. 5** Young Bengal committed suicide after firing at Sir Alfred Watson, editor of "Statesman," who was not injured. **6** Many delegates to Ottawa Conference attended opening by Lord Bessborough of new Welland Ship Canal joining Lake Erie and Lake Ontario. **18.** Mr. Baldwin, addressing Canadian Club at Ottawa, said the more efficiently the British nations could conduct their business the better for the world outside. **16** British Government's award on communal representation in India rejected Hindu's claim for joint electorates, and provided special electorates or constituencies for various classes, including women and Labour. **17.** New India Rupee Loan closed four hours after opening with subscriptions totalling £18,750,000. **20** Final session of Imperial Economic Conference was held at Ottawa, agreements being signed between the Mother Country and the various Dominions under which duties were to be imposed on foreign wheat and other foodstuffs, with preferences for the Dominions, and quotas instituted for bacon and later for beef and mutton, while the Dominions were to give increased preferences to British goods. Problem of Russian trading, raised by Canada, was met by clause providing that if either Britain or Canada were satisfied that preferences were being frustrated by any foreign country steps would be taken for prohibition of importation from that country of the goods concerned. **Sept. 1** Presenting Australian Budget, Mr. J. O. Lyons, Prime Minister, estimated surplus of £12,000,000. **5** Viceroy announced in Legislative Assembly that another Round Table Conference on India's constitutional reforms would be held in London. **12** Gandhi announced his intention to start another hunger-strike "until death" unless Government withdrew scheme of communal electorates for the Depressed Classes of India. **16** Violent earthquake shocks occurred in Hawkes Bay area of North Island of New Zealand, causing considerable damage but no loss of life. **20** Gandhi began his fast, after declining conditional release from prison cell. **26** Fast ended after lasting 6 days and 5 hours on Gandhi receiving official announcement that agreement between the caste Hindus and the Untouchables regarding representation had been accepted by British Government. **28** Second attempt on life of Sir Alfred Watson in Calcutta failed. **30.** Council of State in India urged Government to take further and immediate and drastic measures to crush terrorism. **Oct. 10.** Two English girls found dead near Nakuru, Kenya, after going for motor drive with Englishman, who was arrested. **13** Canada, Australia, New Zealand and South Africa put into force the new tariffs resulting from Ottawa Agreements. **17** Australian Premier said that Commonwealth had not reduced any protective duties but had extended margin of preference to Britain by raising duties against foreigners on 400 items. **21.** Extensive new gold reef discovered in the Rand.

UNITED STATES.

L (1931) **Dec. 7.** Congress met with guard of police outside buildings to prevent disturbances by unemployed. Mr. John Garner, Democrat leader, elected Speaker, and Democrats obtained chairmanships of all committees after 12 years in opposition. **8.** In his message to Congress, Mr. Hoover recommended increased taxation and reduced expenditure to prevent prospective deficit of \$50,000,000. **9.** Mr. Mellon, Secretary to the Treasury, told Congress that he proposed to raise \$300,000,000 by new taxes in next two years, over 1,700,000 more persons being brought within income-tax net. **13.** Mr. Winston Churchill was knocked down by taxi-cab while crossing Fifth Avenue, New York, and taken to hospital with severe injuries, his immediate lecture arrangements being cancelled. **18.** Jack Diamond, notorious racketeer, shot dead in his bed after party to celebrate his acquittal on charge of kidnapping. House of Representatives, by 317 to 200, passed resolution authorising postponement of war payments for a year, but declaring against cancellation or reduction of war debts. **21.** Mr. Churchill left hospital practically recovered. **23.** Senate passed Moratorium Bill by 69 to 22, and it was signed by Mr. Hoover. (1932) **Jan. 4.** The President sent special message to Congress urging immediate action on his emergency economic programme, including creation of finance corporation to furnish credit for industry. **7.** Mr. Stimson sent Note to Chinese and Japanese Governments reaffirming the Kellogg Pact, and invited other Powers to send similar Notes. **9.** Martial law practically in force in Honolulu following arrests of an American naval officer, two American sailors and American woman on charge of murdering a native who had previously been accused of assaulting wife of the officer. **11.** Both Houses of Congress ordered enquiries into conditions at Honolulu. **19.** Bankers advanced £6,500,000 to New York City to meet short-term indebtedness. **21.** Senate and House of Representatives agreed on details of Bill creating a £400,000,000 reconstruction finance corporation to restore industry. **Feb. 4.** Mr. Andrew Mellon accepted post of Ambassador to Great Britain in succession to General Dawes. **5.** Gar Wood set up new speed-boat record of average mean speed over the mile each way of 112 7/12 m.p.h. at Miami. **8.** Vincent Coll, 23-year-old gangster leader of the Bronx, shot dead by machine gun in telephone box. **10.** Edgar Wallace died after short illness at Hollywood. **11.** Bill to widen the rediscount authority of Federal Reserve Banks introduced. **24.** Sir Malcolm Campbell set up new land speed record of 123.68 m.p.h. in his car "Blue Bird" on Daytona Beach. **26.** Campbell broke 5 kilometres, 10 kilometres and five miles records. **Mar. 1.** Colonel Lindbergh's 19-months-old son kidnapped from his home at Hopewell, New Jersey, and President ordered all resources to be used in the search. **3.** Colonel Lindbergh received letter demanding 50,000 dollars ransom for the baby and threatening him. **5.** John Philip Sousa, the bandmaster and composer, died suddenly after banquet in his honour at Reading, Pennsylvania. **14.** Mr. George Eastman, multi-millionaire and founder of Kodak Company, shot himself in his home at Rochester, New York. **21.** Tornadoes killed over 200 persons in Southern States, notably Alabama. **24.** House of Representatives deleted the sales tax from the Bill designed to meet the Budget deficit. **26.** Tariffs

on imported oil and coal were added to the Bill. **29.** Speaker of the House appealed to Congress to sink all differences and balance the Budget. Mr. Hoover announced that he would veto the Soldiers' Bonus Bill. **30.** House of Representatives voted number of taxes as result of Speaker's appeal. **April 1.** The Tax Bill passed, attempt to restore the sales tax being rejected. **4.** Trial began at Honolulu of Mrs. Fortescue, Lieut. Massie, her son-in-law, and two sailors charged with murder of native who had been acquitted of criminal assault on Mrs. Fortescue's daughter. **30.** All four were found guilty of manslaughter. **May 3.** Congress rejected number of economy proposals designed to balance the Budget and voted new pensions for widows and orphans of ex-soldiers. **4.** Mrs. Fortescue, Lieut. Massie and the two seamen each sentenced to ten years' imprisonment, but Governor of Honolulu immediately commuted sentences to one hour's imprisonment. **11.** President vetoed Bill calling for a world conference on tariffs. **12.** Skeleton of Colonel Lindbergh's baby found in woods about five miles from his home. **13.** Mr. Hoover directed all resources to bring to justice those responsible for kidnapping and murder of the child. **25.** Mayor Walker of New York was examined before a Committee of Inquiry. **31.** President attended Senate to ask for a sales tax to balance the Budget, but proposals were rejected. **June 5.** Hoover Finance Reconstruction Corporation increased its financial capacity to 3,000,000,000 dollars to create system of home loans and discount banks. House of Representatives passed Revenue Bill to balance the Budget. **13.** While thousands of ex-soldiers, who had marched to Washington, were encamped outside the capital House of Representatives decided to discuss bill to give bonus to all ex-soldiers. **16.** Republican Convention at Chicago re-nominated Mr. Hoover as candidate for Presidency. **22.** In a manifesto the President urged a world armaments cut of one-third, abolition of tanks, chemical warfare and large mobile guns, and total prohibition of all bombardment from the air. **29.** Democratic Convention at Chicago adopted repeal of Prohibition as Party's plank. **30.** Fiscal year closed with deficit of \$580,000,000. **July 2.** Mr. Franklin Roosevelt, Governor of New York, chosen Democratic candidate for Presidency in fourth ballot, and Mr. John Garner for Vice-President. Mr. J. H. Curtis found guilty at Flemington, New Jersey, of hindering justice by false reports in connection with search for the Lindbergh baby. **13.** Serious fire occurred on Coney Island, about £400,000 of damage being done. Part of army of war veterans who claimed bonus began continuous march round the Capitol Buildings at Washington. **23.** Mr. Borah urged that United States should go to World Economic Conference prepared to discuss general settlement of post-war problems as well as reduction or cancellation of war debts. **28.** "Bonus Army" at Washington ejected by troops from derelict buildings which they had occupied. **31.** Olympic Games opened by Vice-President Curtis at Los Angeles. **Aug. 2.** United States accepted invitation to attend World Economic and Monetary Conference. **3.** Mr. R. P. Lamont, Secretary of Commerce, resigned and was succeeded by Mr. Roy Chapin. **11.** Mr. Hoover, accepting Republican nomination, opposed cancellation of war debts but indicated adjustment would be considered if expansion of markets

were offered. 16. Mrs. Lindbergh gave birth to a son. 26. Mr. Hoover opened at Washington conference of bankers and industrial leaders to consider trade depression, and declared the financial crisis was over. **Sept. 1.** Mr. Walker, Mayor of New York, resigned after investigation into allegations of corruption in administration of the city's affairs. 2. Mr. Joseph V. McKee became Mayor of New York. 3. Commander Gar Wood in *Miss America* beat Kaye Dou in *Miss England III* on Lake St. Clair, Detroit. 5. Latter broke down in second heat, and United States retained Harmaworthy Trophy. 9. Ferryboat taking 165 men to work on island in East River, New York, was blown to pieces by explosion, 62 lives being lost. 13. Elections in Maine gave unexpected victories to the Democrats, who captured Governorship and two of the three Congressional seats. 20. Gar Wood recaptured motor-boat record, attaining average speed of 124.91 m. p.h. on St. Clair River. **Oct. 1.** Clondburst descended on cluster of small towns 75 miles from Los Angeles, 50 persons being drowned. 23. During election speech at St. Louis, Missouri, Governor Roosevelt said Democrats proposed to repeal the Prohibition Amendment to the Constitution.

FRANCE.

(1931) **Nov. 12.** M. Laval obtained vote of confidence by 39 votes when Chamber reopened. Increased surtaxes were announced on imports of semi-finished and finished articles, particularly from countries with depreciated currencies. 26. Ministry of Commerce announced France would open negotiations with Great Britain for reciprocal treaty on tariffs. **Dec. 18.** French Government defeated by 9 votes on unemployment insurance question, but obtained vote of confidence by majority of 59. (1932) **Jan. 12.** M. Laval and his Cabinet resigned following refusal of Radical-Socialist Party to collaborate. 13. M. Laval formed another Ministry. 15. M. Briand retired from politics. 17. By derailment of train at St. Just, near Clermont, 11 passengers were killed. 22. New Ministry obtained majority of 36. **Feb. 4.** Senate Finance Committee voted advance of 110,000,000 francs for six months to enable the French Line to resume work on new ships. 16. M. Laval and his Cabinet resigned after defeat in the Senate. 20. M. Tardieu formed a Ministry. **March 7.** M. Aristide Briand, eleven times Prime Minister, died in Paris. 12. Ivar Kreuger, the Swedish match king and financier, shot himself in Paris and enormous frauds were discovered on investigation of his affairs. 31. Government established quota for various cotton goods and other goods supplied from Great Britain. **April. 5.** As protest against high entertainment taxation, 24 hour strike by amusement caterers organised throughout France. 20. Mr. MacDonald flew to Paris and went to Geneva accompanied by M. Tardieu. **May. 1.** In general election majority of results were indecisive and second ballots were necessary. 6. While President Doumer was opening exhibition in Paris, Russian doctor, Paul Gorguloff, fired five shots at him. The aged President, seriously wounded, was taken to hospital, where he died on following day. Gorguloff was arrested after the crowd had tried to lynch him. 7. M. Albert Thomas, Director of International Labour Bureau, died. 8. Second ballots in general election inflicted crushing defeat

upon M. Tardieu's Government and gave majority to M. Herriot and the parties of the Left. Following landslide just outside Lyons, two apartment houses collapsed and 45 persons were killed. 10. M. Albert Lebrun elected President. 12. Prince of Wales attended funeral of M. Doumer at the Pantheon. **June 3.** M. Herriot accepted task of forming a Government, which was constituted within a few hours. 7. Chamber endorsed new Governments policy by 390 votes to 125. 11. Mr. MacDonald and Sir John Simon arrived in Paris and had series of friendly conversations with M. Herriot as prelude to Lausanne Conference. **July 7.** French submarine *Prométhée*, while making engine test on surface off Cherbourg, suddenly sank, 62 lives being lost and seven saved. By 233 votes to 40 Senate rejected proposal that Frenchwomen should have votes. 27. Sentence of death passed at Paris Assize Court, on Paul Gorguloff who assassinated President Doumer, defence of insanity being rejected. 31. France retained Davis Cup by beating United States. Lord Trenchard unveiled the Arras monument in memory of the British dead. **Aug. 1.** Thiepval Memorial to British officers and men who fell on the Somme unveiled by Prince of Wales in presence of President Lebrun. 22. Prince of Wales and Prince George arrived at Cannes. 24. They flew to Biarritz for brief holiday. **Sept. 14.** Troop train in Algeria left rails and fell into ravine, over 100 officers and men of the Foreign Legion being killed and many others injured. Gorguloff executed in presence of great crowd. 16. French conversion scheme involving 85,000,000,000 francs launched. 26. Explosion on new French submarine *Persee* killed one man and injured 32. 29. Torrential rain caused serious damage along Riviera, including a landslide which blocked railway. **Oct. 16.** Passenger and goods trains collided near Coutances, 7 persons being killed and 15 injured. 28. M. Herriot in the Chamber, explaining general principles of French disarmament plan, said France would accept general application of reduced period of short-term service for armies, provided the Reichswehr and similar bodies were abolished. Vote of confidence was carried by 430 votes to 30. 29. Mme. Lebrun, wife of the President, launched world's largest liner, *Normandie*, 73,000 tons, at St. Nazaire.

GERMANY.

(1931) **Nov. 20.** In memorandum to Bank for International Settlements, Government urged appointment of advisory committee to investigate Germany's financial position. **Dec. 8.** Emergency decree issued by the President imposing heavy sacrifices, including lower wages and fixed prices on all Germans, to avert economic crash. Chancellor threatened Herr Adolf Hitler, leader of National Socialists, with martial law in certain contingencies. 23. Advisory Committee of Bank for International Settlements agreed that Germany would be unable to pay after the Hoover Moratorium expired on June 30 and urged common action by the Governments. (1932) **Jan. 7.** Chancellor discussed question of Presidential election with Herr Hitler and proposed extension of von Hindenburg's term. 9. Dr. Brüning announced that it was impossible for Germany to continue political payments. 11. Herr Hitler rejected proposal to allow President new term of office without an election. 13. Ex-Queen Sophie of Greece died

at Frankfort. **16.** Hitler called upon Dr. Brüning to resign Chancellorship. **Feb. 14.** Fascists called upon President to dismiss Dr. Brüning under threat of Hitler standing in opposition in Presidential election. **15.** Marshal von Hindenburg refused and definitely decided to offer himself for re-election. **22.** Government and Reichsbank decided on great reorganisation of banks involving heavy reductions of capital. Hitler decided to oppose Marshal von Hindenburg in Presidential election. **March 6.** Prince Auguste Wilhelm, ex-Kaiser's son, spoke at Cologne in support of Hitler's candidature. **13.** In Presidential election Marshal von Hindenburg obtained large majority with Hitler second on the poll, but failed to secure absolute majority over other candidates. **April 2.** Ex-Crown Prince announced publicly he would vote for Hitler in second ballot. **10.** On second ballot, Marshal von Hindenburg re-elected President by **19,359,642** votes to Hitler's **13,417,660**, the Socialist, Thaelmann, polling **3,705,382**. **13.** President ordered forcible dissolution of Hitler's army, and their barracks were entered by police. **24.** In the Prussian State elections, the Hitlerites headed the poll, but not sufficiently to place them in power without allies. **May 12.** General Groener, Minister of Defence, resigned that office. **22.** Herr Baumbach's cabinet in Prussia resigned. **25.** Fight occurred in Prussian Diet between Hitlerites and Communists, several deputies being injured. **30.** Dr. Brüning and his Cabinet resigned. **31.** Herr von Papen nominated as Chancellor. **June 3.** President signed decree dissolving the Reichstag, Germany being meanwhile governed by decrees. **9.** Hitler fined **£50** for contempt of court and unseemly behaviour as witness in a Munich court. **14.** Increased taxes and cuts in pensions and out-of-work benefit decreed by new Government in order to balance the Budget. **15.** President raised the ban on Hitler's private army. **July 17.** Hitler opened his electoral campaign. **18.** As result of street fighting, all open-air meetings and carrying of firearms were prohibited. **20.** Under Presidential decrees, Herr von Papen became State Commissioner of Prussia with dictatorial powers, Prussian Government was dismissed and martial law proclaimed in Berlin. **23.** General von Schleicher, Minister of Defence, declared that if equality in armaments were denied to Germany, the country would look after her own interests. **29.** Foreign Minister informed French Ambassador that these views were those of German Government. **31.** Elections for Reichstag gave Hitler an increased representation **230** deputies against **120**, but he failed to secure majority. **Aug. 1.** Nazi storm troops raided several newspaper offices and private houses, causing considerable damage by bombs. **13.** The President received Herr Hitler and rejected his claim to be Chancellor. Herr von Papen offered Hitler the Vice-Chancellorship, which was refused. **22.** Riots occurred in Beuthen, Silesia, after five Hitlerites had been sentenced to death for murder of Communist. **29.** Herr von Papen, Hitler and General von Schleicher conferred secretly. **30.** After Chancellor had seen President the Reichstag met. **31.** In Note to France, Germany demanded equality in armaments. **Sept. 2.** Death sentences on the five Beuthen Hitlerites commuted to imprisonment for life. **4.** Chancellor, most of the Ministers, and ex-Crown Prince attended demonstration at Berlin of nearly **200,000** Steel Helmets, who

oppose the Nazis. **6.** German Foreign Minister declared Germany would not take part in disarmament conferences until question of equality had been cleared up. **11.** Mr. Churchill taken ill with paratyphoid at Salzburg. **12.** Herr von Papen dissolved Reichstag and left the Chamber, after which motions repealing that decree and expressing no confidence in the Government were carried by **513** to **42**. France's reply to German Note rejected plea for equality of armaments, but in conciliatory terms. **14.** The President signed decree, setting up a board for "promoting the fitness of Germany's youth". **28.** Herr von Papen, replying to French Note, declared Germany desired a general lowering of armaments level. **Oct. 12.** Prince of Wales and Prince George were vigorously cheered when they arrived by air at Hamburg for short stay. **14.** Government suspended quota system for foreign agricultural produce. **25.** Supreme Court at Leipzig restored to office the Prussian Cabinet Ministers ejected under the Chancellor's orders, but recognised right of the Commissioner then appointed to administer Prussia.

OTHER COUNTRIES

(1931) **Nov. 5.** Fierce battle between Japanese and Chinese troops at Nomon Bridge in Manchuria. **7.** Japanese obtained complete victory and Chinese retreated. **8.** Fighting broke out in Fientsin and martial law was proclaimed at Peking. **9.** Signor Mussolini announced formation of National State Bank in Italy to finance industry. **18.** Japanese claimed victory in another battle in Northern Manchuria. **20.** Spanish Parliament declared ex-King Alfonso an outlaw and ordered his property to be confiscated. **Dec. 7.** Spanish Cortes ratified the new Constitution. **9.** Chinese authorities declared martial law in Shanghai owing to student demonstrations against Government. Spanish Chamber adopted the Constitution. **10.** Senior Alcalá Zamora elected first Spanish President. **13.** New Japanese Cabinet decided to abandon gold standard. **14.** Marshal Chiang Kai-Shek, President of Chinese National Government, resigned. **18.** Sentence on Galdini, the financier, reduced to one year four months and fine remitted. **21.** Japanese began new advance in South Manchuria and captured several towns. **22.** Chinese Government resigned and ex-President flew to his native village. Part of roof of Vatican Library collapsed, damage to contents being slight. (1932) **Jan. 2.** Japanese troops entered Chinchow, last Chinese stronghold in Manchuria, and continued their advance. **8.** Korean labourer threw bomb at Emperor of Japan while he was driving back to the palace at Tokio, but no damage was done. **18.** Bilbao paralysed by general strike called as result of four Republicans being killed by Carlists. **21.** Following rioting in Shanghai, Japan sent warships and tense situation arose. **22.** Eruption of volcano caused serious damage in several towns of Guatemala. OXFORD AND CAMBRIDGE.

Results.

1923	Oxford won by innings and 227 runs
1924	Cambridge won by 7 wickets.
1925	Match drawn
1926	Cambridge won by 34 runs
1927	Cambridge won by 126 runs.
1928	Match drawn
1929	Match drawn
1930	Cambridge won by 205 runs
1931	Oxford won by 8 wickets
1932	Match drawn

EXOS AND HARROW.

First played 1805. Played 102	Eton won 42	Harrow.
35	Drawn 25.	
1931	Eton won by an innings and 16 runs	
1932	Drawn. Eton 281	226 (5 wickets), Harrow 340

OTHER PRINCIPAL MATCHES.

Winchester beat Eton by 2 wickets
Marlborough and Rugby drawn
Halebury beat Cheltenham by an innings
Clifton and Tonbridge drawn
Royal Navy and Army drawn
Royal Navy beat R A F by 5 wickets
Army beat R A F by innings and 230 runs
Gentlemen and Players, Oval, drawn
Gentlemen and Players, Lord's, drawn

Record Football Attendance.

The record attendance for a football match is 127,307, at the Association International between Scotland and England at Hampden Park on Mar 23, 1924. The largest gate receipts were £27,765 at Cup Final at Wembley Stadium, April 28, 1923, between Bolton Wanderers and West Ham, when 125,047 persons passed the turnstiles, besides many who broke in. Accurate figures were not recorded, but probably the attendance was over 150,000.

MISCELLANEOUS CRICKET RECORDS.

ENGLAND AND AUSTRALIA—TEST MATCH RECORDS.

Highest innings—Australia 720 (6 wickets declared) Lord's, 1930. 600 Melbourne, Australia, 1924. 5, England 636, Sydney, Australia, 1928. 576, Oval, England, 1899. Highest scorer—D. G. Bradman, 334, Leeds, England, 1930. J. Ryder, 201 (not out) Adelaide, 1904. 5, and S. E. Gregory, 201, Sydney 1904. R. E. Foster, 267 Sydney, Australia, 1903. 4. C. P. Mead, 122 (not out) Oval, 1924.

INDIVIDUAL RECORDS.

Highest individual scores, A. E. Stoddart 426, for Hampshire v. Sticks, 1885, in first class cricket in England. A. C. McLaren, 424, for Lancashire v. Somerset at Taunton July, 1895, in Australia. D. G. Bradman (Australia), 452 (not out) for N.S.W. v. Queensland, Sydney 1920. 30.

Highest aggregate innings—Australia, Victoria 1,207 v. N.S.W. Melbourne, 1926, England, Yorkshire 887 v. Warwickshire, 1896.

Record won—Victoria beat New South Wales by innings and 666 runs, Oct. 29, 1926.

Smallest totals—Oxford University (one man absent), 22, v. M.C.C. at Oxford, May, 1877, Northants, 12, v. Gloucester, June 21, 1907.

Highest Aggregate—1929 was scored by New South Wales v. South Australia at Sydney, Jan. 26, 1926. Scores N.S.W. 624 and 593. S. Australia 475 and 259. Next centuries in one season—J. B. Hobbs, 16, next, C. B. Fry (1901), T. Hayward (1906) E. Hendren (1923), P. Mead (1928) and H. Sutcliffe (1928), 13 centuries each.

Most runs made in a year—T. Hayward (Surrey) 3,518 in 1906. T. Hayward exceeded 2,000 runs in 10 seasons, 2,000 runs in May—W. G. Grace, 1895, W. R. Hammond, 1927, C. Hobbs, 1928.

J. B. Hobbs, during 1929 season, beat the record aggregate of 54,896 runs by W. G. Grace in first class cricket. In 1931, Hobbs figures were 57,746. Jack Hobbs first played for Surrey in 1905, and has 23 English seasons, the years 1915-1919 excluded. In 1932 he finished six in the batting averages with 56.23 in 49 innings. His total number of first class centuries to date is 128, also a record.

Highest batting average in England 66.66 D. G. Bradman (N.S.W.), 1930. Best English average 66.66, H. Sutcliffe (York), 1932, beating the old record, 91.23, by Major R. M. Poore (Hampshire), 1892.

CROQUET IN 1932.

Championships—Gentlemen, H. O. Hicks, Ladies, Miss D. D. Steel, Mixed, Lt Col W. B. Du Pré and Miss D. D. Steel.

Open Championships—H. O. Hicks, Mixed, Col C. E. Wilson and W. W. Richards.

Champion Cup—Miss D. D. Steel (24 points), 1, B. G. Klein (13 points) 2.

Ladies' Field Champion Cup—Miss D. D. Steel.

Rochampton Challenge Cup—C. F. Colman.

Reekitt Cup—Mrs W. H. P. Craig.

Isleby Cup—W. R. D. Wiggins (First Division).

Bendon Cup—Capt J. B. Morgan (23 points), 1, B. C. Apps (11 points), 2.

BOWLS CHAMPIONSHIP, 1932.

Single Handled—E. P. Baker (Poole Park) beat E. W. Fortune (St George's, Bristol) at 24.

Pairs—Wellborough (A. H. and G. S. Bull) beat Fiveham (W. Jeffrey and C. Walton) at 14.

Trios—Athenry Southdown (H. Parsons, E. Fudge, J. Pollock, J. Edney) beat Sydney Gardens, Bath (F. Russ, J. Phillips, R. C. Bryant, W. Price) at 13.

County—Northamptonshire beat Surrey, 127-102.

International Bowls Championship.

QUEEN'S PARK, GLASGOW.

Scotland won 3, lost 0, 6 points (1), England, won 2, lost 1, 4 points (2), Wales, won 1, lost 2, 2 points (3), Ireland, lost 3, 0 points.

BADMINTON IN 1932.

CHAMPIONSHIPS.

Mens' Singles, R. C. F. Nichol.

Mens' Doubles, D. C. Hume and R. M. White.

Ladies' Singles, Miss L. M. Kingsley.

Ladies' Doubles, Mrs. M. Barrett and Miss L. M. Kingsley.

Mixed Doubles, H. S. Uber and Mrs. T. Ber.

County, Middlesex.

England beat Scotland 9-0 matches, London.

England beat Ireland 7-2 matches, Dublin.

Cambridge beat Oxford, 13-2 matches.

The Fastest Trains.

The fastest railway speed on record was at the rate of 101 3/4 miles per hour by a G.W.R. train from Plymouth to Paddington on May 9, 1904. The fastest English train leaves Swindon at 3.45 p.m. and reaches Paddington (77 3/4 miles distant) in 65 minutes at an average speed of 72 3/4 miles per hour. The fastest Scottish train leaves Thornhill at 10.13 p.m. and reaches Dumfries at 11.9 p.m. at a speed of 53 3/4 miles per hour. The fastest French train leaves Dublin at 3.15 p.m. and reaches Liverpool at 5.15 minutes at 60 3/4 miles per hour. The Canadian Pacific is second in the regular running record with the 3.50 p.m. from Montreal to Smith's Falls (124 miles in 68 1/2 minutes). The fastest French train is the 10.10 a.m. from Paris (Nord) to Jeumont (147 7/8 miles in 134 minutes) at 66 1/4 miles per hour.

Theatre Records.

Theatre Records.—The longest run at a London theatre is a 238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1916, reached its 1,461st performance on Oct. 27, 1919, and was withdrawn after its 1,468th performance (having brought in £700,000) on July 22, 1920. The "record run" at a London theatre, in pre-war days, was held by *Charley's Aunt* (1,466 consecutive performances). Other long runs are *Our Boys* (1,364), *The Maid of the Mountains* (1,320), *A Little Bit of Plink* (1,242), *A Chinese Honeymoon* (1,072), *Romance* (1,046).

1910	Cambridge	29 34	2 lengths.
1911	Cambridge ..	29 26	2½ lengths.
1912	Cambridge ..	29 31	5 lengths.

* Oxford were waterlogged.

WORLD'S SCULLING CHAMPIONSHIP.

Year	Winner and Country
1900	E. Barry beat A. Felton (N.S.W.)
1901	D.A. Hadfield beat R. Armat (N.Z.)
1902	J. Paddon beat Hadfield (N.Z.)
1903	J. Paddon .. Hadfield (N.S.W.)
1904	J. Paddon .. A. Felton (Queensland)
1905	J. Paddon .. M. Goodsell (N.S.W.)
1906	M. Goodsell .. J. P. McDevitt (N.S.W.)
1907	M. Goodsell .. J. P. Hannan (N.S.W.)
1908	M. Goodsell .. J. Paddon (N.S.W.)
1909	M. Goodsell .. Tom Saul (N.S.W.)
1910	M. Goodsell .. H. A. Barry (Vancouver)
1911	H. A. Barry .. M. Goodsell (Vancouver)
1912 May	E. A. Phelps beat H. A. Barry (Thames)
1913 Oct	E. A. Phelps .. H. A. Barry (Thames)
1914 Sept	E. A. Phelps .. M. Goodsell (Los Angeles)

HENLEY REGATTA, 1932.

Grand Challenge Cup—Leander beat Thames R.C.
 7m 19s
 Ladies' Challenge Cup—Shrewsbury School beat Oriel
 Coll. 7m 40s
 Thames Challenge Cup—London R.C. beat Imperial
 Coll. 7m 42s
 Visitors' Challenge Cup—Jesus Coll. (Cumb.) beat
 Trinity Coll. (Oxford), 8m 22s
 Stewards' Challenge Cup—Thames R.C. beat Berliner
 R.C. 8m 50s
 Wyfold Cup—London R.C. beat Nottingham U.R.C.
 8m 10s
 Silver Goblets—Christ Church (Oxford), beat Gordouli
 B.C. 9m 52s
 Diamond Sculls—H. Buhts (Berliner) beat G. Boetzer
 (Berliner) 9m 15s.

OTHER AQUATIC EVENTS, 1932.

Wingfield Sculls—D. Guye (London R.C.)
 Doggett's Coat and Badge—H. T. Silvester (Hammer
 smith)

AMATEUR PUNTING IN 1932.

Singles—T. L. Hewett
 Doubles—J. A. Urquhart and A. Eason Scott
 Women—Miss I. Padoe.
 Junior—K. Quick
 Professional Punting 1932—F. Barlow.

TENNIS IN 1932.

Amateur Championship—Lord Aberdare
 Open Championship—W. Groom (M.C.C. professional)
 University Matches—Winners, First Strings (Cambridge)
 (S. H. Bastow) Second Strings, (Cambridge) (J. D.
 Whatman) Doubles Oxford (G. E. Cuttis and
 W. D. Evans)
 M.C.C. Prizes—(Gold) Lord Aberdare, (Silver) W. D.
 Macpherson
 Inter-Club Club—Queens Club (Lord Aberdare and
 W. D. Macpherson) beat New York (W. C. Wright and
 J. H. van Allen)
 Bathurst Cup—Great Britain beat America.
 Coupé de Paris—Lord Aberdare.

OXFORD AND CAMBRIDGE.

Principal Events and Winners.

The first Cricket Match between Oxford and Cambridge
 was on June 4, 1867, on Lord's Ground, the result was
 unfinished. Annual contests started in 1838.

In Rowing, Oxford and Cambridge met in 1829 at
 Henley (Hambleden Lock to Henley Bridge, 2½ miles),
 and Oxford won easily in 14 min. 30 sec. The next match
 was in 1836 from Westminster to Putney, and Cambridge
 won in 36 min., but for several years Henley Regatta was
 used for the match. The first regularly annual race on
 the Tideway was in 1856.

The Athletic Sports were instituted in 1864, and the
 first meeting was on Christ Church Cricket Ground
 Since 1865, London has always been the ground.

	First Year	Ox won	Cam won.	Dwn	Wuns 1932	By

WINTER OLYMPIC GAMES, 1932.

LAKE PLACID, N. Y.

SPED SKATING.

	M	S
500 metres, Jack Shea (U.S.A.)	0	43 4/10
1,500 metres, Jack Shea (U.S.A.)	8	57 5/10
5,000 metres, Irving Jaffe (U.S.A.)	9	46 5/10
10,000 metres, Irving Jaffe (U.S.A.)	19	23 6/10

FIGURE SKATING.

Men.—Karl Schaefer (Austria); Women.—Sonja Henie (Norway), Paule-M and Mme Pierre Joly (France).

SKIING.

28 metres Skating, S. Utterstrom (Sweden), 50 metres Skating, V. Saarinen (Finland); Jumping, B. Rund (Norway); Combined (Skating and Jumping), J. Grottnumbrant (Norway).

HOBBSLEIGH.

Pairs—J. H. Stevens, A. Adams, C. Stevens (spare in the team) (U.S.A.); Four—J. T. Plisko, E. F. Eagen, D. C. Gray, J. J. O'Brien (U.S.A.).

HOCKEY.

Canada, 2, U.S.A., 2.

COURSING—WATERLOO CUP.

Year	NOMINATOR.	WINNER.
1925	Mr H Pilkington	Pentonville.
1926	Mr J Jarvis	Jovial Judge.
1927	Mr A Gordon Smith	Golden Seal.
1928	Mrs Sofer Whitburn	White Gollar.
1929	Mr A. Gordon Smith	Golden Surprise.
1930	Mr G Smith	Church Street.
1931	Mr T Cook	Conversion.
1932	Mr M W Ellis	Ben Tinto.

Trotting.—Fastest m. in America, 2 min. 54 sec., by Uhlán, 1913. Fastest pacing m., 1 min. 55 sec., Dan Patch, at St. Paul, U.S.A., Sept. 8, 1906.

At Lexington (Ky.) in Oct., 1928, Peter Manning trotted a mile in 2 min 56½ sec., unpaced and without wind shields, which were used in Uhlán's case. In Aug. 1929, Peter Manning (1926 b.g.) trotted two miles in 4 min 24 sec. Best two-year-olds, McElwain (1929) and Fire Show (1927) a mins. 4 sec.

The British Empire.

AREA AND POPULATION.

Continental Distribution.	English Square Miles.	Estimated Population.
In Europe	121,512	48,000,000
In Asia	1,824,550	333,000,000
In Africa	4,652,000	50,000,000
In North America	3,893,020	9,000,000
In Central America ..	8,600	50,000
In the West Indies ..	12,300	1,730,000
In South America	97,800	314,000
In Oceania	3,300,000	8,000,000
Total	13,909,782	450,094,000

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere.

ETHNOLOGY.—The estimated white population of the Dominions in 1931 was 70,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 380,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS.—Of the total population over 210,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 22,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the British Empire rests, but there are three main principles underlying its administration, viz, self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference*.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Prime Ministers of the various Dominions, at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1911, and in 1907 the title of "*Colonial Conference*" was changed to *Imperial Conference*. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1907 and 1911 the Conference, which was held concurrently

with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923, 1926 and 1930, is as follows:—The Prime Minister and other Ministers of the United Kingdom, (Canada, Commonwealth of Australia, New Zealand, Union of South Africa, the Irish Free State, and Newfoundland), the Secretary of State for India and other representatives of India. The Secretariat of the Conference is provided by the Governments represented.

SELF-GOVERNMENT.—(1) *Great Britain*—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament; and the Judiciary.

(2) *The Indian Empire*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and represents the authority of, Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 145 members (25 official).

(3) *Imperial Dominions*—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is

repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent, by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(a) *Those having Dominion Status* Where "Dominion Status" is enjoyed the executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature of the Dominion. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. Malta, Southern Rhodesia and Northern Rhodesia have "responsible government," but certain powers are reserved.

(b) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Swaziland are governed in substantially the same way, but no power is reserved to the Crown.

(e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia.

(g) *Mandatory Spheres,* where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF-SUPPORT—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central

Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government. Questions affecting general strategical defence are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land and air forces. In the Great War of 1914-1918 the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved. The land and air forces of the Dominions are maintained at the expense of the Dominions concerned. The amounts provided for *Naval Defence* in the estimates of the under-mentioned parts of the Empire for the year 1930-31 are as follows:—Great Britain £51,739,000; Canada \$3,600,000; Australia £1,778,633; New Zealand £675,480 (including £125,000 as a contribution towards the Naval Base at Singapore, and £100,000 interest and sinking fund on account of H.M.S. *New Zealand*); Union of South Africa £78,560. The proportion of expenditure on Naval Defence to the total Import and Export trade of these parts of the Empire is as follows: Great Britain 3·04 per cent.; Canada 0·15 per cent.; Australia 1·06 per cent.; New Zealand 0·77 per cent.; Union of South Africa 0·043 per cent. Per caput of population the expenditure is, Great Britain £1 ss. 7d.; Canada 36 cents; Australia ss. 6d.; New Zealand 9s. 1d.; Union of South Africa (European population only) 10½d. As regards Colonies not possessing responsible governments, contributions to Imperial Defence are paid to the War Office.

THE LEGISLATURE—The Parliament of Great Britain is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretaries of State for the Dominions and Colonies are Cabinet Ministers, their active participation in the government of the nations of the Empire decreasing with the measure of self-government accorded to each. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (*see p. 332*) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a

judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Universities (*see pp. 406-417*) and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and Germany. *Rhodes Scholarships*, of the annual value of £400 tenable at any college at Oxford, are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. The normal number in residence together is about 196, of whom 100 come from the British Empire and 96 from America. *Secretary to the Rhodes Trustees*, The Marquess of Lothian, C.H., 17, Waterloo Place, London, S.W.1. *Oxford Secretary*, Prof. C. K. Allen, M.A., Rhodes House, Oxford.

Statistics issued by the *Universities Bureau of the British Empire* show that the total number of students from overseas attending Universities and Colleges in the United Kingdom at the beginning of the 1929-30 session was 5,486, of whom 995 are from Africa, 1,091 from America, 1,282 from Asia, 794 from Europe, and 344 from the Pacific. The principal figures are India, Burma, and Ceylon, 1,846; United States, 621; South Africa and Rhodesia, 532; Egypt, 366; Australia, 223; Canada and Newfoundland, 233; Germany, 263; China, 143; West Indies, 140; New Zealand, 118; Russia, 64; France, 63; Japan, 61; Netherlands, 46; Poland, 44; Switzerland, 43; Siam, 42; Norway, 32; Hungary, 31; Spain, 30.

The *Davison Scholarships*, established in 1923, have been withdrawn.

The *Prince of Wales's Scholarships* (founded 1932).—Two scholarships tenable for two years at Oxford University by selected students of the University of Buenos Aires, Argentina.

Under *The Commonwealth Fund* (The Fuller Building, 41 East 27th Street, New York, U.S.A.), established in 1928 by Mrs Stephen V. Harkness, there are available for candidates of British descent 40 Fellowships, of an annual value of approximately £500 each, tenable for two years at certain American Universities. They may be awarded as follows:

1. Thirty Fellowships open to men and women, unmarried, under thirty years of age, domiciled in England, Scotland, Wales or Ireland, and graduates of recognised universities therein;

2. Ten Fellowships for (a) candidates from the British Dominions, graduates of a University of a British Dominion or Colony, men or women, unmarried, under thirty years of age, who have studied, but not necessarily graduated, at a British University and (b) candidates who hold an appointment under the British Government, or the Government of a British Dominion, Colony, Protectorate, or Mandated Territory, or the Government of India. They may be single or married, but must not be more than thirty-five years of age on September 1 of the year of award. At least five of these ten Fellowships are open to candidates from the Government Service.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariffs are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. Advances so made and still outstanding are shown under the heading "National Debt" (*see Index*).

Stocks authorised under the Colonial Stock Act 1900 are Trustee Securities, and the price at which some of them may be obtained is shown on p. 657.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and maize, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominions. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Fruit is grown in most of the Dominions and figures largely in the sales of the London Fruit Exchange (Spitalfields). Meat is produced in large quantities in New Zealand, Australia and South Africa. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A.; coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia, chemical and mechanical wood pulp for paper-making is extensively produced in Canada and Newfoundland. Iron ore is found in many of the Dominions, and pig iron is largely produced, tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while 70 per cent of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Guiana, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

CAPITAL OF THE BRITISH EMPIRE—London (England). Population (1921), 8,200,818.

The Chief Magistrates of the following Cities of the British Empire are designated Lord Mayor (in Scotland, Lord Provost)—

*London	Dublin	Newcastle upon Tyne
†Aberdeen	*†Edinburgh	Tyue
*Adelaide	†Elgin	Norwich
*Belfast	*†Glasgow	†Nottingham
Birmingham	Hull	†Perth
ham.	Leeds	Portsmouth
Bradford	Leicester	Sheffield
Brisbane	Liverpool	Stoke-on-Trent
Bristol	Manchester	*Sydney
Cardiff	*Melbourne	*Yok.

* Entitled to the prefix "Right Honourable."

■ CENSUS POPULATION OF THE BRITISH ISLANDS.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1823 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570	4,160,881	1670 . . .	5,773,646
1600	4,811,718	1700 . . .	6,045,008
1630	5,600,517	1750	6,517,035

The first general Census of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

1801.....	16,345,646	1871.....	31,609,899
1811.....	18,509,116	1881.....	35,086,108
1821	20,983,092	1891.....	37,880,784
1831	24,132,294	1901.....	41,609,091
1841.....	26,854,969	1911	45,370,530
1851.....	27,533,755	1921.....	44,769,190
1861.....	29,070,932	1931.....	44,790,485

*. The population of Great Britain and Ireland a month before the outbreak of the Great War was officially estimated at 46,089,249. The number of persons to the square mile was in 1921: England and Wales, 649; Scotland, 164; Ireland (1921), 135.6.

POPULATION ENUMERATED IN GREAT BRITAIN 1811-1931, IRELAND, 1821-1921, AND ISLANDS (ISLE OF MAN, JERSEY AND GUERNSEY AND ASSOCIATED ISLANDS), 1881-1931.

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), which secured annual Parliaments and the equal administration of justice; the *Habeas Corpus Act* (1679), securing the liberty of the person; the *Act of Settlement* (1701), providing for the Protestant succession to the throne; the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911), which enabled the Commons to pass certain Acts without the concurrence of the other chamber; the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act*, 1922.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign.*—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right will, however, enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2. *The Legislature.*—Parliament consists of two Houses, the Lords and the Commons.

(a) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (26) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(b) *The House of Commons*—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies. Practically all persons over 21 years of age are qualified to vote at elections. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies.

3. *The Executive*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (see page 253). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judiciary.*—(a) *England and Wales*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench at the Assizes. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g., the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London, and at the Central Criminal Court ("The Old Bailey," see p. 334) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(b) *Scotland.*—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Judiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 340) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(c) *Northern Ireland*—The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

RELIGIONS AND LANGUAGES.

Religions and Languages.—The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, and estimated figures for 1929 will be found on p. 384. The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts are being made to revive the Gaelic language in the Irish Free State. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 7,069 persons speaking Gaelic only (Ross and Cromarty 3,435, Inverness 3,123, Argyll 335, other counties 176), and 137,149 speaking Gaelic and English at the Census of 1931.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919). The subjects which local bodies administer are, *inter alia*, education, the poor law; public health; police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each Administrative County (under Chairmen), for each City and Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

POLICE.

The strength of the Police force was 58,060 in England and Wales (1930), 6,621 in Scotland (1930), and 2,859 in Northern Ireland (1930). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office. The LONDON POLICE consists of the City Police and of the Metropolitan Police. The City Police district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 337). Although the area is comparatively small, the rateable value is enormous. The night population is 10,896, but the day (or working) population is 436,721. The Force under the Commissioner comprises 1 Assistant Commissioner, 3 Superintendents, 7 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 125 Sergeants, and 983 Constables; also 28 Constables on private service duty. The City of London Police Reserve (Headquarters, Bunhill Row, E.C. 1) numbered 3,266 all ranks in Oct. 1931.

The Metropolitan Police district embraces an area of 447,626 statute acres, with a population of about eight millions. There are within this area fourteen Police Courts (see p. 388). The Force on Sept. 4, 1932, consisted of 32 Superin-

tendents, 740 Inspectors, 2,822 Sergeants, and 16,909 Constables, making a total of 20,502, with 224 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 4, 1932, was 21,129. The gross expenditure of the Metropolitan Police and Metropolitan Police Courts for the year 1931-32 was £8,654,379. On March 31, 1932, there were 14,341 Police pensioners, and 1,486 pensioned widows and 460 children.

CRIME.

(1) Assizes and Quarter Sessions, England and Wales; High Court and Sheriff Courts, Scotland.

1928	162	4.10
1929	103	2.60
1930	122	3.1

Murders in 1930.

In 1930 there were known to the police 75 cases of murder of 86 persons aged over 1 year. In 32 cases (involving 42 persons) the murderer or suspect committed suicide. In 25 cases (26 victims) 26 persons were arrested; in the remaining 8 cases, involving 8 victims (3 of whom had died following illegal operations) no arrest was made. Of the 26 persons arrested there were:—

Discharged at Police Court	1
Insane on Arraignment	4
Acquitted	8
Gilty but Insane	11
Convicted and sentenced to death	12
	36

Death Sentences (1930).

Of the 12 persons sentenced to death in 1930 there were executed 6, commuted to penal servitude for life 6.

Suicides and Attempted Suicides 1927-1930.

	1927	1928	1929	1930
Suicides	4,863	4,846	4,909	4,972
Attempted	2,724	2,804	3,094	3,053

Expenses of Coroners' Inquests (all cases).

	1927	1928	1929	1930
Coroners' Salaries	£86,998	£90,164	£92,126	£94,276

^a "Self-Balancing" Revenue and Expenditure omitted from 1929-30.^b Budget Estimate, (a) April 29, 1932.

THE BUDGET, 1932-1933.

The Budget for 1932-1933 was introduced on April 19, 1932, by the Chancellor of the Exchequer (Mr. Neville Chamberlain). The financial year 1931-1932 ended with a realised surplus of £264,000 (see pp. 258-9). Customs and Excise yielded £3,000,000 more than the Budget figure, but there was a large fall in the yield of Death Duties and Stamps. Income Tax yielded £15,400,000 more and Sm-Tax nearly £4,000,000 more than was anticipated. Mr. Chamberlain estimated the necessary Expenditure for 1932-1933 at £766,000,000 and the Revenue at

£764,300,000. To meet the deficiency of £1,700,000 the Chancellor of the Exchequer reimposed the duty on tea (which was remitted in 1929) at 4d. per lb. (with ad. preferential rate for British Dominions and Colonies) and altered certain of the duties on sugar, molasses, glucose, saccharin and silk. Certain other changes were also proposed in motor vehicle duties. On the revised basis a deficit of £2,800,000 was met by the prospective yield from tea (£3,600,000), and on adjustment there was a prospective surplus of £796,000 for contingencies.

614 CUSTOMS TARIFF OF GREAT BRITAIN AND NORTHERN IRELAND (1932-1933).

I.—IMPORT DUTIES ACT, 1932.

This Act provides that on and after 1st March, 1932, a duty equal to 10 per cent. of their value is imposed on all goods imported into the United Kingdom. The following goods are exempt:—

(a) Goods for the time being chargeable with any customs duty under any enactment other than this Act (see below), except that where composite goods are so chargeable the existing duty is still to be charged and the general ad valorem duty is only chargeable in respect of the amount, if any, by which it exceeds the existing duty.

(b) Goods of any class or description specified in the First Schedule to the Act or added to that Schedule by a Treasury order made in consequence of a recommendation by the Import Duties Advisory Committee. The exemptions specified in the Schedule to the Act are—

Gold and silver bullion and coin; platinum.
Wheat in grain.
Maize in grain.
Meat.
Live quadruped animals.
Fish of British taking.
Whale oil and whale products produced or manufactured in floating factories which are British concerns.
Tea.
Cotton (raw).
Flax and true hemp (cannabaceae); tow of flax and true hemp (cannabaceae).
Cotton seed, rape seed and linseed.
Wool and animal hair (raw); rags of wool not pulled; wool rolls, and wool waste not pulled or garnetted.
Hides and skins (including fur skins, but not including goat skins).
Newspapers, periodicals, printed books and printed music.
Newspaper (that is to say, paper in rolls containing not less than 70 per cent. of mechanical wood pulp and of

a weight of not less than 20 lbs or more than 25 lbs to the ream of 480 sheets of double crown, measuring 30 inches by 20 inches).

Wood pulp and esparto.
Rubber (raw) including crepe, rubber latex, gutta-percha (raw).

Metallic ores, concentrates and residues; scrap metals and wastes fit only for the recovery of metal.
Iron pyrites (including cupreous pyrites).

Copper unwrought, whether refined or not, in ingots, bars, blocks, slabs, cakes and yarns.
Wooden pit-props.

Sulphur.
Mineral phosphates of lime.
Potassium carbonate, chloride and sulphate, kalmite and other mineral potassium fertiliser salts.

Coal, coke, and manufactured fuel of which coal or coke is the chief constituent.

Iron precious and semi-precious stones and pearls.

Radium compounds and ores.
Cinematograph films (that is to say, cinematograph films exempted under the provisions of section eight of the Finance Act, 1928, from the customs duty imposed by section three of the Finance Act, 1925).

Flint, unground.
Boys' beans.

Cork, raw and granulated, cork shavings and waste.

Ramie, not dressed.

Additional exemptions have since been ordered as follows—
Crude Emery, unground.
Mercury.

Argol and other crude tartrates.
Gallnuts.
Kelp.

All articles consigned to any gallery or museum.
Paintings in oil or water colours, pencil and charcoal drawings, and pastels, on canvas or paper (including board).

Roundwood logs of pine, spruce, and aspen in the natural state or free from bark or bast, not hewn or sawn except cross cut at the ends, in lengths not exceeding 30 inches, the top diameter not being more than 24 inches.

Common reeds (phragmites communis), crushed and baled.
Glycol ethers and glycol ether esters.

Bromine.
Crude boron minerals, and concentrates of boracite and nasorite.

Rags, partly of wool, not pulled.

Natural but not terpeneless essential oils: Aniseed, Bois de rose, Brown Camphor, Bergamot, Geranium, Lavender, Lemon, Peppermint.

(c) Goods consigned direct to registered shipbuilding yards.

(d) Goods shown to have been consigned from and grown, produced or manufactured in any part of the British Empire.

(e) Goods imported solely with a view to re-exportation either—

(1) after undergoing a process in the United Kingdom which will not change the form or character of the goods, or

(2) after transit through the United Kingdom, or by way of transshipment.

The Act empowers the Import Duties Advisory Committee to recommend additional duties to the Treasury, who may by Order charge the same. Orders have been made covering additional duties on a considerable number of articles.

II.—UNDER PREVIOUS ACTS.

III.—IRISH FREE STATE (SPECIAL DUTIES) ACT, 1932.

This Act provides for the imposition of Special Customs duties on goods imported from the Irish Free State. Power is granted to the Treasury to make Orders. The goods at present so charged are:—

Live Animals for food, Animals not for food, Butter,	Eggs, Cream, Butter,	Pork, Poultry and Game, Other Meat of all kinds	20 per cent ad valorem from July 25, 1932.
--	----------------------------	---	--

CUSTOMS DRAWBACK.

The Treasury on receiving a recommendation from the Committee to the effect that a drawback of any duties chargeable under the Act ought to be allowed may make an order accordingly.

The drawback may be allowed on the exportation or shipment as stores of goods which are exported or so shipped, either by the importer or by some person who has taken delivery directly from the importer in the same state as that in which they were imported and which have not been used.

The drawback shall be an amount equal to the duty paid.

† British Empire products are either liable to reduced rates or totally exempt

		Estate Duty in respect of agricultural property is to be charged in part on agricultural value at the rates set out in the Finance Act, 1919, in lieu of the above rates.	
		Gifts made by deceased during his life for public or charitable purposes, are charged, unless made more than twelve months before death; other gifts are charged, unless made more than three years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal	

* In cases where the consideration does not exceed £500 and the instrument contains a certificate as required by the Finance (1929-30) Act, 1929, sec. 73 that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration exceeds £500, duty is charged at half the above rates.

expenditure, excepted. Gifts not exceeding £100 in value or amount also excepted.

Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30s and 50s, and are exempt from all other death duties.

Interest at 4 per cent per annum is also payable on the Estate Duty on personally from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 4 per cent interest is charged on all unpaid portions of duty in these cases from twelve months after death

INCOME TAX In the £
The tax is chargeable under five Schedules, A, B, C, D, and E, and the standard rate for the year 1932-33 is 0 5 0

Schedule A : Lands, Tenements, &c.
Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief in respect of the cost of repairs is given under Sch. A to the extent of $\frac{1}{4}$ part of the assessment in the case of lands, and in the case of houses, where the amount of the assessment—
Does not exceed, £40 $\frac{1}{4}$
Exceeds £40, but not £100 $\frac{1}{2}$
Exceeds £100 $\frac{3}{4}$ plus $\frac{1}{4}$ of amount in excess of £100

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance and management in excess of above relief may be claimed. Five years' average taken.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent, or annual value.

Schedule B : In respect of the Occupation of lands used for the purposes of husbandry only, or mainly for those purposes, on an amount equal to the Annual Value, or, by special request, if made before 5th June (5th August in Scotland) in the current income-tax year, on profits of husbandry, as in case of Trades, under Schedule D. In the case of all other lands on an amount equal to one-third of the annual value.

Schedule C : Dividends or Annuities from public revenue (Government Stocks, &c.)

Schedule D : Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E : Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.

LIFE INSURANCE.—Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income, but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £200 in all.

RESIDENTS ABROAD.—No exemption or other relief is given to persons not residing in the United Kingdom. *Exceptions* British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family

DOMINION INCOME TAX.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income

SCHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).

STANDARD RATES OF INCOME TAX.—The Income Tax year is from April 6 to the following April 5. The following were the standard rates for the years mentioned:—

	£ s. d.
1907-8 and 1908-9	0 1 0
1909-10 to 1913-14	0 1 2
1914-15	0 1 8
1915-1916	0 3 0
1916-17 and 1917-18	0 5 0
1918-19 to 1921-22	0 6 0
1922-1923	0 5 0
1923-24 and 1924-25	0 4 6
1925-26 to 1929-30	0 4 0
1930-31	0 4 6
1931-32	0 5 0

SUB TAX.—The Sur Tax replaced the *Super Tax*, which was levied up to and including the Super Tax Year 1928-9 (payable January 1, 1929), based on the statutory income of the year 1927-8). The Sur Tax is in effect a deferred instalment of Income Tax payable on January 1 after the end of the Income Tax year. Thus the first payment of Sur Tax was due January 1, 1930, and was the deferred instalment of Income Tax for the year 1928-9.

Sur Tax for the year 1931-32 (payable January 1, 1933), is at the following rates *plus* 10% of each rate on persons whose total incomes exceed £2,000:—

In respect of the first £2,000.....	Nd.
In respect of the excess over £2,000—	
For every £ of the first £500 of the excess.....	£ s. d. 0 1 0
For every £ of the next £500 of the excess.....	0 1 3
For every £ of the next £1,000 of the excess.....	0 2 0
For every £ of the next £1,000 of the excess.....	0 3 0
For every £ of the next £1,000 of the excess.....	0 3 6
For every £ of the next £2,000 of the excess.....	0 4 0
For every £ of the next £2,000 of the excess.....	0 5 0
For every £ of the next £5,000 of the excess.....	0 5 6
For every £ of the next £5,000 of the excess.....	0 6 0
For every £ of the next £10,000 of the excess.....	0 6 6
For every £ of the next £20,000 of the excess.....	0 7 0
For every £ of the remainder of the excess.....	0 7 6

Notes on Income Tax.

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employed two terms not previously used in connection with the Income Tax, *viz.*, "assessable income" and "taxable income."

"**Assessable Income**" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes.

"**Taxable Income**" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Deduction in arriving at Assessable Income Earned Income Allowance.—The differentiation in favour of "earned" income is made by deducting one-fifth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £300 for any one individual. The "assessable income" of a tax payer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

An allowance is made of one-fifth of the total income (from whatever source) of persons of the age of 65 years and upwards whose total income does not exceed £500. This allowance is granted, in the case of a married couple, where *either* the husband or his wife, living with him, has attained the age of 65 years at the commencement of the year of assessment, but the *joint total* income must in such a case fall within the prescribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption.—Exemption from tax may be claimed where the total assessable income does not exceed £200, or, in the case of an individual whose wife is living with him, £150. Where the income is wholly earned, these limits are equivalent to £125 and £125 *res.* respectively. See above.

Deductions from Assessable Income in order to arrive at Taxable Income.—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." The deductions may be claimed *irrespective* of the amount of the taxpayer's total income.

Personal allowance may be claimed of £100, or, in the case of an individual whose wife is living with him, £150.

Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £150 is increased by a sum equal to four-fifths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) House keeper taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (*see* p. 625) is given or in the capacity of a house keeper or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose.

Deduction in respect of Widowed Mother, &c., taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions, by an *Unmarried Person* who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (*see* p. 625) is given.

Deduction for Children—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £50 in respect of one child, and £40 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £50 a year.

Deduction in respect of Dependent Relatives—A deduction of £25 may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife and incapacitated by old age or infirmity from maintaining himself or herself, or (b) his or his wife's widowed mother, whether incapacitated or not, or (c) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (a) or (b) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income (i.e., that part of the income on which tax is actually charged) apply, *whatever the total amount of the income*. For the year ending Apr. 5, 1932, the first £175 of the taxable income is chargeable at 2s 6d in the £. The remainder of the taxable income is chargeable at the standard rate of tax, i.e., at 5s. in the £.

Relief in respect of Life Assurance Premiums.—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed if the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

100, for $\pounds 50$, or fractional part of $\pounds 50$	0 10 0	3 0 0	6 0 0	
Lease of any kind not specially charged		1 0 0		
Agreement for lease not exceeding 35 years, same as actual lease				

* Section 15 of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money, stock, or security (other than rent), the amount or value of which does not exceed $\pounds 500$, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rent exceeds $\pounds 500$, duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of any property," &c.

The Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent, and that rent exceeds $\pounds 50$ a year.

LEGACY AND SUCCESSION DUTIES.—Also see "Estate Duty."

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of $\pounds 50$, is chargeable.—Except in the cases of small estates, see note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to $\pounds 100$.

Rates of duties payable on legacies, annuities, and residues, and of Succession Duties where deceased died before 1st July, 1898, or where Estate Duty, Finance Act, 1894, is payable.

To Husband or Wife or Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see above)

$\pounds 1$ per cent

Exceptions.—Estates not exceeding $\pounds 15,000$.—Legacies and successions of less than $\pounds 1,000$ ($\pounds 5,000$ in the case of widow or child under the age of 21 of deceased), whatever may be value of whole estate

To Brothers and Sisters of the Deceased, or their Descendants

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants

To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased

Where deceased died on or after 1 July, 1898, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of $1\frac{1}{2}\%$, 4% , 6% , $7\frac{1}{2}\%$, and $11\frac{1}{2}\%$ respectively.

The Husband or Wife is chargeable with Estate Duty and Legacy and Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving without taking or signing a proper Receipt, or not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

LETTERS OF ALLOTMENT AND OF RENUNCIATION Less than $\pounds 5$, 1d.; $\pounds 5$ and upwards, 6d.

GAME AND GUN LICENCES

GAME AND GUN LICENCES—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes, proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds, owners or occupiers, or their servants, killing deer on their own enclosed land, beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unl. s., however, the occupier is himself licensed, he

STATE EXPENDITURE, 1931-32, 1932-33.

The expenditure of the various departments of the State is met from two main sources, (1) supply grants, (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. The Estimated Expenditure given below accounts only for the *net* expenditure, after taking credit for receipts appropriated in aid of expenditure.

THE CIVIL ESTIMATES.

Civil Estimates and Estimates for the Revenue Departments for 1932-33 show a reduction of £7,585,660 on those for 1931-32 (including Supplementary Estimates).

Service	1931-32	1932-33.
Civil Services	£339,451,485	£330,210,320
Revenue Depts.	70,163,280	71,817,785

£409,614,765 £402,028,105

The Civil Estimates are divided into 9 "Classes," as shown below.—

CLASS I: CENTRAL GOVERNMENT AND FINANCE

Principal Items—	1931-32	1932-33
House of Lords Offices ..	£52,799	£52,695

Total . . £18,100,000 £17,400,000

LOCAL GOVERNMENT FINANCES.

In addition to the State Revenue and Expenditure large amounts are received and expended by Local Authorities in Great Britain. The estimated total collected from ratepayers and expended by Local Authorities being —

Service	England & Wales (1929-30)	Scotland (1928-29)
Poor Relief ..	£31,800,000	£4,858,000
Education ..	36,900,000	5,307,000
Police	10,300,000	1,073,000
Other	89,500,000	10,660,000
Total ..	£168,500,000	£21,918,000

The gross rental of Rateable Hereditaments in England and Wales in 1927-28 was £378,284,347 the rateable value being £278,382,812, and the assessable value under the Agriculture Rates Act 1923, £258,879,292.

Payments to Local Taxation Accounts.

In the financial year 1930-31 England and Wales received £295,832, and Scotland received a total of £30,898.

LOCAL GOVERNMENT DEBTS.

In addition to the National Debt there are considerable amounts outstanding as Loans of Local Authorities. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, tramways, waterways and other purposes. On March 31, 1929, there were outstanding loans in England and Wales to the amount of £1,174,084,992, against the total the sum of £67,625,546 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capitalized annuities in Scotland (on March 31, 1928) was £129,975,721, and in Northern Ireland (on March 31, 1928) £16,952,588.

* Scottish figures from 1924 onwards include destitute able-bodied unemployed, 1924-1926, 119, 1927-1928, 20,621, 1929-1930, 113,979, 1931-1932, 957, 1933-1934, 290, 1935-1936, 247, 1937-1938, 73,956, 1939-1940, 51,480.

National Taxation Compared.

The taxation per head in Great Britain and Northern Ireland for 1932-33 was £15 12s. 0d. This compares (approximately) with the following figures:—

Country	Per head
Great Britain (1932-33)	£15 12s. 0d.
France (1931-32)	Francs 1176
Germany (1931-32)	Reichsmarks 243.45
U.S.A. (1932-33)	Dollars 24.50
Italy (1931-32)	Lire 414

Taxation per head, U.K.

	1929-30	1930-31.
Direct Taxes	£424,166,000	£462,781,000
Indirect do.	222,615,000	240,907,000
Per head ..	£14 15s. 10d.	£16 7s. 1d.

Wage Levels Compared.

The level of real wages, i.e., money wages expressed in terms of food-purchasing power, is approximately as follows (Ministry of Labour Gazette, 1920-30):—

Great Britain	100
Germany	74
France	59
Belgium	50
Italy	45

Social Services Compared.

The cost per head of the population for the five social services of unemployment, health, workmen's compensation, old-age pensions, and Poor Law relief, was in 1924 approximately as follows (Report of Royal Commission on Health Insurance, 1926):—

Great Britain	100
Germany	48
France	17
Belgium	7
Italy	4

COST OF THE CIVIL AND SOCIAL SERVICES.

The cost of the Civil Service forms only a small part of the expenditure of £330,000,000 under the Civil Estimates, and extends to the Army, Navy, Air and Revenue Department votes. Adding these services, the estimates for 1932 account for 344,000 civil servants in receipt of salaries, wages and allowances of £71,000,000. The corresponding figures for 1909 were £15,000 and £84,000,000. The number employed has thus increased by 60 per cent while the average remuneration (making some allowance for employees not enumerated) has risen from about 40s to 75s weekly. It should be understood that these averages cover the whole range of employees, from office cleaners to heads of departments with cabinet rank.

The following table gives a detailed comparison for the several services —

Class.	Expenditure (in £)		Number Employed		Salaries, Wages and Allowances	
	1909	1932	1909	1932	1909	1932
Civil—	£ 000	£ 000			£ 000	£ 000
Great Britain ...	35,035	327,022	17,566	70,657	4,870	20,852
Ireland	5,035	3,188	15,036	331	1,643	126
Revenue—						
† Post Office ...	18,978	59,188	166,948	236,438	13,524	38,572
Inland Revenue	1,243	7,300	3,377	18,540	1,050	6,979
Customs and Excise	2,130	5,330	8,157	11,837	1,643	4,624
Defence—						
War Office	593	810	2,638	1,802	591	855

Air Ministry ..		645		1,535		653
	63,392	404,587	215,226	344,004	23,696	70,756

* Including amounts (mainly in Civil and Inland Revenue Offices) for which employees are not enumerated—1909, £1,254,000, 1932, £3,384,000

† Not borne by taxation, but recovered in charges to public

‡ Civil Administrative Departments only

Of the increase of £340,000,000 in expenditure, less than £50,000,000 represents salaries and wages. The period reviewed covers the introduction of many costly social and post-war services. Following are some of the principal items of increased expenditure —

Grants to Local Revenues —

"Derating"	£51,520,000
Education and Teachers' Pensions ..	35,287,000
Police	11,083,000
Housing Grants	15,329,000
Unemployment—Insurance payments and grants ..	62,976,000
Health Insurance—Payments to Fund ..	6,443,000
Old Age Pensions.....	31,028,000
Widows, Orphans and Old Age Contributory Pensions ..	11,000,000
War Pensions	45,240,000
Sugar Beet Subsidy.....	2,400,000
New Administrative Departments (Labour, Health, Pensions, Transport, Mines, &c.) less expenditure of old departments superseded) ..	8,527,000

£280,833,000

INCREASE IN LOCAL EXPENDITURE.

EXPENDITURE OF LOCAL AUTHORITIES IN ENGLAND AND WALES UPON CHIEF SERVICES IN THE PRE-WAR YEAR 1913-14 AND IN THE POST-WAR YEARS 1926-27 AND 1927-28.

Services	1913-14	1926-27	1927-28
Elementary education	£26,350,000	£59,825,000	£59,825,000

FIRE LOSSES.

The cost of losses from fire in Great Britain and Ireland in 1928 was estimated at £8,671,000, in 1929 at £11,784,000, in 1930 at £9,216,000, and in 1931 at £7,945,000. The lives lost through fires in 1929 was 798. The cost in London (1930) was estimated at £666,778, and the lives lost in London fires (1930) numbered 69.

THE NATIONAL DEBT.
AGGREGATE GROSS LIABILITIES, 1931 AND 1932.

Description.	March 31, 1931. £	March 31, 1932. £	Increase + Decrease -
Funded Debt	1,425,024,316	1,467,075,541	+ £42,051,225
Terminal Annuities	11,999,650	11,719,080	- 280,570

* Exclusive of Sundry Contingent Liabilities which the State is not likely to be called upon, to any material extent, to discharge.

† Exclusive of Debts due from British Dominions and Foreign Countries, £2,252,814,000 (1930), £2,222,833,793 (1931), and £2,330,994,281 (1932).

Gross Total of the National Debt.
(1931 and 1932.)

On March 31, 1931 and 1932, the aggregate National Debt consisted of the following totals:—

	1931	1932
External Debt ..	£1,066,662,363	£1,090,836,656
Internal Debt ...	6,463,010,103	6,466,569,175
Other Liabilities	169,591,036	214,007,146
	£7,699,263,502	£7,771,412,977
<i>Deduct</i>	116,363,841	123,462,951
	£7,582,899,661	£7,647,950,026

Cost of the Debt.

(Financial Year 1931-32.)

Interest—

On Funded Debt	£48,116,858
On Terminable Annuities ..	429,793
On Unfunded Debt	239,042,415

Total Interest	£287,588,976
Management and Expenses ..	1,903,238
New Sinking Fund	32,507,786

Total Cost... .. £322,000,000

The Internal Debt.

The Internal Debt consists of the *Funded Debt* ("The Funds"); of the Capital Liability in respect of *Terminable Annuities*, and of the *Unfunded Debt*. On March 31, 1932, the Internal Debt amounted to:—

<i>Funded Debt—</i>	
2½% Consols	£276,198,797
2½% Annuities	2,399,679
2½% Annuities ...	21,120,357
3½% Conversion Loan	750,318,719
4% Consols	403,392,119
To Banks of England & Ireland	13,645,869

Total Funded Debt..... £1,467,075,541

Terminable Annuities—
Estimated Capital Value ...

£11,719,080

Unfunded Debt—

Treasury Bills ..	£604,455,000
Ways and Means Credit ..	7,500,000
4½% War Loan (1925-45) ..	12,804,342
5% " " (1929-47)†	2,084,994,086
4% Funding (1950-90) ..	370,952,309
4½% Conversion Loan (1940-44)	372,975,208
5% Conversion Loan (1944-64)	323,047,502
4% Victory Bonds ..	332,522,445
Treasury Bonds ..	494,246,566
National Savings Certificates	378,874,880
4% National Savings Bonds ..	3,649,226
Other Debt ..	1,753,050

Total Internal Unfunded Debt £4,987,774,614
 Total Internal Debt £6,466,569,175

The External Debt.

The Debt payable abroad was stated at the following totals on March 31, 1932:—

Foreign Credits —

France (For 2,500,000,000) ..	£20,127,204
U.S.A. (\$20,000,000) ..	4,109,589
U.S.A. Government Loan ..	903,698,630
U.S.A. 5½% 20 Year Bonds (1937) (\$136,333,500) ...	28,013,733
<i>Loans from Allied Governments —</i>	
France ..	253,500,000
Russia ..	260,000,000
Italy (repayable by instalments commencing Sept. 15, 1928†) ..	21,387,500

Total External Debt £1,090,836,656
 Total Debt £7,557,405,831

* These sums, on which no interest is payable, may be regarded as available to be set off against debts owed by the same Governments to this country.

† Repayable without interest by instalments commencing Sept. 15, 1928, but under the *Moratorium* proposed by President Hoover these payments were suspended as from July 1, 1931.

‡ Converted July 1921 into 3½ per cent. Converted Loan.

OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices &c. On March 31, 1932, these liabilities stood at £214,007,146, an increase of £44,416,110 upon the total for the previous year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates.

Loans Guaranteed by British Government.—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1932, to be as follows:—
 Turkish Loan, £1,459,570; Egyptian Loan, £3,750,400; Greek Loan, £2,436,800; Mauritius Loan, £600,000; Transvaal Loan, £16,826,200; Sudan Loan, £11,456,400; Welsh Church Loan, £1,965,942; Local Loans, £429,196,622; Irish Land Purchase Stock, £151,063,794; Ulster Savings Certificates, £1,376,482; 2½ per cent. of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tobacco monopoly; Palestine Loan, £4,397,673; Tanganyika Loan, £2,045,078; and Nyasaland, £2,000,000.

Unrepaid Advances—Against these Guaranteed Loans may be set the amounts remaining unpaid on March 31, 1932, on account of Advances made by Great Britain to various Governments, viz.:—Cote, £40,000; Kenya and Uganda, £5,502,592; Uganda, £760,872; Nyasaland, £1,038,983; Persia, £245,000; Nauru and Ocean Islands, £1,708,147; Tanganyika, £3,003,576; Somaliland, £209,000; Northern Rhodesia, £103,000; Transjordan, £14,987; Swaziland, £107,500; St. Lucia, £5,000; Dominica, £77,845; Nigeria, £865,568; British Guiana, £370,000; Antigua, £21,500; St. Kitts-Nevis, £10,000.

The Sinking Fund.

Reductions in the Debt by means of a sinking fund were first made in 1875 by Sir Stafford Northcote, who set up the *New Sinking Fund*, consisting of the balance of the Annual Charge after providing for interest and cost of management. That term was afterwards applied to the fund set up by Mr. Baldwin in 1923, but has again been transferred to the 1928 Fund. The *Old Sinking Fund*, was the application of the surplus revenue of any year for the redemption of debt when so determined by Parliament. Debt reduction is also made by means of *Terminal Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable, and by means of the following Funds:—

1. *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged, £4,221,623.

2. *Funding Loan Sinking Fund*, £3,451,407 applied in cancellation of Debt in 1931-32.

3. *3½ per cent. Conversion Loan Sinking Fund*, £15,302,181 applied in purchase and cancellation of £19,560,872 in 1931-32.

4. *4 per cent. Consols Sinking Fund*, under which £10,077,474 was applied in cancellation of £11,402,948 in 1931-32.

5. *Other Sinking Funds*. Issues from the *Consolidated Fund*, £90,765 applied in Debt reduction in 1931-32.

6. *Depreciation Fund*, under the Finance Act of 1927, by which sums are issued by the Exchequer and are applicable to the purchase for cancellation of 5 per cent War Loan 1929-47 at a price below 95, and of 4 per cent. War Loan 1929-42 at a price below par (£128,008,741 of 5½ Stock and £21,936,500 of 4½ Stock had been so purchased up to March 31, 1932.)

7. *Payments for Death Duties*, under Section 3 of the War Loan Act, 1919, amounting at March 31, 1932, to £8,322,205 cash and £124,467,266 securities.

National Debt Redemption Fund.

This National Fund (of which Messrs Baring Brothers and Company, Ltd., 8, Bishopsgate, E.C.2, are the Trustees) has no connexion with the Government—it is a purely voluntary movement to lighten the debt burden of posterity, but not that of the present generation unless there is an unreamed-of accession of funds. It was the expressed hope of the original donor that his contribution should serve as the nucleus of a very large fund. The Fund was constituted on November 10, 1927, with a gift of £499,878 4s. 11d. and forty-seven persons added £12,705 8s. 11d. in the following year. There is also a further sum of £5,000 that will pass to the Fund at the conclusion of certain life interests. The audited balance sheet, as at December 31, 1930, shows the following net additions during the year:—Donations £205 7s. 7d., profit on investments realised £3,660 or 5d., and income £41,838 8s. 11d. The amount of the Fund on the 31st December, 1930, was £620,465 5s. 6d. Under the provisions of Clause 30 of the Finance Act, 1928, the Fund is exempt from Income Tax.

Estimated Assets.

Against the External Debt of £1,090,836,646 owing on March 31, 1932, may be set the amounts owing to Great Britain by certain of the British Dominions, and by various Countries in Europe. The amount owed to Great Britain far exceeds the External Debt, and the total Assets have a nominal value of £2,535,418,811.

The amounts remaining unpaid, and the estimated value of Investments made by the British Government in various Loans and Undertakings, are shown below (as on March 31, 1932):—

Dominions and Colonies.

(a) Australia	£79,724,220
New Zealand	26,191,109
South Africa	7,500,000
(b) Trinidad	426,492
Newfoundland	400,000
Jamaica	52,950
	<hr/> £114,294,771

In addition, there is a liability, not yet determined, on the part of the East African Colonies and Protectorates, in connexion with the cost of military operations in East Africa.

(a) Australia has been granted an option for a period of two years from April 1, 1931, to postpone sinking fund payments.

(b) Now being repaid by means of Annuities.
 In conformity with the principle of the *Moratorium* proposed by President Hoover, payments due from July 1, 1931, to June 30, 1932, have been suspended in the case of Australia, New Zealand, Newfoundland and Jamaica.

REPARATIONS PAYMENTS.

The following payments were fixed as due from Germany —

- (1) By the *Reparations Commission*, 1921 — £6,600,000,000 within 30 years, equal to 30 annual payments of £220,000,000.
- (2) Under the *Dawes Plan*, 1924 — Average annual payments of £125,000,000
- (3) Under the *Young Plan*, 1929 — Average annual payments of £100,000,000

£625,000,000 had been paid by Germany up to the date of the *Moratorium* proposed by President Hoover in 1931

From 1921-1929 the payments were shared in 92 parts, as under —

France	52
Great Britain ..	22
Italy	10
Belgium	8

From 1929-1932 a further allocation was made in 230 parts, as under —

France	130
Great Britain ..	55
Italy	25
Belgium	20

From 1932-1963 the allocation was to have been in 276 parts —

France	156
Great Britain ..	66
Italy	30
Belgium	24

As from July 1, 1931, President Hoover suggested to all creditor nations a *moratorium* of 12 months in War Debt payments (capital and interest).

At the *Lausanne Conference* representatives of Great Britain, France, Italy, Belgium and Germany reached agreement on July 8, 1932. Under the agreement (a) Reparations are cancelled, (b) Germany makes an eventual payment of £150,000,000 by means of bonds as from the year 1935. The bonds are deposited with the *Bank for International Settlements*, and may be marketed from 1935-1947, under certain safeguards for German credit, at a price not below 90. They bear interest at 5 per cent, with 1 per cent amortisation, which will extinguish them in 37 years. This agreement became known as *The Gentlemen's Agreement*.

Payments due to Great Britain.

On July 14, 1932, the Chancellor of the Exchequer (Mr. Snowden) circulated a written reply to a question asked in the House of Commons:—

I am circulating with the Official Report a detailed statement of the inter-Governmental payments due to His Majesty's Government in the year July 1, 1931, to June 30, 1932. It is not possible at this stage to give a statement of the

debts which will actually be suspended, as this will depend on the acceptance of President Hoover's proposal by the other Governments concerned and the arrangements finally made to give effect to that proposal.

Inter-Governmental Debts due to the United Kingdom in the year July 1, 1931, to June 30, 1932:—

Germany (Reparation)	£14,442,000
France (War Debt and Hague Annuity)	13,314,000
Italy (War Debt and Hague Annuity)	4,471,000
Belgium (Hague Annuity and Reconstruction Loans)	1,042,000
Rumania (War Debt, Relief Debt and Repatriation of Prisoners of War)	469,000
Portugal (War Debt)	350,000
Yugoslavia (War Debt and Relief Debt)	459,000
Greece (War Debt and Loan for Stores)	361,000
Poland (Relief Debt, Repatriation of Prisoners of War and cost of occupation of Upper Silesia Plebiscite area)	600,000
Estonia (Relief Debt and Loan for stores)	70,000
Austria (Relief Debt)	107,000
Latvia (Loan for Stores, and Repatriation of Prisoners of War)	75,000
Lithuania (Loan for Stores, and cost of occupation of Plebiscite area)	33,000
Czechoslovakia (Repatriation of Prisoners of War)	106,000
Australia (War Debt)	3,920,000
New Zealand (War Debt)	1,746,000

* Not including £1,628,000 previously postponed in respect of the principal of the Australian Debt

South Africa (War Debt)	£1337,000
Newfoundland (War Debt)	21,000
Trinidad (War Debt)	28,000
Jamaica (War Debt)	3,000
India (War Contribution)	836,000

£42,790,000

Payments due from Great Britain.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at \$4,604,128,085, of which \$4,128,085 was to be repaid at once in cash and the balance funded at 3 per cent. for 10 years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent in 62 years. Interest is payable on June 15 and Dec 15 in each year at the rate of 3½ per cent. for the first 10 years, and 4 per cent. thereafter, to include the sinking fund. A "Table of Total Indebtedness of Foreign Governments to the U.S. Treasury, July 1, 1930" (see below) shows a "Funded Indebtedness" from Great Britain of \$4,328,000,000 at that date, a decrease during the twelve months since July 1, 1929, of \$28,000,000.

In proposing the revised Budget (Sept. 10, 1931) Mr. Snowden stated that the Hoover Plan reduced the Debt interest paid to the United States by £13,500,000 for this year and also the provision required for redemption of the Debt to the United States by £5,750,000.

† South Africa has expressed the wish to make this payment as usual.

EXTERNAL DEBTORS OF THE UNITED STATES.

INDEBTEDNESS OF FOREIGN GOVERNMENTS TO THE UNITED STATES GOVERNMENT ON July 1, 1932.*

Country	Total Indebtedness	Principal payable under Funding Agreements	Amounts postponed and payable under Moratorium Agreements	Unfunded Debts

* This Government has not accepted the provisions of the moratorium.

† Does not include indebtedness of German Government on account of costs of American Army of Occupation and awards of the Mixed Claims Commission in favour of American Nationals and the United States Government, aggregating 1,600,000 Reichsmarks.

WIDOWS' AND ORPHANS' AND OLD AGE (Contributory) PENSIONS.

Insurance on a contributory basis of Old Age Pensions at 6s to the insured and wife, and of Widows' Pensions, was incorporated with the system of National Health Insurance in 1925. Pensions were fixed at 10s a week and the Widows' Pension was supplemented by allowances of 5s weekly for the first child and 3s for each additional child. Orphans were allowed 7s. 6d. each a week. The contribution was

incorporated with the contribution for National Health Insurance (*n.e.*). The Act of 1929 which came into operation early in 1930, extended the right to pensions by conferring benefit on widows of 55 years of age and over whose husbands had died or reached age 70 before the 1925 Act came into operation. A heavy increase in the number of beneficiaries and expenditure resulted as will be seen from the following summary—

GREAT BRITAIN *

Number of Beneficiaries at end of—		1929.	1930.
Widows'	Contributory	212,424	264,217
	Non-Contributory	67,738	267,952

Amount paid		£36,676,000	£1,757,181

GREAT WAR PENSIONS.

FRESH applications for compensation in respect of disablement claimed to be due to service in the Great War can no longer be entertained, since the period of seven years from the date on which the claimant's active service terminated, or the date fixed (August 31, 1921) as the end of the Great War, whichever is the earlier, has now expired in all cases.

While this is the statutory position, it has been made known by announcement in the House of Commons and elsewhere that exceptional cases, in which clear evidence is produced that an ex-service officer or man is suffering substantial incapacity caused by his war service in respect of which for good reason no claim was made within time, will be investigated with a view to the grant of appropriate compensation.

DISABLEMENT PENSION.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury or disease attributable to or aggravated by war service. Such temporary award usually runs for a period of 24 months, and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, 1921 and the Regulations made thereunder. Under that authority a system of final awards was brought into operation, the effect of which was to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

At March 31, 1932, out of some 479,000 pensions in payment to disabled officers and men, about 423,000 were final awards.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at 100 per cent, and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent, the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a private 50 per cent disabled would receive 50 per cent of the full rate of pension and 50 per cent of the full rate of allowances for wife and children (if eligible).

Disablement assessed at less than 20 per cent is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks.

The Great War Pensions expenditure during the year ended March 31, 1932, amounted to about £50,061,000, and for the current year ending March 31, 1933, is estimated to amount to about £47,265,300. This will bring the aggregate expenditure of the Ministry of Pensions since 1917, and of the Service Departments from 1914 to 1917, together, to £1,063,000,000.

RATES OF PENSION.

The following are some of the principal rates of weekly pension for a private soldier 100 per cent disabled, and of pensions or allowances for dependants of a private soldier.—

Private—40s. ; wife's allowance 20s. ; children's allowances—7s. 6d. for first child and 6s.

for each other child ; (if there is no wife, 20s. for the first, 7s. 6d. for the second, and 6s. for each other child).

Widow—over 40 or with children 26s. 8d. ; under 40 and without children 20s. ; allowances for children 10s., 7s. 6d., 6s.

Parents—need-pensions not exceeding 20s. Provision is also made for other dependants.

A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding 20s. a week.

Treatment.

Where a special course of treatment is necessary for a condition of disablement certified to be due to war service the Ministry of Pensions have power to provide it, and if in consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances.

By March 31, 1933, the Ministry of Pensions will have spent on medical treatment and its accessories about £61,330,000, and another £36,520,000 in special allowances to the patients and their families, during the treatment, in addition to their ordinary pensions.

NUMBER OF FIRST AWARDS.

Officers and Nurses.—From the beginning of the War to March 31, 1932, the following awards of retired pay or pension were made to officers (Navy, Army and Air Force) and their relatives, and to Nurses—

Officers	60,764
Widows	12,254
Children	13,442
Other Dependants	8,467
Nurses	2,470

Men's Awards.—The following awards of pensions were made to N.C.O.'s and men (Navy, Army and Air Force) and their dependants from the beginning of the War to March 31, 1932.—

<i>Navy</i> —Seamen and Marines	34,446
Children's Allowances	20,900
<i>Army and Air Force</i> —N.C.O.'s and Men	1,243,487
Children's Allowances	994,898
<i>Widows</i> (Navy, Army and R.A.F.)	260,330
Children of Widows	411,038
<i>Motherless Children</i>	16,465
<i>Other Dependants</i>	418,369

PENSIONS AND ALLOWANCES IN PAYMENT (on March 31, 1932).

The following were the approximate numbers of pensions in payment as at March 31, 1932.—

Officers	23,600
Nurses	990
Officers' Widows	8,375
Children	4,993
and Nurses' Dependants	5,000
Men	454,250
Men's Widows	128,000
Motherless Children	4,000
Dependants	275,200

The following allowances were also in payment as at March 31, 1932.—

Men's Final Weekly Allowances	2,000
Allowances for Men's Wives and Children	223,500
Allowances for Children of Men's Widows, &c.	51,260

Great Britain and Ireland—Health and Unemployment Insurance. 641

NATIONAL HEALTH INSURANCE.

All persons between the ages of 16 and 65 who are employed within the meaning of the National Health Insurance Acts and do not hold certificates of exemption from health insurance are required to be insured for both health insurance and contributory pensions. Certain classes of persons are entitled to be insured as voluntary contributors.

Contributions.—Men 1s 6d, women 1s. 1d a week (Northern Ireland. 1s. 4d. and 11d.) payable by employer, who may recover by deduction from wages—men 9d, women 6d (Northern Ireland, 8d. and 5d.)

Benefits.—Medical benefit and treatment. Sickness benefit, men 15s, women 12s. weekly. Disablement benefit 7s. 6d. weekly, men and women. Maternity benefit 40s. Ordinarily insurance is effected through an approved society, which may use a valuation surplus to provide additional benefits such as dental or ophthalmic treatment.

A useful summary of the provisions of the National Health Insurance Acts, 1924 to 1928, is obtainable from H. M. Stationery Office for 1d.

Following is a summary of National Health Insurance for 1932.—

—	England and Wales	Scotland	Great Britain	North ern Ireland
Persons entitled to benefits —	No.	No.	No.	No.
Men	10,230,600	1,205,400	11,436,000	212,600

Central Departments	940,000	107,000	1,047,000	50,000
Total	5,102,800	529,000	5,631,800	133,000

National Health Insurance Funds (England, Wales and Scotland) at the end of 1932.

Invested with the National Debt Commissioners	£69,998,800
Invested by or on behalf of Approved Societies	55,404,800
Cash at Bank of England	148,000
Cash in hands of Approved Societies and Insurance Committees	2,384,600
Total	£127,788,200

UNEMPLOYMENT INSURANCE.

With certain exceptions all persons between the ages of 16 and 65 who are employed under contract of service must contribute to the Unemployment Insurance Fund. Among the chief exceptions are persons earning more than £450 a year, who are not manual workers, agricultural labourers, domestic servants, established civil servants, teachers in contributory employment, members of the police, and permanent employees of local authorities, railways, and public utility companies.

Contributions—Increased by the National Economy Order of October 1932 to 1s 8d and 1s 6d respectively weekly for men and women between the ages of 21 and 65. The contribution is payable by the employer in the form of a stamp which he must affix to the contributor's unemployment book, but one half the contribution represents the employee's share and may be deducted from wages.

Benefits—The present maximum weekly rates of benefit are 15s 3d. for men and 13s 6d. for women, with an additional 8s. for an adult dependent and 2s. for a dependent child.

The receipts and payments of the Unemployment Fund for the two years ended March 31, 1930 and 1932, were as follows.—

Great Britain.

	Year ended March 31, 1932	Year ended March 31, 1931

SAVINGS BANKS.

Post Office Savings Banks.—On Dec 31, 1931, there were approximately 10,000,000 active deposit accounts in the *Post Office Savings Banks*, with the sum of £289,440,745 due to depositors. On Dec 31, 1930, Government Stock to the amount of £121,561,907 stood to the credit of holders in the books of the *Post Office Savings Banks*. Any sum from one shilling to £500 may be deposited, and interest is allowed at 2½ per centum per annum. There is no limit to the amount which may stand to a depositor's credit, but not more than £500 may be deposited in the course of one year.

Trustee Savings Banks.—On Nov. 20, 1931, there were 2,448,642 active accounts in the *Trustee Savings Banks*. The total assets of the Banks amounted to £290,088,100, which included £122,936,478 due to depositors in the Ordinary and Special Investment Departments, £40,736,104 Stocks and Bonds held for depositors and £6,388,518 representing the accumulated surplus of the individual *Trustee Savings Banks* throughout the country. Information about these Banks and their offices, numbering 504 (principal and subordinate) in November, 1931, can be obtained from the *Trustee Savings Banks Association*, 10 Gray's Inn Square, W.C.2. (Chairman, Sir Spencer J. Portal. Secretary, Oliver H. Horne, M.A.)

Industrial and Provident Societies.

It is not generally known that associations for carrying on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and when so registered enjoy, among other advantages, the privileges of limited liability. In his report the Registrar of Friendly Societies who administers these Acts says—

"A society, established to carry on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and obtain the privileges of incorporation with limited liability, provided that it restricts the holding which any member may have or claim in its shares to £500, and if it carries on the business of banking, that its share capital is not withdrawable."

At the end of 1930, 5,822 societies were registered: they had a total membership of 7,511,408; and their balance sheets showed total assets (omitting inter-society investments) valued at £236,764,000. The societies registered at the end of 1930 were classified by the Registrar as follows.—

Class of Society	Number of Societies	Share Capital	Balance of Undistributed Surplus and Reserve
		£	£
Distributive Trading (Retail)	1,279	112,594,549	17,733,766
Distributive Trading (Wholesale)	11	10,212,623	8,045,919
Productive Trading Clubs	144	1,837,441	1,013,394
Other businesses	2,373	230,745	1,363,288
Land and Housing	304	4,706,309	13,675,572
Agriculture and Fishing	331	2,273,397	916,902
Totals	5,822	133,637,320	43,264,370

Most of the societies registered under the Industrial and Provident Societies Acts are co-operative in character.

Co-operation

Following are some additional particulars relating to 1,371 societies on a co-operative basis engaged in distributive and productive trading for 1931. With a membership of 6,610,000 their retail sales were £207,457,000 on which there was a surplus for distribution of £26,432,000. Of this, £5,057,000 was disbursed as share interest and £19,600,000 as dividends on purchases by retail customers. The sales of wholesale societies amounted to £99,840,000, and of productive societies to £7,132,000 (the sales in these instances were almost wholly to retail societies). The value of goods produced by co-operative societies after deducting cost of materials used was £24,226,000.

The sales of co-operative societies connected with agriculture and fishing for 1930 amounted to £12,606,000.

* A considerable part of the capital of Co-operative Societies is in the form of Deposits and Loans.

SAVINGS CERTIFICATES.

The Certificates were originally put on sale in 1916 and by Aug. 31, 1932, the total number sold was 1,106,718,015, representing a cash investment of £870,984,162, while the amount remaining to the credit of investors (accrued interest included) was approximately £480,000,000.

In January, 1932, the National Savings Movement celebrated the issue of 1,000,000,000 Certificates and His Majesty the King was graciously pleased to accept the special Thousand Millionth Certificate produced in honour of the event.

First Issue (cost price 15s 6d, and ten-year maturity value 26s), Feb., 1916, to March 31, 1922.

Second Issue (cost price 16s, and ten-year maturity value 26s), April 1, 1922, to Sept. 30, 1927.

Third Issue (cost price 16s, and ten-year maturity value 24s), Oct. 1, 1927, to June 30, 1932.

Conversion Issue (cost price 16s and ten-year maturity value 24s), in exchange for First Issue, January 18 to April 30, 1932.

Fourth Issue (cost price 16s and eleven-year maturity value 23s), on sale from August 2, 1932.

First Issue Certificates not converted may be retained until March 31, 1940, with interest after the tenth year at 2d per month per Certificate.

Second Issue Certificates may be held until March 31, 1941, on similar terms.

GREAT BRITAIN AND IRELAND.

Agriculture.

The total land surface of Great Britain and Ireland in 1921 is stated at 76,448,988 acres, the total area under cultivation, pasture and rough grazings, in 1921, was 62,527,000 acres. Of the remainder over 3,000,000 acres were woods and plantations.

Productive Acreage, 1921

Division.	Arable	Pasture	Rough Grazings
England (b)	8,954,000	13,574,000	3,595,000
Wales (c)	628,000	2,127,000	1,721,000
Scotland	3,052,000	1,580,000	9,497,000
Ireland	(a)	(a)	(a)
Isle of Man	60,000	19,000	31,000
Channel Islands	(a)	(a)	(a)

NOTE.—When the yield of wheat per acre differed from the average for the 30 years 1891-1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between 0.1 and 0.5 bushel, the year has been noted as "Slightly above (or below) Average"; when between 0.5 and 1.5 bushels, as "Decidedly above Average" or "Deficient"; when between 1.5 and 2.5 bushels, as "Good" or "Bad"; when between 2.5 and 3.5 bushels, as "Very good" or "Very bad"; and when above 3.5 bushels, as "Extremely good" or "Extremely bad." * From April 1, 1923, the figures of Imports include imports (if any) into Great Britain and Northern Ireland from the Irish Free State, but exclude the direct foreign trade of the Irish Free State.

Production per Acre.

The production per acre of cereal crops, roots and hay in the year of the outbreak of the War, and in 1931, is shown in the following table:—

Crop	England and Wales		Scotland		Ireland	
	1914	1931	1914	1931	1914	1931

(a) Exclusive of Allotments under the Small Holdings and Allotments Acts, 1908 to 1920, or provided privately, of which there were estimated to be 500,000 (1914) and 925,000 (1920) in England and Wales.
(b) Classification for Ireland only.

Fisheries.

The quantities and values of the sea fish of British taking landed in Great Britain and Ireland in 1931 (exclusive of river salmon) are shown in the following table. The total catch was 103,000 tons less than in 1930 (the largest since

the outbreak of the War) and 200,000 tons less than the record catch of 1923. Representing the 1923 catch by 100, the catches during 1926-31 were respectively 81, 86, 85, 89, 92 and 83. The total value in 1931 was £5,503,000 less than in the previous year.

Strikes.—In 1921 there was a stoppage of production for 88 days, ending in a settlement on June 28, 1921. In 1926 there was a stoppage of production for 213 days, from May 1 until Nov. 30.

Home Consumption of Coal.

In a normal year about 200,000,000 tons of coal are available for home consumption. Railway locomotives require about 13,000,000 tons; gas works 17,000,000 tons; coke production 17,000,000 tons, of which about half (with 1,500,000 tons of coal) is consumed by blast furnaces; colliery engines require about 14,000,000 tons, and coal miners receive about 6,000,000 tons; electrical generating stations require about 10,000,000 tons, and coasting ships require over 1,300,000 tons; in addition, about 40,000,000 tons are used for domestic heating and cooking, and over 70,000,000 tons for manufactures. In the six months (Jan.-June), 1931, steamers and motor vessels used 7,055,000 tons of coal and 200,752,000 gallons of oil fuel.

Iron Ore.

The production and importation of iron ore as shown below. Values are not shown, as that of iron ore produced in Great Britain is taken at the place of production, while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in Great Britain in 1930 is stated at £3,100,000; that of the imported ore at £4,280,000.

Year	Tons Produced	Tons Imported.
1913	15,997,000	7,441,000
1927	11,206,871	5,163,793
1928	11,261,873	4,439,885
1929	13,214,976	5,688,934
1930	11,626,831	4,136,928

Production of Pig Iron and Crude Steel.

The quantity of pig iron and steel ingots and castings made is shown below. In 1905 the quantity of coal used in the United Kingdom in the manufacture of pig iron was 19,255,555 tons; in 1927 the quantity was 1,200,000 tons of coal and 8,400,000 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1929 they numbered 162.

N.B.—The above particulars relate to registered trade unions in Great Britain only, and include unions of employers of which there were 86 in 1930 with Funds of £292,036. The total number of Trade Unions, registered and unregistered, in Great Britain and Northern Ireland (employers only) at end of 1930 was 1,098, and their membership was 4,285,000.

Trade Unions and Politics.

Amounts subscribed to Political Funds of Trade Unions and amount of such funds at end of year—

Year	Subscribed	Funds
1927	£170,000	£413,000
1928	159,000	369,000
1929	168,000	412,000

Bankruptcy Statistics.

England and Wales (1930).

The number of debtors adjudicated bankrupts was 4,133, with liabilities £9,063,934, and assets £1,720,515; of compositions 34, with liabilities £223,211, and assets £13,770, of administration orders for deceased debtors' estates 36, with liabilities £231,903, and assets £78,297. In addition, there were 2,154 assignments, compositions, &c., under deeds of arrangement, with liabilities £5,574,535, and assets £2,555,432.

Scotland (1930).

The number of sequestrations in Scotland was 209, with liabilities £500,670, and assets £136,701.

Northern Ireland (1930).

The bankruptcies numbered 53, with liabilities £69,446, and assets £10,666; deeds of arrangement 51, with liabilities £49,981, and assets £23,507; arrangements under the control of the Court 42, with liabilities £73,492, and assets £16,234.

EXTERNAL TRADE (GREAT BRITAIN AND NORTHERN IRELAND).

IN statistics of Trade, the term **GENERAL TRADE** refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term **SPECIAL TRADE** includes only Imports for consumption in the country receiving them, and Exports of home produce or manufacture. Imports are taken at their C.I.F. value (which includes the Cost of the merchandise

and the charges for Insurance and Freight), whereas Exports are taken at their F.O.B. (free on board) value, which includes only the Cost of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded *en route* with Insurance and Freight. They leave the country of origin with an F.O.B. value and arrive with an acquired C.I.F. value.

Postal Traffic.**Average Daily Receipts, 1929-1932.**

The following table (*Board of Trade Journal*) gives the average receipts of the Post Office in Great Britain from postal traffic, per working day, for each month from January, 1929. Telegraph and Telephone receipts, Savings Bank, and Money and Postal Order business are excluded. The value of postage stamps used for receipt stamp and other revenue duties is included. The figures are an approximately correct index of the movement from month to month of the amount of postal traffic handled, expressed in terms of postage, and may be regarded as a reflection of the state of the country's trade.

ROADS AND ROAD VEHICLES.

The total mileage of public roads in Great Britain is approximately 177,000 miles, of which 155,000 are in England and Wales and 22,000 in Scotland. The cost of maintenance, improvement (widening, etc.), and new construction in 1914-15 was £18,800,000, and in 1929-30 £65,469,691. The roads of Great Britain have been classified by the Ministry of Transport, and out of the total mileage of 177,000, 26,500 (approximately) have been included in Class I, and 16,500 (approximately) miles in Class II.

The maintenance and improvement &c. of public roads is within the jurisdiction of the "highway authorities." Under the Local Government Act, 1929, county councils in England and Wales as from the appointed day (April 1, 1930), became the highway authorities for all roads in rural districts and all classified roads (i.e. Class I and Class II Roads) outside the county and metropolitan boroughs, together with the main roads, for which the county councils were already the highway authorities prior to the appointed day. These roads are known as "county roads" and are now a county charge, although district councils in many cases continue to carry out the actual work of maintenance and improvement. The borough and urban councils are the highway authorities for roads other than county roads which lie within their areas. In Scotland under the Local Government (Scotland) Act, 1929, the county councils are the highway authorities in respect of all roads outside the burghs, and in respect of all classified roads in burghs with a population of less than 20,000 except the burgh of Arbroath. All burghs remain highway authorities in respect of their unclassified roads. The Act provides that the functions of the County Council in regard to highways may be partially exercised by Committees or by the Town Councils of small burghs in accordance with an administrative scheme submitted by the County Council to and approved by the Secretary of State for Scotland. The motor licence duties (referred to below) are paid into a Road Fund which is administered by the Minister of Transport. Grants are made from the Road Fund to highway authorities towards the cost of maintenance, improvement and construction of roads and bridges. During the year 1931-32 the grants from the Road Fund amounted to £20,339,371. The bulk of this money was directed to assisting highway authorities in the maintenance and improvement of classified roads and bridges, and the construction of new roads and bridges of classification value. Under the Local Government Act, 1929, the grants hitherto made out of the Road Fund towards the maintenance of classified roads in London and the county boroughs and of unclassified roads in counties have been discontinued as from April 1, 1930, and a sum corresponding to these amounts, together with an additional contribution, is paid out of the Road Fund towards the block grants to local authorities for which the Act provides.

The total gross receipts from the taxation of road vehicles between December 1, 1930, and November 30, 1931, amounted to £27,379,008. The approximate number of motor vehicles licensed during this period was 1,196,100, while licences in respect of private and hackney horse-drawn carriages numbered 41,907. The average

receipt in respect of a whole year licence was £13 17s. 6d. for cars taxed on horse-power, £2 15s. 0d. for motor bicycles, £25 13s. 0d. for internal combustion and steam-driven goods vehicles, £20 0s. 6d. for electric goods vehicles and £48 10s. 0d. for motor hackneys.

Pedal cycles	634	34,025

London and Paris.

In 1931 there were 1,342 deaths from street accidents in London, a decrease of 73 on the total for 1930. In 1930 there were 303 deaths from street accidents in Paris.

BRITISH RAILWAYS.

The length of road (first track) of the railways owned, leased or worked by the Companies formed under Part I. of the Railways Act, 1921, at Dec. 31, 1931, was as under:—

Southernmiles	2,194
Great Western	"	3,804
London, Midland & Scottish	"	6,956
London & North Eastern	"	6,382
Total		19,336

Railways in 1931.

Capital authorised	£1,311,627,653
" created	1,235,355,474
" issued	1,209,053,431

The amount appropriated for the payment of interest and dividend on capital in 1931 was £28,350,533, representing 3.23 per cent upon the total capital. On Ordinary Stock issued the average return was 1.21 per cent.

The number of traffic locomotives were steam 22,325, electric 40, and petrol 8. Passenger carriages numbered 49,764, merchandise and mineral vehicles 68,759, and containers 6,290. The gross receipts from railway working amounted to £170,158,536, compared with £184,836,382 in 1930, a decrease of £14,677,846. On the other hand expenditure on railway working declined from £147,595,684 in 1930 to £136,858,604 in 1931. Ordinary and workmen's journeys in 1931 numbered 1,156,353,189, a decrease of 5 per cent, compared with 1930, while passenger receipts, including season tickets, were reduced by £4,867,050, or 7.39 per cent, the higher ratio of decrease being attributable to the extended use of cheap fares. For the four group companies the receipts from passengers in 1931 were £52,385,031, a decrease of £4,614,763, every item showing a decrease except third-class season tickets on the Southern Railway. On all railways the tonnage of goods and minerals in 1931 was 268,380,148 tons, compared with 264,261,107 tons in 1930, the receipts being £83,856,220, a decrease of £3,746,493. The decision of the Southern Railway to provide third-class passengers on the electrified London Brighton line with accommodation of a standard hitherto regarded as first-class is a reaction to the growing importance of third-class traffic. In 1931 third-class passengers on all the railways made 1,239,600,000 journeys, while first-class journeys numbered only 59,400,000. First-class passengers added to the railways revenue only £6,000,000 as compared with the third-class passengers contribution of £50,000,000.

LONDONERS' MODE OF TRAVEL.

Recorded figures show that in 1931 each Londoner, statistically speaking, made 496 journeys. These were apportioned as follows:—

	No of journeys.
Omnibuses	236
Trams	130
Underground	78
Suburban trains	50
Coaches	2

Total

496

Londoners prefer 'buses to all other means of transport. There are ten 'buses in London to every one that New York possesses. The following figures for 1931 show that the New York Subway and the Paris Metro are patronised by a far larger proportion of the population than is London's Underground —

	All Passengers	Underground Passengers.
London ..	4,066,112,000	641,977,202
New York ..	3,553,934,000	2,105,000,000
Paris ..	1,958,218,000	929,000,000

CANALS.

There are 3,825 miles of canals and canalised rivers in Great Britain (England and Wales, 3,641 miles, Scotland, 184 miles), no additions to the mileage having been made for several years. In 1930 the inland waterways carried tonnage (so far as returns are available) as under:—

	Mileage of Canals.	Tonnage carried
Independent	1,234	11,419,861
Railway owned	1,048	1,693,905
Thames	126	22,897
Caledonian and Crican	70	99,121

Total

2,478

13,235,784

A Royal Commission on Transport reported in 1930 that, in spite of their limitations, canals and inland navigations form a useful component of the national scheme of transport, and that properly rationalised and developed they can be made to render much useful service to the community in the future. The Manchester Ship Canal, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1929 the tonnage carried through the canal was 6,588,559 tons, and in 1930 the tonnage of toll-paying traffic was 6,290,625 tons, and the tolls, dues, &c., £1,395,567.

A The fastest actual start to stop running in Europe over so great a distance.

B Start to pass average.—This train passes Jeumont, the last station before crossing the Franco-Belgian frontier, 127.7 miles from Paris in 134 minutes at an average of 66.1 miles per hour—the highest scheduled speed in Europe over so great a distance. The run marked A, however, is of a lower speed, but the distance is greater.

The highest authentic speed ever recorded was on a journey from Plymouth to Paddington on May 9, 1904—102.3 miles per hour.

In June 1860, the first trip by a new engine with only tender attached, made by Messrs. Laird, Kitson & Co., on the North Midland Railway ran between Belper and Clay Cross Tunnel a distance of 20 miles, in eight minutes, being at the rate of 75 miles per hour.

AIR SERVICES.

IMPERIAL AIRWAYS.

The Air Port of London (Croydon Aerodrome, Waddon—Tel., Croydon, 2046), extended under the Air Ministry's improvement scheme, was opened on May 2, 1928. The cost of the station was about £260,000, and the buildings include hangars, offices, and a hotel with 50 bedrooms.

Fleet—The fleet of Imperial Airways, with the addition of the 8 *Atalanta* type aeroplanes at present under construction by Sir W. G. Armstrong Whitworth Aircraft, Ltd., numbers in all 40 aeroplanes. The new *Atalantas* are specially designed for service in the tropics and will be used on the Africa route; they have a maximum speed of 150 m.p.h. and a cruising speed of 120 m.p.h. The *Heracles* and *Hannibal* classes represent the largest aircraft in the world employed in civil aerial transport; they provide accommodation, with lavatories and refreshment buffets, for 38 and 22 passengers respectively, and are capable of carrying about 1,200 lb of luggage.

Services in Operation—Imperial Airways operate regular services between England and the most important cities of Western Europe, to India, and through Africa. There is also in operation a Mediterranean Sea service in flying boats of the *Scpio* class to Castelrosso, Egypt and the Holy Land.

Services Proposed—

England-Australia—A weekly Air Mail Service between Calcutta and Australia to link with existing mail service between England and India; journey between London and Port Darwin, 11 or 12 days.

Trans-Atlantic—Service between Europe and America via Azores and Bermuda.

GROWTH OF IMPERIAL AIRWAYS.

National Flying Services, Ltd., operated in 1931 a fleet of 42 aircraft. During 1931 the total amount of "paid" flying was 8,522 hours (3,107 instructional, 3,874 private hire, 765 taxi work and 785 short duration passenger flights). The total membership of the clubs averaged 1,284 in 1931, and 530 members held an "A" pilot's licence. The largest clubs are Leicester-shire, with 938 members, and Hanworth (921).

Other Companies—During 1930 over 40 companies or individuals carried out commercial flying, 12 being engaged in air taxi work.

♠ **Financially Assisted Clubs** with a total membership (Dec 31, 1931) of 6,522, an increase of 764 since Dec 31, 1929. Of the total number 1,659 held civil pilot's licences & Now grouped as "National Flying Services, Ltd."

AVIATION RECORDS AND PERFORMANCES.

LONG DISTANCE FLIGHTS.

1890—54 miles, Clement Ader (France) Machine first leave the ground
 1897—328 yards, Clement Ader (France) First Europe flight
 1898—22 miles 227 yards, Orville Wright (U.S.A.) Long distance flight. Same season Wright beat twenty miles (20 1/2 miles), Dayton
 1908—20 miles 922 yards, L. Delagrè (France) First European distance flight
 1908—77 miles 856 yards, Wilbur Wright (U.S.A.) Beat two hours
 1909—L. Bleriot (France) Cross the Channel
 1910—186 miles, L. Paulhan (France) London to Manchester (one stop)
 1911—G. H. Gurnea (U.S.A.), Hydroplane First flight rising from the water
 1911—200 miles, Lieut. Conneau (France) First Great Britain circuit (20 hrs. 20 mins.)
 1912—F. P. Raynham First Britain long distance record (7 hrs. 30 mins.), Brooklands
 1913—530 miles, Capt. C. A. H. Longcroft Without stop with one passenger (Montrose to Farnborough)

1919—Sir John Alcock and Sir J. W. Brown Newfoundland to Ireland, June 24.
 1919—6,250 miles, R. 30 Airship (Commander Major G. H. Scott) Britain to New York and back, July 26
 1919—21,294 miles, Sir Ross Smith and Sir Keith Smith England to Australia, Nov. 22 Dec. 20
 1919—Sir Alan Cobham England to Cape Town and back
 1919—Sir Alan Cobham England to Australia and back
 1919—Hunford and Fitzmaurice First east to west flight, Ireland to Labrador 26 hours April
 1919—First British Air Mail, London to Karachi, April 24.
 1919—Squad. Ldr. A. G. Jones Williams and Flight Lieut. N. H. Jenkins (R.A.F.) England to India without a stop, in 50 hours 38 minutes, April 24 to 26
 1919—Miss Amy Johnson First woman's solo flight, England to Australia, May 6 to 24
 1919—C. Foster and Bellonte First flight Paris to New York, 3,700 miles, in 37 hours, September
 1919—Bismontout and Rossi (France) Ninety hours in the air (over 6,500 miles), 41stres, June 18 to 22
 1919—C. W. A. Scott, London to Port Darwin, Australia (9 d. 3 h. 40 min.), and back to London (20 d. 26 h.) April 1—June 5
 1919—J. A. Mollison, Australia to England (8 d. 20 h. 45 m.) July 26—Aug. 6
 1919—A. C. Butler, England to Australia (9 d. 2 h. 20 m.)
 1919—Squadron Leader Bert Hinkler, Port Natal, Brazil, to Bathurst, British Gambia (first west to east flight across South Atlantic)

1919—J. A. Mollison, England to Cape Town (4 d. 27 h. 30 m.)
 1919—C. W. A. Scott, England to Australia (8 d. 20 h. 44 m.)
 1919—Miss Amelia Earhart, Harbour Grace to London-derry (20 1/2 h. 30 m.)
 1919—Capt. Bennett Griffin and Lieut. James Mattern, Harbour Grace to Berlin (28 h. 40 m., crossing Atlantic in 20 h. 50 s.)
 1919—J. A. Mollison Portmarnock, near Dublin, to Pennfield Ridge, New Brunswick (30 h. 15 m.).

KING'S CUP WINNERS.

1902 Capt. F. L. Barnard Speed, 124 m.p.h.
 1903—Capt. F. T. Courtney Speed, 150 m.p.h.
 1904—A. J. Cobham Speed, 106 6 m.p.h.
 1905—Capt. F. L. Barnard Speed, 120 5 m.p.h.
 1906—H. H. Broad Speed, 90 4 m.p.h.
 1907—W. L. Hope Speed 92 4 m.p.h.
 1908—W. L. Hope Speed 105 5 m.p.h.
 Fastest time Flying Officer S. Summers, 129 m.p.h.
 1909—Flying Officer D. F. W. Atcherley Speed, 150 3 m.p.h.
 Fastest time, D. F. W. Atcherley
 1910—Miss Winifred Brown Speed 108 7 m.p.h.
 Fastest time, A. R. Butler Speed, 120 7 m.p.h.
 1911—Flying Officer E. C. T. Edwards Speed, 177 8 m.p.h.
 Fastest time, Lieut. G. Rodd, 227 5 m.p.h.
 1912—W. L. Hope Speed 124 5 m.p.h.
 Fastest time H. A. Brown, 176 m.p.h.

SCHNEIDER TROPHY WINNERS

1913—45 75 m.p.h. Prevost (France) At Monaco
 1914—88 8 m.p.h. Howard Pixton (Britain) Monaco.
 1915—107 m.p.h. Luigi Bologna (Italy) Venice.
 1916—111 m.p.h. Giovanni Bianchi (Italy) Venice.
 1917—125 7 m.p.h. H. C. Brard (Britain) Naples.
 1918—177 88 m.p.h. Lieut. T. Rittenhouse (U.S.N.), Cowes.
 1919—224 57 m.p.h. Lieut. Doolittle (U.S.A.), Baltimore
 1920—246 495 m.p.h. Major de Bonardi (Italy), Hampton
 1921—261 695 m.p.h. Flight Lieut. Webster (Britain), Venice
 1922—328 63 m.p.h. Flying Officer Waghorn (Britain), Southampton
 1930—1931—No race

SCHNEIDER RECORDS

1909—357 7 m.p.h. Squadron Leader A. H. Orlebar (Britain) Sept. 12 1909
 1911—388 67 m.p.h. Flight Lieut. G. H. Stainforth (Britain) Sept. 13, 1911 Fastest circuit, 408 288 m.p.h.

SHIPBUILDING, 1931-32.

THE total of new tonnage to which classes have been assigned by *Lloyd's Register* during the twelve months ended June 30, 1932, amounts to 263 vessels, of 220,002 tons gross, while the corresponding figures for the year ended June 30, 1931, were 557 vessels, of 1,758,610 tons gross. Plans for 139 vessels, of 258,110 tons, were passed by the Society in the course of the year. These figures are very much smaller than those for the previous twelve months (240 vessels, of 564,280 tons) and are the lowest recorded since 1922. Of this projected tonnage, 60 per cent. (153,800 tons) was intended to be built in Great Britain and Ireland, and 40 per cent. (104,220 tons) in other countries. The countries in which the greater part of the new tonnage classed by *Lloyd's Register*, during the year, has been constructed are shown in the following statement.—

The countries for which the majority of the vessels were built are.—

Country	No of Vessels	Tons Gross
Great Britain and Ireland ..	113	344,025
Norway ..	20	164,177
Netherlands ..	24	105,545
U.S.A.	22	70,158

LIGHTHOUSES.

In 1930-31 the receipts of the General Lighthouse Fund were £976,643, made up of £959,475 Light Dues collected, £4,804 Rents of disused Lighthouses and Sundry Revenue; £7,333 Barges and Mincoy Light Dues, £5,031 Interest on Investments. The total expenditure of the three General Lighthouse Authorities—Trinity House, Commissioners of Northern Lighthouses and Commissioners of Irish Lights—was £822,817, and for Lighthouses Abroad £34,943, the total Ordinary Expenditure being £857,760, leaving a balance of £118,883 to be carried to the Net Revenue Account.

Mercantile Shipping.

On June 30, 1932, the Mercantile Marine of Great Britain and Ireland had a total tonnage of 19,671,675 gross tons, of which 19,561,143 tons were steamers and motor ships, and 109,532 sailing vessels.

Census of Seamen (April 26, 1931).—Total number of seamen employed, 170,257, as under:

Sea trading Vessels,	British	Foreign	Lascars.
Steam	95,454	9,984	45,615
Motor	13,804	1,067	4,013
Sailing	317	3	0
Total.....	109,575	11,054	49,628

The British Fishing Fleet.—On Dec. 31, 1930, the fishing boats belonging to the United Kingdom, Isle of Man and Channel Islands numbered 14,048 (283,387 net tons) of which 5,654 were sailing vessels (22,925 net tons) and 8,394 steam and motor vessels (260,462 net tons).

The estimated number of men and boys employed in sea fishing in 1930 was 59,361, of whom 52,928 were regular fishermen and 6,403 persons occasionally employed in sea fishing.

Wrecks (World).—The total losses of the World's Mercantile Marine in 1930 are stated to be 302 vessels with a gross tonnage of 425,413 as against 499 vessels (604,703 gross tons) in 1929; these losses (1930) include 246 steamers (339,405 gross tons), 14 motor vessels (38,199 gross tons), 37 auxiliary vessels (7,886 gross tons) and 95 sailing vessels (39,923 gross tons).

(British).—In 1930, 31 sailing vessels (1,802 gross tons) and 102 steam and motor vessels (104,451 gross tons), a total of 133 vessels (106,343 gross tons), were totally lost at sea. In 1930 lives were lost through wrecks at sea—from sailing vessels, crew 4, passengers 1, from steam and motor vessels, crew 53, passengers 5—a total of 63. The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of 2,335 included 673 of the crew and 825 passengers on *S.S. Titanic*, in 1914 the total of 1,778 included 171 of the crew and 840 passengers on *S.S. Empress of Ireland*.

Ocean Shipping in British Ports.

TRAMWAYS.

The total mileage of tramways and light railways open in Great Britain on Dec 31, 1930, was 2,232. The total receipts in 1930-31 were £25,281,531, the working expenses £20,467,129, and the net receipts £4,814,402, the total paid-up capital being £29,276,410. 4,394,530,590 passengers were carried.

Under the *London Passenger Transport Bill* promoted in 1931 by the Minister of Transport (Rt Hon Herbert Morrison) it was proposed to transfer the tramway systems in the London metropolitan area to a *London Passenger Transport Board* which would have been given control of all passenger transport undertakings and interests in the London Traffic Area. The Bill was held over at the Dissolution of Parliament.

POSTS, TELEGRAPHS AND TELEPHONES.

The carriage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Jan 28, 1870, the telephone service became exclusively owned and operated by the Government (with one or two minor exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan 1, 1922. The submarine telegraph cables connecting the British Isles with the various Dominions and most Foreign Countries except the Continent of Europe are maintained and operated by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

THE UNION JACK.

Days for hoisting the Union Jack on Government Buildings (from 8 A.M. to sunset)

March 18.—	Birthday of Princess Louise.
March 31.—	Do. Prince Henry.
April 14.—	Do. Princess Beatrice.
April 25.—	Do. Princess Royal.
May 1.—	Do. Duke of Connaught.
May 6.—	Accession of H.M. the King.
May 24.—	Empire Day.
May 26.—	The Queen's Birthday.
June 3.—	The King's Birthday.
June 22.—	Coronation Day.
June 23.—	Birthday of the Prince of Wales.
July 6.—	Their Majesties' Wedding Day.
Nov. 11.—	Armistice Day.
Nov. 26.—	Birthday of Queen of Norway.
Dec. 14.—	Do. Duke of York.
Dec. 20.—	Do. Prince George.

And on the occasion of the opening and closing of Parliament by the King.

The *Royal Standard* is only to be hoisted when the King or Queen is actually present in the building, and never when Their Majesties are passing in procession.

§ And on such day appointed for the official celebration

GENERAL REGULATIONS.

UNPAID PACKETS, except business reply-cards or envelopes, or re-directed parcels, are charged *double postage* on delivery, UNDERPAID PACKETS, *double the deficiency*.

REDIRECTION.—(1) By agent of addressee: *Letters, post cards, printed papers, and newspapers* may be re-posted free not later than the day after delivery (not counting Sundays and public holidays), and must not have been opened or tampered with. *Parcels* may be re-directed free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being for this purpose one Town Delivery Area), otherwise they are charged at the ordinary pre-paid rate. *Registered packets*, which must be taken to a Post Office, are re-registered free only up to day after delivery. (2) By the Post Office (not undertaken during temporary absence, unless house be left empty, nor from clubs, hotels, &c.). Requests for re-direction of *letters, &c.* must be on printed forms, obtainable from the postmaster or postman, and signed by the persons to whom the letters are to be addressed. Re-direction is free for 12 months; thereafter costs 1s. for each surname for second, 1s third, and 5s each subsequent year. Separate forms must be filled in for *parcels*, and for the forwarding of *telegrams* by post (free) or by telegraph.

REGISTRATION.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. *Parcels* (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. Fee 3d. exclusive of postage. Advice of delivery, a further 3d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets; at Head Offices, if open, this may be done later for 6d. late fee. Unregistered packets containing coin or jewelry, or found open (or undeliverable) and con-

taining stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., 10s or more in value, or any marked "registered" and found in a letter-box, undergo compulsory registration (3d.), carrying no compensation.

COMPENSATION for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for compensation inclusive of registration are:—Fee 3d, compensation up to £5, 4d., £20; and 1d. for each additional £20 up to the maximum 1s. 11d. for £400. Compensation up to £2 is given on (a) *unregistered parcels* (for loss, only of certificate of posting is obtained at the time of posting), (b) *unregistered packets* conveyed by Express Delivery Service No (1). Compensation in respect of money of any kind (*coin, notes, orders, cheques, stamps, &c.*) is only given if particulars (for identification) are kept and the money is sent by Registered Letter Post in one of the special envelopes sold officially (see next page); the maximum compensation for *coin* is £5. Compensation for *jewellery, watches, &c.*, is only given on *registered packets*, for eggs, fish, game and rabbits, meat, fruit, and vegetables only when sent as *parcels*. Compensation is not given for damage to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case, (2) fragile articles by registered letter post, unless conspicuously marked "Fragile, with care."

CERTIFICATE OF POSTING unregistered parcels, free, other unregistered postal packets, ½d

EXPRESS DELIVERY SERVICE BY SPECIAL MESSENGER.—There are five services of which (4) and (5) alone are available on Sundays.—(1) All the way, from most offices which deliver telegrams. Inclusive charge, which must be prepaid, in stamps, 6d per mile, or part of a mile, with 1d. on each separate packet after the first, up to ten, the maximum, also a special charge of 3d. on each packet over 1 lb. in weight. Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (2) After transmission by post, at sender's request (a) from the ordinary delivery office, if open for telegraph business (maximum charge in London 6d); or if so marked, (b) "Express Delivery from Head Office" in large provincial towns, and (c) in London "from Head District Office" or "from G.P.O." Packets must be marked "Express," and letters bear a broad vertical line back and front. Charges as for (1) (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) see p 675 (5) Of a message telephoned to an express delivery office (3d. for 30 words besides express and telephone charges).—Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2d.—For Sundays and Holidays, see pp 674-5, and next paragraph.

RAILWAY LETTERS.—An unregistered letter up to 2 oz., taken to a Parcel or Booking Office of most railways while station is open week days or Sundays, is sent off by next train or steamer to a station or port on any of these railways. Fee within Gt. Britain, or thence to Jersey, Guernsey, Jangleas (L.M.), or chief Irish ports, 3d. to other Irish places 4d. Unless marked to be

called for "it is posted in the nearest letter-box at station of address, but (except on Sundays and in I.F.S.) can be delivered Express (from usual office, or first Express office it reaches) under Service *as*, or (by wiring for messenger to meet it at station) under Service *z*.

DISPATCH, or Undelivered Parcel Packets.—Inland packets chargeable with a postage of 1½d. or more, undelivered, are returned to sender without charge, if his address is found either outside or inside. Packets without sender's address or any enclosure of importance are destroyed, except parcels which, if not applied for are generally disposed of after 3 months, or if perishable are dealt with as *unsuitable Parcel Packets chargeable with postage not exceeding 1d.* are redelivered to sender only on payment of a second postage, and if name, address and request for return appear on outside, those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due, printed papers only if return is requested. Magazine Post packets are charged with return postage. For parcels see p. 669.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only).—Any postal packet may be addressed as a rule to any Post Office except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undelivered. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept a month; others, a week, after which they are treated as undelivered (see above), unless bearing a request for return at end of the interval, or some specified shorter period.

Letter Post (see p. 666).

Among prohibitions are offensive or dangerous things, certain kinds of advertisement, eggs, fish, game, meat, fruit, vegetables, and (to I.F.S., I of Man, Channel Is.) dutiable articles.

Post Cards.

Postage (see p. 666). The left-hand half of the address side may be used for correspondence [the same holds for abroad]. Plain cards (minimum size 4 × 3½ in., not thinner than official cards, may also be used both inland and abroad (maximum size 5½ × 4½).

Business Reply-Cards and Envelopes.

Of special design, for licensed senders only. These pay a deposit, and also full normal postage, plus ½d. on each packet returned by their clients: the latter pay no postage.

Printed Papers Post (see p. 666).

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books and other works of a literary character, with or without written dedications, and any other written or printed matter not being in the nature of a letter, e.g., personal news, drawings, paint boxes, photographic prints, engravings maps &c., together with their binding, provided that the materials are those ordinarily used for the purpose and are not brittle or very fragile, and with anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulae not exceeding 5 words or initials, are also admitted (For full conditions see the official Guide.) Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination &c., without breaking, tearing, unguimming, or cutting.

Sample Post (re-introduced).

Restricted to bona fide Trade Samples, without saleable value. Up to 4 oz., 1d.; 6 oz., 1½d.; 8 oz. (maximum) 2d. Size limits, 12 × 8 × 4 in.

Newspaper Post (see p. 666).

For newspapers "registered at the G.P.O."

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that

title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not "registered at G.P.O." or supplements apart from their ordinary publications, may be charged at printed paper, letter, or (with 1d. fine) parcel rate.

Parcel Post

For bulky and heavy matter (see p. 666). The parcel should be marked "Parcel Post," and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender (if underpaid, deficiency plus 1d. fine is collected from addressee). Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel.

A rural postman must accept any inland parcels he can conveniently carry, but (if on foot or cycle not more, without notice, than 11 lb. from one person).

Parcels to or from Irish Free State, Channel Is., or I of Man are liable to customs duty, except in last case, the sender must declare contents when posting, and addressee must pay fees as for Parcels from Abroad (p. 669) if any duty be payable. Addresses in I.F.S. pay 6d. anyhow, on dutiable parcels 3s. or more, unless sender arranges (see 6d.) to pay duty.

Cash on Delivery Service (not to or from I.F.S.).

A sum (Trade Channel up to £40 can, under certain conditions, be collected from addressee and remitted to sender) of a parcel or registered letter posted at a Money Order Office or a parcel exchange by railway. Fees (extra to usual postal or rail charge). For Trade Charges up to 10s. 6d. up to £1.6d., £2.6d.; £3.10d., and for each further £5 or less, 2d., by rail, 3d. more.

Literature for the Blind.

Papers, periodicals and books if printed in special type and subject to certain conditions of posting, marked outside "Blind Literature, with name and address of sender, 1s., 1d., 5lb. 1d., 6lb. 1d. (maximum), 1d. Maximum size, 2 × 1 × 1 ft., or if a roll 30 × 4 in.

STAMPS, ENVELOPES, POST CARDS, &c.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold of the respective values of ½d., 1d., 1½d., 2d., 3½d., 4d., 6d., 9d., 10d., 1s., 2s., 6d., 6s., and 10s. Books of 6 1d., and 6 ½d. stamps, together with (a) 10 1½d. stamps, 2s., (b) 10 1½d. stamps, 3s., or (c) 34 1½d. stamps, 6s. Rolls of 480 or 960 ½d., 1d., 1½d., and 2d. stamps. Stamps may be purchased at most offices between 9 a.m. and 7 p.m., and at any office open for telegraph business. Rural postmen carry ½d., 1d., and 1½d. stamps and registered letter envelopes.

REGISTERED LETTER ENVELOPES for foreign and inland letters, with a 4½d. embossed stamp (for registration and postage), are of four sizes: F, 5½ in. × 3½ in., 6d. each; G, 6½ in. × 3½ in.; H, 8 in. × 5 in.; or H2, 9 in. × 4 in., 5½d. each; K, 11½ in. × 6 in., 6½d. each.

LETTER CARDS with 1½d. stamp: one, 2d.; 2, 3½d.; 5, 6d.

POST CARDS, Inland, with impressed 1d. stamp: Single—thin—one, 1½d.; 2, 2½d.; 5, 5½d.; 11, 1s.; stout—one, 1½d.; 5, 6d.; 10, 1s.; reply—one, 2½d.; 4, 3½d.; 11, 2s.; Foreign (1½d. stamp) Single—one, 1½d.; 2, 2½d.; 5, 6d.; 11, 1s.; reply—one, 3½d.; 5, 1s. 6d.; 10, 2s. 6d.

EMBOSSED ENVELOPES (a) with 1½d. stamp: "A" (4½ × 3½ in.)—1, 1½d.; 3, 2d.; 5, 3½d.; 11, 1s. 6d.; "Commercial" (6½ in. × 3½ in.)—1, 1½d.; 2, 3½d.; 5, 6d.; (b) with ½d. stamp, unguimmed "N" (6 × 3½ in.)—1, ½d.; 2, 1½d.; 5, 6d.

NEWSPAPER WRAPPERS with $\frac{1}{2}$ d. stamp: 1, $\frac{1}{2}$ d.; 2, $1\frac{1}{2}$ d.; 3, $1\frac{1}{2}$ d.; 7, 6d; with 1d. stamp: 1, $\frac{3}{4}$ d.; 2, $\frac{3}{4}$ d.; 3, $\frac{3}{4}$ d.; 5, $\frac{3}{4}$ d.; 8, $\frac{3}{4}$ d.; 11, 1s

Embossed or impressed postage stamps of the present reign, cut out of envelopes, post cards, letter-cards, newspaper wrappers, or telegram forms, may be used as adhesive stamps in payment of postage on telegrams, provided they are not imperfect, mutilated, or defaced in any way

LONDON POSTAL ARRANGEMENTS

London is divided for postal (not telegraphic) delivery purposes into 20 Districts, and these into 228 numbered sub-districts. To avoid delay in delivery, correct initials and number should appear in addresses. The "Head District" of each District is (sub-district) 1 (but of Paddington District is W. 22, and address of its Head Office ("Head District Office") appears on p. 338

East Central (E.C.)	1-4	South Eastern (S.E.)	1-27
West Central (W.C.)	1-2	South Western (S.W.)	1-10
Eastern (E.)	1-10	Western (W.)	1-1
Northern (N.)	1-22	Paddington (W-S-W)	1-4
North Western (N.W.)	1-22	Battersea	1-8 W 22-20

SUNDAY MAILS and **LATE FEES**, &c., see p. 674.

IMPERIAL AND FOREIGN POST.

N.B.—For times of despatch see above

Letters.

The letter rate from Great Britain to British Dominions and Mandates generally (except Iraq and Transjordan), to countries outside the Postal Union (exc. Government of Latakia), to Egypt, Tangier, French India, and Dubai, to the United States and Territories (incl. Hawaii but not Panama zone or island Dependencies), as well as to H.M. Forces in China, and H.M. Ships outside Home Waters (address c/o G.P.O., London, E.C. 1), is $1\frac{1}{2}$ d. the first ounce and 1d. for each succeeding ounce or fraction. The charge to *all other destinations* is $2\frac{1}{2}$ d. the first ounce and $1\frac{1}{2}$ d. per ounce afterwards. Limits of size: *For Foreign Countries* in the Postal Union, except Egypt, $1\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$ ft.; elsewhere, $2 \times 1\frac{1}{2} \times 1\frac{1}{2}$ ft.; but if in form of a roll, limits in all cases $30 \times 1\frac{1}{2}$ in. diameter. Max. weight 4 lb.

Post Cards.

Postage $1\frac{1}{2}$ d. single, 3d. reply. (See also p. 666) Reply Post-Cards must have the heading "Carte Postale avec réponse payée," on first half, and on the second half (valid only to country of origin) "Carte Postale—réponse."

Reply Coupons.

For the purpose of prepaying replies to letters, the larger offices sell coupons exchangeable abroad for stamps representing a minimum foreign or imperial letter-postage. Price valid within the Postal Union, 4d., valid within British Empire only, 2d.

Books, Newspapers, Samples, &c.

(a) **PRINTED PAPERS**: Newspapers, Books, Catalogues, Photographs, Engravings, Music, and other wholly printed matter, $\frac{1}{2}$ d. per a oz. *For Literature for the Blind*, in other respects

* Except Saturday night-Sunday morning

* Muscat, P.O. of Government of Latakia (Syria), are not in the Postal Union
* Hour for late-fee posting Sun. nt.—Mon. m.m. (p. 674)

considered as a Printed Paper, rates abroad are 1/6d. for each a lb. up to 5 lb., 12 lb. (max.), 2 1/2d.

(b) MAGAZINE POST (for magazines, newspapers and trade journals duly registered for such post or for Newspaper Post within the United Kingdom). These packets, which cannot be registered, must be sent to CANADA by direct packet, and thence (or direct) to NEWFOUNDLAND, be packed without a cover, or with cover open at both ends, and otherwise comply with conditions for Inland Newspaper Post (see p. 667). Rate: a 6 oz. 1d.; 1 1/2 lb., 1 1/2d.; and 1/2d. per 1/2 lb. up to 5 lb., 5d.

(c) COMMERCIAL PAPERS: Legal and mercantile documents, MSS, invoices, &c., partly written, 1/2d. per a oz., minimum charge of 2 1/2d. (d) SAMPLES, Patterns (bound pde), and Scientific Specimens, one key, fresh-cut flowers, &c., 1/2d. per a oz., minimum charge, 1d.

(e) SMALL PACKETS, for small articles of merchandise to many countries. 1 1/2d. per a oz., minimum 6d.

Except that a single printed volume may weigh up to 6 1/2 lb., the limits are: (i) to the British Empire, Tangier, and Foreign countries not in the Postal Union (see note p. 668). Size, (a), (b) and (c) 24 x 18 x 12 in., (d) 24 x 12 x 12 in.; weight, 5 lb. (ii) Egypt: (a) and (c), 18 x 18 x 18 in., weight, 4 lb., (d) 24 x 12 x 12 in., weight, 5 lb. (iii) Elsewhere: Size, (a) and (c) 18 x 18 x 18 in., (d) 18 x 8 x 4 in., weight, (a) and (c) 4 lb., (d) 1 lb. (iv) (e) to all places, 18 x 8 x 4 in., 1 lb. If in the form of a roll, the limits of size for (d) are 18 x 6 in. diameter in case (iii), for (a) and (c) 30 x 4 in., (e) 18 x 6 in. everywhere. Wholly unpaid packets are stopped. Regulations as to packing, writing, &c., are much similar to those for inland packets. Small Packets must be easily examinable.

Parcels from abroad.

These are subject to British Customs examination, and duties (with 6d. fee, or 1s. if they exceed 10s.) must often be paid before delivery.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., must be) insured for many countries, but not registered. They are subject to Customs, and contents and value must be declared on special forms, undervaluation or other inaccuracy may lead to confiscation and heavy fines. (Rebate of Customs is given to British goods in parts of the Empire.) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. Packing must be substantial, and sometimes special kinds of packing are insisted upon. Certain articles are prohibited; among them letters nearly everywhere.

Delivery in many countries is only to certain towns, post offices, stations, or customs houses, whence addressee, who is notified of the arrival, must arrange conveyance. A delivery fee is sometimes collected from addressee (5s. cents in U.S.A.). In Belgium France and Spain parcels are mostly delivered by the railway companies. From most countries abroad, an *uninsurable parcel is returned without notice at sender's expense, unless, when posting, he instructed either its abandonment or its delivery to some other address or person in the country.* Warehousing fees and (rarely) the foreign customs duty are sometimes payable, the return postage always.

Limits.—25 lb. parcels over 11 lb. are only accepted at, and for important post offices, for certain countries (e, f, i, i

table below), cannot be delivered Express, and generally may not contain coin, jewellery, &c. Maximum length generally 34 ft., length and girth combined 4 ft., but to Portuguese Timor length 2 ft., length and girth 4 ft.; also to China (other than about 1500 miles from P.O.), but a parcel 6 in. across may be 39 in. long, except to Sinkiang Province, where limits are 1 x 1 x 1 ft.

Imperial and Foreign Parcel Rates.

(With Route, Minimum Duration, and Frequency of Mails)

Parcels for H.M. Ships addressed: In Foreign Waters, c/o (P.O.) London. (i) in Atlantic Fleet, when this appears in address may be prepaid at inland rate, but are then liable to delay, (ii) in other cases, must be prepaid at following rates: b 1/3, c 2/6, d 3/6, e 6/6.

Abyssinia (Addis Ababa Dire Dawa, Harrar only: w France o), a 3, c 5, d 5, e 6/6, Aden (28 d.), Wed 1, b 2, c 3, d 3, f 8/3, Alaska b 4/3, d 12/3, e 2/6, (Albania) 15 d., daily, a 3, c 4, d 4, e 6/6, 7/6, Algeria (Algiers) 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

a = for the first 1 lb., b = for the first 3 lb., c = up to 7 lb., d = between 7 and 12 lb., e = between 12 and 22 lb., f = between 22 and 30 lb. see Limits above. n follows approximate number of mails per month o = as opportunity offers p = for parcels not over 4 ft. in length and girth q = for parcels between 4 and 6 ft. combined, v = odd w = for the first lb. y = for each further lb. up to 25 lb. x = days, z = weeks, m = months.

Turks & Caicos is same as Jamaica. *United States of America* (excluding Alaska, Panama Zone, and Islands), 8 d. to N York, 15 d. to S Francisco, about twice a week), *b* 2/3, *c* 4/6, *d* 6/9, *e* 11/6, *Uruguay* (see d. 6 n), *a* 2/3, *c* 4/6, *d* 5/6, *e* 9/3, *Venezuela* (3 w. 4/3 n), *b* 4/3, *c* 5/3, *d* 5/3, *Verges* (U.S.), *b* 2/3, *c* 5/6, *d* 3/6, *e* 13/8, *Yugoslavia* (daily), *a* 2/6, *c* 3/6, *d* 4/3, *e* 5/3, *Zanzibar* (v Aden), *b* 2/3, *c* 3/3, *d* 5/6, *e* 9/6.

General Regulations: Postage Abroad.

DUTIABLE ARTICLES must be sent as Parcels, Insured Boxes, Small Packets, or, to some countries, as Letters (Green Label system).

REGISTRATION (except for parcels and magazine post) is in force to almost all countries, valuable articles may not be sent in unregistered letters. Fee, 3d. Compensation on registered packets up to £2 is paid for entire avoidable loss while in the custody of a country in the Postal Union (see note † p. 668), if claimed within a year.

INSURANCE (including, except for parcels, REGISTRATION) may be effected on packets to many countries at the following rates—5d for £12; and 2d. for every additional £12 up to 5s 11d. for £400. COMPENSATION up to 20s (32s. if over 12 lb.) may be given on *uninsured* parcels to or from Newfoundland, India and the smaller colonies, Egypt, with many larger foreign countries, except U.S.A., if certificate of posting is produced. Packets containing no articles but valuable papers (banknotes, etc.) or valuable documents (plans, etc.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

INSURED BOX POST.—Jewellery and similar articles (not letters or valuable paper) may be sent in strong boxes by letter mails to some British dominions (e.g., India and New Zealand), Europe (except Norway, Spain and Near East), Argentine, Brazil, China, Egypt (not Sudan), many French colonies, and a few other countries. Postage 2d per oz (minimum 10d.), maximum weight 2 lb., size 12x8x4 in. Customs declarations must be filled in.

CARE OF DELIVERY (Parcels).—A reciprocal service exists between Great Britain and various parts of the Empire and certain Foreign Countries. Fees for collection 4/2d for Trade Charge (amount to be collected) not exceeding £1, with 2/2d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8s 6d.), but in some countries less (e.g., 1,000 francs). Addressee has generally also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not repayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (locally including parcels up to 11 lb.) to or from certain countries or certain towns in the same. 6d. is paid by the sender, the rest by addressee.

MONEY ORDERS.

ADVICE OF PAYMENT: 2d. inland (and to I.K.S.), 3d. for foreign and colonial orders (to certain countries). Payment may be stopped (fee 4d.); or deferred up to 10 days in case of Ordinary Inland Money Orders.

Inland (and I.F.S.) Ordinary Money Orders

The poundage charged is, for sums not exceeding £3, 4d.; £10, 6d.; £20, 8d.; £30, 10d.; £40 (maximum), 1s. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (including Income Tax) if authorising document is produced.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams, and at some other offices.

Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of 2d., and cost of official Telegram of Advice. If the order is to be delivered at payee's address, porternage must be prepaid unless it be in I.K.S.

Ordinary Money Orders Abroad.

These, which are payable in nearly all countries, should be taken out 1 or 2 days before despatch of mail. Poundage, £1, 6d.; £2, 1s.; £3, 1s. 6d., and thereafter 3d. per £1 or part thereof. Limits of amount, £20, £30 or £40. Limit of validity, 6-12 months.

Telegraph Money Orders Abroad.

Only to certain countries, e.g., to Australia, Canada, India and U.S.A., and to certain towns only in others, e.g., New Zealand, South Africa, Egypt and Palestine. Poundage as for Ordinary Money Orders abroad, *plus* cost of official Telegram of Advice (at deferred rate if desired, in most British Possessions), *plus* supplementary fee of 6d. for Newfoundland and foreign countries (Cuba 4s 8d.), 1s. for British Empire, Egypt and Mandates (Canada 6d. if telegram is full-rate).

POSTAL ORDERS.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most British Possessions, Mandates, and Postal Agencies (not Australia or Canada). They are *paid* (but not *issued*) in I.F.S. They are issued, with a counterfoil, for every multiple of 6d. up to 20s., and for 21s. Poundage 6d. to 2s. 6d. 1d.; 3s. to 15s. 1/2d.; 15s. 6d. upward, 2d. The name of payee must be inserted. They must be presented for payment within 3 months from last day of the month of issue, or a fresh poundage will be charged. Adhesive, unperforated British Postage Stamps may be affixed to the face of an order in spaces provided (2 or 3), to increase its value by 1, 2, 3, 4 or 5 pence.

TELEGRAMS.

Inland.

Telegrams may be handed in at a telegraph office, or, if prepaid and enclosed in envelope marked "Telegram," posted (without stamp) or handed to a rural postman. Rate, 12 words or less 1s. (to, from or in *Irish Free State* 1s. 6d.), each further word 1d. The address is charged for. Original or redirected telegrams, or replies, sent on *Sundays* and (exc. Scotland) *Good Friday*, or *Christmas Day* are charged 6d. extra (prepayable). Replies may be prepaid up to 48 words, the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1d. Certified copy 6d., sometimes more. The charge includes delivery within 3 miles (1 in Irish F.S.) of the nearest telegraph delivery office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S. by addressee). Usual hours 9 a.m. to 7 p.m.; larger offices 8 a.m. to 7.30 or 8 p.m. (see below and p. 674). For Sunday and Holidays, see above, below, and pp. 674-5.

ABBREVIATED ADDRESSES registered for £3 per annum, appear gratis in Bell's Directory (S & J Johnson & Co., Fleet Street, London, E.C. 4).

DELIVERY BY TELEPHONE to a telephone subscriber, thus accelerating receipt, (a) if address is telephonic.

SUNDAY AND HOLIDAY ARRANGEMENTS.

ON SUNDAY THROUGHOUT THE U.K. no Parcel
 Post, Money and Postal Order, or Savings Bank business
 is transacted, nor is there any delivery even to callers of
 letters, etc., except by Express Services (a) and (b) below.
 IN LONDON Central Telegraph and Leicester Square
 Offices at 22 o'clock (including those named in the next
 paragraph, or on p. 228²) are alone open (mostly 8 a.m.
 to 9 p.m.) for stamps, telegrams, and stations, chiefly
 8 of the Thames, besides those on p. 672, send tele-
 grams, mostly at train times. The one general collection
 (10 p.m. to 12) is for Monday mails and first London
 delivery. UNREGISTERED letters for Sunday Mails,
 if too late for Saturday collection, must be posted in
 advance at the places and by the times indicated—
 A—Day Mail to Continent. G.F.O. 7 a.m. into fee 2d
 B—Night Mails. (a) No late fee (2) up to times between
 4.15 and (District Offices) 6 p.m., in one of 125 places (in
 all the 128 Sub-districts, except E.C. 3), including the
 24 offices mentioned above (3) up to 3 p.m. at any of the
 termini referred to under (n) (3) below, or St. Pancras or
 Victoria. (4) With extra stamps (late fee) (5) Inland
 (fee 1/2d) at appropriate terminus up to same times (or
 time marked a) as shown on p. 668 (under Late Fees,
 Inland Mails). (6) Abroad (fee 2d.). (7) N. Europe via
 Hook. Liverpool Street Station, 5.15 p.m., (b) France,
 Italy, Switzerland, Spain, Portugal, Algeria, Tunis
 Victoria Station (Brighton Line), 8.30 p.m. REGISTERED
 (to be handed in) Day Mail abroad, Central Tel. Office,
 6.30 a.m., 4d. fee. Night Mails (a) No late fee (at all) (3)
 offices open in evening, up to times between 4.30 and 8.30
 (4) Fee 1d. 4d. at sorting carriages at proper terminus
 up to same times as ordinary letters (except mail
 abroad via Hook) OUTSIDE LONDON all Head Offices
 and most country telegraphic Sub-offices open from
 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams,
 registration, but all town Sub-offices, and most non-
 telegraphic offices, are closed. Many stations send
 railway letters (p. 666), and telegrams at train times.
 There is a collection and night despatch in most towns.

4 No Deferred Rate. See "Reduced Rates (A)," p. 672.
 E—See "Reduced Rates (B)," p. 672.
 c—Constant station charge. See pp. 675-6
 d—See "Deferred Telegrams," (p. 672)
 nu—No "Urgent Telegrams." See p. 672.
 wlt, nlt, dlt, pld, wltz, nltz, etc.—Letter Telegrams.
 See "Reduced Rates (B)," p. 672.
 ve—Via Empiradio. nm—Via Id. Marconi.
 vnt—Via Marconi, full rate 1/5 (d. if any -/10) less.
 lom, lve—Via Marconi or Empiradio, 1d. (d. wlt, nlt
 rates 1/2d. less per word.
 * Except Battersea.

Postal Regulations—Wireless Telegraphy—Radiotelegrams. 675

EXPRESS DELIVERY (Service 4) is available only (1) Sundays, between London and a few Provincial Head Offices, (2) Good Friday, in London from these. The offices marked 2 on p. 672 together with the following in London, complete the list: G.P.O., Leicester Square, W. and S.W. District Offices, and Branch Offices, Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Stratford, and Swiss Cottage Letters, &c. (not parcels) must be handed in in time to catch preceding night mails—those for Belfast earlier, in S. & E. England. Fee 1s. besides postage and usual express fees (calculated in London as from G.P.O.—2d. to 6s. 6d.).

EXPRESS DELIVERY by messenger of a telephoned message (Service 5, p. 666) is on Sundays restricted to the London Postal District, but a letter reaching "Central Telegraph Office, London, F.C. 1," early on Sunday morning will be telephoned to a telephone subscriber in the London Telephone Area if the envelope be marked conspicuously "For Sunday telephone delivery," with a broad perpendicular line back and front, usual postage being prepaid on the envelope, and 3d. per 30 words or less by stamps affixed to the enclosed message.

CHRISTMAS DAY AND GOOD FRIDAY—In London. One morning delivery of letters, parcels, &c. on Christmas Day, none on Good Friday (except Express Service 4 (above)). Offices usually open as on Sundays in some cases for shorter hours. *Outside London*. In Scotland business is as on week-days. In England and N. Ireland there is one delivery of letters and parcels, no acceptance of parcels. Offices open as Sundays.

BANK HOLIDAYS—London. One morning delivery of letters and parcels, except, as a rule, on Boxing Day. Some 34 offices open as on Sundays, and 12 others, for all classes of business, but parcels are not despatched till next day (Boxing for night mails, and general collection, as on Sundays). *Outside London*. In Scotland business is generally as usual. Elsewhere only one letter and parcel delivery, except, as a rule, on Boxing Day, and generally one despatch (early in rural districts). Smaller offices are closed, the more important open in morning, some also in evening, for parcels, express, &c. and (morning only) postal orders. Telegraph offices nearly all open 9 to 10.30 a.m. and generally at the same hours, if any, as on Sunday evenings.

PUBLIC HOLIDAYS in Scotland. Telegraph mostly as usual other business as usual. Bank Holidays. One delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., &c. business, hours as on Sundays.

Wireless Telegraphy.

Post Office as Licensing Authority—By the Wireless Telegraphy Acts, 1904–26, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships in territorial waters except with the Postmaster General's licence. By the Wireless Telegraphy Order 1908, the provisions of the Wireless Telegraphy Act 1904 apply to British ships whilst on the high seas. The Merchant Shipping (Wireless Telegraphy) Act, 1919, made it compulsory for all British sea-going ships over 1,600 tons to carry wireless apparatus. The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators for the Postmaster General's Certificate.

Ship and Shore Service.—The ship and shore stations of the Marconi Company and Lloyds, 20 in number, were bought by the Postmaster General in 1909. The service has since been reorganised and now comprises 13 stations, viz.—Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portlseahead, Portpatrick, Rugby, Seaford, Valencia and Wick. Portlseahead Radio affords (a) world-wide communication with ships equipped with short-wave sending and receiving apparatus, and (b) communication up to a range of about 2,000 miles with ships equipped with long continuous wave-sending and receiving apparatus. Rugby Radio can transmit radiotelegrams to ships

equipped with long-wave receiving apparatus. The range is world-wide, but ships are not in a position to reply to this station. A public telephone service between certain Transatlantic liners and telephone subscribers in Great Britain and certain Continental countries is also afforded through Rugby Radio.

Anglo-Continental Wireless Services.—Post Office wireless services have been instituted side by side with the cable services to the following Continental countries—Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, Rumania, Latvia, Finland and Russia. The services with Italy, Hungary, Rumania, Estonia, and Danzig are carried on *via* the Leafield Station (near Oxford). The latter station is also used for the transmission of news and commercial intelligence intended for simultaneous reception in several European countries. A medium-power transmitter at the Rugby Station is also used for the services to Czechoslovakia and Poland.

Super-power Transmitter at the Rugby Station.—This transmitter uses power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of British Official news messages, Meteorological Office, reports and Greenwich Time Signals, and for transmitting radio telegrams and news messages to ships at sea.

Beam and Omni-Directional Wireless Stations.—The privately-owned wireless stations in this country at present carrying on commercial services with other countries are owned and operated by Imperial and International Communications Limited. They consist of the Marconi Short Wave Wireless Beam stations at Bodmin, Bridgewater, Grimsby, Skegness, Dorchester and Someton, the high powered omni-directional station at Carnarvon, and the medium-power omni-directional stations at Ongar and Brientwood in Essex; the last two stations also employ Marconi short-wave Beam apparatus. The Bodmin and Bridgewater and the Grimsby and Skegness Beam stations consist of two groups of two units each, one unit of each group being a transmitting station and the other unit a receiving station. The Bodmin transmitting station and Bridgewater receiving station carry out direct high-speed wireless communication with Canada and South Africa. The Grimsby transmitting station and Skegness receiving station carry out similar communication with Australia and India. The Dorchester Beam transmitting station consists of eight Marconi short-wave Beam transmitters, and is the largest beam wireless station in the world. The Someton station is the receiving station of this short-wave Beam group, and has fourteen receivers employed on the same services.

All these wireless stations are operated and controlled directly from Electra House, London, the central radio office of Imperial and International Communications Limited.

* Radiotelegrams.

The Address of a radiotelegram should contain name of addressee, of ship, and of coast station to be used. Private messages for H.M. Navy may not be sent through Portlseahead or Rugby radio, and must have in the address

• "Radiotelegram," as used in the Official Postal Guide, denotes only a message to or from a ship at sea, and includes no other kind of radiotelegraphic message.

"Warship" followed by the name of the vessel, or "Submarine" (which with identifying letters and figure counts in addresses one word) Next must come (a) if ship be in home waters, "Gleethorpes Radio;" (31 per word inclusive), (b) if ship be abroad, the name of the coast station (if this is not known, sender should enquire of the Secretary, Admiralty, London by reply-paid telegram or letter, stating when it is proposed to send the message). Messages to ships on the following stations must go through the coast stations named—Australian Melbourne; China Seletar (Str Settlements) or Stonecutters (Hong Kong); E Indies Matara (Ceylon) or Aden; Mediterranean Rinelet (Malta), New Zealand Auckland, Off South African coast Jacobs (Durban), Bangkok (Cape Town) or Walvis Bay, Off East coast of North America (a) between 30° N. and 30° N. Kingston (Jamaica) or S Lucia (West Indies) (b) North of 30° N. Louisburg (Nova Scotia). In the case of the *Merchant Marine*, if name of nearest coast station is uncertain the message may yet be got through by other means (see Note), while if the name of the ship is not known, sufficient particulars of the voyage (names of ports, &c) may be substituted, at sender's risk, under services A1, B1, and B2 only. *Prepayment of Radio* is admissible. *Counting of words*, etc., is subject to the rules for ordinary Telegrams Abroad, the name of ship with call-sign counts as one word, also (if written in standard form) name of coast station.

The Cost of Transmission (per word) from any telegraph office is the sum of three rates: rate for cable or other message to the coast or land station (denoted by f), coast-station charge (c), and ship "station" charge (s). The normal ship charges (s) are as follows—(i) R.M. Navy, nil; (ii) all other nationalities, including British, 4d; (iii) Greek, Spanish and Swedish ships, 3d; (iv) Finnish ships and Latvian ships, 1½d. These are reduced in certain cases (see "below"). The other charges and services may be classified as follows—

A. SHORT RANGE (250-300 miles), to all ships with wireless telegraph—1. Through Post-Office coast stations: $t+c$ = 7d. 2. Through coast-stations abroad (t) = rate for full-rate telegram to the country in which coast station is situated (see list under heading Telegrams Abroad, p. 672); (c) which varies from 1d to 3d is given in the same list, after the name of the country or place with a coast station, preceded by the sign c.

B. LONG-RANGE COMMUNICATION with ships suitably equipped (mostly listed in P.O. Guide), when beyond reach of short-range stations. 1. 1st "Post-hudradio" (Phone Highbridge) 53t + c = 7d. (a) Long wave both way service (range a 1000 miles), with about 300 ships (including most large liners in N. Atlantic or Mediterranean), (b) Short wave both-way service (range world wide) with about 400 ships. 2. 1st "Rugbyradio" (range world-wide) (t) + (c) = 1s 3d to many ships (see in P.O. Guide) carrying long wave receiving apparatus, ships cannot reply direct to this station. Messages are sent at 2s 4d a m. (G.M.T.) and (ext. Sun) 2s 4d p.m. 3. Ships beyond reach of the above stations may be reached through many long distance stations abroad, the exact station depending upon the position of the ship which can generally be ascertained from the shipowners. A full list of coast stations abroad is given in the P.O. Guide.

C. REDUCED RATES FOR CROSS CHANNEL AND SHORT VOYAGE SITES. 1. Through the appropriate P.O. coast-stations (see Note), the inclusive (t+c+s) rate per word is—Group A (775 ships) 3½d, (Group B (237) 5½d. 2. Vtd. Rugbyradio (if available), inclusive Group A, 1s 3d, Group B, 1s 3½d. 3. Through foreign coast-stations to the same two groups (a) rate as calculated as for A2, but s is reduced to 1d. (Exceptions are (i) To the 4 Dover Ostend Packets, through Antwerp or Ostend c+s = 3d, (ii) To regular cross-Channel boats, through Boulogne, Cherbourg or Havre, c+s = 2½d.) (a) rate calculated as for A2, but s is reduced to 1½d.

NOTE.—"Open address" (not available for R.M. ships)—1. P.O. stations. The word "Wireless" may be substituted for the name of a particular station in services A1 and B1, but not B2. If so substituted for the proper coast station in service C1, the inclusive charge per word becomes Group A boats, 3d, Group B, 5½d. 2. Coast stations abroad. Messages intended to pass through coast stations in Newfoundland or on east coast of Canada may have "Montreal" in place of the name

of any particular station, similarly those for coast stations on east coast of Canada or either coast of U.S.A. may bear "New York" in both cases $t+c+s=1s$ 3d. Again, messages intended to pass through stations on coasts of the Union of S. Africa may have "Slangkopradio" instead of the name of any particular coast station: $t+c+s=2s$ 1d.

TELEPHONES.

CONDITIONS OF SUPPLY.

Telephone instruments are supplied and connexion is established with the appropriate exchange by the Postmaster General at various rates, with an extra charge if the premises to be connected are more than a mile from the exchange. Extensions are also provided as required. The rate for calls varies with the distance, and can be ascertained from the introductory pages of the Telephone Directory.

TELEPHONES ABROAD.

The caller should ask for "Trunks," and give the name of country and town required. The minimum charge always covers a period of 3 minutes, each further minute or part thereof costing one third of this minimum. In periods of pressure calls may be limited to 12 minutes. Most countries are divided into zones (Z1, Z2, etc.), and charges are based on the distance between fixed points in the connected zones. Zone boundaries are fixed in different ways and are often very irregular. In the following lists they can only be indicated very roughly, by certain towns* or areas named in brackets.

A. CONTINENTAL TELEPHONES.—The British zones are.—First Zone. London and S.E. England, including the counties Somerset, Glos., Worcs., Warwick, Leics., Notts., Lincs. Second Zone.—England N. or W. of those counties, and Wales. Third Zone.—Isle of Man, Scotland, Northern Ireland. "Day" charges are reduced at "night" (i.e. 7 p.m. to 8 a.m.). Single "night" calls of at least one hour are charged at half the "day" rates. "Personal calls" are admitted; if the person asked for is available, a "personal charge" (one third of the normal minimum) is added to the call cost, if he is not available, only the personal charge is made.

The following list gives the minimum cost of a "day" and "night" call respectively from the First British Zone. The minimum cost from other British zones is greater by amounts varying irregularly but within a narrow range—for the Second Zone, "day," 1/9 to 2/-, "night" 1/- to 1/3, for the Third Zone, "day," 3/3 to 3/9, "night" 2/- to 2/3.

Austria 14/-, 8/6, Belgium 7/3, 4/4, Bulgaria (Sofia only) 21/6, 13/-, Czechoslovakia Z1* (Bohemia) 13/9, 8/3, Z2 (Moravia, Silesia, W. Slovakia) 15/9, 9/6, Z3 (E. Slovakia) 17/3, 10/6; Danzig 14/6, 8/9, Denmark Z1 (S) 12/9, 7/9; Z2* (N) 13/3, 8/-, Estonia 22/3, 13/6; Finland, Z1 (Åland Is.) 19/3, 11/6; Z2* (S.W.) & Z4 (N) 21/-, 12/9, Z3 (S.E.) 22/-, 12/3, France Z1* (N.E. with Havre, Orleans, Veritun) 6/-, 3/7; Z2 (Southward to Gironde, Lyon and Savoy) 7/10, 4/8, Z3 (N, with Bordeaux and Marseille) 9/5, 5/8, Germany Z1 (Essen) 9/3, 5/6; Z2 (Köln) 9/9, 6/-, Z3 (Frankfurt a/M) 10/6, 6/3; Z4 (Hamburg) 11/3, 6/9; Z5* (Leipzig) 12/-, 7/3; Z6 (Dresden) 12/6, 7/6, Z7 (Görlitz) 13/3, 8/-; Z8 (Breslau) 14/0, 8/6, Z9 (Oppeln) 14/6, 8/9; Z10 (Königsberg) 15/3, 9/3, Z11 (Gumbinnen) 16/-, 9/6, Z12 (Lithuanian frontier) 16/9, 10/-; Gibraltar 17/6, 10/9; Holland 8/-, 5/-, Hungary

* Private (Admiralty) coast stations, not for use of merchant or troop-ships. c-3.

1. The P.O. coast stations are—Cullercoats, Fishguard, Harbinger, Land's End, Mullin Head, Niton, North Foreland, Portpatrick, Seaforth, Valentia, Wick. c, c-3—see above "Cost of Transmission."

15/6, 9/3. *Italy*: Z₁ (Milan) 9/6, 5/9; Z₂ (Turin, Genoa, Venice, Bologna) 10/9, 6/6, Z₃ (Florence, Perugia, Ancona) 12/-, 7/3; Z₄* (Rome) and Naples to Apulia 13/3, 8/-; Z₅ (Calabria, rest of mainland, Sicily) 15/6, 9/6; Z₆ (Sardinia, 4 towns only, from London only) 16/8, 10/-; *Latvia*: Z₁ (Courland and Tukums) 17/6, 10/6; Z₂ (rest, incl. Riga) 18/-, 10/9; *Lithuania* 17/-, 10/3; *Luxembourg* 8/6, 5/-; *Norway* Z₁* (S.E.) 18/6, 11/-; Z₂ (S.W. and central) 19/6, 11/9; Z₃ (N. of Trondhjem area) 20/3, 12/3; *Poland*: Z₁ (W., with Kattowice) 14/3, 8/6; Z₂ (Krakow, Lodz) 14/8, 8/9; Z₃ (Radom) 15/3, 9/3; Z₄* (Lwow) 15/9, 9/6; Z₅ (Kowel) 16/-, 9/9; Z₆ (E. frontier) 16/8, 10/-; *Portugal* (Lisbon only) 17/6, 10/6; *Rumania* Z₁ (W.) 18/-, 11/-; Z₂* (centre and E.) 20/-, 12/-; *Russia* (Moscow only) 22/3, 13/3, *Sarre* 7/9, 4/9; *Spain*: Z₁ (San Sebastian) 10/9, 6/6; Z₂ (Barcelona to Santander) 12/-, 7/3; Z₃* (Valencia) 14/3, 8/9; Z₄ (Cartagena, Toledo) 16/-, 9/6; Z₅ (Andalusia) 17/6, 10/6; Z₆ (Majorca) 20/-, 12/-; Z₇ (Centa) 20/-, 15/9; *Sweden* Z₁ (S.) 16/-, 9/6; Z₂* (Gotland, Göteborg) 17/3, 10/6; Z₃ (central) 18/9, 11/3; Z₄ (N.) 20/-, 12/-; *Switzerland* 8/-, 4/9; *Yugoslavia* (certain towns only) Z₁ (mainly N.W.) 17/9, 10/9; Z₂* (incl. Dalmatia) 19/6, 11/9; Z₃ (Krusevac only) 21/-, 12/9.

B. RADIOTELEPHONE OVERSEAS OR TO SHIPS AT SEA. Calls should be booked in advance, as the hours of service are usually very limited. A "person-to-person" call can be booked, if it fails (or if any call is cancelled) a "report charge" is made (12/- unless otherwise shown below), but not if call matures. The following table gives the minimum cost of a call from England, Scotland, or Wales to the places at present served. Calls from the Isle of Man or Northern Ireland cost 8/- more (minimum), report charges 2/- more.

AFRICA—*Egypt* (Cairo, Alexandria only) 72/-; *Morocco*, French 27/-; *nil*. Ceuta, see list A (Spain, Z₇), *Union of S.A.* (Bloemfontein, Cape Town, Johannesburg, Kimberley, Pretoria, and chief towns in S. of Cape prov) 120/-; **AMERICA**—*Argentina* 126/-; (B Aires city and prov) 120/-; *Brazil* (Rio city and state only) 120/-; *Canada* Z₁* (Que. E. Ont.) 120/-; Z₂ (N.B. N.S. Central Ont.) 132/-; Z₃ (Man. W. Ont.) 144/-; Z₄ (Alta, Sask.) 156/-; Z₅ (B.C.) 168/-; *Chile* 132/-; *Mexico* 180/-; *U.S.A.*: Z₁* (Md., Pa., and N.E. States) 120/-; Z₂ (Minn. to Ga.) 132/-; Z₃ (N. Dak. to Lou.) 144/-; Z₄ (Idaho to Tex.) 156/-; Z₅ (W. States) 168/-; *Uruguay* 126/-; *Venezuela* (Caracas and 4 towns) 132/-; *nil*. **ASIA**—*Indo-China*, French (3 towns), 96/-; *nil*; *Siam* (Bangkok only) 108/-; **AUSTRALIA**—(exc. Tasmania; Perth only in W.A.) 120/-; *ELSEWHERE*—*Bermuda* 144/-; *r* 16/-; *Canary Is.* 34/6; *Cuba* 180/-; (Havana 168/-); *Neth. E. Indies* 114/-; *Java* and *Madeira* 102/-; *Sumatra* (northern towns) 120/-; *Hawaiian Is.* 180/-; *Oahu** 180/-; *Kauai*, *Maui* 198/-; *New Zealand* 135/-; *r* 20/-; **SHIPS IN THE N. ATLANTIC** (6 liners)*:—(a) Direct 36/- (72/- if ship is over 500 miles from Land's End); (b) *via* New York at caller's option, if direct route is delayed, 144/-.

* The capital of a country lies in the Zone marked *.
 • Vatican State 14/-, 8/6
 c Continuous 24 hour service.
 r Report Charge (see under B above)
 * Not available on Sundays or (sometimes) other holiday periods

Work of the Post Office.

The following details of the work done by the Post Office have been supplied to the Editor:—

	1930-31	1931-32.
Letters &c. delivered	6,475,000,000	6,540,000,000
Parcels dealt with...	161,900,000	158,100,000
Registered Letters and Parcels posted (a)	58,600,000	57,600,000
Express Delivery Service (a)	1,972,000	1,887,000
Telegrams dealt with	51,800,000	48,000,000
Money Orders (including Trade Charge Money Orders)	14,970,000	14,480,000
Postal Orders	191,200,000	209,400,000
Telephones		
Trunk Calls	122,810,000	125,690,000
Local Calls	1,348,000,000	1,305,000,000
Savings Bank		
Deposits (b)	£76,100,000	£72,000,000
Withdrawals (b)	£77,700,000	£79,800,000
Government Stock Accounts open	1,690,000	1,680,000
Wireless Licences issued	3,650,000	4,620,000
Other Licences issued	4,210,000	4,170,000
Old-Age Pension Orders paid No Amount.	109,200,000	113,800,000
Widows' & Orphans' Pension Orders paid No Amount	£54,320,000	£56,650,000
Entertainment Duty Stamps sold	£311,000	£364,000
Inland Revenue (excluding Unified) and Income Tax Stamps sold	£2,920,000	£2,860,000
Health and Pensions Insurance Stamps sold	£45,980,000	£45,130,000
Unemployment Insurance Stamps sold	£28,000,000	£31,710,000
War Pensions paid No Amount.	£45,800,000	£3,700,000
Naval, Military, &c. Allowances paid No Amount	£39,570,000	£38,090,000
Postal Drafts paid No Amount	9,480,000	9,350,000
Dividends on P.O. Register Stock	£9,290,000	£9,170,000
	4,490,000	4,820,000
	£13,580,000	£18,110,000
Savings Certificates Issued (pur. price) Repaid (including interest) (c)	£8,040,000	£8,060,000
Telephone Stations at 31st March	£50,890,000-£(d)85,820,000	£53,800,000 £(d)125,780,000
Mileage of wire:	1,982,171	2,054,249
Overhead	1,101,104	1,148,353
Underground	8,277,547	9,034,240
Submarine	17,572	17,567

(a) Included in Letters, &c., or Parcels.
 (b) Figures are for the calendar years 1930 and 1931. Those for 1932 are provisional.
 (c) Including amounts converted into other securities or re-invested.
 (d) Inflated by Savings Certificates conversion operations.

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N. latitude (from the mouth of the Tweed to the Lizard), and between $1^{\circ} 46'$ E. and $5^{\circ} 45'$ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland, on the south by the English Channel, on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), Wales and the Irish Sea. Total area, $50,851$ square miles. Population (1931) $37,354,977$.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the *Cheviot Hills* run from east to west, culminating in the Cheviot, $2,676$ feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with their highest point in Cross Fell, $2,930$ feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scawfell Pike* ($3,210$ feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being *Urra Moor* ($2,489$ feet). South of the Pennines are the *Peak of Derbyshire* ($2,888$ feet) and *Dartmoor* (High Willhays, $2,039$ feet). In the western county of Shropshire are the isolated *Wrekin* ($1,335$ feet), *Long Mynd* ($1,674$ feet), and *Brown Clee* ($1,805$ feet), in Herefordshire the *Black Mountain* ($2,320$ feet) in Worcestershire the *Malvern Hills* ($1,395$ feet), in Monmouthshire the *Sugar Loaf* ($1,955$ feet) and *Coity* ($1,905$ feet), and the *Cotswold Hills* of Gloucestershire contain *Cleeve Cloud* ($1,134$ feet).

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the *Cotswold Hills* to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The *Thames* is tidal to Teddington (60 miles from its mouth); the *Wilts* and *Berks* canal enters at Abingdon, and the *Kennet* and *Avon* canal at Reading. The principal tributaries are the *Cherwell*, *Lee*, *Kennet*, *Wey*, *Mole* and *Medway*. The *Thames* forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of *Plinlimmon* (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the *Bristol Avon*, and on the right the *Wye*, its other tributaries being the *Yrwyay*, *Tern*, *Stour*, *Tem* and *Upper* (or *Warwickshire*) *Avon*. The *Severn* is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as *Tewkesbury* ($23\frac{1}{2}$ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the *Severn* is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal ($16\frac{1}{2}$ miles), which

admits vessels of 350 tons to Gloucester, other canals connecting with the *Thames*, *Trent*, *Dee* and *Mersey*. The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the *Sharpness Bridge*, was begun in 1873 and completed in 1886 (at a cost of $\pounds 2,000,000$) after many difficulties from flooding, &c. The tunnel is 4 miles 644 yards in length (of which $2\frac{1}{2}$ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the *Tyne*, *Wear*, *Tees*, *Ouse* and *Trent* from the *Pennine Range*, the *Great Ouse* (160 miles) from the *Central Plain*, and the *Owll* and *Stour* from the hills of *East Anglia*. Flowing into the English Channel are the *Sussex Ouse* from the *Weald*, the *Itchen* from the *Wiltshire* and *Hampshire Hills*, and the *Axe*, *Teign*, *Dart*, *Tamar* and *Eze* from the *Devonian Hills*, and flowing into the Irish Sea are the *Mersey*, *Ribble* and *Eden* from the western slopes of the *Pennines* and the *Derwent* from the *Cumbrian Mountains*. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in *Cumberland*, but partly in *Westmorland* and *Lancashire*, the largest being *Windermere* (10 miles long), *Ullswater* and *Derwentwater*.

Islands.—The *Scilly Islands* (Cornwall), 25 miles from Land's End, consist of about 40 islands, with a total area of about $4,000$ acres, only *St. Mary's*, *Tresco*, *St. Martin's*, *St. Agnes* and *Bryher* being inhabited, population (1931) $1,732$. The capital is *Hugh Town*, in *St. Mary's*. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* is separated from Hampshire by the *Solent*. The total area is 147 sq. miles, population (1931) $88,400$. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, *Newport*, at the head of the estuary of the *Medina*, *Cowes* (at the mouth) being the chief port, other centres are *Ryde*, *Sandown*, *Shanklin*, *Ventnor*, *Freshwater*, *Yarmouth*, *Totland Bay*, *Seaview* and *Bembridge*. *Lundy Island*, 21 miles N.W. of *Hartland Point*, Devon, is about $2\frac{1}{2}$ miles long, and 1 mile broad, with a total area of about $1,050$ acres (mainly picturesque), and a population of about 50 ; it contains the seat of the proprietor of the island and two lighthouses.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 45° in the *Scilly Islands* to 45° at the mouth of the *Tweed*, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the *Lake district* of *Cumberland* and the driest in the *Thames estuary* and the *Lincolnshire Wash*. The climate of England is influenced by the much-indented coastline of the west and by the flow of warm water in the *Gulf Stream Drift*, which strikes the S.W. projection and proceeds N. and E. along the west and south coasts.

EARLY INHABITANTS

Prehistoric Man—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. F. Chubb to the Nation in 1908, and now preserved as a national monument). *Stonehenge* (10 miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48-51 A.D. was *Caractacus* (strictly *Caratacus*), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly *Boudicca*), Queen of the Iceni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrabatinum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash

to Spilthead, while about 350 A.D. incursions in the north of Irish (Scoti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome, officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

Anglo-Saxons and Normans.—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welsh* (old English *Waelisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishops at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dyke*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871-901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Godwinson of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or *Sautlache*) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 49 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 72 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown in the following pages.

LORDS LIEUTENANT, HIGH SHERIFFS, AND CHAIRMEN OF Q.S.

County or Shire	Lord Lieutenant	High Sheriff, 1932	Chairman of Q.S.
(1) Bedford ..	S. Howard Whitbread, C.B.	Christopher W. Gurney..	Anthony H. Wingfield, D.L.
(2) Berks	James Herbert Benyon ..	Capt G. H. Palmer	C. Murray Pitman, K.C.
(3) Bucks	Col. Lord Cottesloe, C.B., V.D., T.D.	Lt.-Col. F. H. Allhusen, C.M.G., D.S.O.	Col. Lord Cottesloe, C.B., V.D., T.D.
(4) Cambridge ..	Charles R. W. Adeane, C.B.	Maj.-Gen. Sir W. Childs, K.C.M.G., K.B.E., C.B.	His Hon. Judge Farrant, D.L.
(5) Isle of Ely ..	Brig.-Gen. Sir W. Bromley	William Gavin Clegg	Maj. J. F. T. Roysds, D.L.
(6) Cheshire .. .	Davenport, K.C.B., C.M.G., C.B.E., D.S.O.		
(7) Cornwall .. .	John C. Williams	Capt J. T. Coryton	Col. E. Treffry, C.M.G., O.B.E., T.D.; Lt.-Col. R. T. G. Tangye, O.B.E.
(8) Cumberland ..	Earl of Lonsdale, K.G. ...	John B. Wrigley	His Honour Judge Eustace Hills, K.C.
(9) Derby	Duke of Devonshire, K.G.	Lt.-Col. H. K. Stephenson, D.S.O., T.D.	H. St. J. Raikes, K.C., C.B.E.
(10) Devon	Lord Mildmay of Flete...	S. M. Manning-Kidd ...	Lord Merrivale, P.C.; Sir F. G. Newbolt, K.C.; Sir A. H. Bodkin.
(11) Dorset .. .	Earl of Shaftesbury, K.P.	Wilfred J. Brymer	J. C. Swinburne-Hanham.
(12) Durham .. .	Marquess of Londonderry, K.G.	Henry Pelle, C.B.E., D.Sc.	J. S. G. Pemberton, D.L.
(13) Essex	Brig.-Gen. R. B. Colvin, C.B., T.D.	H. McQuignodale	Collingwood Hope, K.C., C.B.E.; W. J. Courtland
(14) Gloucester ..	Earl Beauchamp, K.G. ..	Maj. W. J. P. Marling ..	Lt.-Col. Russell J. Kerr
(15) Hants	Maj.-Gen. Rt. Hon. J. E. B. Seely, C.B., C.M.G., D.S.O.	Joseph J. Crossfield ..	His Hon. Judge Lailey, K.C.
(16) Isle of Wight	Sir John Cotterell, Bt. ...	Lt.-Col. H. R. Pettit ..	T. P. P. Powell, O.B.E.
(17) Hereford .. .	Viscount Hampden, K.C.B., C.M.G., A.D.C.	Maj. J. F. Harrison ..	Sir J. Priestley, K.C.; His Hon. Judge Sturges, K.C.
(18) Hertford .. .	Earl of Sandwich	(See Cambridge)	G. F. Rowley
(19) Huntingdon ...	The Marquess Camden	Raoul Hector Foà	Hon. H. A. Hannen; Hon. Mr. Justice Luxmoore.
(20) Kent			Rt. Hon. Sir I. Sanderson, K.C.; Sir James Openshaw.
(21) Lancashire ..	Earl of Derby, K.G.	Lt.-Col. A. T. Poiritt, D.L.	Sir A. G. Hazlerigg, Bt.
(22) Leicester .. .	Sir A. G. Hazlerigg, Bt.	Maj. E. G. Gillian, D.S.O., D.L.	
(23) Lindsey			T. Hollis Walker, K.C.
(24) Kesteven .. .	Earl of Yarborough	Thomas Henry Haggas ..	His Hon. Judge Langman
(25) Holland			R. Glead, D.L.
(26) London	Marquess of Crewe, K.G.	Sir Ernest Benn, Bt., C.B.E.	Sir P. Clarke.
(27) Middlesex .. .	Lord Rochdale	Lt.-Col. M. F. M. S. Kittos, O.B.E., D.L., T.D.	Sir Montagu Sharpe, K.C.
(28) Norfolk .. .	Russell J. Colman	Maj. Quintin E. Gurney, T.D.	Sir Bartle Frere, K.C.
(29) Northampton ..	Marquess of Exeter, C.M.G.	Sir T. Fernor-Hesketh, Bt.	John Alfred Gotch
(30) Peterborough, ..			His Hon. Judge Wood- cock
(31) Northumberland	Sir C. P. Trevelyan, Bt., M.P.	Capt. W. H. Charlton, T.D.	Sir F. Blake, Bt., C.B., D.S.O.
(32) Nottingham ..	Duke of Portland, K.G. ..	Lt.-Col. John Jardine ..	Col. Sir L. Rolleston, K.C.B., Hon. Sir A. A. Roche.
(33) Oxford	Duke of Marlborough, K.G.	Lt.-Col. Sir F. K. McClean, A.F.C.	
(34) Rutland	Earl of Ancaster	Vere Finch	William Henry Neill
(35) Salop	Earl of Powis	Maj. A. W. Foster, M.C., D.L.	Sir W. F. K. Taylor, G.B.E., K.C.
(36) Somerset .. .	Marquess of Bath, K.G. ..	Reginald A. Hobbhouse	Capt. Hon. T. H. Watson.
(37) Stafford	Earl of Harrowby	Capt. Sir F. L'E. Joseph, C.B.E.	Lord Charnwood
(38) Suffolk, E. ..	Sir T. C. T. Warner, Bt., C.B.	Capt. Hon. J. St. V. B. Saumarez.	R. E. White; Sir R. F. Dunnell, Bt., K.C.B.
(39) " W.			Cecil Whiteley, K.C.
(40) Surrey	Lord Ashcombe, C.B., T.D.	Sir Stanley Machin	(Sir H. S. Cantley, Bt., K.C., M.P.; R. Burrows, K.C., LL.B.)
(41) Sussex, E. ...	Lord Leonfield	Brig.-Gen. D. J. E. Beale- Browne, D.S.O.	
(42) " W.			
(43) Warwick	Lord Leigh	J. D. Siddeley	Lord Ilkeston
(44) Westmorland ..	S. H. Le Fleming	Maj. E. F. Wrigley	Earl of Lonsdale, K.G.
(45) Wilts	Sir Ernest S. Wills, Bt. ...	Lt.-Col. W. (H. Bell), D.S.O.	His Hon. Judge Randolph.
(46) Worcester .. .	Viscount Cobham	Capt. C. F. D. Perrins ...	Hon. Sir R. W. Coventry, K.C.
Yorkshire:—			
(47) East Riding ...	Lord Deramore		
(48) North Riding ..	Hon. Geoffrey Howard	Maj. Frederick Hawks- worth Fawkes	(Lord Irwin. His Hon. Judge McCarthy. W. F. Tempest
(49) West Riding ..	Earl of Harewood, K.G., D.S.O.		

CHAIRMEN OF C.C., CLERKS OF THE PEACE, CHIEF CONSTABLES AND M.O.H.

Chairman of C.C.	Clerk of the Peace	Chief Constable.	Medical Officer.

AVERAGE HEIGHTS AND WEIGHTS

The average heights and weights of men in the United Kingdom have been tabulated as follows. The weights include *clothing*, which is generally calculated at one-twenty-fourth of the whole

	Average Height.	Average Weight.
Scotmen	5 ft 8½ in.	11 st. 11 lb.
Irishmen	5 ft 8 in.	10 st. 13 lb.
Englishmen	5 ft. 7½ in.	11 st. 1 lb.
Welshmen	5 ft. 6½ in.	11 st. 4 lb.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 30 miles from its outflow into the North Sea.

The City of London represents London within its ancient boundaries. The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 13th century Guildhall, to the massive splendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church. St. Bride's, St. Dunstan's in the East, &c.).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 19, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia. Westminster is the richest of the London areas.

Metropolitan Boroughs.—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—For Police purposes the administration is invested in the City Corporation as to the City Police and in the Home Office as to the Metropolitan Police. The authority for the supply of water is the Metropolitan Water Board, while the River Thames is administered as to its tidal portion by the Port of London Authority and above Teddington by the Thames Conservancy, the lighthouse and pilotage authority being Trinity House. The bridges are maintained in the City of London by the Bridge House Estates Committee of the Corporation of the City, and in the remaining area by the London County Council. The London and Home Counties Joint Electricity Authority (5 Millbank, Westminster, S.W. 1) provides (or secures the provision of) electricity throughout an area of 1,797 sq. miles. Locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways, &c.

THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans, it is said, it received municipal institutions which have endured in their main features to the present day. In Saxon times it was, in reality, a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times A.D. 1397, 1398, 1406, 1419), and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas, he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the payment being popularly known as the *Lord Mayor's Shove*.

Aldermen were first appointed by a charter of Henry III in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II directed them to be chosen for life. The *Common Council*, elected annually on St. Thomas's Day (Dec. 21), was, at an early date, substituted for a popular assembly called the *Folkmoete*. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own *Sheriffs*. The citizens, however, lost this privilege, as far as the election of *Sheriff of Middlesex* is concerned, by the Local Government Act, 1888, but they continue, as heretofore, to choose the *Sheriffs of the City of London*. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers—The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance c. 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk and Common Serjeant are mentioned as officers in the charter of Edward II, A.D. 1319, but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1932-1933.

Sir Percy Walter Greenaway, Kt., born 1874, Common Councilman, 1917, Alderman of Bishopsgate Ward, 1924, Sheriff, 1931. Lord Mayor, 1932, The Mansion House, E.C. 4. £10,000
Private Secretary, T. Harvey Hull

* The above is abstracted from the 29th "City's Cash Account" of the series extant—A.D. 1932 to 1933-34 (The Accounts earlier than A.D. 1933 were believed to have been destroyed in the Fire of London; but two years' Accounts, temp. Queen Elizabeth, have been discovered among the Corporation Archives, as exceptions to that belief). The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The above extract is from the 24th Annual Printed Account of the Corporation, A.D. 1926 to 1927-28. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, the 14th December, 1905, and 29th January, 1917, upon Reports of the Coal and Corn and Finance Committees, and they are printed in conformity with the 29th Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES).

IN the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulterers (poultryers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

9,716 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (see p. 684). The actual net number is, however, smaller, as many belong to more than one Guild, and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

There are 28 Guilds in existence. The Liveries of the Loriners' (38a), Stationers' (37b), and Merchant Taylors' (32a), are the most numerous, the Up-holders' (18), the smallest.

THE LONDON FIRE BRIGADE. Headquarters

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries; and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

On Dec. 31, 1931, the complement of the Brigade consisted of:—1 chief officer; 2 divisional officers; 3 assistant divisional officers; and 1,925 officers, firemen, and pilots; a technical and clerical staff of 193. There were 61 land fire-stations, 3 river stations and 1 river repairing depot. The appliances included 87 motor fire engines, 74 motor escape vans, 6 petrol-electric motor ladders, 5 petrol motor ladders (in addition to tenders, &c.), 3 hose carts and 104 fire escapes, 1 long fire ladder, 64 miles of hose, 1 steam and 3 motor fire floats, 55 smoke helmets, 399 hook ladders and 293 hook belts. There were 1,691 street fire-alarm posts, 97 telephone lines from station to station and 357 telephone lines to public and other buildings. The number of calls to which the Brigade responded during the year ended Dec. 31, 1931, totalled 8,080, and the fires numbered 4,465, of which 24 were classed as "serious."

PRINCIPAL OFFICERS.

Chief Officer, Arthur R. Dyer, A.M.I.C.E.

Divisional Officers, Maj. C. C. B. Morris, M.C.; Com. A. N. G. Firebrace, R.N.

Assistant Divisional Officers, Maj. F. W. Jackson, D.S.O.; C. M. Kerr, A.M.I.C.E.; F. W. Field.

THE LONDON COUNTY COUNCIL.

689

Offices, The County Hall, Westminster Bridge, S.E. 1, and Old County Hall, Spring Gardens, S.W. 1.

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday), 9.30 to 12.30 (Saturday).

Meets on Tuesday at 3 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c., and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member of alderman, 144. The term of office for aldermen is 6 years, and ten retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken. In addition to members of the Council co-opted members are included on the following committees: Central Public Health, Education, Housing, Mental Hospitals, Midwives Acts and Public Assistance.

Under the Local Government Act, 1929, the Council, as from April 1, 1930, became responsible for the administration of all forms of poor relief in London, including the services previously maintained by the late Metropolitan Asylums Board. As required by the Act the Council prepared an administrative scheme for discharging the functions transferred, and the transferred services were merged as far as possible in the Council's existing organisation and allocated to the committees of the Council to which they were appropriate.

The Finance Committee have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £83,222,000 (of which £45,959,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of about forty millions.

The Central Public Health Committee, among other duties affecting public health, are responsible for the treatment of tuberculosis, the diagnosis and treatment of venereal disease, the maintenance of 74 hospitals, with accommodation for over 41,000 patients, and the Council's ambulance service.

The Education Committee comprise thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Education service involves an annual expenditure of nearly £12,000,000. The Council maintains 1,171 elementary schools with over 600,000 pupils, and 156 secondary and technical schools, evening

institutes and training colleges, with about 200,000 students. In addition it gives grants-in-aid to the University of London and to 21 secondary and technical schools and training colleges.

The Housing Committee perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 31, 1932, in respect of all schemes was £39,780,000, and very large works are still in progress. Over 50,000 houses and tenements have been completed since the war.

The Improvements Committee deal with questions relating to the carrying out of street improvements and construction of bridges, tunnels and ferries. Among other works now being carried out is the widening of Putney bridge.

The Mental Hospitals Committee administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913, and also the mental hospitals transferred from the Metropolitan Asylums Board. The Council has mental hospitals and other institutions for the care of mental defectives, with accommodation for over 32,000 patients.

The Metropolitan Main Drainage system covers about 159 square miles, including certain districts outside the county, and comprises about 400 miles of main, storm-relief, intercepting and outfall sewers, twelve pumping stations, two sewage precipitation stations, and five sludge vessels. The total capital outlay on main drainage is over £16,000,000, and further expenditure is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain, and for the installation of plant at the northern outfall for the treatment of sewage by the activated sludge process.

The Public Assistance Committee administer the duties in connection with poor relief, other than hospital treatment, including the maintenance of institutions, receiving homes and training centres, for over 11,000 inmates.

The Council is the Tramway Authority for London. The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 166½ street miles, all of which are electric lines (123½ miles on the underground conduit system and 43½ miles on the overhead system). The whole of this great system is worked by the Council, and through-running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1932, to £18,915,000, and the net debt outstanding to £8,386,000. The results of working for the year 1931-32 were: gross receipts £4,211,603, surplus on working £647,799, deficiency for year, after payment of interest on capital outlay and providing for repayment of debt £209,125, which was met to the extent of £21,637 by the surplus brought forward from the previous year, the balance (£77,492) being charged on the special county rate.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following—Sanctioning of loans required by the councils of the metropolitan boroughs; maintenance of fire brigade; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers, town planning; controlling the building line, and the naming of streets and numbering of houses, supervising buildings and district surveyors; dangerous structures; cattle diseases, controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses, the granting of licences for music, dancing and boxing, historic buildings and monuments, inspection of factories and certain other buildings to secure means of escape from fire, administration of the Shops Acts, the Children Act, and the Midwives Acts, licensing and inspection of employment agencies, registration of massage establishments, licensing of premises under the Cinematograph Act, registration of motor cars; collection of duties on motor cars, dog and establishment and certain other local taxation licences, registration of War charities, and welfare of blind persons

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at September 30, 1932, was £98,135,599. These figures are exclusive of the issues of Bonds, the amount outstanding at September 30, 1932, being £6,067,760 Local Bonds for Housing.

The *Rating* for the year 1932-33, as shown by the statement below (which relates to rate accounts only), amounted to 6s 3½d in the pound over the whole county, including the City, and a further rate over the county outside the City of 3d in the pound, together 6s 6½d. The total rate for 1932-33 was 6s 7½d. The *Assessable Value* of the County of London on April 6, 1932, was £59,662,000—a 1d rate over the whole county producing £248,592.

ESTIMATED EXPENDITURE ON RATE ACCOUNTS IN 1932-33.

Service	Expenditure, including Debt Charges	Income (other than Exchequer Grants)	Net Expenditure	Exchequer Grants	Net Expenditure falling on Rate

THE PRINCIPAL ENGLISH CITIES.

BIRMINGHAM.

BIRMINGHAM (Warwickshire), the second City in England, situated in the heart of industrial England, is the chief centre of the hardware trade of the world. It is practically equidistant from the other important trade centres in the country, being 111 miles from London, 85 miles from Manchester and 91 miles from Bristol. The municipal area is 51,147 acres (about 71 square miles), with a population at the census of 1931 of 1,017,500.

It is estimated that over 1,200 distinct trades are carried on in the city, the chief industries being the manufacture of ammunition and small arms, chocolate chemicals, cycles and their component parts, magnetos, railway rolling-stock, glass, motor-cars and motor-cycles, motor tyres, tools, toys, electrical apparatus, wireless sets and components, jewellery and brass working.

Gas, water and electricity are supplied by the Corporation, who also own the transport undertaking, markets and Municipal Bank. An Information Bureau has been opened at the Council House to deal with all enquiries relating to the Municipal and Industrial facilities of Birmingham.

The principal buildings are the Town Hall, built in 1832-1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall, the Council House and Corporation Art Gallery and Museum (1878), the University (1800 Webb, 1909), the Central Library, the 13th century Church of St Martin (rebuilt 1873), the Cathedral (formerly St Philip's Church, built by Archer, a pupil of Wren's), the Roman Catholic Cathedral of St Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838, and was created a city in 1889, it is governed by a Lord Mayor and City Council of 30 Aldermen and 91 Councillors. The generally accepted derivation of "Birmingham" is the ham or dwelling-place of the ing of the family of *Berim*, presumed to have been a Saxon. Between the 11th and 16th centuries, the de Berminghams were Lords of the Manor.

Principal City Officers

The Lord Mayor (1932-1933), H. E. Goodby.
Recorder, E. W. Cave, K.C. (1932).
Stipendiary Magistrate, The Rt. Hon. Lord Ilkeston (1910).
Town Clerk, F. H. C. Wiltshire (1918).
Clerk of the Peace, Joseph James (1905).

LIVERPOOL.

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Irish Sea and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 30,204 acres (which includes 2,883 acres in the bed of the river Mersey) (about 43 square miles, excluding the bed of the river), with a population at the census of 1921 of 855,539. The net tonnage of British and Foreign ships engaged in ocean trade arriving in the port during 1930 was 14,303,649, and of those departing 13,145,639, these figures exclude 2,628,220 tons for arrivals and 3,771,031 for departures in the coasting trade, while the value of the sea-borne trade of the port was stated at £351,246,047 for 1930. The docks, on both sides of the river, have a lineal quayage of about

37 miles, and the Gladstone docks can accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. The chief import is grain, those next in importance being sugar, oil, fruit, timber, cotton and provisions.

The principal buildings are the Cathedral, erected from the designs of Sir Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England. St George's Hall, erected 1838-1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood, the Walker Fine Art Gallery, the University, the Royal Infirmary, the Municipal Offices, and the Custom House. A Roman Catholic Cathedral, designed to be the largest in the world, will be built on Brownlow Hill.

Liverpool was incorporated as a borough early in the 12th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 39 Aldermen and 118 Councillors. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers

The Lord Mayor (1932-1933), J. Gates.
Recorder, Edward G. Henmerde, K.C. (1909).
Stipendiary Magistrate, Stuart Deacon (1910).
President, Court of Passage, Sir Wm F. Kyffin Taylor, K.B.E., K.C.
Town Clerk, Walter Moon, £3,300 (1922).
Clerk of the Peace, R. D. Cripps.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N.W. of London. The municipal area is 22,577 acres (about 34 square miles), the population at the census of 1931 being 766,333. In April, 1931, the area and population were increased by the addition of the Wythenshawe area.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, India-rubber goods, chemicals, &c. The city is connected with the sea by the *Manchester Ship Canal* (opened in 1894), which has a total length of 35½ miles, a depth of 28 to 30 feet, and a minimum width at the bottom of 220 feet. The net tonnage of ships engaged in the Foreign Trade was 3,677,681 for arrivals and 3,098,698 for departures in 1929, the value of the sea-borne trade of the port being £59,886,967 in 1929. The net tonnage of arrivals in the Coasting Trade was 552,463, and of departures 1,071,756 net tons in 1929. In 1929 the weight of sea-borne merchandise which passed over the Waterway amounted to 6,344,005 tons, as compared with 6,022,316 tons in 1928.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1809, enlarged at cost of £800,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands

Library (1899), which includes the Althorp collection; the University (Owens College); and the 18th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council will consist (from April 1, 1931), of 36 Aldermen and 108 Councillors. The Latin name of the city was *Mancunium*.

Principal City Officers

The Lord Mayor (1932-1933), W. Walker.

Recorder, Sir Walter Greaves-Lord, K.C., M.P. (1925).

Stipendiary Magistrate, J. Wellesey Orr (1927).

Town Clerk, F. E. Warbeck Howell (1929).

Clerk of the Peace, E. M. Redhead.

SHEFFIELD

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire, 159 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 34,163 acres (about 53 square miles), with a population at the census of 1931 of 511,742. The principal industries are the manufacture of heavy steel (armor plates, rails, tyres, axles, engine castings, &c.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Sheffield plate (silver rolled on other metals) made during the years 1742-1840, when electroplating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St. Peter's), the Town Hall (1897), the Cutlers' Hall (1832), Corn Exchange, Market Hall, Museum, Mappin Art Gallery, Ruskin Museum, the University and City Hall (1932).

The Saxon town of *Kesfeld* was created a county borough in 1888 and a city in 1893, the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 24 Aldermen and 72 Councillors.

Principal City Officers

The Lord Mayor (1932-1933), Ernest Wilson.

Recorder, Walter Hadley, K.C. (1931).

Master Cutler (1932-1933), Lt.-Col. A. N. Lee,

D.S.O., O.B.E., T.D.

Town Clerk, E. B. Gibson (1931).

Clerk of the Peace, G. E. Smith.

LEEDS

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 185 miles N.N.W. of London, and is the centre of the woollen industry and the wholesale clothing trade. The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works, printing works, and factories of thread, glass and earthenware, with metal casting, machinery and machine tools, steam engines, railway wagons, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is 38,106 acres (nearly

60 square miles), the population at the census of 1931 being 482,789.

The principal buildings are the Town Hall (1848), the Royal Exchange (1872), the Philosophical Hall, the Municipal Buildings and Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840; the 12th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Laci in 1152, is one of the most complete examples of Cistercian houses now remaining. *Temple Newsam*, birth-place of Lord Darnley, was acquired by the Corporation in 1922. The present mansion, a stately edifice in red brick, was built by Sir Arthur Ingram in 1620. Adel Church, about 3½ miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I. in 1666, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a corporation of 26 Aldermen and 76 Councillors. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers

The Lord Mayor (1932-1933), R. H. Blackburn.

Recorder, J. W. Jardine, K.C. (1932).

Stipendiary Magistrate, Horace Marshall (1910).

Clerk of the Peace, Sir Arthur Copson Peake (1896).

Town Clerk, Thomas Thornton (1924).

BRISTOL

BRISTOL is situated partly in Gloucestershire and partly in Somerset and is a City and County in itself, and is 119 miles W. of London. The present municipal area is 19,615 acres with a population, at the census of 1931, of 396,918. Bristol is noted for its maritime history. Within one mile of the centre of Bristol is Clifton. The beautiful Clifton and Durham Down, containing in all some 442 acres, has long been a favourite place of resort and recreation, and is a great asset to the City.

The principal industries are shipbuilding, rope making, chocolate, sugar and tobacco factories, motor and general engineering, clothing, printing, paper bag and cardboard making, glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The docks comprised within the Port are the City Docks, 6 miles from the entrance to the river Avon, the Royal Edward and Avonmouth Docks, at the mouth of the river, and the Portishead Docks, to the westward of the river entrance. The net tonnage of ships (engaged in the Foreign Trade) entered in 1931 was 2,648,608 tons, and of those cleared 1,067,079 tons, the value of the seaborne trade being stated at £30,317,121 for 1930; the net tonnage of arrivals in the Coasting Trade was 899,972, and of the departures 2,291,366 net tons in 1931. The principal imports are grain, flour and meal, fruit, provisions, frozen meat, sugar, metals, ores, oilseeds, paper, petroleum and petroleum spirit, timber, tobacco and general merchandise, and the chief exports are galvanised iron, tin-plates, machinery, manufactured oils, chemicals, stroutia, hardware, and unmanufactured clay.

The chief buildings, in addition to the 14th century Cathedral (rebuilt by Street 1866-1883), the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as "the fairest,

goodliest and most famous parish church in England"), and the 15th century Temple Church, are Canyiges' House, the Merchant Venturers' Almshouses, St Peter's Hospital, the Council House, Guildhall, Exchange (erected from the designs of John Wood in 1743), Colston Hall, the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1860. It is a remarkable engineering triumph, affords by far the best view of the wonderful *Avon Gorge* and new low level road from Bristol to the Royal Edward and Avmouth Docks, known as *Portway*, and it is seldom that such a panoramic view is to be found in such close proximity to a great city. The *Leigh Woods* and *Nightingale Valley* on the opposite side of the river to Clifton Down add enormously to the beauty of the surroundings. Bristol offers to the visitor a wealth of beauty and charm of historic and romantic associations which can in no other part of the country be surpassed.

Bristol was a Royal Borough before the Norman Conquest, and in 1899 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69 Councillors. The earliest forms of the name are *Brigstowe* and *Briston*.

Principal City Officers.

The Lord Mayor (1932-1933), Thomas James Wise.

High Steward and Lord Lieutenant, His Grace the Duke of Beaufort, G C V O
Recorder, Stuart James Bevan, K C, M P (1932).
Town Clerk, Josiah Green.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 18½ miles N. of London. The municipal area is 13,392 acres, with a population of 313,366 at the census of 1931.

Hull is the third port in the United Kingdom and the chief port of North-Eastern England. Ten docks cover a water area of 210 acres and are equipped with every modern appliance for the rapid handling of cargoes. Hull has the reputation of being the cheapest port in the U.K. Net registered tonnage of ships using the docks in 1931, 6,570,546. Value of imports (grain, oilseed, provisions, wood, fruit, wool, &c.) £61,208,853 in 1930, exports (cotton, woollen goods, coal, machinery, cattle food, &c.) £27,669,961. Hull is the largest centre of the seed-cushing and oil-extracting industry in the world, the premier fishing port of the U.K. and an important centre of the flour-milling industry, other manufactures are acetates, canisters, cement, colours and chemicals, electric lamps, mill machinery, oil cakes and meals, paint, paper, polishes, power alcohol, radiators, rope, shipbuilding, soap, starch, surgical dressings, tanning, tar products, varnish, vegetable oils, wood milling, &c.

The chief buildings, in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the longest parish church in England), the Guildhall (1913), Exchange (1866), Chamber of Commerce, Corn Exchange, Market Hall, City Hall, Custom House, Dock Offices, Royal Institution (1854), Wilberforce House, Trinity House (1753), and the Forens Art Gallery. A Municipal

Art Gallery has been established under the gift of the late Mr. T. R. Forens. A municipal aerodrome was opened in 1929.

The name of *Wyke-upon-Hull* was changed to Kingston upon Hull by Edward I. in the 13th century. The town was incorporated in 1440 and made a county borough in 1888. The Corporation consists of a Lord Mayor, 21 Aldermen and 63 Councillors.

Principal City Officers.

The Lord Mayor (1932-1933), J. M. Dossor.
Recorder, Charles Frederick Lowenthal, K.C. (1929).

Town Clerk, A. J. R. Howard Roberts (1929).

BRADFORD

BRADFORD (Yorkshire, West Riding), 192 miles N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 24,341 acres (about 38 square miles), with a population at the 1931 census of 298,041.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works, and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1867), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, the Wudson (Baths and Public Halls, 1905), Grammar School, Technical College (1882), and the Mechanics' Institute (1832).

The Saxon township was created a parliamentary borough in 1832, a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 22 Aldermen and 66 Councillors.

Principal City Officers.

The Lord Mayor (1932-1933), J. W. Longley.

Recorder, Frank Beverley (1926).

Stipendiary Magistrate, Beaumont Morice (1914).

Town Clerk, N. L. Fleming (1920).

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and 27½ miles N. of London, has an area of 8,458 acres (13 square miles) and a population of 283,145 at the census of 1931.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. The exports of the Port of Newcastle upon Tyne (River Tyne) include coal, chemicals, oil fuel (as cargo and bunkers), pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, iron, iron ore and steel, sulphur ore, petroleum, timber and wood, and potatoes. The net tonnage of ships engaged in the Foreign Trade was 7,072,837 for arrivals and 8,324,027 for departures in 1930, the value of ocean borne trade being £39,061,331 in 1931; the net tonnage of arrivals in the Coasting Trade was 3,740,523 and of departures 2,599,030 net tons in 1930. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings include the (12th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St.

Nicholas), St. Andrew's Church (11th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, Holy Trinity War Memorial, Guildhall (1698), Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery, Wood Memorial Hall (1870) and the Custom House. The beauty of Jesmond Dene (gift of 1st Lord Armstrong) is much appreciated by visitors. The city is connected with the south bank of the Tyne by six bridges, viz.:—High Level (Stephenson) for road and rail, Swing bridge (road), Redheugh (road), Scotswood suspension (road), King Edward VII. (rail), Tyne (road).

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough, and in 1859 was incorporated. The City Corporation now includes a Lord Mayor (1906), 29 Aldermen and 57 Councillors.

Principal City Officers.

The Lord Mayor (1922-1923), Dr. J. W. Leech, M.P. Recorder, R. Storry Deans, LL.B. (1922).
Town Clerk and Clerk of the Peace, Arthur Maule Oliver, O.B.E. (1907).

NOTTINGHAM.

NOTTINGHAM (Nottinghamshire), the principal manufacturing centre of hosiery and lace, stands on the left bank of the Trent, where the tributary stream Leen enters the river, 225 miles N.N.W. of London. The municipal area is

20,935 acres (27 square miles), and includes an open market-place of 5½ acres in the centre of the city, recently laid out as an ornamental garden, &c. Population, Census of 1921, 268,802.

The city is connected with the North Sea and the Atlantic by the river Trent and canals and is an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters, and colour printing.

The chief buildings are the 11th century Nottingham Castle (restored in 1876, and now the City Museum and Gallery of Art), Wollaton Hall (1580-88) recently purchased by the Corporation, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Council House, opened by the Prince of Wales in 1929, the Guildhall and Court House (1887), Shire Hall, Albert Hall Exchange, University College, Hospital and Eye Infirmary. New University College, opened July 20, 1928.

Snotengaham or *Notningeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobawo*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1297. The Corporation comprises a Lord Mayor, 26 Aldermen and 48 Councillors.

Principal City Officers.

The Lord Mayor (1922-1923), H. S. Whitby. Recorder, Henry Holmes Joy, K.C. (1922).
Town Clerk (1922) and *Clerk of the Peace* (1922), William John Board, O.B.E.

STRATFORD-UPON-AVON.

STRATFORD-UPON-AVON (a municipal borough in Warwickshire, on the west bank of the River Avon), had a population (Census 1921) of 11,616. As the birthplace of Shakespeare the borough is visited annually by travellers from all parts of the globe. The principal buildings, &c., are:—

Shakespeare's Birthplace (April 23, 1564), bought for £3,000 in 1847 and restored in 1857. Managed by 32 Trustees (22 *ex-officio*, 4 representative). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Founded A.D. 1269. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804 and 1909, mural allegorical paintings, done by medieval priests.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harvard House.—Built 1506 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Anne Hathaway's Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Here Shakespeare

acquired his "small Latin and less Greek," and matchless English.

The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830-92) and his wife Group compiles Library, with 20,000 volumes of Shakespeare editions and dramatic literature, including Irving and other collections. *Gallery* of pictures (including unique "Droeshout" portrait). *Tower*, affording extensive views of river and district. *Gardens*, and *Statuary* (Lord Ronald Gower's gift). *Theatre*, burnt down in 1926, has been rebuilt by international subscription. Special spring and summer performances, commencing about April 23, with floral procession to tomb and unfurling of national flags, on the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; retired to it about 1610; died there April 23, 1616. House was rebuilt about 1705, and demolished by Rev. Francis Gastrell, 1750.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768. Contains details of the unbroken sequence of Bailiffs and Mayors since A.D. 1553 (including the poet's father, John Shakespeare). Exhibits: Gainsborough portrait of Garrick; four Corporation Maces, gilt silver of 15-16th Century.

Trinity Church.—Dates from 13th Century. Of cathedral-like proportions. Shelters remains of poet and family.

Wilmote.—The house of Shakespeare's mother, Mary Arden, was purchased in 1930, now open to the public. Interesting medieval manor house with dovecote and ancient barns.

FREEDOMS AND ADDRESSES (CITY OF LONDON).

THE *Honorary Freedom of the City of London* is conferred as a mark of high distinction upon eminent subjects of the Crown for exceptional services to the Country and the Empire. The *Freedom of the City of London* is acquired after strict compliance with regulations from time to time issued pursuant to resolutions of the Court of Common Council. The names of applicants who have complied with the regulations are submitted for election to the Court of Common Council at its fortnightly meetings, those applying through the medium of a Livery Company being submitted in a similar manner to the Court of Aldermen. Orphans of Freemen are eligible for election as foundation scholars at the Freemen's School, Ashstead, Surrey, and Freemen of the City of London are themselves eligible for admission to Almshouses at Brixton, in accordance with regulations from time to time issued.

Addresses of Welcome are occasionally offered to Foreign Sovereigns and Presidents pursuant to resolutions of the Court of Common Council. These high distinctions are sometimes confused with the ceremony of admission to the Honorary Freedom of the City, but the Honorary Freedom is conferred only on persons in allegiance to H.M. the King.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq. miles. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles. Separated from the mainland by the Menai Straits is the Welsh island-county of *Anglesey* or *Môn* (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.—The population at the Census of 1931 was 2,593,014 (inclusive of Monmouthshire).

Relief—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,557 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.), Berwyn (Arian-fawddy 2,970 ft.); Powys (Plinlimmon 2,462 ft., Drygfan Fawr 2,115 ft., Radnor 2,163 ft.), and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,866 ft., Pen-y-gawr fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Uk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Taf* (50 miles), *Taff* (40 miles), *Doney* (30 miles), *Tŷ* (25 miles), and *Conwy* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elen and Claeuwrn valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Gondels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratacus), King of the

Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Uk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic *Gondels* and *Brythons* into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelwe*, or Welsh (= Foreign). The West Saxons' victory of Deorham (577) isolated the *Waelisc* of Wales from those of Cornwall, while the battle of Chester (633) similarly cut off communication with the *Waelisc* of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being *Howel Dda*, who codified the laws of the country, while *Llewelyn ap Seissyllt* (husband of the heiress of *Gwynedd*) again united the provinces and reigned as Prince from 1023-1025.

The Norman Conquest.—After the Norman conquest of England William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house *Gwynedd*, in the north, gained an ascendancy over the whole of Wales, and *Llewelyn ap Iorwerth* was in constant strife with England for recognition as an independent sovereign, but *Llewelyn*, the son of *Iorwerth*, was killed in 1240 during hostilities between the Welsh and English, and his brother *David* was captured and executed by the English in 1242. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (*Eisteddfod*), instituted by Prince *Rhys ap Griffith* in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of *Prydian*, a ruling prince in an age many centuries before the Christian era.

AREA AND POPULATION OF THE 13 WELSH ADMINISTRATIVE COUNTIES.

County or Shire and Administrative Headquarters	Acreage	Population, 1931

CARDIFF.

CARDIFF (Glamorgan), at the mouth of the river Taff (Caer Taff), Rummey and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1931) of 223,648. The principal industries include ship repairing, rope making, steel, copper, lead and zinc works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, pit-wood, oil, fruit, butter, cheese, frozen and chilled meat, live cattle, canned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, tin plates, &c.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

The Lord Mayor (1932-33), C. F. Sanders.
Stipendiary Magistrate, W. Hugh Jones, K.C.
Recorder, Roland E. L. Vaughan-Williams, K.C.
Town Clerk & Clk. of Peace, Cecil G. Brown, LL.B.

SWANSEA

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest anthracite port), patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1931 of 164,825. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton, and the 17th century Grammar School, founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns a member to Parliament.

Mayor (1932-33), D. Evans.
Recorder, E. W. Milner-Jones.
Town Clerk, H. L. Lang-Coath.

THE KINGDOM OF SCOTLAND.

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between $60^{\circ} 51' 30''$ and $54^{\circ} 38' N.$ latitude and between $1^{\circ} 45' 32''$ and $6^{\circ} 14' W.$ longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N and W, and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water). The population (at the census of 1931) was 4,842,554, a decrease of 39,943 since the census of 1921.

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright, Hartfell (2,651 feet) in Dumfries, and Whitecumb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*, they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and *Ben Mìch Dhui* (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of *Daer* and *Poitrail* water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, *Bonnington Linn* (30 feet), *Corra Linn* (84 feet), *Dundaff Linn* (10 feet), and *Stonehyres Linn* (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (127 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The

Spey (120 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882-9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with *Lochs Awe*, *Tay*, *Rannoch* and *Ercht* in the Grampian valleys, *Loch Ness* (24 miles long and 800 feet deep), with *Lochs Oich* and *Lochy*, in the Great Glen; and *Lochs Shin* (20 miles) and *Maree* in the northern Highlands.

Orkney.—About 6 miles N of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1921) of 25,896. *Kirkwall*, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *bjochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between *Pomona* and *Hoy*, was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland.—About 50 miles N of Orkney (with the detached *Fan Isle* at 25 miles N) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1921) of 27,921. *Lerwick*, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N of *Unst*, is the most northerly of the group and of the British Isles ($60^{\circ} 51' 30'' N$ lat.).

Western Islands.—Off the W coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, *Portree*, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernesshire, in 1746), which contains the *Cuillin* (*Sgurr-na-Banachdich*, 3,243 feet), *Red Hills* (*Ben Caillich*, 2,403 feet), and many other picturesque mountains, *Mull* (367 square miles), containing *Ben More* (3,125 feet), *Ben Buie* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura*

* *Land's End to John o' Groat's.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near *Duncansby Head*, (situated at the N.E. extremity of the island) to *Land's End*, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 600 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 2 miles S.W. of *Duncansby Head*, while *Dunnet Head* (also in Caithness) extends farther N than *Duncansby*. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Heboudai*, latinized as *Hebrides* by Pliny, and corrupted to its present form. The Norwegian name *Sudreygar* (Southern Islands) was latinized as *Sodorænesæ*, a name that survives in the Anglican bishopric of "Sodor and Man."

(160 square miles), with a chain of hills culminating in the *Paps of Jura*, *Beinn-an-Oir* (2,571 feet), and *Beinn Chaolais* (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Munch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles *W. of Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callenish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour, the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

The offices of the *Scottish Travel Association* are at 37, George Street, Edinburgh.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picts* by the Romans on account of the tribal habit of painting the body. The *Picts* seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the *Picts* were driven northwards by later Celtic immigrants. Celtic *Gauls* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampian") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern *Caledonia* was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catraig*, or *Picts' Work Dyke*, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern *Caledonia* about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the *Picts* and *Scots*, the *Brythonic Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the *Lothians*. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (633), and towards the close of the 6th century the Scots under *Kenneth Macalpine* became the dominant power in *Caledonia*. In the reign of Malcolm I (943-954) the *Brythons* or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (*Lothian*) being conquered by Malcolm II (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The *Hebrides* did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1931) of 438,998 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates' and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1932-35), William J. Thomson.

Town Clerk, Sir Andrew Grierson, LL.D., S.S.C., J.P.

City Chamberlain, John D. Imrie, M.A., B.COM.

GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 30,046 acres, and a population (1931 Census) of 1,088,461. (Increased to 1,130,675 by subsequent extension of area). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £69,500,000 in 1930, the total net tonnage of the ships entering (1931-32) being 6,313,607 tons, of those cleared 6,271,080 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmary, the Art Galleries and the Mitchell Library. The City is governed by a town council of 116 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1932-35), Alexander Brown Swan.

Town Clerk, David Stenhouse, J.P.

City Chamberlain, A. C. McMillan, G.A., J.P.

* The Cities of Edinburgh, Glasgow, Dundee and Aberdeen are each a County of a City, and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

DUNDEE.

DUNDEE, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 4½ miles N. of Edinburgh, has a municipal area of 7,317 acres, and a population (Census 1931) of 175,583 (an increase of 7,868 since 1921). The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. One of the finest Public Baths is in Dundee. The harbour affords dock accommodation of nearly 38 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends 2 members to Parliament.

The Lord Provost (1932-35), William Huntly Buist.

Town Clerk, W. H. Blyth Martin.

ABERDEEN.

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 6,748 acres with a population (Census 1931) of 167,258 (an increase of 8,289 since 1921). The tonnage of the ships entered in 1931 was 931,966 tons (and fishing vessels 1,349,845 tons). The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shipbuilding, paper-making, and woollen, jute and linen manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H. M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (1932-35), Henry Alexander.
Town Clerk, George S. Fraser, M.A., B.L.

BURGHs OF SCOTLAND IN ORDER OF POPULATION.

NOTE.—R signifies a Royal Burgh; P, a Parliamentary Burgh. Remainder are Police Burghs.

* Town with privileges of a Royal Burgh

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,532 sq. miles and its geographical position between 52° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N. E. to S. W. (Toir Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperren Mountains* (Sawel 2,240 ft.) of County Tyrone in the North; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 2,793 ft.) in the North-East; the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillcuddy's Reeks* (Carruntuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockneeldown* (2,569 ft.) and *Comeragh Mountains* (2,490 ft.) of County Waterford, in the South. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, and the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Sue, Nore, and Barrow* to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which *Lough Neagh* (250 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the *Shannon Chain of Allen, Bodery, Forbes, Ree and Derg*, and the *Erne Chain of Gowna, Oughter, Lower Erne, and Erne*, in the central plain; *Melvin, Gull, Gave, and Conn* in the north; and *Corrib and Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of Macgillcuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N. and 62° in the S.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scots*, who afterwards established themselves in Scotland.

Legendary History.—According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardris* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn McCool (Fingal) to connect Antrim with Scotland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 380, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

Later History.—The Roman conquest of Britain was not extended to Ireland, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Fingall* (White Strangers) and the Danes as *Dubgall* (Black Strangers), names which survive in "Fingall,"

"MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaid-tir, Laigin-tir, Mumans-tir and Kinnak-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Anlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhrí O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicized by *Robert Poyning*, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

* NORTHERN IRELAND.—Under the *Government of Ireland Act, 1920*, as amended by the *Irish Free State (Agreement) Act, 1922*, the *Irish Free State (Consequential Provisions) Act, 1922*, and the *Ireland (Confirmation of Agreement) Act, 1925*, Northern Ireland comprises the cities of Belfast and Londonderry, and the counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, with its capital at Belfast.

† IRISH FREE STATE.—Under the *Irish Free State (Agreement) Act, 1922*, the Provinces of Leinster, Munster and Connaught, with the Ulster Counties of Cavan, Donegal and Monaghan, form the Irish Free State, with its capital at Dublin.

‡ Excluding the larger lakes, rivers and tideways. The estimated population of the Irish Free State at June, 1932, was 2,973,000.

Northern Ireland.

THE GOVERNOR.

HIS GRACE THE DUKE OF ABERCORN, K.G., K.P., born 1869; appointed Governor 1922; re-appointed for further term Dec. 8, 1928 (Government House, Hillsborough, Northern Ireland. Telegrams: Governor, Belfast; Telephones. Official, Hillsborough 19; Private, Hillsborough 18) £8,000
Private Secretary and Comptroller, Lt.-Com. Oscar Henderson, C.B.E., D.S.O., R.N. (ret'd)
Aide-de-Camp, Capt. H. de C. Martelli, M.C.
Military A.D.C., Lieut. C. A. R. Shillington, R.N.V.R.
Royal Air Force, A.D.C., Major M. F. Hammond-Smith, M.C.
Surgeon in Ordinary, Professor Thomas Sinclair, C.B., F.R.C.S., M.P.
Physician in Ordinary, Sir Thomas Houston, M.D.

CONSTITUTION AND GOVERNMENT.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922, and the Northern Ireland (Miscellaneous Provisions) Act, 1928, a separate Parliament and Executive Government were established for Northern Ireland, which comprises the six parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, and the Boroughs of Belfast and Londonderry. The Constitution of Northern Ireland is Federal in type, certain legislative and fiscal powers being reserved to the Imperial Parliament.

The Northern Irish Parliament consists of a House of Commons of 52 elected members (who receive an allowance of £500 per annum) and a Senate of a *ex-officio* Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. Northern Ireland continues under the Act of 1920 to return 13 members to the Imperial House of Commons.

The Executive power is vested in the Governor on behalf of His Majesty the King; he holds office for 6 years, and is advised by 7 Ministers responsible to Parliament. (The Cabinet Salaries and the allowances of the Members of Parliament here have voluntarily abated by 15 per cent for years 1931/32.)

THE CABINET (June 8, 1931.)

(Stormont Castle, Belfast.)

Prime Minister, The Rt. Hon Viscount Craigavon, D.L., M.P. £3,200

EDUCATION.

On Dec. 31, 1930, there were 1,893 Public Elementary Schools with 201,072 pupils. In 1930-

31 there were 73 Preparatory, Intermediate and Secondary Schools recognised by the Ministry of Education, with 12,094 pupils, and 123 Centres of Technical Instruction, with 23,941 students. The Queen's University at Belfast had 123 Professors, Lecturers and Demonstrators, and 1,427 students in 1930-31.

FINANCE.

The greater part of the taxation in Northern Ireland is imposed and collected by the Imperial Authorities; the balance after deducting the cost of collection and of certain services reserved to the control of the Imperial Parliament is paid over to Northern Ireland's Exchequer. Northern Ireland makes a contribution to the cost of the Imperial Services, i.e., Navy, Army and Air Force, National Debt, &c

	1929-30	1930-31.
Total revenue . . .	£11,126,000	£12,233,000
Total expenditure (including Imperial contribution) £11,109,000		£12,229,000

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—In 1930 there were 315,259 acres under corn crops (oats, 306,809 acres), 182,565 under green crops (potatoes, 136,294), 28,507 under flax, 8,906 under fruit, and 478,044 under hay, a total acreage of 1,013,281. The production (1930) in tons was: oats, 277,286; potatoes, 856,435; turnips, 753,060; flax, 5,363; hay, 835,912. The *Live Stock* included 672,776 cattle, 704,100 sheep; 216,315 pigs, 48,338 goats, 104,304 horses, 235 mules, and 8,299 asses.

Principal Industries.—Agriculture, shipbuilding and ship repairing, flax spinning and weaving, linen bleaching and finishing, distilling, linen embroidery, fruit preserving, food canning, milling, and the manufacture of textile machinery, ropes and twine, furniture, tobacco, tweeds and woollens, shirts and collars, chemical manures, soaps and candles, clothing, hosiery, pottery, roofing felts, biscuits, matches, &c. the production of aluminium oxide, bauxite, salt, diatomite or kieselguhr. Herring fishing and pickling is an important industry during the summer months.

Minerals.—About 2,400 persons were engaged in the various mines and quarries in 1930, the principal output being igneous rocks (other than granite) about 415,000 tons, sandstone 187,000 tons, chalk 206,000 tons, clay 238,000 tons, granite 78,000 tons, limestone 107,000 tons.

Manufactures.—Belfast is the principal industrial centre. Linen manufactures provided employment for over 75,000 persons in 1931, the number of spindles being 900,000. The shipyards employed about 13,000 persons in 1930, the output exceeding 168,000 tons.

COMMUNICATIONS

Seaports.—The principal seaports are Belfast, Londonderry, Newry, Larne and Coleraine. There are regular week-day shipping services from Belfast to Liverpool, Heysham, Ardrossan and Glasgow, and from Larne to Stranraer. Other services are maintained at regular intervals and there are also indirect routes via Greenore and Holyhead and Kingstown and Holyhead.

Railways.—The principal railways are the Great Northern, L.M. & S. (Northern Counties Committee), Belfast and County Down, Londonderry and Lough Swilly, and the Clogher Valley. The total railway mileage in 1930 was 766 miles.

TOURIST ASSOCIATION.—The *Ulster Tourist Development Association*, 6, Royal Avenue, Belfast.

Saorstát Éireann—The Irish Free State.

THE GOVERNOR GENERAL.

Vacant £10,000

CONSTITUTION AND GOVERNMENT.

UNDER the *Irish Free State (Agreement) Act, 1922*, the Irish Free State (*Saorstát Éireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I is declaratory of Fundamental Rights: (1) The coequality of the Irish Free State (2) Power of government derived from the people, in accordance with the Constitution. (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens (4) Irish the national language, English being recognised as an official language (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person inviolable (7) Dwelling of each citizen inviolable. (8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed. (9) Free speech and right of lawful assembly. (10) Free education for all citizens. (11) Natural resources of the State inalienable

Section II. provides for a legislature (*Oireachtas*) of the King and two houses, the Chamber of Deputies (*Dáil Éireann*) and the Senate (*Seanad Éireann*), the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter, consisting of 56 Senators and of 2 Senators from each University, elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year. Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register, and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people. In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides for its exercise as in the Dominion of Canada, by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber, and consists of not more than twelve Ministers (*Aire*) appointed by the representative of the Crown, of whom

four ministers shall be members of the Chamber, and a number not exceeding eight chosen from all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate their seats; provided that the Chamber may from time to time, on the motion of the President of the Executive Council, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (*Cúirt Oachtarach*). The Courts of First Instance include a High Court (*Ard Chúirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant such leave.

Section V contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

DEFENCE—ROINN COSANTA.

Article 46 of the Constitution of the Irish Free State lays it down that the Oireachtas has the exclusive right to regulate the raising and maintaining of the armed forces in the Irish Free State. The strength provided for (1932-33) is 229 Commissioned Officers and 5,500 Non-Commissioned Officers and men. The estimated total expenditure on the Army for the financial year ending March, 1933, is £1,318,458.

RELIGION.

(Census of 1926)

Catholics	2,751,269
Episcopalians	164,215
Presbyterians	32,429
Methodists	10,663
Other	13,416

Total 2,971,992

EDUCATION.

Primary Education is directed by the State. Secondary Education is in private hands and is largely conducted by Religious Orders. There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin). The estimated State expenditure on education in 1932-33, excluding administration and inspection, was Primary £3,648,000; Secondary £338,647; Technical £180,213; Science and Art £42,065.

Receipts	£24,365,196	£25,425,500
Expenditure	25,276,784	25,408,150

The estimated Revenue for 1931-32 includes Customs, £8,173,000; Excise, £6,196,000; Estate, etc., Duties, £1,231,000; Income Tax and Super Tax, £4,035,000; Excess Profits Duty, £80,000; Corporation Profits Tax, £250,000; Motor Vehicles Duties, £900,000; Post Office Services, £1,831,000.

The principal items of estimated Expenditure for 1931-32 are Debt Service, £2,070,007 (Interest £1,378,667, Sinking Fund £697,360), Local Taxation Grants, £2,407,773; Army Services, £1,637,480; Police, £1,609,426; Education, £4,646,946; Old Age Pensions, £2,756,500; Postal Service, £2,201,775; Lands and Agriculture, £1,113,467, etc.

The expenditure figures also include a number of items of a capital and productive character, together with certain abnormal and non-recurrent charges.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock—In 1931 there were 763,224 acres under corn crops, 653,729 under root and green crops, 647 under flax, 7,361 under fruit, and 2,313,189 under hay, a total of 3,738,220 acres. The principal produce in 1932 was oats, 520,820 tons; potatoes, 1,932,120 tons; turnips, 3,300,750 tons; mangolds, 1,539,866 tons; flax, 119 tons; and hay, 5,116,305 tons. The Live Stock included 4,029,084 cattle, 3,575,379 sheep, 1,227,003 pigs, 153,232 goats, 449,697 horses, 15,719 mules, and 177,334 asses.

Minerals—517 persons were employed in the coal mines in 1929. 85,187 tons of coal were won.

Sea Fisheries—Over 12,000 persons were employed in the fisheries in 1930, the total value of all fish landed being £247,366.

TRADE

The total trade of the Irish Free State for 1931, exclusive of Bullion and Specie, was valued at £87,528,373, being £50,457,477 for Imports and £37,070,896 for Exports; the Imports from Great Britain were valued at £35,728,937, and the Exports to Great Britain at £31,787,227; the Imports from Northern Ireland at £5,040,085, and the Exports to Northern Ireland at £3,928,492.

THE LEGISLATURE—OIREACHTAS ÉIREANN.

The Legislature (*Oireachtas*) consists of a Senate (*Seanad Éireann*) of 60 members, and of a Chamber of Deputies (*Dáil Éireann*) on a population basis (153 at present) elected on the principles of Proportional Representation. The *Oireachtas*, unless sooner dissolved, continues for "six years or such shorter period as may be fixed by legislation." The period fixed by legislation is at present five years.

Speaker of Dáil Éireann, Promissias

(*Ó Fathaigh* (Frank Fahy, B.A., B.L.)) . . . £1,700

Deputy Speaker of Dáil Éireann, Pádraig

(*Ó h-Úráin* (Patrick Hogan)) 1,000

Clerk of the House, Colm O Murchadha

(Colm Murphy)

Party Strength (*Dáil Éireann*).

Government, Fianna Fáil	71
Ómáinn na nGaedhael	57
Independents	11
Labour	7
Independent Labour	2
Farmers	4
The Speaker	1

Total 153

** Members of *Dáil Éireann*, other than Ministers, are allowed £30 a month towards expenses, together with free travelling facilities between Dublin and their constituencies.

The Senate—Seanad Éireann.

MEMBERS OF SEANAD ÉIREANN.

THE KING'S PRIZE.

Open only to British Subjects who are past or present members of H.M. Forces, or the Forces of any British Protected State.

STAGES—

First Stage, N.R.A. Bronze Medal and N.R.A. Bronze Badge. (*Qualifying*.) (7 shots at 200, 300 and 600 yards.)

Second Stage, N.R.A. Silver Medal and N.R.A. Silver Badge (Open only to the *Three Hundred* competitors who have taken the highest places in the First Stage.)

Third Stage, The King's Prize of £50, N.R.A. Gold Medal and N.R.A. Gold Badge. (Open only to the *One Hundred* competitors who have taken the highest places in the Second Stage.)

WINNERS OF THE KING'S PRIZE.

The present conditions are 10 shots at 300, 300 and 600 yards, and 15 shots at 300 and 1,000 yards. Highest possible score (since 1925) 300.

Third Stage from 1885.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Viet., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Paval Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefdoms along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 353 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 77 per cent. of the population. The details of the 1931 Census (revised totals) are as follows—

PROVINCE, STATE, OR AGENCY	Area in square miles (1921)	Persons				Difference per cent 1931 & 1921.
		1931			1921	
		Males	Females	Total		
Ajmer Merwar	2,711	296,081	264,211	560,292	495,271	+ 13.1

In this table the population shown in the Census Tables of 1921 have been adjusted with subsequent changes of area.

* Districts and Administered Territories

† Constituted a Province from April 1, 1932.

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchujunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Sulaiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhya. The Eastern and Western Ghats all but complete this enclosing triangle of mountain ranges. In the extreme N.W., south of the Vindhya, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical

geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chuchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The sixth general census of India was taken on the 26th February, 1931. The returns (revised and corrected totals) gave a population of 352,837,778, as compared with 318,942,480 in 1921 (for details see p. 721), an increase in the ten years of 10.6 per cent. The census total of 1931 is divisible into 271,526,933 (or nearly 77 per cent.) for British India, and 81,830,845, (or over 23 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1931 37 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste, Tribe, Race or Nationality.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes and races are (Census 1921)—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,264,000), Ahir (9,032,000), Rajput (9,773,000) Burmese (8,371,000), Jat (7,375,000), Maratha (6,566,000).

Religions (Census 1931).—The population by religions in 1931 includes 239,193,635 Hindus (68 per cent. of the total), 77,677,545 Muhammadans (22 per cent.), 12,786,806 Buddhists (3.6 per cent.), nearly all in Burma, leaving nearly 6 per cent. for all other religions, including 6,296,763 Christians (3,773,087 of whom are in Madras, Travancore, and Cochin), 4,335,771 Sikhs, 1,252,105 Jains, 111,853 Parsis, and 8,391,065 described as Tribal, who believe in magic and strive to propitiate impersonal forces. Minor Religions, and Religions not returned, 459,873. The Muhammadans, who are increasing faster than the Hindus, are influenced by the caste system and other Hindu characteristics. No particulars of religion are available of 2,308,221 persons (Bombay 75,735, Burma 19,649, and North-West Frontier Province, 2,212,837). The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on agricultural and pastoral pursuits. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services comprise over 4,825,000 persons.

Sec.—Marriage is almost universal owing to religious obligations. The movement

against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945, and 1,000 to 943 in 1931.

Languages.—India has 222 vernacular languages, of extraordinary variety. The languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,234,000), Rajasthani (12,681,000), after which come Orissa, Kannarese, Gujarati, Burmese, and Malayalam. Hindustani, a dialect of Hindi, containing a large number of Persian and Arabic words, is the *lingua franca* of India. Hindustani and Hindi have become the chief literary languages of Hindustan. English is understood by many.

LARGE CITIES WITH POPULATIONS EXCEEDING 100,000 (including Cantonments).

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.

They are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation.

The principal latest official publications relating to India, are—*Parliamentary Papers* (Session 1931-32)—India Finance (Supplementary and Extending) Act, 1931 (H.C. 13), Moral and Material Progress Report, 1930-31 ("India in 1930-31") (H.C. 116), East India Budget, 1932-33 (H.C. 104), Statistical Abstract, 1920-21 to 1929-30 (Cmd 4109), Accounts and Estimates, 1931-32, Explanatory Memorandum (Cmd 3969), 1932-33, (Cmd 4161), Emergency Measures and Correspondence between the Viceroy and Mr. Gandhi (Cmd 4014), Burma (Kantung)—Siam boundary (Mch Sal River) Agreement (Cmd. 4112), Commercial relations between India and Poland, (Convention signed May 8, 1931 (Cmd 4119), Round Table Conference, 1931; Second Session: Prime Minister's Statement (Cmd. 3972), Proceedings in Plenary Session (Cmd 3997); Burma Round Table Conference, Report and Prime Minister's Statement (Cmd 4004), Constitutional Reforms—Federal Finance Committee, Report (Cmd. 4069), Franchise Committee, Report (Cmd 4086), Indian States (Financial) Committee, Report (Cmd. 4103), Communal Decision (Cmd 4147) *Non Parliamentary Publications*.—British Trade in India, 1930-31; Half-Yearly Returns of Loans raised in England; Home Accounts, 1930-31; Estimate of Revenue and Expenditure, 1931-32; Indian Regulations relating to Passengers' Baggage Round Table Conference:—Federal Structure and Minorities Committee, Proceedings; Indian Franchise Committee, Memoranda; Burma Round Table Conference, 1931-32, Report and Proceedings. *Government of India Publications*.—Reports of Committees on—Druses (Chopra), Frontier Regulations, Omissa, Central Banking, Finances of Sind; Government of India Act, with Rules and Notifications thereunder, Sind Conference, 1932, Report and Appendices. *Published by the High Commissioner for India*.—Reports of the Indian Trade Commissioner, 1930-31 and 1931-32. Parliamentary and Non-Parliamentary Papers can be purchased through any Bookseller, or direct from H. M. Stationery Office, Imperial House, Kingsway, W.C.2. Government of India publications can be obtained from the High Commissioner for India, India House, Aldwych, W.C.2. One-inch Ordnance Survey Maps are published by the Survey of India, and can be obtained from the High Commissioner for India (address above) (1s to 1s. 6d. each).

tion, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevailed, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1899. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling, and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (356 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (366 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. One last contributor to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their incursions left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, made himself master of Northern India, and ended his reign in pity and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions, but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud

of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years, but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutub-din, whose memory is perpetuated by the Kutub Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed, frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 Babar, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humayun (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540-1545. Akbar the Great, Humayun's son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Bejar and Bidar were absorbed, and Bijapur and Golkonda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Fazl, the poet. Jahangir (1605-27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under Shah Jahan (1627-1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. Aurangzeb (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and Bahadur Shah (1707-12) secured the crown. After four short-lived emperors Muhammad Shah (1719-48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Marhattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of

the present Nizam). In 1728, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748-1754) and *Alamgir II.* (1754-1759), occupied the throne, and were succeeded by *Shah Alam* (1759-1806), who came to terms with the British.

THE MAHRATTAS—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1657-1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishwanath* (1712-1720) Peshwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivaji's descendants thenceforth holding a merely nominal position. Under the Peshwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS—The Punjab lay beyond the reach of the Mahrattas. Thence the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Gurind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780-1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route

round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505-1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the Dutch were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1662 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. French and Danish East India Companies were established in 1601 and 1666 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George, in 1633 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay

and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1762, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant, and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwans* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule Warren Hastings (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Marhattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of Lord Cornwallis (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third

Mysore War, in which he defeated Tipoo, the son and successor of Hyder Ali. The rule of Sir John Shore (1793-98) was uneventful.

The administration of the Marquess Wellesley (1798-1805) was distinguished by many important events. Tipoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tipoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassem (1800) broke up the Marhatta confederacy, but led to the Second and Third Marhatta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of Lord Cornwallis (1805), and that of Sir G. Barlow (1805-7), Wellesley's policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the Marquess of Hastings (1814-23) a severe struggle with Nepal ended with the Treaty of Sagauli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Marhatta Peshwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. Lord Amherst (1819-58) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While Lord Dalhousie Bentinck was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the

residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sohraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *via* the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to Indian rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory, while on the death of the last of the Marhatta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventual annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN. The "Act for the Better Government of India" established the authority of the Crown: and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms. with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Afghan and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured

a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 Lord Amherst occupied the post of Viceroy. Lord Curzon was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 22 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz. the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Santhalpuri district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. In Dec., 1912, the Viceroy took formal

possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. The outbreak of *The Great War* in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916 that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The Bombay Government took the first steps towards obligatory primary education, a policy of more complete local self-government was decided on by the Government of India. The influenza epidemic spread to India, and it was estimated that over 22 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Gandhi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers with which the Government had armed themselves during the War to deal with sedition. The murder of the Amir and the subsequent events in Afghanistan were followed by an invasion of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. The Home Parliament, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see pp. 735, 737). The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which

the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i.e., an exchange rate of Rs. 10 to the £, was adopted. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1922, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1922. The battle between constitutionalism and revolution continued. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrest. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued which forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England.

In November the Prince of Wales visited India. In 1922 the Government arrested Mr. Gandhi, who was sentenced to six years' imprisonment. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press.

The Fiscal Commission (appointed in 1921) reported and advised the adoption of a policy of protection.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. Twenty-three Acts and Regulations supplementing the criminal law were repealed. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. The "Inchoape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 12½ crores. The Government accepted the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghan-

istan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border. At the Imperial Conference, a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921, that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. The Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended. During the year a Legislative Council was set up in Coorg.

Early in 1925, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures. A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in the Montagu-Chelmsford scheme of 1918. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived. The Government extended the policy of protection by granting a bounty on steel manufactured in India. The Khyber Pass Railway, 27 miles in length, from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened.

In 1926 the Cotton Excise duty was abolished.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence. The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides.

Lord Irwin succeeded Lord Reading as Viceroy in April, 1926.

In the United Provinces a Bill was passed to improve the lot of tenants in Agra Province by facilitating occupancy tenure and for the prevention of unauthorised imposts by landlords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupee should be fixed at 2s. 6d., that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India. Government announced their intention to adopt the ratio of 2s. 6d. and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawng valley an expedition was sent to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tribal slavery in the area lying between the head waters of the Irrawaddy. In Nepal the slave liberation scheme, formulated by the Prime Minister of that State, was completed at a cost of £275,000.

Important changes in the administration of the State of Hyderabad were made by H. H. the Nizam following representations by the Supreme Government.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particularly in Kohat, Calcutta and Delhi. The Government of Bengal was obliged to proclaim a state of emergency.

The elections for the Indian Assembly and Provincial Councils were held towards the close of the year.

In 1927 a continuance of the measures for the protection of the Indian steel industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile industry against competition in cotton yarn produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, etc. An Act for the registration of trade unions came into force. The rupee was stabilised by legislation, at 1s 6d., and a bill for the establishment of an Indian Reserve Bank was introduced. The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1935, 50 per cent. of the cadre of officers should be Indians.

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened. The Indian Princes met in conference to consider their future status. His Highness, the Maharajah of Patiala, sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were passed. The latter provides that the Church in India shall be an autonomous body.

In November the Home Government announced its intention to set up a Statutory Commission, with the Rt. Hon. Sir John Simon as Chairman, to report to what extent it is desirable to establish the principles of responsible government in India, or to extend, modify or restrict the degree of responsible government.

In 1928 the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of reference. Boycotts and sympathetic strikes were organised. Towards

the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously hostile. A Committee was appointed, with Sir Harcourt Butler as Chairman, to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States.

The Royal Commission on Agriculture in India (appointed in 1926) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action.

In 1927 it was announced that in future, the number of direct vacancies open to Indian candidates at Sandhurst will be doubled, that a certain number of vacancies will be reserved for Indian officers holding the Viceroy's commission, and that Woolwich and Cranwell will be open to Indian aspirants for King's Commissions.

In 1929, power was given by the Appellate Jurisdiction Act to appoint Indian judges, etc., as additional members of the Judicial Committee of the Privy Council for the hearing of appeals from India. The Statutory Commission continued its labours, but met with a considerable amount of opposition organised by some of the political groups in India. Indian leaders attempted (but with little success) to draw up proposals acceptable to the main recognised political parties for submission to the Commission. A bill was introduced in the Assembly providing for the removal from India of non-Indian communist agents and a few days later an attempt was made by communists to destroy members of the Assembly by throwing bombs at the Government benches. The Bill was passed later as an Ordinance owing to the refusal of the President of the Assembly to allow its discussion on the ground that some of its provisions were *sub judice* in view of a trial of some conspirators then proceeding. There was considerable unrest in parts of India during the year, particularly in Bombay. An Act was passed providing for the investigation and settlement of trade disputes; under it strikes and lock-outs in utility services are penalised; strikes and lock-outs having any object than the furtherance of a trade dispute within the trade or industry in which the strikers or employers are engaged, or are designed to inflict severe general and prolonged hardship upon the community and government are illegal.

A Royal Commission was appointed to report on the existing conditions of labour in industrial undertakings in British India, on the health, efficiency and standard of living of the workers, and on the relations between employers and employed. A Committee was also appointed to consider the general problem of road development.

An Act was passed providing that the age of marriage shall not be less than 14 and the age of consent not less than 16.

The Indian States Committee presented its Report. It recommended that the Viceroy, not the Governor-General in Council, should in future be the Agent of the Crown and that important matters of dispute between the states themselves, between the states and the Paramount Power and between the states and British India should be referred to independent Committees for advice. The Committee dealt with the relationship between the Paramount

Power and the financial relations between British India and the states, particularly the claim of the states for a share in the maritime customs, the proceeds of which are enjoyed at present exclusively by British India.

In view of the impending issue of the Report of the Statutory Commission it was decided to extend the term of the Central and Provincial legislatures, thus postponing the elections beyond the end of the year.

In 1930 the outstanding event was the issue of the Report of the Statutory Commission (the Simon Commission). The report was unanimous. A survey of the facts, containing an analysis of the trend of political thought in India was first published (Cmd 3568), then, after a short interval, the Commission's Recommendations (Cmd. 3569). These, though in no sense revolutionary, foreshadowed many changes: First, the separation of Burma, whose political association with India is not based on any natural or racial affinity, but is a mere accident of history; and, secondly, a number of radical reforms in the constitution of India proper. Briefly these may be summarised as the grant of the greatest possible measure of independence to Local Governments within their own sphere, and the substitution of a Federal system in place of the existing arrangements. Measures were also proposed whereby representatives of the Indian States will join with representatives of British India for the discussion of matters of common concern in a "Council of Greater India," to be appointed not by Statute but by Royal Proclamation.

A notable feature of the Statutory Commission's scheme was its insistence on the principle that the constitution to be framed should be such as will not require to be revised and overhauled by external authority at stated intervals, but should contain within itself provision for adaptation by a process of natural growth, to meet new circumstances and changing conditions, thus avoiding the unsettlement caused by periodic enquiries. The ideal of a Federation for All-India was held up as one to be attained by degrees as the Federated States come to realise the desirability of entering into closer political relations with British India, and the reconstruction of the constitution of British India on a federal basis was advocated as an essential preparatory step towards that ultimate objective.

It was proposed that the Provinces should be provided with enlarged financial resources. Their Governments would no longer be "dyarchic," as under the Montagu-Chelmsford Constitution, but unitary, every Member being required to accept joint responsibility for all acts of the Administration. Ministers, whether chosen from the local Legislature or not, were to be nominated by the Governor, and would have charge of those branches of the administration which are now "reserved" to the Official Side of the Government, e.g., control of the Police and maintenance of Law and Order. The Commission recommended that reserve powers should be vested in the Governor for such essential purposes as the protection of minorities and of the rights of the Services, and the carrying on of the Government in any emergency such as the breakdown for any reason of the normal arrangements; that Legislatures should be enlarged, the franchise-basis widened, and constituencies

reduced to more manageable size. Moreover, a certain elasticity was recognised as indispensable, and measures were indicated whereby each Province may advance towards self-government on the lines found best suited to its individual needs, provided always that the rights of minorities were not invaded by any constitutional changes thus effected.

Other recommendations were that in the Central Government the "Legislative Assembly" should become the "Federal Assembly", the Council of State, or Upper House, to continue with its existing functions and constituent elements.

The Commission suggested that it may be desirable to treat the defence of India as a matter falling within the responsibility of the Governor-General (advised by the Commander-in-Chief as at present) as representative of the Imperial Authorities instead of as a function of the Governor-General in (Executive) Council in association with the Indian Legislature. The possibility that this suggestion might be held to derogate from the prestige of the Indian Government was recognised: the Commission made it only because on any other basis they regarded the military problem as an "almost insuperable" obstacle to the carrying out of the policy laid down in 1919 of the "progressive realisation of responsible government." It was submitted that so long as British troops are required for the defence of the Indian frontier the British Parliament cannot surrender to any subordinate or independent authority effective control in this sphere.

The Commission's Report, published in June, was received with a storm of disapprobation in Indian political circles, and was the signal for a recrudescence of the non-co-operation movement in an acute form. There were serious riots and bomb outrages in various parts of India. In the course of the measures taken to restore order Mr. Gandhi and numerous other political leaders were brought to trial, convicted, and sentenced to terms of imprisonment.

In September the Round Table Conference was convened in London as the next stage in the process of settling the future constitution.

On the North West Frontier there were repercussions of the unrest in India itself. Repeated raids by tribesmen necessitated defensive and retaliatory measures, particularly by the Royal Air Force.

General elections to the Indian and Provincial Legislatures took place in the autumn.

In 1931 the various Committees of the Round Table Conference presented their Reports, one of the most important being that of the Federal Relations Sub-Committee outlining the constitution of a Federal Government of India. The representatives of the Indian States had expressed their willingness to consider their entry into a Federal system. The Conference adjourned in January. Later, there was considerable disorder in India, but eventually negotiations resulted in an agreement for the cessation of civil disobedience and of the boycott of English goods.

New Delhi was inaugurated in February. The Earl of Willingdon succeeded Lord Irwin as Viceroy in April.

The Royal Commission ("Whitley") on Labour, appointed in 1929, submitted their Report and recommendations.

The Round Table Conference re-assembled in

London in October, and discussed the composition and functions of the proposed Federal Legislature, the Federal Court, the representation of minorities, the States' places in the Legislature, &c.

At the conclusion of the Session of the Conference in December the Prime Minister stated, that in view of the differences of opinion revealed during the discussions, the Government proposed to appoint three Committees to work in India to investigate more fully the questions of franchise, federal finance, and relations with certain Indian States.

In 1922 measures were taken to counteract the civil disobedience movement and Mr. Gandhi, who attended the Conference, was arrested on his return to India. The various communities having failed to agree in regard to their representation in the Provincial Legislatures, the Home Government decided on certain provisions to give effect to a scheme for the representation of the communities, to be laid before Parliament in due course. Later, it was announced that another (small) Round Table Conference would be convened in November, with a view to reach an agreement consistent with the declared policy of His Majesty's Government on the important constitutional questions still remaining to be decided. The North-West Frontier Province was constituted as Governor's Province, an annual subvention of Rs 1 crore (£750,000) being granted by the Central Government, to be operative for three years or until the new constitution of India is inaugurated, whichever is earlier. An initial balance of Rs 10 lakhs (£75,000) was placed at the disposition of the Province. Aden was constituted a Province, under a Chief Commissioner under the direct control of the Government of India.

IMPERIAL LEGISLATION—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act (1773)*, which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act (1784)* left the business and most of the patronage to the Court of Directors but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 12 and must not be less

than 8, and is at present 9. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the Imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut. Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919 confers on provinces a larger measure of independence of the Government of India. It distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India.

By the Government of India Act, 1920, His Majesty may by Order in Council transfer the control of the military government of Aden to such person or authority as may be specified in the Order.

INDIAN LAW—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (Imperial and provincial) and of the bodies that preceded them, (2) statutes of the British Parliament applicable to India, (3) the Hindu and Muhammadan laws of inheritance and domestic law, (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H. M. GEORGE V.

Secretary of State—The Right Hon. Sir Samuel Hoare, Bt., G.B.E., C.M.G., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g., foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see p. 300).

The King-Emperor appoints the Governor-General, the Governors of the 10 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam, Burma, and the North-West Frontier Province), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (see pp. 735, 737 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance; Foreign and Political; Home; Legislative; Commerce, Industries and Labour; Education, Health and Lands; Army; and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 16 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, Burma, and the North-West Frontier Province; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands and Aden.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of adminis-

tration, and is the responsible head of his jurisdiction. There are 273 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bengal, Bombay, Bihar and Orissa, and in the United Provinces of Agra

and Oudh, the Punjab and Burma, and a Chief Court in Oudh. Appeals may be carried to the English Privy Council. The Central Provinces and Berar, Coorg, Sind, the North-West Frontier Province and British Baluchistan have each a *Judicial Commissioner's Court*.

CONSTITUTION OF THE TWO CHAMBERS OF THE INDIAN LEGISLATURE.

President, Sir Henry Moncreiff Smith, C.I.E.

LEGISLATIVE ASSEMBLY.

President, Sir Ibrahim Rahimtulla, K.C.S.I., C.I.E.

Deputy President, R. K. Shanmukham Chetty.

The *Council of State* consists of 60 members, 34 elected and 26 nominated. Of the latter not more than 20 may be officials. The total electorate in the 1930 election was 40,573.

The *Legislative Assembly* consists of 145 members, 104 elected and 41 nominated, 26 of the latter being officials. The total electorate in the 1930 election was 1,212,172.

THE SUPREME GOVERNMENT, DELHI.

(Indian salaries are the substantive salaries (excluding allowances) stated in rupees *per mensem*.)

Viceroy and Governor-General, His Excellency the Right Hon. Earl of Willingdon,

Census Commissioner, Dr. J. H. Hutton, C.I.E.	

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, &c. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the ten major or "Governor's" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam, Burma, and the North-West Frontier Province—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of

the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the "transferred" subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty in Council. The

* The areas and populations of the separate provinces are for British territory only. The population figures are according to the Census of 1931.

* 27 seats reserved for Non-Brahmans.

† 7 seats reserved for Mahattas.

‡ Including 27 nominated as the result of elections in Berar.

Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-General, who may reserve them for His Majesty's pleasure.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (25 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of the fourth general election comprises over 8,744,802 persons, of which nearly 398,000 are women.

(6) MADRAS (area, 142,260 sq. miles; pop. 46,740,107) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1681. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 89 per cent. of the people are Hindus. There are 1,774,226 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil, Telugu and Malayalam. Madras (182,018) and Trichinopoly (122,842) famous for their Hindu temples, are the chief cities after the capital.

(a) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind), contains 123,547 square miles (about equal in size to the British Isles), with a population of 21,899,123. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis (89,543), who are very prominent in trade, are mainly found in Bombay, Marathi, Gujarati, Sindhi, Kanarese and Western Hindi, are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway

systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system, while Karachi (Sind) is the port for the extensive North-Western Railway system Ahmedabad (313,769), Poona (250,187), Sholapur (144,654), Surat and Karachi (263,565), the capital and chief port of Sind, are the most important cities

(3) BENGAL (area of newly-constituted province,

76,843 sq. miles, with population of

50,114,000) was placed under a Lieutenant-

Governor in 1854. The old Bengal Presidency

included practically all Northern and Central

India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 55 per cent. of the population are Muhammadans and 43 per cent. Hindus. The principal languages are Bengali and Western Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (338,518), now the second capital, and Howrah (224,873), a great jute-manufacturing centre adjoining Calcutta

CHIEF CITY, Calcutta. Pop. including suburbs and Howrah, 1,485,582.

(4) THE UNITED PROVINCES OF AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 106,995 sq miles, pop. 48,408,763), forms the upper part of the great Ganges plain to the W of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and nearly 15 per cent. Muhammadans. Western Hindi is the chief language. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (229,764), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (205,315), the great manufacturing centre, Cawnpore (243,775), Lucknow (274,659), Bareilly (144,031), and Allahabad (183,914).

(5) THE PUNJAB (area, 99,842 sq miles; pop. 23,580,852) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock salt, which, with wheat and other grains and cotton form the principal exports. Timber is scarce. 57% of the population are Muhammadans, and 27% are Hindus. The Sikhs number about 4,072,000 in the Punjab and Punjab States, to which they are mainly confined. Panjabi, Western Panjabi and Western Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 264,840 people.

CHIEF CITY, Lahore. Population, 429,747.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 233,707 sq miles, about equal to Spain and Portugal, with a population of 14,667,146. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled, but, owing to remarkable prosperity, the population has increased 22 per cent. in 20 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Shans are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jade-stone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has

been built to the Shan States, which lie in the Salween basin.

(7) BIHAR AND ORISSA (area of new province. 83,182 sq miles, with pop. of 37,677,576). This province, which came into existence on April 1, 1912, comprises Bihar, Orissa and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar and tobacco are cultivated. 82% of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Western Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,109 sq miles, pop. 12,065,885). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Western Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds and cotton. There are cotton mills at Nagpur.

Since October 1, 1902, BERAR has been amalgamated with the Central Provinces Berar (area, 17,767 sq miles, pop. 3,441,838), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

(9) ASSAM (area, 53,015 sq miles, pop. 8,622,251) was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Suma and Bhauputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

(10) The NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan (area, 13,419 sq. miles; pop. 2,425,076 partly estimated). It was constituted a Governor's Province on April 28, 1922. Attached to the Province are the five trans-border political

agencies of Malakand, Khyber, Kurram, Tochi and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans, and the chief languages are Pashto and Western Punjabi. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

Chief Comr., Lt.-Col. R. J. G. Burke . . . Rs. 4,000

(13) **BRITISH BALUCHISTAN** (area, 54,226 sq. miles; pop. 463,508) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotali, Nushki, Zhob, Chaghal, Nasirabad and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans, and Pashto is the chief language. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs *via* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding

the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner in Baluchistan, A. N. I. Cate, C.I.E. Rs. 4,000

Secretary to the Chief Commissioner, H. Weightman Rs. 1,300

Rev. and Jud. Commr., Lt.-Col. J. A. Brett, C.I.E. Rs. 2,850

Sec., P. Wks. Dept., Brigadier C. H. Haswell, C.I.E. Rs. . . .

(14) **DELHI**—This province (area, 593 sq. miles, pop. 636,246) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi (Pop. 447,442).

Chief Commissioner, J. N. G. Johnson, C.I.E. . . . Rs. 3,000

(15) **THE ANDAMANS AND NICOBARS** (area, 3,143 sq. miles, pop. 25,463) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco nuts.

Chief Commissioner, J. W. Smyth, C.I.E. . . . Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included (Pop. 10,600 in 1911).

ADEN AND PERIM—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great oil bunkering and coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. It has an area of 75 square miles and a population (according to the census of 1931) of 46,638. It is a free port. The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The total sea-borne trade in 1931-32 was £6,894,600. In 1931-32, 1,483 vessels called at Aden and 298 at Perim. The British Government has treaty engagements with, and subsidies, the neighbouring Arab tribes, both inland and along the coast (Hadhramahut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Saïr.

Aden has been separated from the Bombay Presidency and formed into a Province under a Chief Commissioner under the direct control of the Government of India from April 1, 1932.

PERIM—a small unfortified island with an area of 5 square miles and a population of 1,700 serving as a bunkering station at the southern entrance to the Red Sea, was occupied in 1857 and is administratively attached to Aden.

Aden: Chief Commissioner and Resident and Commander-in-Chief, Lt.-Col. B. R. Reilly, C.I.E., O.B.E. per *mensm* Rs. 3,500.

In 1834 the East India Company occupied

Sokotra (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 12,000, mainly Arabs. A formal protectorate was established in 1896. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign power. The Kuria Muria Islands, to the south of Oman, which have been a British possession since 1854 and which were formerly attached to the Aden Residency, were transferred to the control of the British Resident in the Persian Gulf in 1937. The island of Kamaran in the Red Sea about

200 mile north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator, Captain G. V. Wickham.

INDIAN APPOINTMENTS

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England and India. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London July–August. Candidates must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £270 if of European domicile, or £315 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for their guidance. A final examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. In case of failure to pass the final examination or to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences at Rs. 7,200* a year. The Regulations for competitive examinations to be held in India can be obtained from the India Office, London.

The Indian Army.—Copies of a pamphlet giving full information regarding conditions of service may be obtained, on application, from the Military Department of the India Office. The following is a summary of the principal points: Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 18 and 29 years of age (in the case of Indian candidates the age limits are 18 and 20 years). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India; the remainder being offered to candidates in the order of their passing the entrance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supplementary Reserve between the ages of 21 and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the

period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's initial pay is at the present moment roughly Rs. 480 (£36) per month. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian Police Force (Higher Grade).—A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination. The standard of the competitive examination for admission to the Indian Police Service is such that competitors whose school education ended before they reached the age of 17 can have little prospect of qualifying for appointment. A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres. Save as provided in the regulations a candidate must be a European British subject. Indian and Burmese candidates are eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 22 years of age on Aug. 1; must be unmarried, and if they marry before reaching India must forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London. Successful candidates are required to undergo a strict medical examination, are examined as to their ability to ride. Free passage to India is granted to probationers. Their initial pay is Rs. 350 per month, plus an overseas pay of Rs. 100 per month in the case of probationers with non-Indian domicile. The pay proceeds by annual increments to Rs. 700, plus overseas pay of £30 a month, and thence to Rs. 1,350 per month, with overseas pay of the same amount, subject to efficiency bars, with prospects of promotion to higher posts.*

The patronage of the Secretary of State for India is not extensive. Appointments of Chaplains of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplains' Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years

* The rates of pay quoted are subject to revision and will in any case, up to March 31, 1933, be subject to a maximum reduction of 20 per cent. on account of the financial emergency at present existing in India.

of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,050 per month, plus overseas pay of £30 a month.*

Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst. Executive Engineers on Indian State Railways. In making these appointments he acts with the advice of a Selection Committee. Application forms can be obtained from the Secretary, Services and General Dept., India Office, Whitehall, London. Every candidate must have attained the age of 21, and not attained the age of 25 on Jan. 1 of the year in which the examination is held. Candidates must produce evidence that they have obtained one of the University degrees or passed one of the examinations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience. Every candidate must be a British subject of non-Asiatic domicile. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs. 525 a month

and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are retained. The pay rises by increments to Rs. 1,025 in the 6th year and to Rs. 1,675 in the 24th year of service, with possibilities of promotion to higher posts.*

Indian Forest Service.—Recruitment for this Service is at present suspended, and it is not known whether or under what conditions it is likely to be resumed. In Bombay and Burma, the Forest Service is under the control of the Local Government, by whom appointments are made. Any recruitment of candidates from Europe is undertaken by the High Commissioner for India, India House, Aldwych, London, W.C. 2, to whose offices enquiries should be addressed.

Further information regarding these and other Indian appointments can be obtained on application, from the Services and General Department, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations and other Statutory Rules, which can be consulted at the India Office.

* The rates of pay quoted are subject to revision, and will in any case up to March 31, 1933, be subject to a maximum reduction of 10 per cent. on account of the financial emergency at present existing in India.

THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1931.

(In lakhs of rupees)*

SEPARATION OF CENTRAL AND PROVINCIAL FINANCES

The Government of India Act, 1919, was designed *inter alia* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own. Effect has been given to these measures of devolution in the ten "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, Burma, the Province of Coorg and the North-West Frontier Province†. As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue, Irrigation, Stamp Duties and Excise. In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a "central" source of revenue) that may be due to an increase of the

total assessed incomes within the Province over that of 1920-21.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided. It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakhs of rupees. They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy pursued has involved a progressive reduction of the provincial contributions with a view to their ultimate cessation. The Budget for 1928-29 provided for the remission of those portions of the contributions which had not been permanently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April 1, 1927, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

* A lakh = Rs. 100,000. (See p. 747 for the Indian system of notation.)

† See p. 753 for the financial arrangements sanctioned on the constitution of the North-West Frontier Province as a "Governor's Province."

INDIAN SYSTEM OF NOTATION.—The Indian numerical notation system differs from the European. Large numbers are punctuated as crores and lakhs and not in hundreds, thousands and millions. A *lakh* is one hundred thousand (written out as 1,00,000), and a *crore* is one hundred lakhs or ten millions (1,00,00,000). Thus, 1,68,00,000 is read as 1 crore 68 lakhs. A lakh of rupees (Rs 1,00,000), may be read as equal to £7,500 at 13½ rupees—the statutory rate adopted for conversion in this article. The rupee is divided into 16 annas and at 13½ rupees to £1 the anna is equivalent to 1½d. The anna is subdivided into 12 pies (1½d. approximate value).

NET REVENUE AND EXPENDITURE OF THE CENTRAL GOVERNMENT

The figures of Gross Revenue given above include the net receipts of railways and other com-

mercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments; while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for 1929-30 is therefore given in the table below, which shows the net revenue derived from commercial undertakings, after deducting all expenditure including interest charges, similar adjustments being made under other heads of revenue and expenditure by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

(000 omitted)

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden is estimated at Rs 3.9 per head, or, if land revenue (which is akin to rent) be added, Rs 5.1 per head.

DEBT AND ASSETS.—On March 31, 1932, the public debt of the Central Government amounted to Rs 520.4 crores (£520.7 million) in India and £379 million in England. The figures include debt incurred on behalf of Provincial Governments, the debenture stock of various railways taken over on the transfer of the lines, and the capital value of liabilities undergoing redemption by way of terminable annuities. The interest-bearing obligations and certain interest-bearing assets of the Government of India amounted to Rs 704 crores (£528 million) in India and £380.9 million in England. The excess of interest-bearing obligations over interest-yielding assets amounts to Rs 215 crores (£162 million). Apart from Rs 33.37 crores in cash, bullion and securities held on Treasury Account, the Central Government held on March 31, 1932, £40 million in the Gold Standard Reserve.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam, the land revenue has been permanently fixed, elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Pro-

vinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindars*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *rayatwari* tenure prevails, and each rayat, or peasant proprietor, holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent of the rental paid to the landlord by the cultivating tenant, while in temporarily settled *rayatwari* districts the revenue varies from 20 per cent of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1930-31 amounted to Rs 3,028 lakhs (£2,708,000).

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malwa) States. Except in these States the manufacture is a Government monopoly. Bengal opium is either sold direct to the Governments of Borneo, Netherlands Indies, Hong Kong, Straits Settlements, &c. or issued to the Excise Department for local consumption. In addition a substantial quantity is supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sale to chemists. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £1,899,600 in 1930-31. The expenses of production, &c., were £557,700. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue amounted to Rs 1,678 lakhs (£1,258,200) gross in 1930-31 (Central and Provincial Governments).

CUSTOMS.—The net receipts amounted to Rs 4,681 lakhs (£3,510,000) in 1930-31. (For tariff see p. 751.) The export duty on rice yielded 87 lakhs (£631,000). The export duty on jute produced 328 lakhs (£2,564,700). The duty on motor spirit and kerosene amounted to 406 lakhs (£3,045,000). The protective special duties on iron, steel, &c., yielded 593 lakhs (£4,449,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income	Rate of Tax per Rupee*
Rs 1,000 and over 4 pias
" 2,000 "	7½ "
" 5,000 "	11½ "
" 10,000 "	15 "
" 15,000 "	20 "
" 20,000 "	23½ "
" 30,000 "	28½ "
" 40,000 "	31½ "
" 1,000,000 or upwards	32½ "

* 12 pias = 1 anna, 16 annas = 1 rupee, 232 rupees = £1 (statutory rate).

In the case of companies and registered firms, whatever the total income, the rate is $3\frac{1}{2}$ ples in the rupee

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at rates ranging from 1 anna $6\frac{1}{4}$ ples to 7 annas $9\frac{1}{4}$ ples in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna 3 ples in the rupee. In the case of individuals, unregistered firms, and other associations of individuals not being a registered firm or a company, the rate ranges from $1\frac{1}{2}$ ples to 7 annas $9\frac{1}{4}$ ples on incomes in excess of Rs. 30,000. Rs. 1,631 lakhs (£12,323,000) were received from taxes on income in 1930-31.

STAMPS—Stamps yielded 1,261 lakhs gross (£9,454,000) in 1930-31. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT—The salt duty was reduced from Rs. $2\frac{1}{2}$ to Rs. 2 a maund (84 lb.) in 1903, to Rs. $1\frac{1}{2}$ in 1905, and to R. 1 in 1907. It was increased to Rs. $1\frac{1}{2}$ on March 1, 1916, to Rs. $2\frac{1}{2}$ from March 1, 1923, reduced to Rs. $1\frac{1}{2}$ from March 1, 1924, and raised to Rs. 2 in 1931. Rs. 683 lakhs (£5,124,180) were received from salt in 1930-31.

FORESTS—About 107,000 square miles of forests are reserved and scientifically worked by the State, while about 122,000 square miles besides are under State control. The revenue from forests amounted to Rs. 473 lakhs (£3,550,000) in 1930-31. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS—The Post Office in 1930-31 conveyed 1,300 million of letters, postcards, newspapers, &c., and issued over 30 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wire, including cable, in India on March 31, 1931, was 573,461 miles, and the number of paid messages sent in 1930-31 was over 18 million. The capital outlay amounted to Rs. 1,522 lakhs (£11,417,700) at the end of 1930-31. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services showed for the year a loss of 133½ lakhs (£1,002,000), the increase on 1929-30 being due mainly to adverse economic conditions and general trade depression.

RAILWAYS—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1931, was 42,281. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 42 per cent. on the metric gauge. On March 31, 1931, the total capital at charge was Rs. 870 crores (£652,356,000). The net earnings of the railways in 1930-31 amounted to 3,234 lakhs (£24,252,000), showing a percentage of 3.7 on total capital at charge. The number of passengers "originating" was 576 million, and the goods traffic amounted to 83.4 million tons. Rates are very low, third-class passengers travelling on the average about four miles for a penny. The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 5.2 crores in 1930-31. To meet the contribution (5.7 crores) payable to general revenues, 20.9 crores were withdrawn from the Reserve Fund. The total capital ex-

penditure on State and other railways in 1930-31 was 1,465 lakhs (£10,990,000).

IRRIGATION—The total capital outlay on State irrigation works up to March 31, 1931, was £102,331,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £1,276,000. The area irrigated by Government irrigation works, excluding the Indian States, in 1929-30 amounted to 31.6 million acres, while the annual value of the crops raised amounted to over $1\frac{1}{2}$ times the total capital expended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES—The net expenditure in England, chargeable to Revenue, amounted in 1930-31 to £26,212,000. The main items were:—Interest on Railway Debt and Annuities, £9,581,000; Interest on Ordinary Debt and other obligations, £4,625,000; management of debt, £608,000; interest assumed in respect of British 5 per cent. War Loan, £826,000; Stores, £2,256,000, of which £2,280,000 was for Marine and Military stores, payments for British forces, troop service, &c., £2,721,000; Army non-effective charges, £3,396,000; Civil annuities, pensions, &c., £1,409,000; Furlough payments, civil and military, £2,188,000; home administration (£450,400 less £114,500 contributed by H.M. Treasury); £31,600 in connection with new offices; Aden contribution, £150,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy or 1 tola. Up to 1893 the Indian mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 12 4d. The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways, the other half of the profit, and the whole of the interest, being added to the Gold Standard Reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £25,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1931, amounted to £59,970,258. Of this sum £1,123,655 has been used for capital expenditure on railways; £2,886,217 has been transferred to the Paper Currency Reserve in reduction of created rupee securities, £14,148,884 has been transferred to Revenue, and the remainder credited to

the Gold Standard Reserve. On March 31, 1932, the investments of this fund in sterling securities amounted to £10,694,637 (estimated value), while £29 was held in cash in England, and £1,152,334 deposited in gold at the Bank of England and £7,153,000 held in gold in India. India has a paper currency. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1928 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—The sanctioned strength of the Army in India is: British troops and officers, 68,900; Indian troops and officers, 155,300; Army in India Reserve of Officers, 1,600; Indian Army Reserve, 40,000; Auxiliary Force, 36,000; Indian State Forces, 44,700; and Indian Territorial Force, 19,000. For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912-13 to 5,430 lakhs (£40,725,000) in 1930-31. The estimated net expenditure for 1932-33 is 4,674 lakhs (£35,050,000). During the Great War of 1914-18 the Government of India recruited on a voluntary basis over 877,000 combatants and 563,000 non-combatants, giving a grand total of about 1·4 million men. 1,381,000 officers and men were sent on service overseas from India; the total Indian casualties were about 122,000 (as compiled up to Dec. 31, 1919). In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis.

The ROYAL INDIAN MARINE was reorganised on a combatant basis in 1928 and now flies the white ensign. An admiral of the Royal Navy was appointed as the first Flag Officer commanding. The fleet consists of four sloops, two patrol boats, one survey ship and various auxiliary craft.

Flag Officer Commanding and Director, Rear-Admiral H. T. Welwyn, C.B., D.S.O., R.N.

EDUCATION.—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. There are 16 Universities in British India and 2 in Indian States, viz., Agra, Andhra, Annamalia, Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1929-30 numbered 260,930, and the scholars 12,515,000, including 1,468,000 females. Of the institutions, about 50 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1929-30, (£20,571,000), £4,535,000 came from fees, and £13,125,000 from Government revenues or local and municipal funds. The census of 1921 showed that only 139 males and 21 females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1929-30 numbered 777, with a total population of over 19 million, and receiving an income of £9,486,500 from rates and taxes (octroi, taxes on

† Net Exports.

houses and lands, water, lighting, and conservancy rates, &c.) and £18,848,000 from other sources. Out of 12,781 members of municipal bodies 817 were officials and 11,964 non-official. In almost all districts in British India there are local district boards, partly representative. Of their total expenditure of about £12,243,000 in 1929-30 27 per cent. was devoted to civil works, 37 per cent. to education, and the remainder largely to sanitation and hospitals.

TRADE OF INDIA—India's visible balance of trade in 1931-32 was Rs 90.5 lakhs (£67,875,000). The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure, but in 1931-32, exports of treasure exceeded imports by £43,988,000. The table (p. 750) exhibits the leading figures for the last five years in thousands of pounds sterling (Rupees being converted at the rate of 13½ to the £).

During the year 1931-32 as compared with 1930-31 the value of the imports (excluding Government stores and treasure) decreased by Rs 3,848 lakhs (£28,860,000), or 23 per cent., while the total exports (including re-exports but excluding treasure and Government stores) fell by Rs 6,509 lakhs (£48,818,000), or 29 per cent.

The bulk of the imports consists of manufactured articles, while two thirds of the exports consist of food tobacco and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1931-32 (converted at Rs 13½ to £1) —

IMPORTS (000 omitted).

Cotton Goods	£11,033	Rubber Manuf's	£1,657
Cotton Yarn	2,212	Spices	1,562
Cotton, raw	5,275	Drugs	1,433

Oilcake	1,100	Re-exports	2,494

JUSTICE, POLICE, AND PRISONS.—There are 8,175 officers and 17,601 honorary judges and magistrates exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1929, 2,513,844 civil suits were instituted; 2,669,341 persons were tried, and 1,334,668 convicted, in criminal cases, of whom 793 were sentenced to death and 660 executed, 1,832 to transportation, and 185,099 to imprisonment. The strength of the police in 1929 was 14,955 officers and 184,501 men. There were 1,184 prisons, with a daily average of 128,402 prisoners. At the convict settlement of Port Blair (Andamans) there were 8,188 prisoners on March 31, 1930.

VITAL STATISTICS. The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38.21 per 1,000 in 1908 and 28.77 in 1913. It was 35.9 per 1,000 in 1919 and 25.95 in 1929. There were over 12 million deaths from India during 1928-19. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1929 were about 12,244,000 in India as a whole. The ratio of births per 1,000 of the population was 35.47 in 1929. In 4,667 hospitals and dispensaries, maintained mostly from public funds, 54,173,000 patients were treated in 1929. The number of persons vaccinated in 1929-30 was 15,919,000. According to the census of 1921 there were 102,400 leprosy.

CUSTOMS DUTIES.—The general import tariff is now 25 per cent. *ad valorem*. The principal exceptions are—Cotton twist, yarn and thread 6½ per cent. or As 1½ per lb. whichever is higher; cotton piece goods 25 per cent. if of British manufacture, 50 per cent. if not; plum grey, i.e., not bleached or dyed in the piece, 25 per cent. or As 4½ per lb., whichever is higher, if of British manufacture, 50 per cent. or As 5½ per lb., if not; raw cotton 6 per lb.; raw hemp, artificial silk yarn and thread 12½ per cent.; silk or artificial silk mixtures 34½ per cent.; motor cars and motor cycles 37½ per cent.; sugar 31½ plus Rs 3 As 7 per cwt.; arms and certain "luxury" articles, including gold and silver manufactures, silk or artificial silk piece goods, gold and silver plate, &c. 50 per cent.; cigars 12½ per cent.; cigarettes, from Rs 10 As 10 to Rs 15 per 100, spirits generally Rs 37 As 8 per gallon, salt Rs 1 As 9 per maund (82½ lb.), plus As 4½ per maund if manufactured outside India; motor spirit As 10 per gallon, and kerosene As 3 Ps 9 per gallon; mineral oil 12½ per cent. (an excise duty of As 10 is leviable on motor spirit and As 2 Ps 9½ per gallon on kerosene produced in India); coal As 10 per ton; coal tar dyes 10 per cent.; spices 37½ per cent.; manufactured tobacco Rs 3 As 12 per lb.; matches Rs 1 As 14 per gross of boxes of 100; match splints As 5 Ps 7½ per lb.; veneer (for match boxes) As 7 Ps 6 per lb.; beer As 15 per gallon; refined spirits Rs 60 per gallon; certain machinery 10 per cent.; certain metals, iron and steel and railway plant and rolling stock 15½ per cent.; gold coin, metallic ores, certain agricultural instruments, quinine, etc., are free. A few other articles pay 2½ per cent. There are protective duties at special rates on coal, tins, iron and steel and certain manufactures thereof. There are export duties of As. 2 Ps. 3

a maund on rice; Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, for which the rate is Rs. 1½ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hessians, and 5 per cent. *ad valorem* on raw hides and skins.

SHIPPING—In 1931-32 the number of vessels engaged in the foreign trade which entered and cleared with cargoes at ports in British India was 6,031, with a tonnage of 14,938,000. Of this tonnage, over 67 per cent. was under the British flag.

The following table shows the distribution of the Indian private sea-borne trade in 1931-32.—

(Note.—Rupee figures converted at rate of Rs. 13½ = £1.)

PORTS—The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madras.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1929-30, 266,681,000 acres were sown, or 228,161,000 acres excluding area sown more than once. Of the total area sown approximately 10 per cent was under wheat, 34 per cent. under rice, and 42 per cent. under other food-grains and pulses, 7 per cent. under oilseeds, and 9 per cent. under cotton, jute, and other fibres. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 51 million acres.

BANKS—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. In 1929 there were 33 Indian joint-stock banks, whose head offices are located in India, in addition to

28 exchange banks with head offices outside India, and 22 Indian co-operative banks, with capital and reserve of Rs. 5 lakhs and over. The capital of the Imperial Bank of India was Rs. 562 lakhs; reserve, Rs. 548 lakhs, deposits, Rs. 7,924 lakhs, and cash balance, Rs. 1,400 lakhs. The corresponding figures for the Indian joint-stock banks were: capital, Rs. 787 lakhs, reserve, Rs. 367 lakhs, deposits, Rs. 6,272 lakhs, cash balance, Rs. 905 lakhs. The 22 exchange banks with head offices not located in India had—capital, £106 million, reserve, £121 million; deposits, £1,514 million outside India, and Rs. 6,666 lakhs in India, cash balances £220 million outside, and Rs. 905 lakhs in India. The 22 Indian co-operative banks had a capital of Rs. 140 lakhs; a reserve of Rs. 65 lakhs, deposits, Rs. 1,090 lakhs, loans outstanding, Rs. 893 lakhs; and cash balances amounting to Rs. 85 lakhs. The proportion per cent. of cash to liabilities on deposit was—18½ in the case of the Imperial Bank, 15½ for exchange banks doing a considerable portion of their business in India; 10½ for other exchange banks, and 13 to 14½ in the case of Indian joint-stock banks.

CO-OPERATIVE CREDIT SOCIETIES—In 1930-31 there were in British India and Indian States 1,863 central, 93,773 agricultural and 10,530 non-agricultural societies, with a total membership of 4,308,252 and a capital of £68,934,000. The Provincial and Central Banks showed a profit of £442,000, and agricultural and non agricultural societies £1,472,500.

MINERALS—The output of coal in India in 1929 was 23,419,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 306 million in 1929. The production of salt is about 1,709,000 tons. The production of manganese ore was about 994,300 tons, and of saltpetre 4,585 tons (export figures). The yield of gold (nearly all from Mysore) was about 364,000 oz. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1929 was 180 tons, and of the latter 1,348 tons.

MANUFACTURES—In India the ancient village handicrafts still survive. Cotton-weaving is by far the most important hand industry. There were 8,129 factories in 1929 subject to the Indian Factories Act, employing 1,553,000 persons, including 257,000 women and nearly 47,000 children (12 to 15 years of age), the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women was 31. The maximum weekly hours for children are 36. There were 327 cotton mills at work in British India and Indian States in 1929-30, mostly in Bombay and Ahmedabad. In 1929-30, the production was 834 million lb. of yarn (mostly of low counts) and 562 million lb. of woven goods. The 98 jute mills, mostly situated in or near Calcutta, contained 1,140,435 spindles and 53,900 looms. There were, in 1929, 17 woollen and 10 paper mills, 12 breweries, and various other factories.

JOINT STOCK COMPANIES—In 1929-30 there were 6,925 joint stock companies registered in British India and in the Indian States, with a paid-up capital of Rs. 28,691 lakhs (£215,181,000).

TABLE OF THE PRINCIPAL INDIAN RULING PRINCES AND CHIEFS, SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES

† The present chief has a personal salute of two additional guns

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States, the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or

temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £475,900 (£91,878 from Mysore) were paid to the Government of India in 1930-31. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial

Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square miles, and a population of 81,310,845. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 662, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 753-754 are the names of 86 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H. H. the Aga Khan, G.C.S.I., G.C.I.E., G.C.V.O., and the Maharajah of Burdwan, G.C.I.E., K.C.S.I., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior.

The Indian States may be thus classified:—
1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 466,894—the fifth city in India). This State is in the centre of the Deccan or central plateau of Southern India.

The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1722, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1861, when it was restored to native rule; under a somewhat strictly framed instrument of transfer. In Dec. 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kannarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 173,573) was granted to Gholab Singh by Lord Dalhousie, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar, while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. *Rajputana*, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 21,225,712) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of this area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India. 9. The Malayalam States of *Travancore* and

Cochin, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of *Khalpur* (Sind), *Bahawalpur*, and *Rampur*. 11. *Kalat* (including *Makran* and *Kharan*) and *Las Bela*, with tribal areas in the possession of the *Marri* and *Bugti* tribes. 12. *Gujarat*, including *Kutch* and the numerous petty chiefships of *Kathiawar*. 13. The Southern *Mahratta* States. 14. The numerous *Afghan* and *Baluch* tribes of the N.W. frontier, inhabiting the mountains from the north of *Peshawar* to the base of the *Suleiman* range, a distance of 800 miles. The names of some of these tribes, *Waziris*, *Orakzais*, *Afridis*, &c., have become familiar owing to the many expeditious against them. 15. The aboriginal *Gond* and *Kol* tribes, under petty princes of aboriginal or *Rajput* blood, in *Chota-Nagpur*, *Orissa*, the *Central Provinces*, and the *Jalpur* (*Vizagapatnam*) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

Countries Contiguous to India.

NEPAL

Sovereign, His Majesty Maharaja Dhruva Tribhuvana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jung; *sic* 1911

Prime Minister, His Highness Maharaja Sir Juddha Shumsher Jung, Bahadur Rana, K.C.I.B. (Hon.), Prime Minister, and Supreme Commander-in-Chief. (Personal salute in British India, 29 guns)

Nepal (area, about 54,000 sq miles, pop. 5,600,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.) Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. Its exports to British India are estimated to amount to about £4,000,000, and its imports to £2,000,000 a year. The chief trade route is that between Kathmandu and the Bihar and Orissa frontier (77 miles). Nepal exports rice and other grains, hides, oil-seeds, *ghis*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be *Rajputs*. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the Nepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the succession being determined by special rules. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1903, between the British and Nepalese Governments, by which *inter alia* the internal and external independence of the State was recognised.

CAPITAL, Kathmandu (pop. 80,000) — *British Envoy at the Court of Nepal*, Lt.-Col. C. T. Daukes, C.I.E. Rs. 3,000

BHUTAN.

Bhutan (area, about 20,000 sq miles, pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1900 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the *Tongsa Penlop*, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.C.S.I., G.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Resident.

CAPITAL, Punakha.

THE PERSIAN GULF.

For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few.

The ruler of *Bahrain* (capital, *Manama*) has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrain. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent and Consul at his Court.

The independent tribes on the *Pirate* (Arab) Coast from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1863 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Lingah and Bahrain.

Important caravan routes converge at *Kuwait*, which has an excellent harbour. The *Sheikh* is under treaty obligations with the Indian Government.

<i>Political Resident, Persian Gulf, Lt.-Col. T. C. W. Fowle, C.B.E.</i>	Rs. 4,000
<i>Secretary, Capt. E. H. Gastrell</i>	Rs. 1,750
<i>Political Agent and Consul, Muscat, Capt. R. G. E. W. Alban</i>	Rs. 1,250
<i>Political Agent, Kuwait, Lt.-Col. H. R. P. Dickson, C.I.F.</i>	Rs. 1,700
<i>Political Agent, Bahrain, Capt. C. G. Prior</i>	Rs. 1,700

PERSIA (*q v*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is continuous with Persia and Afghanistan. The Trans-Caspian Railway runs, *via* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar. Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *via* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, bonas, salt, and musk, in exchange for cotton and woollen goods and grain. Trade passes from Bengal (through Sikkim) and from the Punjab and United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet, for three trade marts, with British and Tibetan agents, for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England

also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug. 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec. 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Rhango, in Upper Burma. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods &c. Teng-yueh and Suimaou, near the Burma frontier, are treaty "ports." There are British consuls at Teng-yueh and Yunnan-fu.

SIAM (*q v*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiangmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

* Including 186,654 Greek Catholics. In earlier censuses only small numbers were involved, and Greek Catholics and Greek Orthodox were included under the general term "Greek Church." A rapid increase in membership of both Greek Catholics and Greek Orthodox has been shown in recent censuses, and since the former owe obedience to the Pope in matters of faith, they have been included with the Roman Catholics for 1931.

† Practically all Methodists and Congregationalists, and a large number of Presbyterians, united to form the United Church of Canada in 1929.

‡ Including Tunkers

§ Including Hutterites.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41' (approximately the latitude of Rome, Italy).

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian plateau. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 12,972 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,008 feet, both in the Yukon.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNORS-GENERAL OF CANADA SINCE 1867.

Name.	Date of Appointment	Date of Assumption of Office.
Viscount Monck, G.C.M.G.	June 1, 1867	July 1, 1867
Lord Lisgar, G.C.M.G.	Dec. 29, 1868	Feb. 2, 1869
Earl of Dufferin (Marquess of Dufferin and Ava), K.P., K.C.B.	May 22, 1872	June 25, 1872
Marquess of Lorne (Duke of Argyll), K.T., G.C.M.G.	Oct. 5, 1878	Nov. 25, 1878
Marquess of Lansdowne, G.C.M.G.	Aug. 18, 1883	Oct. 23, 1883
Lord Stanley of Preston (Earl of Derby), G.C.B.	May 1, 1888	June 11, 1888
Earl of Aberdeen, K.T., G.C.M.G.	May 22, 1893	Sept. 18, 1893
Earl of Minto, G.C.M.G.	July 30, 1898	Nov. 12, 1898
Earl Grey, G.C.M.G.	Sept. 26, 1904	Dec. 20, 1904
Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.	Mar. 27, 1911	Oct. 13, 1911
Duke of Devonshire, P.C., K.G., G.C.M.G., G.C.V.O.	Aug. 19, 1916	Nov. 11, 1916
General Viscount Byng of Vimy, G.C.B., G.C.M.G., M.V.O.	Aug. 2, 1921	Aug. 11, 1921
Viscount Willingdon, G.C.M.G., G.C.M.G., G.C.I.E., G.B.E.	Aug. 5, 1926	Oct. 2, 1926
Earl of Beasborough, G.C.M.G.	Feb. 9, 1931	April 4, 1931

GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

Governor-General and Staff.

<i>Governor-General and Commander-in-Chief, His Excellency The Right Honourable</i>	
The Earl of Bessborough, G.C.M.G., LL.D.	* £10,000
<i>Secretary to the Governor-General, A. F. Lascelles, M.V.O. M.C.</i>	\$6,000
<i>Comptroller of the Household, Lt.-Col. H. W. Snow, C.M.G., D.S.O., Reserve of Officers.</i>	
<i>Assistant Secretary to the Governor-General, James F. Crowdy, M.V.O., B.A.</i>	\$4,200
<i>Deputy-Assistant Secretary to the Governor-General, F. L. C. Pereira.</i>

Commercial Secretary, J. A. Langley

3rd Secretary, K. P. Kirkwood.

BRITISH HIGH COMMISSIONER IN CANADA.

British High Commissioner, Sir William Henry Clark, K.C.S.I., K.C.M.G. (Earncliffe, Ottawa).

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The Senate consists of 56 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 6 for British Columbia, 6 for Manitoba, 6 for Alberta, and 6 for Saskatchewan; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalized subject of the King, and the

owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The *House of Commons* is elected every five years at longest, and the Parliament consists of 225 members, elected as follows: 22 for Ontario, 65 for Quebec, 14 for Nova Scotia, 11 for New Brunswick, 17 for Manitoba, 14 for British Columbia, 4 for Prince Edward Island, 16 for Alberta, 11 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King, no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive* \$4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H. R. H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H. R. H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

The Senate.

<i>Speaker of the Senate</i> , Hon. Pierre Blondin*	\$6,000
<i>Clerk of the Senate & Clerk of the Parliaments</i> , Austin Blount, C.M.G.	6,000
<i>1st Clerk Assistant</i> , L. P. Gauthier.	4,740
<i>Gentleman Usher of the Black Rod</i> , Andrew R. Thompson.	4,140
<i>Law Clerk</i> , J. G. A. Creighton, C.M.G., K.C.	5,120

The House of Commons

<i>Speaker of the House of Commons</i> , Capt. Hon. George Black, M.P. (and allowance \$3,000)	\$6,000
<i>Deputy Speaker</i> , Armand Lavergne	4,000
<i>Clerk</i> , A. Beauchesne, M.A., K.C., F.R.S.C. (and allowance \$1,500) ..	6,000
<i>Clerk Assistant</i> , Thos. M. Fraser, B.C.L.	4,740
<i>Sergeant-at-Arms</i> , Lt.-Col. H. J. Coghill (and allowance \$600)	4,520

THE JUDICATURE.

The Judicature—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and six puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada.

The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

Supreme Court of Canada.*

<i>Chief Justice of Canada</i> , Rt. Hon. F. A. Anglin, P.C.	\$15,000
<i>Puisne Judges</i> , Rt. Hon. Lyman Poole Duff, Hon. T. Rinfret; Hon. J. H. Lamont, Hon. R. Smith, Hon. L. A. D. Cannon	12,000
<i>President of the Court of Exchequer for the Dominion</i> , Hon. A. K. McLean	10,000
<i>Puisne Judge of the Exchequer Court</i> , Hon. Eugene R. Angers	9,000
<i>Registrar of the Supreme Court</i> , James F. Smellie, K.C.	6,000
<i>Registrar of the Exchequer Court</i> , C. Morse, K.C., D.C.L.	5,000

DEFENCE.

The Canadian Militia is composed of the Active Militia and the Reserve, the Active Militia consisting of the Canadian Permanent Force (a small body of all arms) and the units of the Active Militia of the several branches of the service which are organized and perform annual training. The Reserve Militia consists of reserve units and of all able-bodied citizens between the ages of 18 and 60, with certain well-defined exceptions. The total establishment of the Non-Permanent Active Militia (1931) is 9,071 officers and 128,500 other ranks.

Expeditionary Force in the Great War.—The number enlisted up to the cessation of hostilities was 595,447, of whom 418,052 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at \$2,000,000,000.

Royal Canadian Navy.

The Royal Canadian Navy consists (1932) of 4 Destroyers and 3 Mine-sweepers. The authorized complements are 104 officers and 792 men of the Permanent Force. There is also a Naval Reserve of 70 officers and 420 men and a Naval Volunteer Reserve of 70 officers and 930 men.

Royal Canadian Air Force.

The strength of the Royal Canadian Air Force, permanent service, was on Jan. 1, 1932, 178 officers and 709 airmen.

Royal Canadian Mounted Police.

Headquarters: Ottawa.

<i>Hon. Commandant</i> , H. R. H. the Prince of Wales, K.G.	
<i>Commissioner</i> , Maj.-Gen. James Howden MacBrien, C.B., C.M.G., D.S.O.	
<i>Deputy Commissioner</i> , Col. T. S. Belcher.	
<i>Assistant do.</i> , Lt.-Col. A. W. Duffus (Ottawa).	
<i>Liaison and Intelligence Officer</i> , Col. C. F. Hamilton.	
<i>Secretary</i> , G. T. Hann.	

* All salaries and sessional indemnities are subject to a reduction of 10 per cent for the fiscal year 1932-33.

* Judge's salaries were subjected to a special income tax of 10 per cent for the fiscal year 1932-33.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1931) 20,500 public elementary and secondary school districts (attendance at the former being compulsory except in the Province of Quebec), with 2,137,810 pupils. In addition there were 95,083 pupils in private elementary and secondary schools. Higher education is conducted in 153 universities and colleges with an enrolment, in 1931, of 83,114.

Fodder Corn	341,717	8'32	2,864,900
Sugar Beets	50,647	9'06	459,000

In 1931 the live stock included 3,128,996 horses, 7,991,000 cattle, 3,668,000 sheep, 4,716,720 swine, and 65,468 000 poultry.

In dairy produce the Dominion output of creamery butter in 1931 was 225,802,635 lb., valued at \$ 0,168,738. There was also produced 84,337,000 lb. of dairy butter valued at \$20,710,000. The cheese production, home-made and factory, for the same period totalled 129,402,438 lb. valued at \$18,169,395.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 6,524 fur farms in the Dominion in 1930, 5,070 of which were fox farms, the remainder being divided between mink, raccoon, marten, skunk, fisher, Karakul sheep, beaver, muskrat, chinchilla rabbit, coyote, badger and Siberian hare. The total number of animals on the farms at the end of 1930 including estimates of the numbers of muskrats and beaver was 568,018, valued at \$16,197,747; born in captivity, 332,864; sold from farms, 24,500, value \$1,828,545; pelts sold, 77,657, value \$3,096,270; the total sale for live animals and pelts being \$4,024,815 as compared with \$6,779,865 in 1929.

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch marketed in the calendar year 1931 was \$30,682,631, as against \$47,804,216 in 1930 and \$60,259,744 in 1928, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations and in fish-canning and curing establishments in 1931 was \$45,321,256, and the number of men employed 69,370. The number of canning and curing establishments in operation in 1931 was 662.

Lumbering.—The value of production, including (a) primary forest production and (b) the value added by manufacture in sawmills and pulp mills, was \$303,145,169 in 1930, as compared with \$337,649,078 in 1929. The principal items of production in 1930 were sawn lumber \$87,970,000, shingles \$5,388,837, lath \$1,154,593, and wood pulp \$112,355,872.

Industrial Statistics.—Industrial establishments of all kinds in 1930 had a total capital of

\$5,003,316,760, the gross value of the products being \$3,428,970,628. These industries employed 644,439 hands, the total pay roll for whom was \$723,022,766.

Minerals.—Some minerals produced in 1931* were as follows: Gold, 2,693,892 oz. (\$45,687,688), copper, 292,304,390 lb. (\$24,114,065), lead, 207,348,482 lb (\$7,260,183), nickel, 65,666,320 lb (\$12,267,453); silver, 20,562,247 oz (\$6,121,943), zinc, 237,245,451 lb (\$6,059,249), cobalt 521,051 lb. (\$632,179), coal, 12,243,211 short tons (\$41,207,682), natural gas, 25,874,723 M. cu. ft. (\$9,066,754); crude petroleum, 1,542,573 bbls (\$4,211,674), asbestos, 164,296 tons (\$4,812,886), gypsum, 863,724 tons (\$2,111,517); salt, 259,047 tons (\$1,904,149). The total value of the mineral output in 1931 was \$228,029,018.

Shipping.—The registered shipping on Dec. 31, 1930, including inland vessels, was 3,170 sailing vessels and 5,728 steamers (total net tonnage, 1,432,064). The sea-going vessels entered and cleared at Canadian ports in 1931 were: Canadian 17,865 (11,707,129 tons), British 5,826 (20,008,005 tons), Foreign 17,906 (22,885,015 tons), total tonnage 54,600,149. The number of coasting vessels entered and cleared was 154,861, with a registered tonnage of 94,675,207.

Banking.—There were 20 chartered banks on Dec. 31, 1931, with 3,970 branches, with liabilities to the public of \$2,741,554,219, assets of \$3,066,028,472; deposits \$2,422,834,828. The balance of undrawn deposits in the Post Office and Dominion Government savings banks on March 31, 1931, was \$24,750,227. These two classes of Dominion savings bank were amalgamated in 1929.

COMMUNICATIONS.

Railways.—The total single track mileage of steam railways in operation on Dec. 31, 1931, was 43,173 miles, the capital liability of the steam railways being \$4,101,124,843 (1930), earnings (1931) \$358,549,382, the working expenses (1931) \$321,025,587. There were also (1931) 1,982 (single track, 1,409) miles of track of electric railways with a capital of \$216,778,095, earnings \$49,088,310, and working expenses \$35,367,067. In 1931 the passengers carried numbered 26,550,556 (steam), 720,468,361 (electric), and freight 88,148,232 tons (steam), 1,977,441 tons (electric).

Canals.—In 1931 the vessels passing through

* Subject to revision

the canals of the Dominion numbered 27,651 of 17,618,784 tons. There are seven systems under control of the Dominion Government with a total waterway of 1,846 miles (of which 509 miles are constructed canals).

The new *Welland Ship Canal* between Lake Erie and Lake Ontario, with a 25 foot channel, was opened for traffic on April 20, 1931, although the official opening was postponed until August, 1932.

Posts and Telegraphs.—There were 12,427 post-offices on Mar. 31, 1931. The postal revenue was \$30,416,106 in 1930-31. On March 31, 1930, there were 4,210 rural mail delivery routes on which were erected 237,351 boxes. The length of telegraph lines directly operated by the Dominion Government in 1931 was 9,300 miles, and that by the Canadian National System 24,627 miles. Other lines reached 19,301 miles. On March 31, 1931, there were 1,075 coast and land wireless stations, 319 ship wireless stations, 88 broadcasting stations, and 523,100 private receiving stations for the reception of broadcast programmes. The ship to shore wireless traffic for the twelve months ended March 31, 1931, amounted to 306,727 messages and 8,534,982 words. Wireless "beam" stations are operated at Montreal, Quebec, for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long-distance service to ships.

On December 31, 1930, there were 1,399,086 telephones and 4,476,213 miles of telephone wire in use, earnings, \$65,240,610, expenses, \$56,559,517.

Provinces of the Dominion.

ONTARIO.

Area and Population.—The Province of Ontario contains a total area of 407,262 sq. miles, with a population (1930) of 3,213,000. Of the population (Census 1921) 1,082,871 live in rural parts and 1,883,594 in urban centres.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 112 members elected for five years which meets every year at Toronto. Executive Council of fourteen members (three without portfolio) act as the Ministry of the Province.

Lieutenant-Governor, Hon. Heibert A. Bruce

Official Sec., Col. A. Fraser, LL.D.

Executive.

Premier and Minister of Education, Hon. George Stewart Henry, LL.D.

Highways, Hon. Leopold Macaulay

Attorney-General, Hon. William H. Price

Agriculture, Hon. Thomas Laird Kennedy

Health, Hon. John Morrow Robb

Provincial Secretary and Registrar, Hon. George H. Challies

Mines, Hon. Charles McCrea

Lands & Forests, Hon. William Finlayson

Provincial Treasurer, Hon. Edward Arunah Dunlop

Public Welfare, Hon. William G. Martin

Public Works and Labour, Hon. Joseph Dunsmore Monteith

Ministers without Portfolio, Hon. J. R. Cooke, Hon. H. C. Schofield; Hon. Paul Poisson

Speaker, Legislative Assembly, Hon. Thos. Kldd

SUPREME COURT OF ONTARIO

Chief Justice of Ontario, Rt. Hon. Sir William Mulock, K.C.M.G., P.C.

Chief Justice of the Second Divisional Court, Hon. Francis R. Latchford

Chief Justice of the High Court Division, Hon. H. E. Rose

Justices of Appeal, Hon. J. Magee, Hon. C. A. Masten, Hon. H. W. E. Middleton, Hon. W. R. Riddell, Hon. D. L. Grant, Hon. R. G. Fisher, Hon. A. C. Kingston

High Court Judges, Hon. H. T. Kelly, Hon. W. A. Logie, C.B.; Hon. W. H. Wright, Hon. William Edgar Rauey, Hon. John Millar McEvoy, Hon. P. Kerwin, Hon. Nicol Jeffery; Hon. Charles Garow; Hon. George H. Sedgewick

Agent-General for Ontario in the British Isles, William C. Noxon, 163, Strand, London, W.C. 2.

Assistant, S. E. Percival.

Finance.—The Ordinary Receipts of the Provincial Government for 1930 were \$87,343,291, and the Ordinary Expenditure \$57,929,353.

Agriculture and Live Stock.—The total area is 234,163,200 acres, and in 1931 the area of cleared land was about 15,000,000 acres, of which 9,064,649 acres were under field crops. The estimated total value of all field crops in 1931 was \$124,547,000. Cheese factories produced 79,816,828 lb of cheese in 1929 valued at \$14,513,547, and creameries made 59,185,194 lb of butter valued at \$23,623,174. In 1931 there were 578,333 horses, 2,488,000 cattle, 1,035,000 sheep, 1,379,943 pigs, and 23,588,000 poultry. Five grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Lumbering.—The value of production including primary forest production and the value added by manufacture in pulp-mills and saw-mills in 1929 was \$111,000,000.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1929 was \$2,103,090,728. There were, in 1929, 339,859 employees, an invested capital of \$2,418,340,450, and an annual wage bill of \$307,304,007. The chief manufacturing centres in 1929 were Toronto (\$593,253,569), Hamilton (\$197,949,082), Ottawa (\$36,098,047), Oshawa (\$66,377,921), London (\$50,346,829), and East Windsor (\$59,617,888).

Minerals.—Ontario is the leading mineral Province in the Dominion, the output in 1930 being \$113,530,976. The principal metals are gold, \$35,886,552; silver, \$3,893,876; nickel, \$24,455,133; and copper, \$15,187,259.

Hydro-Electric Power.—The Province of Ontario is well supplied with water power, having available about 7,000,000 h.p. The chief power rivers are the Niagara, the St Lawrence and the Ottawa. One of the world's largest and most successful electrical undertakings—the largest publicly owned—is operated by the Hydro-Electric Power Commission of Ontario, which generates and transmits power to more than 600 co-operating municipalities and serves about 75 per cent. of the population of the Province. The aggregate peak load exceeds 1,200,000 h.p. The undertaking represents a capital investment of about £70,000,000 (\$350,000,000).

Principal Cities.—CAPITAL, TORONTO, population 632,000, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (156,000); Ottawa, the Federal capital (127,000), with a large lumber trade and woodenware manufactures; London (71,000); Brantford (30,000); Kingston (23,500); Peterborough (22,000); Windsor, connected by tunnel beneath Detroit River with Detroit, Mich., U.S.A. (63,000); Port William (26,000); Kitchener (31,000); Guelph (21,000); St Catharines (25,000); Sault Ste Marie (23,000).

QUÉBEC.

Area and Population.—The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1931) of 2,874,255, an increase since the last census of 513,590. In 1927 the Province was diminished by 112,400 square miles by the award of the Imperial Privy Council in the controversy between the Dominion

of Canada and Newfoundland with regard to their boundary in the Labrador Peninsula.

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Province.

Quebec.—Hons. Hugues Fortier (Chief Justice); P. A. Choquette; Art Fitzpatrick; J. H. Fortier.

Agent-General for Quebec in England, Hon. L. J. Lemieux, 2 Cockspur St., Trafalgar Square, S.W.1.

Finance.—The actual revenue for the year 1931-32 was \$36,942,000 and the actual expenditure \$37,525,720. The bonded debt (June 30, 1932) was \$91,987,691 and the net funded debt \$66,860,821.

Production and Industry.—The gross value of manufactured products in 1930 was \$1,022,280,687 the principal manufacturing centres being (1930) Montreal (\$532,404,755), Quebec (\$38,324,617), Three Rivers (\$37,979,600), Shawinigan Falls (\$24,510,020), Sherbrooke (\$15,946,699), Granby (\$11,385,686), and Hull (\$8,960,340). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which 51,000,000 are under licence to cut timber. The wood pulp industry is assuming greater importance every year. Several large mills have recently been built, and during 1930 the production reached 1,833,000 tons, valued at \$12,355,872. The Province produces more than half of the total output of the Dominion. In 1930, 1,536,240 tons of paper were manufactured, valued at \$90,668,121 (mainly newspaper). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1930, was about 8,463,816 acres. In 1930 the production of dairy industry products was cheese 34,059,680 lb (valued at \$5,106,866), and butter 60,746,665 lb (valued at \$17,851,545). In 1931 there were in the Province 304,537 horses, 1,720,000 cattle, 732,000 sheep, 725,398 swine, and 7,932,000 poultry.

Education.—The Superintendent of Education assisted by a Council composed of a Roman Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1930, 8,470 schools with 624,757 scholars, including the high and superior schools and 20 normal schools supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers, Historic Guides, Blind and Deaf, Nursery, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville), and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 130,594), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada, and Montreal (population, 228,577), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St Lawrence Rivers. Ocean-going steamers ascend the St Lawrence as far as Montreal. Other important cities are Hull (29,433), Sherbrooke (28,933), Trois Rivières (25,450), Verdun (60,745). Population figures from the "Seventh Census of Canada, 1931."

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25'–47° N. lat. and 59° 40'–66° 25' W. long, and is connected with New

Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,827, an increase since the last census of 31,499 persons. Estimated population (1929) 550,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 28 members.

Agriculture and Live Stock.—About 8,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1931 there were about 5,000,000 acres of land occupied, of which about 735,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and the apple crop for 1931 was 1,400,000 barrels, the principal fruit belt being the Annapolis Valley. The products of the fields and orchards in 1931 were valued at \$15,000,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$100 per 100 acres, or \$1 per acre for any additional, not to exceed 150 acres in all. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1931 the live stock included 50,500 horses, 227,300 cattle, 222,300 sheep, 42,100 swine, and 1,255,500 poultry.

Manufactures.—In 1929 the gross value of the manufactures was \$65,033,701. The capital invested was \$127,526,491, and 26,568 hands were employed; the principal industrial centres being Sydney (\$12,026,021) and Halifax (\$10,700,999).

Fisheries.—The total value of the fisheries in 1927 was \$9,500,000, and the number of persons employed was about 20,000.

Minerals.—Mine products in 1927 were valued at \$35,980,000; the coal deposits are extensive and are estimated to last for 200 years. 4,745,005 gross tons were produced in 1927. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—CAPITAL, HALIFAX (population 58,372), one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the entrepôt of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Sydney in Cape Breton has a population of 22,545, and Glace Bay 17,007.

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The Canadian National Railway connects the island with the mainland by rail ferry.

NEW BRUNSWICK

Area and Population.—NEW BRUNSWICK is situated between 45°–48° N. lat. and 63° 47'–66° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,987 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Finance.—The ordinary receipts for 1927 were \$4,933,009, and the ordinary expenditure \$4,917,237.

Agriculture and Live Stock.—The total land area is 28,663,000 acres, of which 600,000 acres were under field crops in 1925. The total value of the field crops in 1927 was \$28,413,500. The live stock (1927) included 216,679 cattle, 153,057 sheep, 77,307 pigs, 51,304 horses, and 954,093 poultry. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) \$4,798,589. In 1927 the cheese factories in operation produced 800,000 lb., and the creameries 1,885,362 lb. of butter.

Manufactures.—The gross value of the output of manufactured goods in 1924 was \$67,456,006, the principal manufacturing centre being St. John (\$26,552,152). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County; and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found, also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON; population (1921) 8,114. St. John (pop. 69,093) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (17,488).

MANITOBA.

Area and Population.—Manitoba, originally the Red River Settlement is situated in about the centre of the continent, between 49°–60° N. lat. and 95°–101° W. long., with a total area of 251,832 square miles and a population (1921 Census) of 700,139, an increase since the last census of 61,079.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual seasonal allowance of \$1,800.

Lieut.-Governor, Hon. James Duncan

McGregor \$9,000

The Judicature.

Court of Appeal —

Chief Justice, Hon. J. E. Prendergast \$10,000
Private Judges, Hon. E. M. Denny, Hon. C. B. E., W. H. Trueman, H. A. Robson, S. E. Richards each 9,000

King's Bench —

Chief Justice, Hon. D. A. Macdonald 10,000
Private Judges, Hon. A. C. Galt, A. K. Dysart, J. E. Adamson, J. T. Kilgour, W. J. Donovan, P. J. Montague each 9,000

Finances—The revenues of the provincial government for the year ended April 30, 1931, were \$14,705,531, and the expenditures \$14,705,531; bonded debt \$94,201,735.

Agriculture and Live Stock—The total land area in Manitoba is 243,857,280 acres, of which 5,708,897 acres were under field crops in 1931. The soil is fertile and productive. The value of field crops in 1931 was \$24,664,000. The live stock included 226,529 horses, 677,668 cattle, 213,936 sheep, 387,646 swine, 5,546,691 poultry. The dairy output was 522,851 lb of cheese, 21,079,073 lb of creamery butter (\$4,531,785), the honey production was 7,352,000 lb.

Manufactures—The gross value of the manufactured products in 1930 was \$162,000,000. The capital invested in the 957 manufacturing enterprises amounted to \$174,000,000 and the hands employed 29,000, the chief industrial centres (1930) being Winnipeg, St. Boniface, Brandon and Portage La Prairie. In 1930 there were 4,420 miles of steam railway in the Province.

Principal Cities—CAPITAL, WINNIPEG, population 1931 218,785, the third largest city in Canada. Other cities (1931), Brandon (17,082), St. Boniface (16,305), Portage La Prairie (6,597).

BRITISH COLUMBIA

Area and Population—British Columbia has a total area estimated at 372,630 square miles, with a population (Census of 1931) of 694,263, the Census of 1921 gave 524,582, showing an increase in the decennial period of 169,681 (32.35 per cent.), the highest percentage for the Dominion.

Government—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly of 48 members.

Lieut. Governor, Hon. J. W. Fordham-Johnson (1931) \$9,000
 Private Sec., A. M. D. Fairbairn 2,400

 Minister of Agriculture, Hon. William Atkinson 7,500
 Minister of Mines and of Labour, Hon. W. A. McKenzie 7,500
 Minister of Public Works, Hon. R. W. Bruhn 7,500
 Minister of Education, Hon. J. Hinchliffe 7,500
 President of the Council, Hon. W. C. Shelly.
 Without Portfolio, Hon. R. L. Matland, K.C.
 Speaker, Legislative Assembly, Hon. C. F. Davis.

The Judicature.

Court of Appeal—Chief Justice, Hon. J. A.

Macdonald \$10,000
Private Judges, Hon. A. Martin, W. A. Gallilher, Albert E. McPhillips, M. A. Macdonald each 9,000

Supreme Court—Chief Justice, Hon. Aulay

Morrison 10,000

Private Judges, Hon. D. Murphy, F. B. Gregory, D. A. McDonald, W. A. Macdonald, and A. I. Fisher each 9,000

Local Judge in Admiralty, Hon. Aicher Martin 1,000

Agent-General in London, F. P. Burden, British Columbia House, 1 Regent Street, S.W. 1

Finances—The receipts of the provincial government in 1930-31 were \$24,280,703, and the expenditure \$29,099,564.

Agriculture and Live Stock—The agricultural production of British Columbia in 1931 was valued at \$40,108,000. Live stock in 1931 included 56,379 horses, 246,000 cattle, 145,000 sheep, 51,977 swine, and 4,409,000 poultry. The butter output totalled 5,438,305 lb of creamery and 2,410,000 lb of dairy butter, and the cheese 780,885 lb.

Production and Industry—The gross value of the output of manufactures in 1930 was \$240,938,154, the principal manufacturing centres being Vancouver, Victoria, New Westminster, and Prince Rupert. The yield of the principal industries was, in 1931: forests, \$44,447,000, agriculture, \$40,108,000, mining, \$34,883,000, fishing, \$12,110,000. There is an extensive coal measures, and a vast and compact area of merchantable timber, the mines have produced over \$1,272,731,028, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, timber, fruit, pulp and paper.

Principal Cities—CAPITAL, VICTORIA. Population 1931, 38,441. Other centres are Vancouver (246,293 in 1931), New Westminster (17,544), Prince Rupert (6,326).

PRINCE EDWARD ISLAND.

Area and Population—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 130 miles in length, and from 4 to 24 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1931) 68,038, a decrease from the last census of 577 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government—The Government is vested in a Lieut. Governor and an Executive Council, and a Legislative Assembly of 30 members elected by

the people, 15 as Councillors (with a property qualification) and 15 as Assembly-men (on general suffrage).

Lt. Governor, Hon. Charles Dalton (1930) \$7,000

Executive.

Asst. Provincial Sec. - Treas. and Clerk of Executive Council, H. R. Stewart 2,000

The Judicature.

Chief Justice, Hon. John A. Matheson .. \$10,000

Assistant Judges, Hon. Aubin E. Aisenault, Hon. Albert C. Saunders each 9,000

Judge of Vice-Admiralty Court, William S. Stewart

Agriculture and Live Stock—The value of the field crops in 1929 was estimated at \$25,976,000. The soil consists, for the most part, of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from \$20 to \$60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 600 fox ranches, conducted by incorporated companies and private partnerships or individuals. The live stock (1930) included 35,570 horses, 99,500 cattle, 87,000 sheep, 54,000 pigs, and 979,700 poultry.

Manufactures—The gross value of the manufactures in 1930 was \$4,638,725, against \$2,326,708 in 1900.

Principal Cities—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,228), Souris (1,094), and Georgetown (884).

ALBERTA.

Area and Population—The Province of Alberta has an estimated area of 255,285 square miles, including about 2,360 square miles of water, with a population (1926) of 607,584, an increase since the 1921 Census of 19,130.

Government—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 60 members, elected for five years, representing 51 electoral districts into which the Province is divided. The Executive Council consists of eight members.

Lieut.-Gov., Hon. W. L. Walsh (1931) \$9,000

Executive.

Premier and Provincial Secretary, Hon. J. E. Brownlee \$8,500

Attorney-General, Hon. J. F. Lymburn 6,000

Speaker of the Legislative Assembly, Hon. G. W. Johnston 2,500

The Judicature

The Supreme Court of Alberta.

Appellate Division, Hon. Horace Harvey, (C.J.) \$10,000

Judges, Hon. A. H. Clarke; C. R. Mitchell; H. W. Lunney; A. A. McMillan each 9,000

Trial Division—Judges, Hon. W. C. Simmons (C.J.); W. C. Ives; T. M. Tweedie, J. R. Boyle; Frank Ford, A. F. Ewing each 9,000

Agriculture and Live Stock—The total area in field crops, 1930, was 10,425,200 acres. The Department of Agriculture in the Provincial Government conducts free schools of agriculture at four points in the Province. Free home-steads are still available in many desirable localities. The value of the field crops in 1930 was estimated at \$85,868,900, wheat, \$51,831,000, oats, \$11,691,000, hay and clover, \$4,653,000; grain hay, \$19,970,000, potatoes, \$2,029,000, barley \$2,660,000. The live stock included 698,665 horses, 348,297 milk cows and 939,813 other cattle, 530,000 sheep, and 636,402 swine. The creamery butter made totalled 17,500,000 lb., valued at \$4,856,250, and cheese 980,000 lb., valued at \$166,600.

Finance—Gross bonded Debt, March 31, 1930, \$106,888,380, Net General Debenture Debt, \$71,089,000 Revenue (1929-30) \$15,829,865. Expenditure (1929-30), \$15,402,884 Assessed valuation of land within the Province, \$521,958,416

Manufactures—The gross value of the output in 1929 was \$107,556,792, against \$1,313,375 in 1900, the principal manufacturing centres being Calgary (\$44,694,670) and Edmonton (\$30,388,021).

CAPITAL, EDMONTON. Population (1926) 65,163, Calgary (65,513). Lethbridge, Medicine Hat, Red Deer, and Westakwin are the other principal cities of the Province.

SASKATCHEWAN.

Area and Population—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an area of 251,700 square miles, the population at the Census of 1921 being 921,785, an increase of 163,996 persons since the Census of 1921.

Government—The Government is vested in the Lieutenant-Governor, with a Legislative Assembly of 63 members. There is an Executive Council of ten members.

Lieutenant-Governor, Hon. H. E. Munroe, O.B.E., V.D., M.D. \$9,000

Premier, President of Council, and Minister of Education and of Natural Resources, Hon. J. T. M. Anderson 9,000

Agriculture and Live Stock—Saskatchewan is

the largest wheat-producing province of the

Dominion, and one of the most productive grain

areas in the world. In 1931 the grain yield

totalled 207,256,000 bushels. The approximate

value of grain crops was \$66,202,000, of field crops

\$3,046,000, livestock \$12,434,000, poultry pro-

ducts \$6,934,000, and garden produce \$3,036,000.

The live stock included 1,077,234 mules and

horses, 1,214,785 cattle, 209,888 sheep, and

497,027 swine.

Industries—The capital invested in manu-

facturing enterprises in 1931 was \$50,000,000,

and the value of the manufactured products

\$84,000,000, the principal industrial centres

being Regina, Moose Jaw, Saskatoon and Prince

Albert.

In 1931 there were 4,720 public elementary

schools with 222,550 pupils and 6,946 teachers,

and 20 secondary schools with 8,942 pupils.

CAPITAL, REGINA. Population (1931), 53,209.

Other large centres are Saskatoon (43,291), Moose

Jaw (22,299), Prince Albert (9,905), Swift

Current (5,296), North Battleford (5,986), and

Yorkton (5,027).

TERRITORIES**THE YUKON TERRITORY** was constituted a

separate political unit in 1898. It is governed

by a Comptroller and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1922 was 4,127 (2,819 males and 1,308 females). Mining is the chief industry. The gold output for the year ending Dec. 31, 1931, was \$826,138.

Comptroller, George A. Jeckell.

Judge, Hon. C. D. Macaulay.

THE NORTH-WEST TERRITORIES (1,209,682 square miles, population 12,000—including 7,100 Eskimo, and 3,800 Indians) comprise the territories formerly known as Rupert's Land and the North-western Territory (except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory) together with all British territories and possessions in North America and all islands adjacent thereto not included within any province, except the Dominion of Newfoundland and its dependencies. For administrative purposes the Territories were subdivided into the provisional districts of Mackenzie, Keewatin and Franklin. The Commissioner in Council has power to make ordinances for the Territories under instructions from the Governor-General in Council or the Minister of the Interior.

TERRITORIAL COUNCIL

(Appointed by the Governor-General in Council.)

Commissioner, Hugh Howard Rowatt

Deputy Commissioner, Roy Alexander Gibson.

Councillors, Charles Cammell; Austin Louis

Cumming; Kenneth Robinson Daly; Gen.

J. H. MacBrien, C.B., C.M.G., D.S.O.

Acting Secretary, David Livingstone McKeand.

DOMINION OFFICIALS

Chairman, Dominion Lands Board, H. E. Hume,

trict) W. M. Cory, Ottawa; (Keewatin Dis-

trict) (Vacant).

THE WORLD'S RUBBER.

In a Paper on "The Supplies of Rubber," Dr. George Rae, D.Sc., said the total area under plantation rubber at the end of 1929 was between 5,600,000 acres and 7,200,000 acres, of which the area under native rubber in Netherlands India was variously estimated at between 1,100,000 acres and 1,700,000 acres. The remaining 5,500,000 acres consisted of approximately 3,300,000 acres in estates owned by Europeans and Americans; 510,000 acres in Asiatic owned estates over 100 acres, and 1,690,000 acres in native holdings under 100 acres. About 80 per cent. of all the estate rubber trees were tappable; 90 per cent. of the native rubber in Malaya and Ceylon was tappable, and probably less than 50 per cent. of the native rubber elsewhere was tappable.

The total exports of rubber from producing countries were 24,000 tons in 1920; 107,000 tons in 1925; 254,000 tons in 1926; 312,000 tons in 1927; 361,000 tons in 1928, and about 302,000 tons in 1929. The actual output of rubber for the year 1929, distributed according to the

nationality of producers, was approximately as follows:—

	Tons	Per Cent
British—U K	236,000	27.9
Local	69,000	8.2
Netherlands	57,000	6.7
Other European	30,000	3.5
American	22,000	2.6
Asiatic estate	64,000	7.6
Malayan native	199,000	23.4
Neth Ind. native	103,000	12.8
Other native	36,000	4.3
Wild	26,000	3.1
	547,000	100.0

The absorption of rubber by manufacturers (i.e., the quantities of rubber they turned into rubber goods) was 85,000 tons in 1920; 120,000 tons in 1925; 310,000 tons in 1926; 350,000 tons in 1927; 790,000 tons in 1928; and approximately 705,000 tons in 1929.

PHYSIOGRAPHY.

The Island of Newfoundland is situated between $46^{\circ} 37' - 51^{\circ} 37' N.$ latitude and $52^{\circ} 44' - 59^{\circ} 30' W.$ longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with fells (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80° .

GOVERNMENT

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortreal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

GOVERNOR.

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION.

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1930-31 by 60,592 pupils. The Government grants in 1930-31 amounted to \$1,025,157 33

RELIGION

Portugal ..	6,548	991,711
Spain ...	86,859	1,506,739

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, coal and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, non pyrites, and other minerals; the total value of the fishery products in 1930-31 was upwards of \$20,469,856.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's.

COMMUNICATIONS.

Railways—There were 905 miles of railway open in 1926 and 47 miles of private line. The trans-insular line runs to Port-au-Basques, via Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trippasey, the principal settlements in Conception Bay, and to Lewis-ports (In Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of 11 first-class steamers.

Posts and Telegraphs—There were 893 post offices in 1930 (161 of which were also telegraph offices) and 79 telegraph offices additional, dealing with 7,386,400 letters and post-cards, 3,300 newspapers and books, and 711 521 parcels. 800 telephone stations are open, mostly in post offices. There are 4,830 miles of telegraph line and 1,200 miles of postal telephone wire. Postal revenue, \$485,320; Customs duty collected, \$178,836; telegraph revenue, \$189,581.

Shipping—On Dec 31, 1930, the Mercantile Marine of Newfoundland consisted of 2,501 sailing vessels of 102,718 tons, and 255 steam and motor vessels of 41,670 tons. In 1929-30 the tonnage of vessels entered and cleared at Newfoundland ports was 3,375,499 tons, of which 1,820,223 tons were British.

TOWNS.

The CAPITAL, ST JOHN'S (population 1931, 42,645; with suburbs, 59,420), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonavista (4,052), Carbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER

High Commissioner in London, D. J. Davies, C.B.E., B.Sc. (*Acting*). Office, 58, Victoria Street, S.W.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north. The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct., 1926. By the judgment given in March, 1927, the boundary was defined as a line drawn due N from the eastern boundary of Blanc Sablon as far as 54° N. lat. and from thence W along that parallel to the Romaine River, and thence N along the east bank of that river and its headwaters to their source, and thence due N to the crest of the watershed or height of land there, and thence W and N along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley. The territory thus confirmed as under the jurisdiction of Newfoundland has an area estimated at 220,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River. The inhabitants are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek.

The Commonwealth of Australia.

* Exclusive of full blood Australian Aborigines, who are estimated at 60,000.
 † Estimate, as at March 31, Census postponed to June 1933.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West* Indian Ocean. The total area of the Continent is 2,948,366 English square miles the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,220 miles, and the geographical position of the Continent is between $10^{\circ} 41' - 39^{\circ} 8'$ South latitude and $113^{\circ} 9' - 153^{\circ} 39'$ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Marv, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto. The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

GOVERNOR-GENERAL.

Governor-General, His Excellency the Rt. Hon. Sir Isaac Alfred Isaacs, P.C., G.C.M.G. (1932) £10,000
Military Secretary, Capt. L. F. Braccardie, D.S.O., R.A.N.
A.D.C., Lieut. C. H. Finlay.

Executive Council.

(Oct. 13, 1932.)

Prime Minister and Treasurer, Rt. Hon. Joseph Aloysius Lyons, P.C.
Attorney-General, Minister for External Affairs, and Minister for Industry, Hon. John Greig Latham, C.M.G., K.C.
Minister without Portfolio, Rt. Hon. Stanley Melbourne Bruce, P.C., C.H., M.C.
Minister for Defence, Rt. Hon. Sir George Foster Pearce, P.C., K.C.V.O.
Postmaster-General, Hon. Robert Archdale Parkhill.....
Minister for Trade and Customs, Hon. Henry Somer Gullett, .. .
Vice-President of the Executive Council, Hon. Alexander John McLachlan.....
Minister for the Interior, Hon. John Arthur Perkins
Minister for Commerce, Hon. Frederick Harold Stewart
Minister for Health, and Minister for Repatriation, Hon. Charles William Clanan Marr, D.S.O., M.C., V.D.
Assistant Ministers, Hons. Walter Massey Greene, Josiah Francis, James Allan Guy

COMMONWEALTH OFFICES IN LONDON,

Australia House, Strand, W.C. 2

Resident Minister, Rt. Hon. S. M. Bruce, P.C., C.H., M.C., M.P. £2,250
Official Secretary and Financial Adviser, J. R. Collins, C.M.G., C.B.E. 1,550
Assistant Sec., H. F. Farrands 653

Commissioner-General for Australia in America (vacant)
Official Secretary, D. McK Dow, "Canard Building," 25, Broadway, New York 784
Commercial Representative for Australia in Canada, L. R. McGregor, 36 Yonge Street, Toronto.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The *Senate* contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1932, is made up of 28 for New South Wales, 20 for Victoria, 10 from Queensland, 7 from South Australia, 5 each from Tasmania and Western Australia, and 1 (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £800 per annum, with free railway passes.

President of the Senate, Hon. Patrick Joseph Lynch.

Speaker, House of Representatives, Hon. George Hugh Mackay.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the Judicial Committee of the Privy Council.

Chief Justice, Rt. Hon. Sir Frank Gavan Duffy, P.C., K.C.M.G. £3,500
Judges, Hon. Sir George Edward Rich, K.C.M.G.; Hon. Hayden Erskine Starke; Hon. Owen Dixon; Hon. Herbert Vere Evatt, Hon. Edward Aloysius McTierman each 3,000

Court of Conciliation and Arbitration, *Chief Judge*, His Hon. George James Dethridge 3,000

Judges, Their Hons. George Stephenson Beoby, Edmund Alfred Drake Brockman, C.B., C.M.G., D.S.O., V.D. each 2,500
Federal Court of Bankruptcy, Judge, Hon. Lionel Oscar Lukin 2,500

DEFENCE.

Navy.

The Australian fleet consists of the Cruisers *Australia*, *Canberra*, *Brisbane*, *Adelaide*, 4 sloops, 5 destroyers, 1 seaplane carrier, and several auxiliaries. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces of the Royal Australian Navy on February 15, 1932, consisted of 341 officers and 2,776 men. There is also a R.A.N. Brigade composed of members of the Citizen Naval forces.

Army.

From 1911 to 1929 the defence policy was based on the universal compulsory training of a Citizen Army, but from November 1st, 1929, the constitution of the forces on a voluntary basis was adopted. Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces, and youths from 14 to 17 years in the Senior Cadet Corps. On March 31st, 1932, 29,821 were undergoing training.

Air.

The permanent strength of the Australian Air Force in April, 1932, was 102 officers and 708 airmen; and of the Citizen Air Force, 48 officers and 260 airmen. The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1930-31 was £379,898.

FEDERAL FINANCE.

The Premiers' Plan.

The Governments of Australia met in Conference (May-June and August-Sept., 1931) to consider what measures were possible to restore solvency and to avoid default. The National Income of Australia was £650,000,000 in 1927-28, falling to £564,000,000 in 1929-30, and a further fall to £450,000,000 was estimated for 1931-32.

The *Premiers' Conference* adopted a plan which combines all possible remedies in such a way that the burden falls as equally as possible on every one, and no considerable section of the people is left in a privileged position. This sharing of the burden is necessary to make the load more tolerable; it is still more necessary, because only on this condition will it be possible to get the combined effort required.

The plan has been adopted by the Conference as a whole, each part of which is accepted on the understanding that all the other parts are

equally and simultaneously put into operation it embraces the following measures:—

- (a) A reduction of 20 per cent. in all adjustable Government expenditure, as compared with the year ending 30th June, 1930, including all emoluments, wages, salaries, and pensions paid by the Governments, whether fixed by statute or otherwise, such reduction to be equitably effected;
- (b) Conversion of the internal debts of the Governments on the basis of a 22½ per cent. reduction of interest;
- (c) The securing of additional revenue by taxation, both Commonwealth and State;
- (d) A reduction of bank and Savings Bank rates of interest on deposits and advances;
- (e) Relief in respect of private mortgages.

These proposals require the greatest effort in economy and taxation which the Conference considers it safe to attempt. The effect will be still to have a gap of from £13,000,000 to £15,000,000 to be covered for a time by borrowing.

REDUCTION OF EXPENDITURE

The plan provides for Government economy on the basis of an immediate cut, averaging 20 per cent., for all Government wages and salaries below the level of 1929-30. To this will be added all saving that can be made from a strict scrutiny into the necessity of every item of Government expenditure.

Years	Revenue	*Expenditure	Payments to States
	£	£	£
1927-28	73,808,127	79,258,464	9,085,789
1928-29	74,894,799	77,253,774	9,036,638
1929-30	77,143,387	78,614,392	9,489,344
1930-31	69,566,920	80,324,539	11,112,615
1931-32	71,532,298	70,218,207	10,188,503

The above particulars do not include the interest payable on loans to the States, which amount is recoverable from the States concerned.

DEBT.

The total of the Public Debt for Commonwealth Purposes on June 30, 1932, was £308,884,730, including a War Loan from the British Government of £79,724,220, which is subject to a funding arrangement whereby the debt is to be extinguished about 1956 by annual repayments of 6%, of which £1 is 8d per cent. is for reduction of principal. The British Government agreed to the suspension for the years 1931-32 and 1932-33 of the repayment of principal moneys due under this arrangement, and of the interest moneys for 1931-32. The interest payments suspended are to be liquidated by 10 equal annuities from July 1, 1933, with interest at a rate to be determined. Adding the indebtedness of the States viz., £788,943,128, the total public debts of Australia amounted (June 30, 1932) to £1,187,827,858 (of which £602,607,938 was redeemable overseas) or £182 7s. per head of population.

* In addition, the following amounts were spent from loans for War Purposes and for Works—1925-26, £9,973,988; 1926-27, £9,228,570; 1927-28, £8,628,848; 1928-29, £8,231,147; 1929-30, £8,291,533; and 1930-31, £1,988,820. There was no loan expenditure on Works in 1931-32, all such expenditure being made from revenue.

In July and August the internal debt of £558,000,000 was the subject of a voluntary conversion plan in connection with the "Premiers' Plan" for financial rehabilitation. Of the total internal bondholders, conversion applications totalled £520,000,000, while in the absence of notification of dissent, £31,000,000 was automatically converted. Dissents amounted to only £16,000,000, or less than 3 per cent. The conversion plan involved an interest reduction of 2½ per cent.

Banking—For the quarter ended June 30, 1932, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £352,537,702, and the Australian assets to £415,310,082. On June 30, 1932, the amount of deposits in the Savings Banks totalled £197,925,927, approximately £32 4s per head of population. The Trading and Savings Banks have reduced their interest rates for deposits and advances in accordance with the "Premiers' Plan."

Cattle ..	11,202,134	11,720,916
Horses ..	1,845,614	1,792,734
Pigs	1,018,324	1,071,679

(a) Estimated number of sheep as at Dec. 31, 1931, 108,000,000.

(b) 1931-32, 14,724,830 acres, 189,652,654 bushels.

In 1930-31 Australia produced 922,121,253 lb. of wool (as in the grease), against 927,596,816 lb. in 1929-30; 350,405,104 lb. of butter; 33,099,781 lb. of cheese, and 71,050,133 lb. of bacon and hams.

Mines and Minerals.—In 1930 the value of gold produced was £1,981,977; silver and lead, £2,243,313; copper, £810,657; tin, £128,033; coal, £7,632,311; value of all minerals produced in 1930, £15,400,334. The production of gold in 1931 was valued at £3,563,499 (Australian currency).

Manufactures.—In 1930-31 there were in Australia 21,751 industrial establishments, employing 338,843 hands; wages paid amounted to £69,454,829; value of plant and machinery, £124,497,697; of lands and buildings, £122,210,609; of materials used, £162,104,646; value added by manufacture, £128,310,123; and total value of final output, £290,798,564.

Labour Statistics.—In 1931 there were 362 Trade Unions, with 769,006 members, of whom 112,901 were women. The estimated total number of employed persons over 20 years of age in 1931 was 1,321,000 males and 314,600 females. The number of unemployed members of trade unions averaged 27.4 per cent. Employers' Associations number 547, with membership of 122,428. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1931: 1923-1927=1,000) 852, including clothing, fuel, light and other miscellaneous household expenditure (base 1923-1927=1,000) 873. Melbourne Wholesale Price Index 1931 (base 1921=1,000) 1,428. Nominal Weekly Wage Index No., Australia, males (base 1921=1,000=51s. 3d.) 1,694=86s. 10d. Number of industrial disputes in 1931 was 134, involving 37,667 persons in a loss of 245,991 working days and £227,731 in wages.

COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open for general traffic at June 30, 1931, private lines being included in the totals and shown in parentheses:—

State	Miles open.	
New South Wales ..	6,160	(116)
Victoria	4,742	(25)
Queensland	6,795	(266)
South Australia	3,932	(34)
Western Australia ...	4,911	(277)
Tasmania	806	(141)
Federal Capital Territory	5	—
Northern Territory ...	317	—

Total 27,668 (899)

The gross earnings of all Government lines in 1930-31 were £38,985,433, working expenses £31,727,975, and net earnings £7,257,458, being at the rate of 2s 3d per train mile, and representing a return on the total cost (£341,544,692) of a 12 per cent., as against a 36 per cent. in 1929-30. In 1930-31 passenger journeys numbered 312,553,960 and 26,547,126 tons of goods and live stock were carried, the train miles run being 64,753,508. The electrification of the Sydney suburban system is in progress.

Tramways.—There are 630 miles of tramways in Australia, 575 miles of which are of electric, 29 of steam, 24 of cable, and 2 of horse traction. Extensive conversions to electrical traction have been made and more are in progress. The several Governments control 403 miles; municipal authorities, 186 miles; and the remaining 36 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1931, was £25,410,508. The revenue of electric tramways for the year 1930-31 was £6,723,164, working expenses £5,586,025, and net revenue £1,137,139, or 3.84d. per car mile. 71,043,470 car miles were run and 584,978,843 passenger journeys recorded.

Shipping.—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in 1930-31 were: entered, 1,534 (5,581,517 tons); cleared, 1,573 (5,668,673 tons). Of the vessels entered, 1,009 of 3,735,039 tons were under the British flag and 525 of 1,845,478 tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1930-31 was: Sydney 5,982 vessels of 8,468,532 tons, Melbourne 3,014 (6,320,549), Brisbane 1,147 (3,570,102), Adelaide 1,864 (3,983,519), Fremantle 708 (3,464,625), and Hobart 453 (767,592). At December 31, 1931, there were 2,346 vessels of a total net tonnage of 354,174 on the shipping registers of the several States.

Posts and Telegraphs.—In year ended June 30, 1931, there were 8,137 post offices; there were 9,189 telegraph stations, with 160,149 miles of wire, transmitting 12,985,208 telegrams, receiving 572,423 and dispatching 547,655 cable-

grams. A Beam wireless station, giving a service to and from Great Britain, was opened for traffic in April, 1927. At the end of year 1930-31, 498,055 *Telephones* were connected with 6,086 telephone exchanges; approximately 405,054,000 "local" and 30,164,077 "trunk line" calls were recorded for the year. 331,082 wireless broadcasting listeners' licences were issued in 1930-31.

Motor Vehicles.—At June 30, 1931, there were 604,105 motor vehicles registered in the several States. These comprised 420,206 cars, 76,066 motor cycles, and 97,933 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1930-31 was £4,072,633. Motor omnibus services are extensively operating in urban areas.

Civil Aviation.—225 aeroplanes of various types were registered with the Department of Civil Aviation at June 30, 1931. During the year 113,340 flights of a total duration of 44,567 hours were effected: 3,596,930 miles were flown, and 94,350 passengers carried. 48,503 lbs. of mail were carried by aerial mail contractors. Three subsidized companies are now operating machines over approved routes (5,479 air miles), while several unsubsidized companies have commenced commercial services over additional routes.

CAPITAL.—CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by N.S.W. on Jan. 1, 1911, has been laid out as the capital of the Commonwealth. At June 30, 1931, the population of the Federal Capital Territory amounted to 8,386, of which 7,023 were living in Canberra.

WORLD MOTOR VEHICLES PRODUCTION, 1929 AND 1930.

THE following table shows the production of motor vehicles in the five principal producing countries in 1929 and 1930; the figures are those published in the *United States Commerce Reports*, May 25, 1931, with the exception of those relating to the United Kingdom, which have been provided by the Society of Motor Manufacturers and Traders, Limited. The figures relate only to complete vehicles manufactured by companies strictly national in character, and not to the output of assembly plants in various countries.

Producing Country.	1929.			1930		
	Passenger Cars	Commercial Vehicles	Total	Passenger Cars	Commercial Vehicles	Total
United States..	4,527,400	771,000	5,358,400	2,784,800	571,200	3,356,000

Grand Total *	5,296,700	980,800	6,277,500	3,371,900	727,400	4,099,300

* These totals are the figures shown in the *United States Commerce Reports*; they do not include the effects of the revisions in the United Kingdom figures due to the substitution of particulars obtained from the Society of Motor Manufacturers and Traders, Limited.

THE NORTHERN TERRITORY.

The Northern Territory has a total area of 953,620 square miles, and lies between 12°-138° East longitude as far as 26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia, and the divisions into territories, known respectively as *North Australia* and *Central Australia*, were abolished in 1931—a reversion to the position as it existed prior to such divisions on February 1, 1907. The headquarters of the Administrator are at Darwin in the far north, a Deputy Administrator being stationed at Alice Springs in the south, to exercise all the powers and functions of the Administrator in that portion of the Territory situated south of 20° S. lat. except the power to fix the commencement of Ordinances, and to make regulations under Ordinances in force in the Northern Territory. As the administrative system obtaining from February 1, 1907, to June 12, 1931, has thus been continued, the residents of that part of the Territory south of 20° S. lat. are no less favourably placed than hitherto. The population of the Northern Territory as at June 30, 1931, was 4,193 (exclusive of full-blooded aborigines).

Agricultural development is increasing both in the number of individual landholders and the acreage under crop. The success of peanut growing during the last two years is mainly responsible for the improvement, and it is believed to presage a definite era of agricultural progress in the Territory. This applies to the land situated north of 20° S. lat. Agriculture is practically negligible in that part south of 20° S. lat. Agricultural leases are granted in perpetuity at nominal rentals, which are subject to re-appraisalment every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curing are excellent. The staple industry is pastoral—cattle raising north of 20° S. lat. and cattle, horse, and sheep raising south of 20° S. lat. Until railways are constructed, however, little, if any, improvement is expected in the pastoral industry in that part north of 20° S. lat. owing to the distance between the eastern and southern Australian markets. The position south of 20° S. lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable, under proper conditions, of carrying successfully and profitably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be cultivated. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up the industry will become important. The railway extends from Darwin to Birdum in the N. (315 miles), and Alice Springs is now connected by rail with Adelaide.

Darwin occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges, and boasts a splendid climate.

<i>Administrator of Northern Territory</i> (Darwin) Col. R. H. Weddell	£1,200
<i>Deputy Administrator (Alice Springs),</i> V. G. Carrington	600
<i>Chief Clerk and Accountant, L. H. A. Giles</i>	770

PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guinea mainland situated between the meridians of 141° and 150° 30' E. longitude, and between the 5th and 12th parallels of South latitude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Langhian Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members, form the Legislative Council. The white population in 1931 was 1,228. The official estimate of the native population is 275,000. On Dec. 31, 1930, 58,902 acres were under crops (47,837 coco-nuts, 9,075 rubber, 750 sisal hemp and 348 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

CAPITAL, Port Moresby.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 156° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), Bismarck Archipelago including New Britain, New Ireland, and islands adjacent to both (19,200 sq. miles), and the two northernmost Solomon Islands (4,100 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1931 there were 222,000 acres under crops (coco-nuts, 204,100). The white population in 1932 was 2,923, and the Asiatic population 1,457 (estimated); the native

population in 1932 was 390,000 (enumerated), including 26,000 working under indentures (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.)

Seat of Administration, Ralibaul.

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in July, 1932, was approximately 2,000.

Administrator, Captain Charles Robert Pinney, M.C.

President Executive Council, E. C. Robinson.

States of the Commonwealth.

I.—NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S lat and 141st and 154th meridians of E long, and comprises an area of 320,372 square miles (inclusive of 940 square miles of Federal Territory)—i.e., more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The estimated population at 31st March, 1932, was: Males, 1,282,200, Females, 1,245,784. Total, 2,527,984. A census is to be taken on June 30, 1933.

Births, Deaths, and Marriages.

Year	Births	Deaths	Marriages
1925	54,615	20,823	18,522
1926	53,126	22,188	19,219
1927	53,858	22,770	20,052
1928	54,800	22,694	20,076
1929	52,672	24,615	19,535
1930	52,136	21,252	17,383
1931	47,224	21,284	15,377

Vital Statistics.—Annual rate per 1,000 of population in 1932.—Births, 19.02; Deaths, 8.48; Marriages, 6.23. Deaths under 1 year per 1,000 births, 43.5.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the census of 1921, number 1,027,420, Roman Catholic 502,815, Presbyterian 229,932, Methodist 181,977, Congregational (Independent) 22,235, Baptist 24,722, Salvation Army 9,490, and Holiness 10,150.

PHYSIOGRAPHY.

The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Goulcock, Monaro and Munlong Ranges—the highest points being Mount Kosciuszko, 7,328 feet, and Townsend, 7,266 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Bellinger, Namuccan, Macleay, Hastings, Camden Haven, Manning, Wollombla, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Murrumbidgee, Bega, Towamba, and Snowy Rivers. The western por-

tion of the country is not so well watered, but immense reservoirs have been constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,609 miles, and the Murrumbidgee, 921 miles, are both tributaries of the Murray, which has a total length of 1,609 miles, 1,203 miles forming part of the boundary between the States of New South Wales and Victoria. Other inland rivers are Lachlan, Bogan, Macintyre, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 63.2°. The mean temperature in the shade for the north coast is 66° to 69°, south coast 60° to 63°, northern tableland 56° to 60°, southern tableland 44° to 57°, north-western slopes, the mean annual temperature ranges from 62° to 68°, in the Central-western slopes 58° to 64°, south-western slopes 59° to 63°, and in the Western Plains and Riverina Division from 62° to 69°. The Seasons are as follows: Spring during September, October and November; Summer during December, January, and February; Autumn during March, April, and May; Winter during June, July, and August.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

GOVERNOR.

Governor of New South Wales, His Excellency Air Vice-Marshal Sir Philip Woolcott Game, G.B.E., K.C.B., D.S.O., born 1876 (1930) £5,000
Official Secretary, H. S. C. Budge, C.M.G.
Private Secretary, Brig.-Genl. A. T. Anderson, C.M.G.

Lieutenant-Governor, His Excellency the Hon. Sir Philip Street, K.C.M.G., born 1863.

EXECUTIVE COUNCIL.

H.E. the Governor presides:

The Ministry.

On May 13, 1932, the Commission of the

Premier and Colonial Treasurer, the Hon. G. T. Lang, was withdrawn by the Governor, and the Hon. B. S. B. Stevens was commissioned to form a Ministry. The Legislative Assembly was dissolved on May 18. A general election was held on June 11, 1932, and the following Cabinet was formed on June 18, 1932—

Premier and Treasurer, B. S. B. Stevens
Deputy Premier and Minister for Transport, Col. M. F. Brukner,
Secretary for Public Works and Minister for Health, R. W. D. Weaver.

Attorney-General and Vice-President of the Executive Council, H. E. Manning, K.C., M.L.C.
Secretary for Lands, E. A. Buttenshaw
Colonial Secretary, Capt. F. A. Chaffey
Minister for Education, D. H. Drummond
Minister for Labour and Industry, J. M. Cunningham

Minister for Agriculture, H. Main
Asst. Minister in the Legislative Council, J. Ryan, M.L.C.

Minister for Local Government, J. Jackson
Secretary for Mines and Minister for Forests, R. S. Vincent

Minister of Justice, L. O. Martin
Honorary Minister assisting the Colonial Treasurer, E. S. Spooner
Honorary Minister assisting the Minister for Labour and Industry, H. M. Hawkins, M.L.C.

Allowances, amounting in the aggregate to £17,603 per annum, are payable to members of the Ministry

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the *Legislative Council* (122 in September, 1932) are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and tramways. The *Legislative Assembly* consists of 90 members. Each member of the Legislative Assembly receives £706 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the State General Elections in June, 1932, there were 739,009 male and 725,959 female electors, making a total of 1,465,008 enrolled and qualified to vote, of these 1,367,087, or 96.39 per cent of electors in contested districts voted.

President of the Legislative Council, Professor Hon. Sir J. B. Peden, K.C.M.G., LL.B., K.C. £945
Chairman of Committees, Legislative Council, Hon. B. O'Connor, LL.B. 573
Clerk of the Parliaments, C. H. H. Calvert 826

Speaker, Legislative Assembly, Hon. Sir Daniel Levy, LL.B. £1,281
Chairman of Committees, Legislative Assembly, W. T. Masingham 883
Clerk of Assembly, W. R. McCourt 953
Librarian, J. J. Quinn 696
Principal shorthand Writer, E. W. Hine 735
Ser., Standing Committee on Public Works, Arthur Humeley 603
Leader of Opposition, Hon. J. T. Lang
 (in addition to allowance as M.P.) 184

THE JUDICATURE

The judicial system includes a Supreme Court (with a Chief Justice and eight Puisne Judges), Land and Valuation Court, Industrial Commission, District Courts, Workers' Compensation Commission, Courts of Quarter Sessions, Petty Sessions and Children's Courts and Fair Rents Courts. Trial by jury has been in force since 1824.

Supreme Court

Chief Justice, Hon. Sir P. W. Street, K.C.M.G. £2,513 10s.
Puisne Judges, Hon. J. M. Hailey, Hon. A. G. F. James, Hon. R. H. Long Innes, Hon. C. G. W. Davidson, Hon. P. Halse Rogers, Hon. E. Milner Stephen, Hon. K. W. Street, Hon. F. S. Boyce £1,905

Industrial Commission of New South Wales.

President, His Honour Mr. Justice Browne £1,905
Members, His Honour Mr. Justice Webb, £1,905, His Honour Mr. Justice Cantor
Land and Valuation Court Judge, His Honour Mr. Justice Herbert Pike 1,905
Ch. Judge in Equity and Probate Judge, Hon. J. M. Hailey 1,905
Judge in Divorce and Matrimonial Causes, Hon. F. S. Boyce 1,905
Judge in Bankruptcy, Hon. R. H. Long Innes 1,905

District Courts

His Honour Judge White, His Honour Judge Armstrong, His Honour Judge Mocatta, His Honour Judge Edwards, His Honour Judge Coyle, His Honour Judge Thomson and His Honour Judge Cuthbert, His Honour Judge Sheridan each £1,163

(The several District Court Judges are also Chairmen of the Courts of Quarter Sessions and Judges of the Court of Review within their respective districts, and Judges of the Court of Marine Inquiry.)

Crown Solicitor, John Ernest Clark 1,467
Workers' Compensation Commission Chairman, His Honour Judge Purdian 1,163

EDUCATION.

Education—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in 1931 in 3,240 State schools was 387,881, and the average daily attendance 322,816. In addition to the State schools there were in 1931, 751 private colleges and schools, with 94,022 scholars, exclusive of many business and short-hand schools. The University of Sydney, with which 6 colleges are affiliated, including two Women's Colleges, was incorporated in 1850, and had 3,147 students (2,295 male and 852 female) in 1931. The State expenditure on Education was

£5,007,973 in the year ended June 1931. The individual students at State Technical classes numbered 15,125 in 1931, and many attended at the State Agricultural College and Farms.

FINANCE.

The receipts and expenditure of the principal revenue accounts of the State are shown below. Particulars of the business undertakings are stated separately, their accounts having been separated from the Consolidated Revenue Account as from July 1, 1928.

A sum of £800,000 contributed from Consolidated Revenue towards losses on developmental railways is duplicated in the figures for 1928-29, and later years being included as receipts and expenditure in both groups "Governmental" and "Business Undertakings."

The foregoing statement is exclusive of particulars of special funds such as the Unemployment Relief Fund formed in 1930 by means of special taxation of wages and other income. The receipts in 1930-31 amounted to £4,877,835, and the expenditure to £4,857,084, and in 1931-32 receipts £6,042,256, expenditure £6,105,452.

In terms of a financial agreement between the Commonwealth and the States, the Commonwealth took over the debts of New South Wales and the other States on July 1, 1929, and assumed the liabilities of the States to bondholders. A national debt sinking fund was established and the Australian Loan Council of representatives of the Commonwealth and the States was constituted to manage the debts and supervise public borrowing. The Commonwealth contributes a certain sum each year towards interest and sinking fund charges. In the latter part of the year 1931 the debts held in Australia were converted under the National Debt Conversion Loan into securities bearing interest at a reduction of 2½ per cent.

Of the public debt of New South Wales at June 30, 1931 an amount of £168,941,651 was repayable in London, the annual interest being £7,840,497, and £13,825,624 was repayable in New York, interest £671,667. The balance, £98,930,254 was held in Australia, and the annual interest (£5,772,171 in June, 1931) has been reduced by the conversion.

Banking, &c.—There were (June 30, 1932) 14 banks, with total assets within New South Wales £128,459,939, including advances, &c., and Government securities £128,639,011, coin, bullion, Australian Government Notes, and cash with Commonwealth Bank, £12,564,844; and liabilities, £126,065,833, including deposits, £111,172,054. The savings bank deposits on June 30, 1932, amounted to £71,518,000. The amount assured in New South Wales in Life Assurance Societies in 1931 was

£118,459,561 Ordinary, and £17,802,002 Industrial. The membership of Friendly Societies was 242,344, and the funds at June 30, 1931, were £4,029,240. Members of Trade Unions numbered 315,840, the funds of 190 Unions at Dec. 31, 1930, being £375,748.

Co-operative Societies.—There were 376 registered societies in existence at June 30, 1931. During the year ending on that date the sales of 98 rural societies amounted to £14,060,694, and the sales of 48 trading societies amounted to £2,466,826. Building Societies advanced £500,329 to members.

Shipping.—Excluding coastal trade, 2,247 vessels entered ports of N.S.W. during the year ended June 30, 1931. For the year ended June 30, 1932, the shipping entries at Sydney, including State coastal, were 5,840 vessels of 8,227,876 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are a floating dock and five patent slips.

Motor Vehicles.—At June 30, 1932, there were 143,970 registrations of motor-cars in force, and 62,791 of other motor vehicles.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 113 miles are controlled by the State. At June 30, 1931, the mileage of the State railways open for traffic was 6,044, the capital cost amounted to £132,565,362, and the net earnings for the year 1931-32 to £2,476,790.† There were also 200 miles of State tramways, the capital cost being £8,435,810 excluding cost in respect of power-houses, transferred to railways in 1930, and the net earnings during the year 1931-32 £255,690.†

Roads and Bridges.—A Main Roads Board, of two engineers with special knowledge of road construction and a president, was constituted in 1924. The Board was abolished on March 22, 1932, and its functions were transferred to a Board of Commissioners appointed to control the land transport services of the State. Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lands, feeding the railways, and giving primary producers access to markets and providing better facilities for motor traffic. There are 118,341 miles of roads in New South Wales. The total expenditure by the Government on roads, bridges, etc., other than on Sydney Harbour Bridge, in 1930-31 was £3,763,275 (including loan moneys expended by Main Roads Board). The construction of an arch bridge over Sydney Harbour was completed and the bridge opened

† Government railways and tramways, Sydney Harbour Works, Hunter District Water and Sewerage Works.

for traffic in March, 1932. This bridge carries a roadway 37 ft. wide, two footways each 10 ft. wide, and four lines of railway, of which two are being used as tramways. At mean high water there is a headway of 17½ feet. At June 30, 1932, the Government expenditure in connection with the bridge amounted to £8,136,947. Of this sum £1,252,258 had been expended on resumptions and £1,507,000 on approaches. The cost of the bridge is being defrayed partly by a levy of ¼d. in the £ on the unimproved capital value of properties in adjacent local areas, and partly by charges and tolls in respect of traffic across the bridge.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. At June 30, 1932, there were 2,522 post offices in New South Wales. The postal matter carried during 1926-27 (the latest year for which the information is available) included 352,038,722 letters and postcards, 81,395,900 newspapers, 66,164,500 books, packets and parcels. During the year ended June 30, 1932, 5,517,053 telegrams and cablegrams were transmitted, exclusive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 141,445.

TRADE.

The overseas imports into New South Wales during 1931-32 were valued at £18,795,635, and the overseas exports were £34,604,529. The chief exports were wool £13,896,000, wheat and flour £6,637,000, butter £1,990,600, meats £2,025,000, hides and skins £976,000.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 6,809,520 acres, excluding 1,737 acres double-cropped, were under cultivation during the year ended June 30, 1932, producing 65,977,000 bushels of wheat, 2,767,000 bushels of maize, 3,241,980 bushels of oats, 2,427,423 bushels of rice, besides other kinds of grain, with 32,283 tons of potatoes, 1,191,696 tons of hay, and 2,048 cwt. of dried leaf tobacco. Sugar-cane to the extent of 260,209 tons was crushed; and 1,335,883 gallons of wine, and 796 cases of bananas, and 26,502 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The total area under wheat in the year 1931-32 was 3,923,100 acres, of which 3,624,900 acres were harvested for grain, and 298,200 acres for hay, and 11,500 acres were fed off. The production of wheat was 54,140,000 bushels of grain and 364,600 tons of hay.

Land Alienation.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1932, was 67,859,926 acres, while the area of land held under lease, &c., from the Crown was 113,122,127 acres, and the balance, 17,064,447 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital area (Canberra), being 198,036,500 acres.

Livestock.—The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino, which was introduced in 1797. On June 30, 1932, there were 524,512 horses, 1,074,186 dairy cows, 1,796,287 other cattle, total cattle 2,870,473; 33,366,000 sheep, 334,331 swine, 25,622 goats, and

427 camels. In 1930-31, 427,200,000 lb. (stated as in the grease) of wool were produced, 124,207,799 lb. butter, 6,316,065 lb. cheese, and 21,901,194 lb. bacon and ham. The production of wool in 1931-32 was about 427,200,000 lb., and butter about 124,000,000 lb. During 1930-31 there were 224,532 persons permanently engaged in rural industries, 114,589 being males, and 9,543 females.

Values of Rural Industries.—The agricultural production was valued in 1930-31 at £15,105,000, dairying and farm-yard produce at £12,560,000, and pastoral production at £23,175,000, a total of £49,840,000.

Forests, Fisheries and Trapping.—The value of these industries in 1930-31 was £2,607,000, and 5,593 persons were engaged.

Mining Industry.—The goldfields were opened in 1851. The principal minerals are coal, copper, silver, lead, zinc, tin, iron, opal and platinum. The total value of minerals won during 1932 was £7,246,873, exclusive of Portland cement £617,432, lime £28,125, and coke £297,318, coal accounting for £4,607,343, silver, silver lead and ore £1,099,359, and gold £83,565. The value of the mining plant and machinery was £7,453,590. The mining industry gave employment to 26,370 persons during the year.

Factories.—In 1930-31 there were 7,544 factories. The average number of persons employed during the year was 127,605, of whom 93,881 were males and 33,724 females, the amount of £25,200,290 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £244 7s 3d. during the year and females £107 10s 9d. The capital value of land, buildings and fixtures amounted to £49,822,322, and of plant and machinery £30,865,884. The full capacity of the machinery was 1,368,140 h.p., including steam, 928,374 h.p.; gas, 24,221 h.p.; electricity, 374,499 h.p.; water, 19,035 h.p.; oil, 32,002 h.p. The power actually used was, on the average, 749,026 h.p. The value of output was £12,483,336; materials used, £64,579,042, and fuel consumed (including motive power rented), £4,380,721; the production, i.e. value added to raw materials, was £49,523,773. There are large iron and steel works at Newcastle, Lithgow and Port Kembla.

The total value of the production of the primary industries in 1930-32 was £58,222,000, making, with factory production, a total for all industries (as far as it is recorded) of £107,676,000, which is equal to £43 2s. 4d. per head of population.

LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,400 sq. miles in the sparsely-populated western division, the State is divided into 128 municipalities and 128 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1930 was £220,421,771 in municipalities, including the city of Sydney, and £129,853,697 in shires.

The total income of the municipal bodies was £15,178,581, and the expenditure on works and services, &c., £14,941,921

TOWNS.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 188 miles, the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet. There are extensive plants for loading ships, and for storing and loading grain in bulk; also for replenishing coal and oil bunkers. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about 22 square miles, of which 3,000 acres have a depth of from 35 feet to 160 feet, the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains a population of 109,400 (Dec., 1931); or, including suburbs, a population of 1,256,230. In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals. The parks within the metropolitan area are 92,298 acres in extent, and include the National Park which measures 33,807 acres, Ku-ring-gai Chase 35,300 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 152 acres. Other towns are Newcastle (with suburbs), 103,700; Broken Hill, 21,950; Lithgow, 15,050; Maitland, E & W., 11,940; Goulburn, 12,570; Katoomba, 9,580; Bathurst, 10,050; Lismore, 10,510; Albury, 9,770; Cessnock, 13,860; Wagga Wagga, 9,100; Liverpool, 6,360; Fairfield, 7,920; Grafton and South Grafton, 6,560; Wollongong, 10,800; Orange, 8,640; Tamworth, 7,790; Armidale, 6,560; Dubbo, 6,350; Glen Innes, 4,250; Forbes, 5,120.

Approximate time in transmission of mails from London to Sydney, 28 days

DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat. 33° 33' 4" S., Long. 159° 4' 26" E. Area, 3,220 acres. Pop., Dec., 1931, 113. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control. Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

POPULATION.—On June 30, 1932, the estimated population numbered 1,803,298 (890,439 males and 912,859 females).

Increase of the People.

Year	Births	Deaths	Marriages
1927	35,074	16,773	13,608
1928	34,498	17,708	13,186
1929	33,604	16,717	12,935
1930	33,127	15,959	12,641
1931	30,332	17,033	10,182

Vital Statistics.—Annual rate per 1,000 of population in 1931.—Births, 16.88; Deaths, 9.48; Marriages, 5.67. Deaths under 1 year per 1,000 births, 44.47.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 (last census) numbered 601,809, "Protestants" 18,636, Presbyterians 257,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 76 years, ended in 1931, was 58.5° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 139, and the average yearly rainfall was 25.53 inches.

GOVERNMENT

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of 12 members.

THE MINISTRY (May 19, 1932)

(The sum of £10,000 is allocated for Salaries of the Ministry).

Premier, Treasurer, and Minister of Public Health, Hon. Sir S. S. Argyle, K.B.E., M.R.C.S., M.L.A.

Chief Secretary and Minister in charge of Electrical Undertakings, Hon. I. Macfarlan, M.L.A.

Attorney-General, Solicitor-General, and Minister of Railways, Hon. R. G. Menzies, K.C., M.L.A.

Minister of Agriculture, Hon. J. Allan, M.L.A.

President of the Board of Land and Works, Commissioner of Crown Lands and Survey, and Minister of Forests, Hon. A. A. Dunstan, M.L.A.

Minister of Public Instruction, Hon. J. W. Pennington, C.B.E., M.L.A.

Commissioner of Public Works, Minister in charge of Immigration, and Minister of Mines, Hon. J. P. Jones, M.L.C.

Minister of Water Supply and Minister of Labour,
Hon. G. L. Gondie, M.L.C.
Ministers without Portfolio, Hon. A. E. Chandler, M.L.C.; Hon. H. Cohen, C.M.G., M.L.C.; Hon. W. S. Keut Hughes, M.L.A.; Hon. T. C. Manifold, M.L.A.

AGENT-GENERAL IN LONDON.

Agent-General in London, Walter Leitch, C.B.E., Victoria House, Melbourne Place, Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses—the *Legislative Council* of 34 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the *Legislative Assembly* of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors (June 30, 1932) for the Council number 472,450, and those for the Assembly, 1,068,887.

President of the Legislative Council, Hon.

Sir Francis Grenville Clarke, K.B.E. £750
Speaker of the Legislative Assembly, Hon.

Sir A. J. Peacock, K.C.M.G. 1,000

THE JUDICATURE.

There are magistrates' courts, and general sessions and county courts, and a Supreme Court with a Chief Justice and six Puisne Judges. **Chief Justice,** Hon. Sir William Hill Irvine, K.C.M.G., LL.D. (*Acting as Ex-Chief Justice*)

Puisne Judges, Their Honours Sir Leo F. B. Cussen (*Acting Chief Justice*), F. W. Mann, W. G. S. McArthur, J. R. Macfarlan, C. J. Lowe, and J. S. Wasley (*acting*) each £2,500

County Court Judges, W. H. Moule, H. C. Winneke, C. J. Z. Womanski, W. H. Williams, H. C. G. Macindoe, A. W. Foster each 1,500

Chief Clerk of Supreme Court and Acting Master-in-Equity, M. M. Phillips 1,200

Taxing Master for the Supreme Court, E. H. Tiebblis 800

Crown Prosecutors, C. H. Book, £1,250;

R. M. Nolan, £900, W. St. G. Sproule

Crown Solicitor, F. G. Meuzies 1,475

NOTE.—All the above-mentioned salaries, including Judge's salaries, are subject to percentage reductions under the Financial Emergency Act, at various rates, from 21 per cent on salaries of £728 to 27 per cent where the salary exceeds £3,000.

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 260,319 children on the registers in 1930, the average attendance being about 70 per cent. **Secondary Education** is principally under private control, 75,944 pupils being in attendance at the 502 schools in 1930. There is a State-aided *University* at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman).

FINANCE.

The revenue and expenditure and State Debt for five years are given as follows—

Year	Revenue	Expenditure	Debt
	£	£	£
1927-28	27,387,927	27,521,270	158,183,470
1928-29	28,156,034	28,104,947	159,552,653
1929-30	27,323,842	28,406,712	162,288,994
1930-31	27,575,504	28,023,708	167,016,596
1931-32	24,555,272	26,163,594	169,833,964

Banking, &c.—There were (June 30, 1932) 14 banks (including Commonwealth Bank) with total assets £149,733,208, within the State, and liabilities £122,036,678. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1932, amounted to £65,781,000.

PRODUCTION AND INDUSTRY.

Agriculture—Of the 9,306,289 acres under cultivation in 1930-31, 4,600,200 were wheat crops and 371,024 oats, and 1,277,338 acres were cut for hay. In 1930-31, 7,254,615 gallons of wine were produced. The estimated value of production in 1930-31 was (including manufacturing values) £70,298,619.

Livestock—There were in 1931, 660,132 milch cows, producing 110,006,619 lb. of butter and 8,064,463 lb. of cheese, and 760,788 other cattle, 16,477,995 sheep, 281,245 pigs, and 379,872 horses.

Minerals—The gold production in Victoria has declined very considerably, the amount produced in 1931 being 43,638 oz. (£262,462). Other minerals raised consisted principally of coal (black and brown), kolin, tin and gypsum.

Trade and Industry—Wool, wheat, flour, butter, live stock, fruits, condensed milk and poultry are the staple productions of the State, and the manufactures (8,159 factories, &c., employing 126,016 hands in 1930-31) are mainly for home consumption. The chief exports overseas are wool, butter, wheat, flour, skins and hides, tallow, milk and cream, preserved and frozen meats and fruit (dried and fresh). The principal overseas imports of the State are iron and steel, machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens, timber, petroleum spirit and paper.

CITIES AND TOWNS.

MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight, its widest streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. Melbourne and suburbs cover an area of 125,741 acres and contained (December 31, 1931) a population of 1,030,750. Other cities are Ballarat, 41,750; Geelong, 42,760; Bendigo, 33,720; Warrnambool, 8,200. The chief towns are Castlemaine, 6,670; Wonthaggi, 7,330; Mildura, 6,000; Hamilton, 5,300; Ararat, 5,357; and Shepparton, 6,000.

Transmission of mails, approximate, 30 days. Melbourne, distant from London 11,267 miles; transit, 30 to 35 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S lat and 129° and 141° E long, the total area being 380,070 sq miles.

POPULATION—In 1932 the population numbered 585,466 (302,371 males and 283,095 females).

Increase of the People.

Year	Births	Deaths	Marriages
1927	11,492	5,128	4,501
1928	11,408	5,147	4,146
1929	10,665	5,039	3,719
1930	9,984	4,851	3,312
1931	9,079	4,888	3,069

Birth rate 15.56, death rate 8.38, marriage rate 5.26 per 1,000 of population. Infantile mor-

tality, 35.46 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,634; Congregationalists, 15,289; Baptists, 33,033; Lutherans, 24,606; Roman Catholics, 64,054; Presbyterians, 22,659; and Churches of Christ, 15,039.

PHENOGRAPHY

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude, is also unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 63°; the winter temperature (July–August) averaging 53°, and the summer (November–March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 95 years' record, is 21.10 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melbourne to Cape Northumberland. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

GOVERNOR.

Governor of South Australia, His Excellency Brig.-Gen. Hon. Sir Alexander Gore Arkwright Gore-Rutledge, KCMG, C.B., D.S.O. (1928) . . . £5,000
Private Sec., Leigh Winser, C.M.G., M.V.O.
Lieut.-Governor, Hon. Sir George John Robert Murray, KCMG, LL.M., born 1863 (1916)

THE MINISTRY (Oct. 30, 1930).

(£7,750 is allotted as salaries to Ministers, less 20 per cent. for 12 months.)

Premier and Treasurer, and Minister of Education, Hon. Lionel Laughton Hill.
Attorney-General and Minister of Railways, Hon. William Joseph Denny, M.C.
Chief Secretary and Minister of Agriculture and Commissioner of Forest Lands, Hon. Stanley R. Whitford.
Commissioner of Crown Lands and Minister of Mines, Marine, Labour and Employment, Hon. Robert Stanley Richards.

Commissioner of Public Works and Minister of Industry, Hon. John McInnes.
Minister of Local Government, Immigration, Repatriation and Irrigation, Hon. James Jelley.

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Sir H. N. J. J. Well, KCMG, Australia House, W.C. £1,600
Secretary and Trade Commissioner, C. F. G. McEann 850

THE LEGISLATURE

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female, there is a small property qualification for electors to the Legislative Council, who numbered 133,409 in 1931, those for the Assembly numbering 329,895.

President of the Legislative Council, Hon. Sir J. L. Stirling, KCMG £680
Speaker of the House of Assembly, Hon. E. J. Shephard 680

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice; and four Puisne Judges, there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions for 1931 totalled to 274, which is at the rate of 1 in every 1,100 of the population.
Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, KCMG, B.A., LL.M. £2,000
Judges, Hon. J. M. Napier, LL.B., Hon. H. A. Parsons, LL.B., Hon. F. W. Richards, LL.D., Hon. A. W. Piper . . . 1,700

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister, it is secular, compulsory, and free; there are 1,074 State schools, with 3,604 teachers and 95,000 scholars; the expenditure in 1931 was £917,233, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 186, with 917 teachers and 14,310 scholars. There is an endowed University at Adelaide, founded in 1874, with 1,056 undergraduates, and 1,372 other students, all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE

Year	Revenue	Expenditure	Debt
	£	£	£
1928	11,346,903	11,621,834	90,612,402
1929	10,840,914	11,771,772	92,653,531
1930	9,847,201	11,473,023	93,419,118
1931	10,725,811	12,539,668	99,527,447
1932	10,481,977	11,545,336	101,599,238

Banking.—There are 8 banking institutions in Adelaide, in addition to the Commonwealth Government Bank and the State Bank of South Australia, with about 385 branches and agencies, and £42,000,000 paid-up capital, having a total liability of £26,902,165 and assets £29,482,907 in June quarter, 1932. The savings banks on June 30, 1932, had 549,634 accounts open with £21,167,251 to their credit. Over 90 per cent of the population have Savings Bank accounts.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the total area about one-half is farmed or grazed, and 8,100,000 acres cultivated—under wheat 4,100,000 acres, hay 528,000, oats 206,000, barley 222,000, orchards and vineyards 82,000, with 2,500,000 acres lying fallow. Wheat produced 48,093,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. There were 52,000 acres of vines, with a production of 10,680,000 gallons of wine, 156,000 cwt. of currants, and 185,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (Dec. 31, 1931).—There were 6,608,981 sheep, cattle 265,324, horses 125,222, pigs 109,780. Wool production, 66,162,687 lb.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £553,558 (1931). Over £33,096,000 of copper have been produced since the foundation of the State, but production has not been profitable for some time.

Manufactures.—In 1931 there were 1,644 factories, employing 25,121 hands, the gross value of the output being £19,997,455, and the wages paid £4,655,144. Plant, machinery, land, and buildings were valued at £18,601,557.

Value of Production, 1930-31.—(Crops, total value, £9,009,865, average per head £16, manufactures, £7,397,175; pastoral, £2,777,621, minerals, £1,288,738; dairying, £1,644,881; poultry, fisheries and game, forestry, &c., £1,739,386. Total value of production, £23,857,166, average £41 per head.

Trade and Commerce Overseas, 1930-31.—The total value of the Imports was £3,925,550 (U.K. £1,402,596, or 37 per cent, other British countries £746,591, or 20 per cent, foreign countries £1,636,299, or 43 per cent). The total value of the Exports was £10,061,535 (U.K. £5,444,798, or 54 per cent, other British countries £856,628, or 9 per cent, foreign countries £3,760,109, or 37 per cent). In 1931-32 the imports were £2,821,761 and exports £12,222,151, consisting of breadstuffs £6,350,243; pastoral and dairying products £2,493,661, fruits and wine £1,562,300, minerals £1,628,609, and miscellaneous £187,338.

Transport, &c.—There are 3.82 miles of railway in South Australia, 156 miles of electric tramways, 46,000 miles of roads and several good harbours. On June 30, 1932, there were 57,881 motor vehicles in use, classified as 39,023 cars,

taxi-cabs, &c., 10,909 lorries, trucks, &c., 7,860 motor cycles and 89 road tractors. There are 874 post offices in the State, and 759 telegraph stations and 50,656 telephones connected.

Shipping (1930-31).—Ships entered numbered 1,020, tonnage 4,165,788, British 820 (3,477,553 tons), foreign 200 (748,235 tons).

TOWNS.

ADELAIDE, the chief city and capital, population (1931) 324,337, inclusive of suburbs within 10 miles radius. Other towns are Moolta (4,250), Kadina (5,000), Wallaroo (3,250), Port Pirie (10,000) on the east, and Port Augusta (3,350) on the west of Spencer Gulf, and Kapunda (2,100), Gawler (5,000), and Peterborough (3,300) on the line from Adelaide to the north, Victor Harbor (3,450) in the south, Mt Gambier (6,000) in the south-east, and Port Lincoln (2,850) on Eyre Peninsula. Murray Bridge (3,600) and Renmark (3,750) on the River Murray.

Transmission of mails from London to Adelaide, approximate, 29 days.

IV.—QUEENSLAND.

This State, situated in lat 10° 40'—20° S. and long 138° 15'—30° E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (i.e., equal to more than 5½ times the area of the United Kingdom).

POPULATION.—At the Census of 1921 the population numbered 755,972 (398,969 males and 359,003 females). On March 31, 1932, the estimated population was 965,934.

Increase of the People.

Year	Births	Deaths	Marriages
1927	19,830	8,079	6,278
1928	19,783	7,976	6,321
1929	18,487	8,308	6,169
1930	18,939	7,455	6,199
1931	17,833	7,525	5,951

Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1921 there were 309,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,735 Baptists, and 44,132 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kribb's Range* divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1931 was 69° F., the maximum and minimum shade temperatures being 100° and 41° F., mean barometer, 30.067. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty.

The rainfall during 1931 was 66 7/8 inches, and there were 132 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

GOVERNOR

Governor of Queensland, His Excellency Col. The Rt. Hon. Sir Leslie Orme Wilson, G.C.S.I., G.C.I.E., C.M.G., D.S.O. £3,000
Private Sec., Col. L. E. C. Worthington-Wilmer 300
Aide-de-Camp, Capt. T. P. Honnor, R.M. 300
Official Sec., F. Ryder 380
Lieut.-Governor, Sir Jas. W. Blair.....

EXECUTIVE COUNCIL

(H.E. the Governor presides.)

Premier, Chief Secretary and Treasurer, Hon. Wm. Forgan Smith £1,300
Secretary for Public Lands, Hon. Percy Pease 1,000
Attorney-General, Hon. John Mullan 1,000
Home Secretary, Hon. Edward Michael Hanton 1,000
Minister for Labour and Industry, Hon. Maurice Patrick Hynes 1,000
Secretary for Railways and Main Roads, Hon. Frank Arthur Cooper 1,000
Secretary for Mines, Hon. James Stopford 1,000
Secretary for Public Instruction (vacant) 1,000
Secretary for Agriculture and Stock, Hon. Frank William Bulcock 1,000
Secretary for Public Works, Hon. Henry Adam Bruce 1,000

AGENT-GENERAL IN LONDON

Acting Agent-Gen. & Official Secretary, L. H. Pike, A.C.I.S., J.P., 409-410 Strand, W.C.2

THE LEGISLATURE.

Parliament consists of a *Legislative Assembly* of 72 members elected by universal adult suffrage.
Speaker, Hon. George Pollock £1,000
Chairman of Committees, Edward Joseph Hanson 700
Clerk, C. A. Bonmays 780

THE JUDICATURE

There is a Supreme Court, with a Chief Justice and six Puisne Judges, an Industrial Court, with a President and another Judge, and Inferior Courts at all the principal towns, presided over by Police Magistrates.
Chief Justice, Supreme Court, Hon. Sir J. W. Blair £2,250
Senior Puisne Judge, H. D. Macrossan
Puisne Judges, W. F. Webb, H. H. Henchman, E. A. Douglas, F. T. Brennan, R. J. Douglas . . . each 2,000

EDUCATION

Primary Education is compulsory, secular and free. In 1931 there were 1,730 State schools, including 106 Provisional and 13 High schools in operation, with 4,299 teachers and an average daily attendance of 116,097 children; and in 1930, 191 private and 10 grammar schools, with 1,264 teachers and an average attendance of 27,335. A State-aided University was established during 1920.

FINANCE.

Revenue, Expenditure, and Debt of Queensland for five years ended June 30 :—

Year.	Revenue	Expenditure	Debt (Gross)
	£	£	£
1928	16,718,070	16,707,564	111,733,969
1929 ..	16,736,188	16,908,145	112,862,049
1930 ..	15,997,870	16,721,055	112,148,979
1931 ..	15,072,652	15,914,696	112,231,189
1932 ..	12,934,113	15,069,293	111,911,785

Banking—Assets of Joint Stock Banks at June 30, 1931, £38,236,288, liabilities £36,251,609. The deposits at the same date amounted to £35,680,258. The Commonwealth Bank of Australia also has a branch in Queensland with assets June 30, 1932, £10,010,105, and liabilities £9,369,913. Depositors' balances in Queensland branch of the Commonwealth Savings Bank at March 31, 1932, £22,382,915, averaged £23 38 51 to each inhabitant. There were 390,996 operative accounts.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 18,850,187, and 88,787 acres have been granted without payment, under a system of deferred payment, 7,765,825 acres more are in process of alienation, and an additional area including preferential pastoral leases of 222,415,280 acres leased out for sheep and cattle 11,414,753,110 acres for grazing selections, 11,271,120 acres are held under occupation licence, 366,015 acres under gold-mining and mineral lease, 949,668 for special purposes, 3,528,884 acres perpetual leases and perpetual lease pickly pent selections, 14,316 acres held as auction perpetual leases, pickly pent leases 12,286,120 acres, reserves and roads 20,507,279 acres, leaving 55,606,419 unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while large areas are devoted to maize, which yields an average crop of about 25 60 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, coconuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1931, 581,276 tons of sugar were produced. The live stock in January 1932 included 5,550,399 cattle, 22,324,278 sheep, 469,474 horses, and 222,586 pigs. Wool, meat, sugar and butter are the principal products.

Climate—The Bureau of Seasonal Forecasting of the Council of Agriculture, Turbot Street, Brisbane, makes researches into the climatic sequences of Queensland and issues forecasts, the beneficial nature of the work being much appreciated by farmers and graziers in Queensland and the adjoining States.

Forestry—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,484,403 acres. In 1930 31 the wealth produced by the timber industry of Queensland was about two million pounds, and there were 3,061 hands employed in the sawmills and plywood mills. At June 30, 1931, the total area of reforestation plantations was 6,208 acres, and

in addition 74,148 acres had been treated for natural regeneration by the State Forest Service, which employs 256 persons, and is engaged actively in timber farming and wood-trading operations. An area of 161,251 acres has been reserved for National Parks.

Minerals.—The total mineral output in 1931 was £1,265,225. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1931 was valued at £55,842. silver, £75,653, copper, £126,342, tin, £35,744; coal, £699,926, wolfram, £28, molybdenite, £48, lead, £230,740, opals and gems, £3,503; arsenic, nil, cobalt, nil; zinc, nil; fluorspar, £1,142, bismuth, £37, limestone, £30,708; scheelite, £103, ironstone (flux), £5,100. mercury sulphide, £309.

Commerce.—The chief articles of export overseas, the produce of the State, in 1930-31 were: Wool, £6,675,042; meat, including extract, and bacon, hams, and pork, £2,643,800; hides, £233,845; skins, sheep, £112,763; skins, other, £10,841; tallow, £191,746; butter, cheese, and milk, £3,540,200; sugar, £1,786,982.

TOWNS.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,032. Estimated Dec. 31, 1931, 317,130. The status of the chief magistrate of Brisbane was raised to that of Lord Mayor in 1930.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (30,000), Maryborough (12,000), Townsville (32,050), Port Douglas, Mackay (9,230), Thursday Island (1,400), Cooktown, Cairns (10,500), Bowen (3,000), and Bundaberg (11,250), Gladstone (2,537). Other places of importance are Ipswich (26,253), Toowoomba (26,439), Charters Towers (9,200), Gympie (9,592), Mt Morgan (5,000), Warwick (7,500), Roma, (4,000) and Cloncurry.

Transmission of mails from London to Brisbane, approximately, 32 days. An mail takes about a week less.

V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia from which it is separated by Bass Strait, about 120 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33' 43" 39' S lat. and 144° 39' 148° 23' E. long, and contains an area of 26,215 square miles.

POPULATION.—At the Census of 1921 the population numbered 213,780 (107,743 males and 106,037 females).

Year.	Birth Rate	Death Rate	Infant Mortality	Marriage Rate
1927	23.01	9.68	53.0	6.82
1928	22.13	10.06	64.0	7.09
1929	22.44	10.17	53.2	8.01
1930	22.11	9.00	50.6	6.70
1931	21.65	9.35	46.0	6.82

Religion.

All religions are free. In 1921 there were 112,222 members of the Church of England, 35,456 Roman Catholics, 27,171 Methodists, 14,796 Pres-

byterians, 4,543 Congregationalists and Independents, and 5,332 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions, the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54.4°, the mean temperature for Dec. Jan. and Feb. being 61.5°, and that of June, July, and Aug. 46.9°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England, the average rainfall varies from 20 inches to 200 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1896 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, and the State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

GOVERNOR.

Acting Governor of Tasmania, Hon Sir Herbert Nicholls, K.C.M.G., Chief Justice.

EXECUTIVE COUNCIL (June 15, 1928).

Premier, Treasurer, and Minister for Agriculture, Hon J. C. McPhee ...
Chief Secretary, Hon C. E. W. James ...
Land and Works Hon. Sir Walter H. Lee, K.C.M.G. ...
Attorney-General, Hon H. S. Baker ...
Without Portfolio, Hon Edward Hobbs; Hon A. Wardlaw.

AGENT-GENERAL IN LONDON

Acting Agent-General in London & Official Secretary, H. W. Ellis, F.S.O., J.P.
Address, Australia House, Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members elected for six years; and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months, the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon W. B. Propping, C.M.G.
Speaker of House of Assembly, Sir John W. Evans, K.C.M.G. ...
Clerk of the House, Henry McPherson

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir H. Nicholls, K.C.M.G. (b. 1868) ... £1,800
Puisne Judges, Hons. H. Culp; A. J. Clark ... each £1,500

Solicitor-General, P. L. Griffiths £950
Registrar Supreme Court, A. G. Brammall 730
Recorder of Titles, A. A. Richardson ... 775

EDUCATION.

Primary education is compulsory, secular, and free, there being 500 State schools in 1930, with 38,345 children on the registers. Secondary education is also provided by the State (5 high schools with 1,587 scholars), and by private endowment. There is a *University* at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE.

Year	Revenue	Expenditure	Debt
1927-28	£2,062,687	£2,867,605	£24,872,785
1928-29	2,766,434	2,855,977	23,324,630
1929-30	2,956,272	2,981,992	22,921,211
1930-31	2,609,290	2,854,394	23,389,079
1931-32	2,431,190	2,657,109	23,659,588

Banking—Dec 31, 1931, the banks of issue had total deposits £7,665,404, the savings bank deposits were £5,482,293.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock—Of the total area of 16,778,000 acres there were, in 1930-31, 267,632 acres under crops. The principal crops are apples, potatoes, hay, and other fruit, followed by hops, peas, oats, green forage, and wheat. The live stock included 230,284 cattle, 2,119,606 sheep, 54,556 pigs, and 32,700 horses. The wool production was 14,000,000 lb. The butter produced amounted to 9,802,300 lb.

Electrical Energy—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State, the capacity of the installation being 81,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

Forestry—Timber reserves total 950,538 acres. Area held under lease or forest permits for saw-milling, logging, &c., 272,000 acres. The amount of timber milled for 1930-31 was 30,597,832 super feet, exclusive of piles, poles, fencing, and for practically all sleepers. The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. A company has been formed with options over large areas, and there is every prospect of an early commencement of manufacturing operations.

Minerals—The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1931 being £707,028.

Manufactures—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery, the value of production in 1930-31 was £2,807,497, the capital invested in the 805 establishments being £9,182,000 in 1930-31.

TOWNS.

CAPITAL, Hobart. Population (1932), 58,270. Other towns are Launceston (pop 31,210), Devonport, Ulverstone, Burnie, and Queenstown. Transmission of mails, approximate, 31 days.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long. and from 13° 30' to 35° 8' S. lat.

Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION.—At the Census of April 4, 1921, the population was 332,732 (177,278 males, 155,454 females); in 1931 the total was estimated at 421,609 (225,586 males, 196,023 females).

Natural Increase of the People.

Year	Births.	Deaths.	Marriages.
1927	8,451	3,793	3,107
1928	8,704	3,640	3,309
1929	9,051	3,930	3,367
1930	9,200	3,774	3,205
1931	8,549	3,681	2,741

Religions.

There is no State aid to religions. At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 28,377 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand dunes, varied by wide stretches of clayey soils. The climate is one of the most temperate in the world. The total rainfall at Perth during 1931 was 39.18 inches, the average for the past 55 years being 34.70. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Western Australia, (vacant).
 Lieutenant-Governor, His Excellency Hon Sir John Alfred Northmore, K.O.M.G., LL.B. (June, 1932).
 Private Sec., Maj. B. Kerr-Pearse, C.M.G., M.V.O.

EXECUTIVE COUNCIL

<i>Premier and Treasurer</i> , Hon. Sir James Mitchell, K.C.M.G., M.L.A.	£1,700
<i>Minister for Lands, Immigration and Health</i> , Hon. Charles G. Lathlain, M.L.A.	1,500
<i>Attorney-General and Minister for Education</i> , Hon. Thomas A. L. Davy, K.C., M.L.A.	1,500
<i>Minister for Railways, Mines, Police, Forests and Industry</i> , Hon. John Scaddan, C.M.G., M.L.A.	1,500
<i>Minister for Public Works and Labour</i> , Hon. John Lindsay, M.L.A.	1,500
<i>Chief Secretary and Minister for Country Water Supplies and Trading Concerns</i> , Hon. Charles F. Baxter, M.L.C.	1,500
<i>Minister for Agriculture</i> , Hon. Percy D. Ferguson, M.L.A.	1,500

AGENT-GENERAL IN LONDON

<i>Agent-General in London</i> , Hon. William C. Anxwin, <i>Offices</i> , Savoy House, 115-116, Strand, W.C.2	£2,000
<i>Secretary</i> , C. B. Rushton, I.S.O.	810

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage, the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

<i>President of the Legislative Council</i> , Hon. Sir John Waters Kihwan	£800
<i>Speaker of the Legislative Assembly</i> , Hon. S. Stubbs	800

THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction. There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts and Children's courts.

Chief Justice, Hon. Sir J. A. Northmore, K.C.M.G., LL.B. £2,300

Puisne Judges, Hons. T. P. Draper, C.B.E., J. P. Dwyer (and 1 vacant), each £2,000

EDUCATION.

Education—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1932, was £549,116; in addition, a grant of £25,111 was made to the University.

FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30—

Year	Revenue	Expenditure	Debt
	£	£	£
1928	9,807,949	9,874,415	76,427,764
1929	9,947,950	10,223,919	69,355,449
1930	9,740,515	10,268,518	71,194,325
1931	8,686,756	10,107,294	76,564,685
1932	8,035,316	9,593,212	79,707,953

Banking.—There were, including the Commonwealth Bank of Australia, 8 cheque-paying banks, formerly banks of issue, in the State on June 30, 1932, with total assets £25,591,112 and liabilities £16,678,049. The amount due to depositors in the Commonwealth Savings Bank in Western Australia on June 30, 1932, was £10,210,879.

PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,588,800 acres) 3,900,850 acres were under crops in 1931-32, wheat for grain accounting for 3,158,888 acres. In 1932 the live stock included 826,417 cattle, 10,096,614 sheep, 220,482 pigs, 18,828 goats, and 156,347 horses. There were about 5,000 acres of vineyards.

Manufacturing Industries.—There were on June 30, 1931, a total of 1,455 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 14,619. The combined output of these establishments for 12 months ended June, 1931, was computed at £12,353,353.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 12 months ended June, 1931, is computed to have been 122,483,555 super feet.

Minerals.—The groups of the Coolgardie gold-fields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 510,572 oz in 1931. The total amount produced in the State from 1886 to June 30, 1931, is 39,103,153 fluc ozs. Magnetic iron, lead, copper and tin ores and coal exist in large quantities.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1917 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textiles, tobacco, cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1932—Gold, £4,912,715; Wool, £2,345,570; timber, £358,361; sandal wood, pearls and shell, hides and skins, £341,999; wheat, £5,333,740; flour, £580,729; and fresh fruit, £430,738.

TOWNS.

CAPITAL, Perth. Population (1931) of Metropolitan area, including Fremantle, 209,720.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 35,143), Albany (3,915), Kalgoorlie and Boulder (11,635), Bunbury (4,556), Cottesloe (5,510), Claremont (6,400), Geraldton (4,556), Midland Junction (5,220), Norham (4,874), and Collie (3,450).

Transmission of mails from London to Perth, approximate, 27 days.

The Dominion of New Zealand.

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., *Prime Minister.*)

THE Dominion of New Zealand is situated in the South Pacific Ocean and in point of actual distance is consequently far from the Homeland and from the older established countries of the world. This fact does not, however, in any way diminish the importance of New Zealand. Rather, on the other hand, does it serve to increase its significance as a power in the Pacific Ocean.

Actually the Dominion possesses an importance far in excess of that which the uninformed might expect to be attached to such a young country. Directly connected with the older world by fast modern steamship services—indeed, only a few short weeks away from the Homeland—her isolation is much more apparent than real.

New Zealand extends for a length of over one thousand miles north and south and possesses a population of slightly more than one and a half million people. In addition the Dominion has control over numerous islands in the South Pacific with a large aggregate Polynesian population. More specifically her jurisdiction extends from Penrhyn Island, about eight degrees south of the Equator, to the coasts of the Ross Sea on the borders of the Antarctic Continent.

New Zealand is primarily a grazing country, and the quality of its pastures has gained a world-wide reputation. For that and other reasons its future will for many years to come doubtless be inseparably associated with stock raising, principally of dairy cattle and sheep. Wool, frozen meat, butter, cheese, hides and skins, and fruit in the main comprise her staple exports, and are the products upon which the Dominion principally relies to exchange for many manufactured goods from overseas.

It is equally true, however, that with increasing population there is a growing tendency for greater diversity in industry and for the manufacture of many commodities within the Dominion which formerly were obtained solely from abroad. Nevertheless the population is as yet insufficient to maintain a very wide range of industries, and consequently the Dominion's industrial field of manufacture is to a great extent limited to the treatment of the principal primary products.

The main market for the products of New Zealand is the United Kingdom, as much as 88 per cent. of the total value of her exports being sent there during the calendar year, 1931. A further 5 per cent. was sent to other British countries, making a total of 93 per cent. marketed within the British Empire.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion produces is fully realised by the Government and the people of New Zealand, and it is also realised that the prosperity of the United Kingdom is dependent in large degree upon the extent to which New Zealand and the other Dominions and Colonies co-operate by purchasing the products of the Homeland.

That this is fully recognised in New Zealand is obvious from the fact that this country purchases a greater proportion of its imports from the United Kingdom than any other British Dominion. The desire to further inter-Empire trade moreover finds practical expression in the extension of a substantial measure of preference by means of differential rates of customs duties to the products of the British Empire.

Generous provision is made in New Zealand for primary, secondary and technical education, and, in addition, every encouragement is given to the student who is desirous of continuing his course at the University. So far as humanitarian legislation generally is concerned New Zealand is recognised as being one of the foremost countries in the world.

Finally, a few words must be written of the Dominion's wonderful scenic attractions and sporting facilities. This article would, indeed, be incomplete without reference to them, however brief.

Within the compass of a comparatively small country there are to be found all the varieties of scenery that is possible to see in any other part of the world and these offer unlimited scope to the tourist. From the sportsman's point of view the attractions, too, cannot be surpassed anywhere, for here in New Zealand is to be obtained much that appeals—deep sea fishing, incomparable angling in the numerous lakes, rivers and coastal waters, and excellent deer-stalking.

All these features combine to make the Dominion's scenic resorts, tourist attractions and sporting facilities one of its most important natural resources.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22' and 47° 18' South latitude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages.—North Island, mean temperature 57° F., rainfall 47 in. (days with rain 163) sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours.

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907 the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor-Gen. and Commander-in Chief of New Zealand, His Excellency The Right Hon. Lord Hledisloe, P.C., G.O.M.G., K.B.E., D.Sc., apptd 1930 (Salary £7,500, H.E. has relinquished £2,250) £5,250
Official Secretary, Sir Cecil Day, O.M.G., C.B.K. A.D.C.'s, Lt. J. C. Elworthy, R.N., Capt. J. W Tweedie.

* EXECUTIVE COUNCIL.

His Excellency the GOVERNOR-GENERAL.

COALITION CABINET (Aug. 1932).

Prime Minister, Minister of Railways, of External Affairs, and in Charge of Scientific and Industrial Research, Public Trust, Electoral and High Commissioner's Departments, Rt. Hon. G. W. Forbes, P.C. £1,377
Minister of Public Works, of Transport, of Employment, and in Charge of Roads and Public Buildings, Rt. Hon. J. G. Coates, P.C., M.C. 895

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £2 2s per diem when so engaged, but not during attendance at a session of the General Assembly. A house allowance of £53 is also paid where a Government residence is not provided (no per cent. cut in 1931-32 and further 25 per cent. in 1932-3.)

Minister of Lands, Commissioner of State Forests, and Minister in Charge of Land for Settlements, Scenery Preservation, Discharged Soldiers' Settlement, and Valuation Departments, Hon. E. A. Rauson £895

Minister of Finance, of Customs, of Stamp Duties, Attorney-General, and Minister in Charge of State Advances and Land and Income Tax Departments, Hon. W. Downie Stewart 895

Minister of Native Affairs, of Cook Islands, and in Charge of Native Trust, Government Life Insurance, State Fire and Accident Insurance, Legislative, Public Service Superannuation, Friendly Societies and National Provident Fund Departments, and Member of the Executive Council representing the Native Race, Hon. Sir Apirana Ngata 895

Minister of Health, of Immigration, and in Charge of Mental Hospitals and Printing and Stationery Departments, Hon. J. A. Young 895

Minister of Education and of Industries and Commerce, Hon. R. Masters M.L.C. 895

Minister of Defence, of Justice, of Marine, and in Charge of Penitentiary, Police, Prisons, Registrar-General, and Inspection of Machinery Departments, Hon. J. G. Cobbe 895

Postmaster-General, Minister of Telegraphs, of Labour, of Internal Affairs, and in Charge of Tourist and Health Resorts, Publicity, Government Statisticians, Audit, Museum, and Advertising Departments. Hon. A. Hamilton . . . £895
Minister of Agriculture and of Mines. Hon. C. E. Macmillan 895

HIGH COMMISSIONER IN LONDON
High Commissioner in London. Sir T. M. Wilford, K.C.M.G., K.C., New Zealand Government Offices, 415 Strand W.C.2 . . . £1,575
Secretary. F. T. Sandford 753

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life, since that date for 7 years only), at present consisting of 24 members; and a House of Representatives consisting of 60 members elected for 3 years (Life of present parliament extended to 4 years). Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919). Members of the Upper House receive £255 3s per annum, and of the Lower House £364 10s per annum, in each case with travelling expenses and deductions for non-attendance.

Speaker of the Legislative Council. Hon. Sir W. C. F. Cairncross . . . £583 4s

Speaker of the House of Representatives. Hon. Sir C. K. Statham (plus sessional allowance of £78 15s. per annum and free sessional quarters) 708 15s.

THE JUDICATURE

The judicial system comprises a Supreme Court and Court of Appeal, also Magistrates' Courts having both civil and criminal jurisdiction.
Chief Justice. Rt. Hon. Sir Michael Myers, P.C., K.C.M.G. £2,250

Justice Judges. Hon. Sir A. L. Healdman, J. It. Reed, C.B.E., A. S. Adams, W. C. MacGregor, H. H. Ostler, A. W. Blair, D. S. Smith, R. Kennedy . . . each 2,000
Judge, Court of Arbitration. Hon. F. V. Frazer 2,000

In 1931, 62,945 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 42,092. In 1931 convictions (or sentences) in Supreme Courts were 1,624. Civil cases to number of 527 were tried, and 706 judgments were recorded for a total amount of £311,400.

POLICE.

On March 31, 1932, the strength of the Police Force was 1,157 of all ranks, equivalent to 1 for every 1,317 of the population. Average cost of police protection per inhabitant was, in 1931-32, 5s 5d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, local, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two, or three votes according to the value of their property.

Revenue of local bodies, 1930-31 . . . £16,264,645
 Receipts not revenue, 1930-31 4,432,956
 Expenditure, 1930-31 22,174,584
 Net indebtedness, March 31, 1931 . . . 62,166,199

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the Staff Corps, the Permanent Staff, the Artillery, the Permanent Air Force, the Army Ordnance Corps, the Permanent Army Service Corps, and the Army Medical Corps. The compulsory territorial system (including Senior Cadets) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Establishment of N.Z. Permanent Forces, 110 professional officers, establishment of N.Z. Permanent Staff, 135 (chiefly drill instructors). Strength of (volunteer) Territorial Force on March 31, 1932, 2,000 officers, 6,613 other ranks.

Navy

In 1909 New Zealand presented the battle cruiser *New Zealand* to the Imperial Government. The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war. The ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 20th June, 1927, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." Expenditure on naval defence 1931-32, £504,182. The New Zealand Division comprises the cruisers *Diamond* and *Dunedin*, the depot ship *Phantom*, the trawler *Wakakura*, and oil-tanker *Nucula*. Two sloops, *Veronica* and *Laburnum*, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station.

*FINANCE

Year	Revenue	Expenditure	Gross Debt.
1928	£25,123,980	£24,944,905	£251,396,252
1929	23,599,676	24,176,028	264,191,983
1930	25,349,861	25,200,882	267,383,343
1931	23,068,931	24,708,042	276,033,358
1932	27,719,733	24,860,552	...

* Financial year ends March 31. railway revenue and expenditure are excluded throughout, and post and telegraph revenue and expenditure in 1929, 1930, 1931 and 1932.

Banking.—At the end of 1931 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £68,557,120, liabilities, £61,713,034; value of notes in circulation, £5,782,355.

Post-office and private savings banks had, at the close of the year 1931—32, 1,091,607 depositors, having £53,387,732 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1931) 7,524 public primary schools, with 6,191 adult teachers and 223,105 scholars, there are also 305 registered private primary schools, with 26,726 scholars, and, in addition, 139 village schools for the Maoris with 7,523 scholars. The higher education of boys and girls in the cities and large towns is carried on in 46 endowed colleges and grammar schools, in 22 technical high and technical day schools. In addition there are 82 secondary depts of district high schools, and 2 junior high schools, 49 private secondary schools, and 11 secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,869 students in 1931, and has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,262 acres, and, apart from boroughs and holdings under 1 acre, 43,239,585 acres of this were in occupation in 1931, this acreage representing 83,826 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1930-31 was 249,014 acres, giving a yield of 7,579,153 bushels. An area of 87,152 acres of oats was threshed, the yield totalling 3,376,609 bushels, while 223,869 acres were converted to chaff, hay, or ensilage. Other acreages in 1930-31 were barley, 24,887, peas, 10,558, rye-grass, 47,942, and potatoes, 28,459. An area of 504,608 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1931 numbered 4,080,525, sheep, 29,792,516, pigs, 476,194; and horses, 295,742. Sheep in 1932 numbered 28,666,219. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Manufactures.—Statistics of factory production show (1930-31) 5,203 factories in operation, employing 80,829 hands. Value of output for year, £80,745,426.

Minerals.—Coal-mining is one of the largest industries, the output in 1931 being 2,157,756 tons, the approximate total output to the end of 1931 being 75,999,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, occurs in great abundance in Taranaki, and in the form of brown hematite at Otakaka and Patapara, near Nelson.

EXTERNAL TRADE.

Year	Imports	Exports	Total
1927 ..	£44,782,946	£48,496,354	£93,279,300
1928 ..	44,886,266	56,188,481	101,074,747
1929 ..	48,797,977	55,579,063	104,377,040
1930 ..	43,025,914	44,940,622	87,966,606
1931 ..	24,812,958	35,153,028	59,965,986

[Note.—Import values in 1930 and 1931 are in sterling. Export values in New Zealand currency.]

Principal Imports, 1931 —

Fruit (Fresh and Dried)	£632,636
Tea	650,550
Sugar	552,605
Tobacco	668,846
Iron and Steel	2,028,512
Electrical Machinery and Apparatus	1,334,112
Other Machinery	976,506
Motor-cars and parts thereof	1,247,409

Wood, Timber, and Manufactures thereof	327,200
Oil, Petroleum (crude and refined)	1,941,255
Leather and Manufactures thereof	468,453

Principal Exports, 1931 —

Wool	£5,515,376
Butter	10,649,527
Frozen Meat	8,892,555
Cheese	4,461,293
Hides, Skins and Pelts	1,263,720

The external trade of 1931 was shared by the principal countries as under:—

Country	Imports from	Exports to
United Kingdom	£12,664,893	£30,940,654
Australia	2,685,808	1,169,055
United States	3,698,714	920,931
Canada	1,217,987	256,890
Japan	298,307	267,890
France	222,349	419,016
India	389,325	59,185
Ceylon	613,142	5,093
Germany	403,195	309,847
Belgium	269,056	146,335
Dutch East Indies	844,329	10,205

COMMUNICATIONS.

Railways.—In March, 1932, there were 3,222 miles of Government railway lines in working order, and more under construction, and 117 miles of private lines, together with an excellent system of road service cars. The number of passengers carried on Government lines in 1931-32, including season-ticket holders, was 19,155,600, and in addition 2,384,670 on railway road motor services, while goods carried amounted to 5,824,811 tons. Operating revenue and expenditure were £5,788,965 and £5,301,653 respectively.

Shipping.—During 1931 the vessels entered Inwards numbered 564 (tonnage, 2,155,920), and those entered outwards 559 (tonnage, 2,155,713), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1931), 271,243,916 letters and post-cards, 39,454,971 newspapers, 151,369,568 books

and packets, and 3,415,554 parcels, and the work is effected by 1,738 post-offices. There are 12,558 miles of telegraph line, with 63,934 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 14,166,403.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the Urban Areas, at April 1, 1932, was as follows:—Wellington, 144,800, Auckland, 218,400, Christchurch, 128,900; Dunedin, 87,400, Wanganui, 27,800, Invercargill, 24,350, Palmerston North, 23,200, Napier, 19,300; Timaru, 18,650, New Plymouth, 18,650; Hamilton, 18,250, Hastings, 16,750, Gisborne, 16,400; Nelson, 12,700, Masterton, 8,700; Oamaru, 7,600, Whangarei, 7,700, Greymouth, 6,250, Ashburton, 5,450, Blenheim, 5,300, Rotorua, 5,150.

THE ISLANDS OF NEW ZEALAND

The following islands form part of the Dominion proper.—*North Island* and adjacent islets, *South Island* and adjacent islets, *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30' S lat and 175° 40'–177° 15' W long. *Chatham Islands* have a population of 600, half of whom are Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847.—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S lat and 172° 8' 8" E long (uninhabited). *Auckland Islands*, about 200 miles south of Bluff Harbour, in 50° 32' S lat and 166° 13' E long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41' 15" S lat and 178° 43' E long uninhabited, and *Bounty Islands* (47° 43' S lat., 179° 0' 30" E long) uninhabited.

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10' to 31° 30' S lat., and 177° 45' to 179° W long, includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atini, Mauke, Mitiaro, Manuae and To Au-o-tu, Takutea, Palmerston, Penrhyn (or Tongareva), Manahiki, Rakahanga, Pukapuka (or Danger), Niue (or Savage), Suvarrow, and Nassau. The population at the Census of 1926 numbered 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, and pearl-shell. The trade is chiefly with New Zealand and the United States of America. The exports (1932) were valued at £87,136, and the imports at £80,767. Rarotonga is the chief island, with a native population of 3,731, and a population other than native of 205. The Government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The five Arikis of

Rarotonga are of equal rank and are all members of the Council. Rarotonga is a place of call for the mail steamers between Sydney, N S W., and Wellington, N Z., and San Francisco, U S A.

Resident Commissioner, Rarotonga, H F

AYSON, C.M.G.

Resident Comm., Niue, W. M. Bell, C.B.E.

Ross Dependency.—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British settlement under the control of the Governor General of New Zealand.

Tokelau or Union Islands.—A group of atolls (population 1,048), transferred from Gilbert and Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samoa.

The Mandated Territories are:—

Western Samoa, consisting of the islands of Savai'i, Manono, Apolima, Upolu, Fiautapu, Nukunono, Nukunono, and Nukunono (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,133 square miles and a population at the Census of 1926 of 40,229. 35,880 were Samoans, 1,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The largest island, Upolu (703 square miles) and Upolu (430 square miles). Upolu contains the harbours of Apia and Sualafu, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Admiral* of the German Navy, H.M.S. *Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), cocoa, bananas and rubber are the chief products of the islands. The exports were valued in 1932 at £194,447 (copra £109,220), and the imports at £164,950.

Administrator, Brigadier-General H. E. Hart, C.B., C.M.G., D.S.O. & D.

NAURU ISLAND

Nauru Island, situated in longitude 166 degrees east, and 26 miles south of the Equator, was proclaimed German territory on Oct. 1, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919, the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April 1, 1932) of 2,316, of whom 141 are Europeans. There are valuable deposits of phosphates on the island, and in 1930 the exports of phosphates were 271,255 tons (valued at £270,091). The value of the imports in 1930 was £143,416.

Administrator, W. A. Newman (address, Nauru, Central Pacific).

The Union of South Africa.

AREA AND POPULATION.

Provinces	Area (English Sq Miles)	Census of 1921		European Population, 1931.
		European.	Total.	
Cape of Good Hope	276,966*	650,609	2,782,719	749,231
Natal	35,284	136,838	1,429,398	177,449
Transvaal	110,450	543,485	2,087,636	696,120

Union of South Africa . . .	472,347*	1,510,488	6,928,580	1,828,175
South-West Protectorate †	322,393	19,432	227,739	24,115

Of the European population of the Union, 1931, 930,541 were males, and 897,634 females. The increase in the European population of the Union (1926-31) was 9.0 per cent. For the Provinces it was as follows:—Cape, 6.0 per cent.; Natal, 11.7 per cent.; Transvaal, 14.4 per cent.; Orange Free State, 1.2 per cent.

* Includes Walvis Bay (430 sq. miles), which is administered by the Territory of S. W. Africa, but is an integral part of the Cape of Good Hope Province.

† 1926 figures.

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50' - 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwart Berg* and *Lange Berg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Rooi-geld* and *Nieuw-geld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Succurberg*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magabes* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooze Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensbergen* and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H. R. H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (*Cape Town and Pretoria*), The Right Honourable the Earl of

Trade Commissioner for the Union in East Africa, Adis Ababa, Col. Beresford Turner, C.M.G., D.S.O.
 Hon. Trade Commissioners are also established at Rotterdam, Antwerp, Oslo, Genoa and Paris, and a Consul General at Lourenço Marques (D. Steyn).

THE LEGISLATURE.

The Senate consists of 40 members. For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred. Since 1921 the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section 24 of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their

official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The House of Assembly consists of 148 elected members, 58 of whom represent the Cape of Good Hope, 17 Natal, 55 Transvaal, and 18 the Orange Free State. Members of both Houses must be British subjects of European descent.

The Fifth Delimitation Commission, appointed in July, 1927, divided the country into the following constituencies: Cape of Good Hope, 58; Natal, 17; Transvaal, 55; Orange Free State, 18; and the present Government was elected on that basis. The Sixth Delimitation Commission is now functioning, and according to the results of the Census of 1931—Europeans only—will delimit the country according to the following constituencies: Cape of Good Hope 61, Natal 16, Transvaal 57, Orange Free State 16, a total of 150. The total number of seats contemplated by the South Africa Act, §§ 32-33, is thus reached, and the members assigned to each province will henceforth be based on a Union quota of European on all adults. The female franchise which was introduced under the provisions of Act No. 18 of 1930 is not utilised in the determination of the quota.

President of the Senate, Sen. the Hon.

C. A. van Niekerk £1,200

Speaker of the House of Assembly, Hon.

J. H. H. De Waal 2,000

LOCAL GOVERNMENT

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising—

(1) *The South Africa Permanent Force*; (2) *The Coast Garrison Force*, (3) *The Citizen Force*, (4) *The South African Division of the Royal Naval Volunteer Reserve*, and (5) *Special Reserves*.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and

other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

EDUCATION.

In the South Africa Act, Section 85 (iii), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows.—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*: (a) Education provided by universities and university colleges incorporated by law; (b) education provided by the South African Native College; (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (e) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I Universities and university colleges comprising the following—

1. *University of South Africa*, with the following constituent colleges—

Potchefstroom University College Potchefstroom

Grey University College, Bloemfontein
 Rhodes University College, Grahamstown.
 Huguenot University College, Wellington,
 C.P.

Natal University College, Pietermaritzburg.

2. *University of Capetown.*

3. *University of Stellenbosch.*

4. *University of the Witwatersrand.*

5. *University of Pretoria.*

II Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein.

III. Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1931 was 7,049. The State expenditure on higher education as above defined during the financial year 1931-32 was £794,465.

Primary Education and Education other than Higher Education.—The central direction of

public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State-schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State-schools. In all Provinces primary education is free.

Number of State and State-aided Schools in the Union in 1931—For European scholars, 4,887, for Non-European scholars, 4,044, total 8,931.

Number of Scholars and Teachers on Nov. 3, 1931—European scholars, 358,021; Non-European scholars, 399,360, total, 757,381. Teachers—In European Schools, 15,724; in Non-European Schools, 10,123.

State Expenditure on Education in 1931—Cape, £3,464,876; Natal, £759,653; Transvaal, £2,795,650. Orange Free State, £911,926, total, £7,932,145.

Private Schools in 1930—European, 264; Non-European, 474; total, 738.

Number of Scholars—European, 20,652; Non-European, 20,800, total, 41,452.

Number of Teachers—European, 1,194; Non-European, 595, total, 1,792.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent-General of Education, Cape, Prof. M. C. Botha, M.A.

Supt. of Education, Natal, F. D. Hugo, B.A.

Director of Education, Transvaal, S. P. E. Bashoff, M.A., D. Litt.

Director of Education, Orange Free State, S. H. Pellissier, B.A.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1931, are stated as under—

Year.	Revenue	Expenditure
	£	£
1926-1927	28,577,003	21,850,419
1927-1928	30,094,024	22,840,768
1928-1929	30,501,650	23,180,076
1929-1930	30,486,458	24,414,770
1930-1931	28,563,005	24,249,060

DEBT

The Funded Debt of the Union at March 31, 1931, was £243,539,687 and the Floating Debt £13,305,413.

PROVINCIAL FINANCE.

Since their establishment in 1920 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1925,

the sources of revenue available to the Provinces are—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for six years ended March 31, 1931, were as follows—

Financial Year	Revenue transferred or assigned	Subsidies	Total Ordinary Revenue	Total Ordinary Expenditure
	£	£	£	£
1925-26	4,349,768	5,300,776	9,650,544	9,499,183
1926-27	4,460,171	5,171,178	9,631,349	9,948,058
1927-28	4,850,546	5,122,840	9,973,386	10,549,670
1928-29	5,186,622	5,149,119	10,335,741	10,786,812
1929-30	5,234,805	5,243,032	10,477,837	11,344,925

Manufactures—The development of local industries has been most marked during the last three years, the scarcity of overseas supplies with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1927-28 was £60,123,111 sterling, 1928-29, £70,934,098, 1929-30, £98,913,844, 1930-31, £98,307,910; 1921-22, £79,446,299; 1922-23, £74,476,292; 1923-24, £79,789,348; 1924-25, £84,159,604; 1925-26, £91,536,926; 1926-27, £97,878,822; 1927-28, £106,981,697; 1928-29, £123,440,757, and 1929-30, £112,178,613. Amongst the new industries which have been established during the period of the War may be mentioned the following—Wattle extract, industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia, bottling; starch from maize, iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c.

Mines and Minerals—Gold mining still continues the chief source of the country's mineral wealth. At the outbreak of war the diamond

mines closed down. The value of the output of the principal minerals of the Union in 1931 was—

	£		£
Gold ..	46,205 858	Silver ..	69,760
Diamonds ..	4,182,523	Asbestos ..	246,583
Coal ..	3,032,800	Osmidium ..	63,174
Copper ..	387 505	Corundum ..	10,357
Tin ..	47,752	Platinum ..	277,807

The mineral production for the Union of South Africa was as follows—

	Gold	
1921*	8,128,710 fine oz.	£43,082,162
1922*	7,009,858	32,343,485
1923*	9,149,073	41,574,945
1924*	9,575 040	44,739,377
1925	9 597,592	40,767,981
1926	9,954,762	42,285,139
1927	10,122,491	44,997,608
1928	10,354,264	43,982,119
1929	10,412,326	44,228,748
1930	10,716,351	45,520,166
1931	10 877,777	46,205,858

The labour employed in the gold industry in December, 1931, Transvaal, was 23,827 Europeans and 222,526 coloured

	Diamonds	
1922 ...	669,559 metric carats	£2,266,631
1923 ..	2,053,095	6,032,207
1924 ..	2,440,398	8,033,406
1925	2,430,128	8,198,128
1926	3,217,967	10,682,597
1927	4,708,038	12,392,308
1928	4,372,857	16,677,772
1929	3,661,212	10,590,113
1930	3,163,591	8,349,719
1931	2,119,156	4,182,523

The average labour employed in diamond mining, including individual diamond digging, was in 1931: Transvaal, 4,600 Europeans, 26,633 coloured; Cape, 2,951 Europeans, 9,288 coloured; O.F.S., 476 Europeans, 2,454 coloured, a total of 8,027 Europeans and 38,375 coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1918, one-half being owned by residents in U.S.A.

	Coal (Tons of 2,000 lb.)	
Transvaal ..	7,004 448 tons	£1,721,853
Cape ..	4,601	3,008
O.F.S. ..	1,129,880	317,961
Natal ..	3,500,319	993,978
Totals ..	11,639,748	£3,032,800

The average labour employed in coal mining in 1931 was Natal 516 Europeans, 11,722 coloured; Transvaal 781 Europeans 11,845 coloured; Cape, 8 Europeans, 93 coloured; O.F.S., 145 Europeans, 2,457 coloured, a total of 1,450 Europeans and 26,127 coloured

Silver.
 There are no silver mines in the Union. The output, valued at £60 66 in 1931, represents silver contained in gold bullion and base metal ores

Copper
 (Tons of 2,000 lb.)
 In 1931, 11,271 tons of concentrates were produced in the Transvaal, and 2,594 tons in the Cape Province. The total shipments of copper during the year amounted to 16,396 tons, valued at £387,505.

* Premium included—1920, 1921, 1922, 1923, 1924—£10 950 842, £8 553,598, £2,567,502, £2,712,151 and £4,667,121 respectively

Tin

(Tons of 2,000 lb.)

The Union figures for 1931 are 68½ tons, valued at £47 75s

Other Minerals

The value of the total mineral production of the Union for 1931 was £54,894,888. The value of miscellaneous products quarry products, £88,935; lead, £518; magnesite, £2,598; graphite, £1,350

EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1927-1931 (exclusive of silver and copper specie) was as follows. Note amended figures (exports) include Gold Specie.—

Year	Imports	Exports	Total Trade.
	£	£	£
1927	74,123,587	95,355,152	170,478,739
1928	79,106,083	96,460,170	175,566,253
1929	83,450,597	97,757,434	181,208,031
1930	64,568,447	83,409,477	147,977,924

COMMUNICATIONS

Railways—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, which started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1931, was 13,048 miles (comprising Cape 5,177, Orange Free State 2,633, Transvaal 3,281, Natal 1,495, and South-West Africa 1,462), of which 12,152 miles are 3 ft. 6 in. gauge and 896 miles a ft. gauge.

The capital expenditure on Government railways up to March 31, 1932, amounted to £147,885,175. The gross earnings for the year ending March 31, 1932, were £22,039,659, and the net deficit, after payment of interest, £1,222,386. Working expenditure (excluding depreciation) amounted to £15,627,753, or 70.90 per cent of the gross revenue, as compared with £17,420,455, or 71.63 per cent of the gross revenue for the previous year. The Cape to Cairo Railway, projected by Cecil Rhodes, had advanced to Bulawayo by 1902, 1,362 miles from Cape Town and 3,600 miles from Cairo. Through communication by rail is now available from Cape Town to Port Francqui in the lower Congo, 3,300 miles, all 3' 6" gauge. The Trans-Zambesi Railway, from Dondo (on the Beira Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1932, there were 3,162 post and 2,942 telegraph offices open in the Union. During the year 1931-32 330,353,000 articles of mail matter, including 3,554,000 registered articles, addressed to places within and without the Union, were handled. An Air Mail service in conjunction with incoming and outgoing European mails operates between Capetown and Port Elizabeth, with branches to Durban and Johannesburg (Rand Airport). A direct Air Mail service—once weekly—operates between South Africa (Capetown) and England (Croydon) via Rhodesia-Tanganika, Kenya, Sudan, Egypt, Greece and France. The number of money orders issued was 644,905, valued at £3,146,690, while 528,406 orders, value £2,216,918, were paid. 4,083,150 postal orders were issued, and 3,728,212 postal orders paid. The number of depositors in the Savings Bank was 462,342, with £6,760,508 standing to their credit. 4,961,465 inland telegrams (including press messages) were received and despatched during the year. 26,652 miles of telegraph wire were in use. There are 5 wireless telegraph stations in the Union, which during the year received from and transmitted to ships 14,466 messages, in respect of which £5,235 accrued to the revenue of the Department. The telephone system consists of 438,646 miles of wire, with 104,122 telephone instruments in the service of 77,729 subscribers, by whom approximately 17½ million (inclusive of 10½ million trunk) calls were made through departmental telephone exchanges. The combined cash revenue from Posts, Telegraphs and Telephones was £4,359,991, comprising Postal £2,331,076, Telegraphs £499,277, and Telephones £1,559,638. The combined cash expenditure totalled £3,089,141.

Shipping.—In 1931, 4,755 vessels (15,009,288 tons) entered, and 4,756 vessels (15,007,585 tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD.

Chairman, Hon. C. W. Malau, M.P., Minister of Railways and Harbours.

Members, A. Kuit, R. B. Waterston, and D. Hugo.

Secretary, W. Heckroodt.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.

(*Suidwes-Afrika*.)

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Albertus Johannes Werth.

Secretary, H. P. Smit.

SOUTH-WEST AFRICA lies between 8. lat 19° 23' and the Orange River, with a narrow strip between 18° 18' 30" S lat extending from 21° to 25° E long, known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 322,393 square miles, and the population (1932) is approximately 275,900, of whom approximately 32,000 are Europeans. The estimated native population (1932) is distributed as follows: Territory proper, 100,600; Ovamboland, 117,000; Kaokoveld, 4,300; Okavango, 14,000; Caprivi Zipfel (eastern portion only) 8,000. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western lee of the great Kalahari Plateau. The boundaries are the Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Tughrabes Falls*, twice the height of Niagara.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaas, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards, and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovambos, the only Europeans are those allowed in under permit for the purpose of prospecting for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The territory is divided into 27 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No 42 of 1925 provides for a Legislative Assembly consisting of 22 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(a) Native affairs or any matters specially

affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives

(b) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(c) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration;

(d) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons;

(e) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(f) The administration, management and working of the postal, telegraph and telephone services;

(g) The establishment or control of any military organization in the territory;

(h) The movements or operations of any unit of the South African Defence Forces within the territory;

(i) The entry of immigrants into the territory or of other persons;

(j) Tariffs of customs and excise duties and the control and management of customs and excise;

(k) Currency and banking and the control of banking institutions

The following matters are reserved for a period of three years,* after which period the Assembly may by resolution assume control thereof:—

(a) The establishment or control of any police force in the territory;

(b) Civil aviation;

(c) Primary or secondary education in schools supported or aided from the revenues of the territory;

(d) The establishment, management or control of any land or agricultural bank in the territory;

(e) The allotment, sale, lease or disposal of Government lands in the territory.

In regard to finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 343 miles), comprises Union Lines 398 miles, S.W. Territory Lines 1,462 miles and privately owned Lines 74 miles, a total of 1,934 miles

The Capital of the Protectorate is Windhoek, which lies practically in the centre of the country at 5,500 ft above sea-level (Urban white population, 1926, 3,809). Other inland towns are Keetmanshoop (Urban white population, 1926, 1,159), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Maltahöhe. The ports are Walvis Bay (Urban white population 1926, 662) and Luderitz Bay (Urban white population, 1926, 1,234).

* The period of 3 years has expired, but a resolution for the extension of powers has not yet (October, 1929) been passed by two-thirds majority of the members of the Assembly as required by the Constitution Act

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE

The Province of the Cape of Good Hope reaches in S lat from 26° to 34° 50', and in E long. from 16° 25' to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles

Area and Population

	84 miles	Pop. 1926 (European only)	Pop. 1901

Education—Local School Administration is conducted by school boards and school committees, the unit of administration being the school district. The Province is divided into 111 school districts, each under the control of a School Board, a portion of the members being

elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the age of 15 being free.

State and Aided Schools, Nov. 3, 1931, 2,385 European and 2,377 non European. There are 147,949 European pupils and 220,602 non-European. Total number of teachers 12,125 (6,485 in European schools and 5,640 in non-European schools).

Hospitals.—The daily average number in all hospitals (1930) was 1,776, ordinary revenue £161,661, ordinary expenditure £329,748. Government grants in aid £166,445.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 58 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is (Chairman of the Committee.

Local Government.—There are 128 municipalities, each governed by a Mayor or (Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 92 Divisional Councils and 86 Village Management Boards and 20 Local Boards.

Administrator, Hon J. H. Conradie . £2,500
Executive Committee, J. I. Mann P. J. Du Plessis, A. B. Cunningham, B. Muller

Prov. Sec., A. S. Weisbecker
Superintendent-General of Education, M. C. Botha, M.A.

Professional Assistant, W. de V. Malan, Ph.D.
Secretary, P. A. Millard

Capital, CAPE TOWN. Total population (1931), European (with suburbs), 150,914.

Cape Town is 5,979 miles from Southampton, transit, 16 days.

NATAL

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1931 the European population was 177,449 (males 90,253, females 87,196).

In 1900 the European births registered numbered 3,341, death 658, and marriages 1,454. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg which is affiliated to the University of South Africa. It has a constituent college at Durban with faculties of engineering, fine arts, and commerce. There are in the Province (1931) 444 primary schools and 28 beyond primary schools for European children, also a technical colleges, 1 physical culture school, 3 night continuation classes, and 1 training school for European teachers. In addition there are 83 Asiatic schools, 683 native schools, 23 other coloured schools, and 10 training colleges for native and Asiatic teachers. These are maintained or aided by Government. There is also a large number of private schools.

Administration.—The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon H. Gordon Watson, I.S.O.
Executive Committee, F. C. Hollander; Capt. G. M. Botha; J. Macaulay; T. N. Wadley.

Provincial Secretary, A. E. Chaiter, O.B.E.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (European and coloured), 36,023 in 1921. The 1931 Census figures for the European population of Pietermaritzburg are 21,581.

In Durban (population, 1921, 153,855, 1926, 72,928, for 1931 European population of Durban was 86,228), or Port Natal, is the only harbour of any importance on the south east coast. The entrance is now safe and navigable for any vessel at any time, the average low-water depth at the entrance, LOWEST, the bar being no longer existent, for 1927 being 37 feet.

Natal, 6,800 miles, transit, 20 days.

ZULULAND

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River, on the south-east by the Indian Ocean, on the north by the Portuguese possessions, and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amputaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Duthels* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietrsburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL

In 1931 the European population numbered 696,120 (males 357,504 females 338,616).

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 1,087,636, of whom 1,159,430 were males and 928,206 females. In 1930 there were 19,108 European births, 6,667 European deaths, and 6,912 European marriages.

Religion.—The religious statistics for 1921 are—

Churches	Europeans	Others
Dutch Churches	287,630	49,578
Anglican	98,849	94,543
Presbyterian	31,715	12,407
Methodists	37,921	143,441
Roman Catholics	23,419	14,490
Lutherans	4,583	136,335
Other Christians	19,544	64,437
Jews	33,515	4
Hindus, &c.	1,804	15,499
No Religion	4,507	1,023,417

On Nov. 3, 1931, there were 1,226 European and 641 non-European State and State-aided Schools in the Transvaal. The enrolment was 135,703 and 81,569; and the number of teachers 5,498 and 1,810 respectively.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 55 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. J. S. Smits.

Executive Committee, S. P. Bekker; J. F. Brown, C.M.G.; F. W. R. Robertson; I. J. van Heerden.

Provincial Secretary, C. E. Viljoen, B.A.

Asst. do., C. H. Sheard, B.A.

Director of Education, S. P. E. Boshoff, M.A., D.Litt.

Sec. to the Education Dept., F. S. Malan, B.A.

The Capital is PRETORIA, pop. 1931, European 62,138. Pretoria, which is also the seat of the Union Government, is pleasantly situated on the Aples River, and has wide, shady streets and magnificent buildings. The principal town is JOHANNESBURG, 5,500 feet above sea-level, about 35 miles S.W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and non-ferrous metals. The population in 1931 was (European) 203,298.

Pretoria is distant from London 7,200 miles, transit, via Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided

into 33 districts. The population at the last six censuses was:—

Year	White	Coloured	Total
1904	142,679	244,636	387,315
1911	175,189	352,985	528,174
1918	181,678
1921	188,556	440,271	628,827
1926	202,985
1931	205,375

In 1931, of the European, 104,738 are males and 100,637 females.

The number of European births registered in 1930 was 5,317, deaths 1,674, and marriages 1,709.

Religion.—Europeans only (1926 Census).—

Dutch Churches	163,504	Lutherans	893
Anglican	13,235	Roman Catholics	2,516
Presbyterian	3,945	Jews	5,753
Congregational	116	Other	5,545
Methodists	7,478		

Education.—In 1931 there were 802 European and 227 non-European State and State-aided Schools in the Orange Free State Province. The enrolment was 45,272 and 26,591 respectively, and the number of teachers 2,067 and 590.

Administration.—The government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. C. T. M. Willcocks.
Executive Committee, J. A. D. Seifontein; H. J. Odendaal; C. T. van Schalkwyk, jr.; J. C. Buys.

Provincial Secretary, R. A. Gregorowski.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 28,503 Europeans in 1931. The city is an important railway centre, is developing rapidly, and continues to hold its place as one of the foremost cities in the Union. Many fine buildings have been erected, and a new Town Hall (costing £220,000) will be erected very shortly.

Bloemfontein is distant from London 6,300 miles, transit, via Capetown, 19 days.

GOLD PRODUCTION

The Annual Production of Gold, for the 25 years 1905-1930, is stated below from figures issued by the Bureau of the Mint, Washington, D.C., U.S.A. In 1930 the chief producing countries were Union of South Africa, \$221,526,636; United States, \$43,419,018; Dominion of Canada, \$43,557,064; Russia, \$20,671,835; Mexico, \$13,860,217; Australia and New Zealand, \$9,553,776; Southern Rhodesia, \$11,320,517.

Year	Fine Oz.	Value	Year	Fine Oz.	Value
1905	18,396,451	\$380,288,300	1918	18,614,039	384,786,306

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 19 square miles, with a population (1931) of 27,789 (11,353 white and 16,436 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members, appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or ordinary wells, and the inhabitants are normally dependent on the rainfall stored and preserved in tanks, but a new system of horizontal wells has recently been successfully installed. Vegetation is prolific, the principal trees being the Bermuda cedar (guilpe), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to Canada. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S. and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Rjans, Papus or Negritos, Chinese, Bajans, Dusuns, Minuts and Buan (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time 1/11 more than two-thirds of the island is included within "Netherlands India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population (1931) is 270,223, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 9 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 4 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, coal, copra, cutch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior, where there is a branch from Beaufort to Weston (20 miles). There are five wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is an Armed Constabulary numbering 508 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI

Sultan, H.H. Ahmed Tajudin Akhazul Khalil
Waddin, suc. Sept. 1, 1924, Assumed full powers
(after minority) Sept. 19, 1931

A native State on the north-west coast of the
island of Borneo. The total area is about 2,500
square miles, the population being 30,135
(April, 1931), of whom 25,972 are Malays and
Bornean races. The territory was placed under
British protection in 1888, and on Jan. 2, 1906,
the Sultan accepted by treaty a British Resident
to assist and advise him in the administration.

* Exclusive of land sales.

The chief town, Brunei, has a population of
10,453. Native industries include fishing, cloth-
weaving, brass foundries, and silversmiths' work.
The chief imports are rice, cloth, tobacco,
sugar, petroleum, and sundries; the exports
are chiefly cutch (mangrove extract), rubber,
jelutong, and sago.

	1930	1931
Revenue	£38,858	£39,901
Expenditure	44,287	37,659

High Commissioner, The Governor of the
Straits Settlements

British Resident, Brunei, T. F. Carey, M.O.S.

Brunei is 5 hours by steamer from Labuan,
and is distant 758 miles from Singapore (transit
4 days). There are wireless stations at Brunei,
Labuan, Temburong, and Belait.

BRITISH GUIANA,

which includes the Counties of Demerara,
Essequibo, and Berbice, is situated on the north-
east coast of South America and has a total area
of 89,480 square miles, with a seaboard of more
than 300 miles. The population, Dec. 31, 1931,
was estimated at 131,619, of whom 131,519 were
East Indian immigrants. The birth-rate was
31.4, and the death-rate 21.8 per 1,000 of
the population. The colony is bounded on
the south by Brazil, on the east by Dutch
Guiana, on the west by Venezuela, and on the
north and N.E. by the Atlantic Ocean. The
climate, although hot, is pleasant and healthy.
The cultivated portion of the country, amount-
ing to about 180,366 acres (of which 61,097 acres
are in sugar-cane and 73,647 in rice), is con-
fined to the sea-coast and to a short distance
from the rivers. The coastland is very like
the Netherlands, being below the level of
the sea, and intersected with canals constructed
by its former Dutch owners. At the junction
of the boundaries of British Guiana and
Venezuela is Mt. Roraima, a flat-topped mountain
8,740 feet above sea level, and on the Potaro
River (a tributary of the Essequibo) are the
Kaitum Falls, with a clear drop of 741 feet
and a total fall of 822 feet. The seasons are
divided into dry and wet, the two dry seasons
lasting from the middle of February to the end of
April, and from the middle of August to the end of
November. The meteorological records taken
on the coast-lands during a period of 85 years
show, as regards temperature, that the climate
is a very equable one. The mean temperature
is 80.4°, its recorded extremes during this long
period ranging between 68° and 96°, but these
extreme temperatures are very rarely recorded,
the usual extremes during a year being 70° and
80°. In the interior the mean temperature is
higher—82.6°, its extremes ranging from 66° to
103°. The yearly rainfall is, on the contrary,
subject to marked variation, its mean on the
coast lands being 91.00 inches distributed over
192 days of the year, and its range from 52.7 to
135.2 inches per year. In the interior the
average recorded rainfall is 58.5 inches per
year, ranging from 45.2 to 80.4 inches per year.
The chief product is sugar, which forms 57 per
cent of the export trade. The leading exports
are sugar (£1,109,532 in 1931), rum, diamonds,
gold, timber, balata, bauxite, rice and copra.
There are about 9,000 aboriginal Indians; they

are occupied largely in fishing, hunting, and raising crops of cassava.

The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 28, 1928. The Legislative Council consists of the Governor as President of 20 Official Members and of 19 Unofficial Members Executive and administrative functions are exercised by the Governor and an Executive Council. There are 3,941 miles of post-office telephone wire, 1,430 of which are contained in 13 miles of aerial cable, in addition, there are 21½ miles of submarine cable and 384 of telegraph lines, with 73 post-offices and postal agencies. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29' 5" to 15° 53' 55" N latitude and 89° 9' 22" to 88° 10' W longitude. Its extreme

length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1931) of 51,347—25,524 males and 25,823 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a disastrous hurricane devastated the capital of the colony, with a loss of nearly 1,000 lives, a Mansion House and being raised for the sufferers. The country consists chiefly of primeval forest, with savannas and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coconuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasture. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 85 primary schools in the colony and 4 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1930 was 625,960 tons. There is a radio telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq miles) and *Hispaniola* (28,000 sq. miles), being Independent, Jamaica and its dependencies, British; and *Puerto Rico*, a dependency of the United States. II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,800 United States, 1,350 French, 430 Netherlands, and 60 Venezuelan. Trade Enquiry Office in London, The West India Committee, 14, Trinity Square, E.C. 3.

B. W. I. COMMISSION.

In 1932 a Commission was appointed by the Secretary of State for the Colonies to examine the possibilities of closer union between *Trinidad* and the *Windward Islands* and the *Leeward Islands*.

Chairman, Gen Sir Charles Ferguson, Bt, GCMG, KCB, DSO, MVO
Other Members, Maj Sir Charles Orr, KCMG; Sir Sidney Arncliffe-Smith, KBE, CB
Secretary, S. MacNeill Campbell

THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long, and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1929 of 60,648, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Bimini. Originally settled by Englishmen, the Bahamas were, in 1787, surprised by the Spanish but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1931 being valued at £83,762. Tomatoes are cultivated in large quantities for shipment to Canada and the

United States. Mahogany, lignum-vitæ, mastio, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

Nassau is distant from Liverpool 4,000 miles, transit, 14 to 22 days, *via* New York.

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4' N. and longitude 59° 37' W. It is nearly 22 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 126,322; estimated at 173,679 on Dec. 31, 1931. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison's College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1720. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop. 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

JAMAICA.*

aborighinally Xaymaca, or Land of Wood and Water—an island situated in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42'—18° 32' North lat and 76° 11'—78° 23' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973; females, 456,145), whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,666, not specified, 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south

shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 220 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages, the number of accounts open in the Govt. savings banks was 113,154 (1931). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and coconuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dyestuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members, the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 12 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707, the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580, and Port Antonio, 6,272. Chief exports (1931) bananas, £1,983,395, sugar, £378,503; coffee, £170,993; pimento, £108,668, cocoa, £50,937.

THE CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, between 79° 42' and 81° 26' W. and 19° 15' and 19° 46' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 200 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1931) 6,182. Shipbuilding and turtle-fishing are the principal industries.

The principal town is Georgetown, in Grand Cayman, population (1931) 1,500.
 Revenue, 1931, £6,210, expenditure, £7,290.
 Imports, 1931, £35,140, exports, £9,993.
Commissioner and Judge of the Grand Court, Lt.-Col. E. A. Weston, O.M.C. (with house and fees) £520

TURKS AND CAICOS ISLANDS

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568. Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

THE LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda, (2) St.

Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombrero, all, except the last, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate. There is a General Legislative Council of 10 official and 10 elective members, with the Governor as President, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,242 (estimated Dec. 31, 1931, at 128,000).

(1) ANTIGUA AND BARBUDA

Antigua is the seat of government and residence of the Governor-in-Chief of the Leeward Islands. It lies in 19° 6' N. lat and 61° 45' W. long, and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is planted on a small scale and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted. The population, with Barbuda (Census of 1921) was 29,767, estimated at 31,235 on Dec. 31, 1931.

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long 61° 48' W. Area, 62 square miles. Population, 900. The island is flat and is fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Warden, H. D. C. Moore (and quarters) £360
Redonda is uninhabited.

(2) ST KITTS-NEVIS WITH ANGUILLA

The islands of St Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (Dec 31, 1931) of 36,067 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St Kitts (population Dec 31, 1931, 18,446), the principal island, is the oldest colony in the West Indies, it is situated in lat 17° 18' N. and long 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Basseterre, is a port of registry.

Nevis (pop. 12,683) is separated from St Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coco-nuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Charles-town, is a port of entry.

Anguilla (population 4,794) is about 60 miles N.W. of St Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

(3) DOMINICA

the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are

under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, and fruit. The population was estimated at 43,098 on Dec 31, 1931; included in this total are 400 Caribs of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,042, and Portsmouth, population 3,069.

(4) MONTserrat

is situated in 16° 41' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1931) of 12,350. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles, it contains three active volcanoes and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports are cotton seed meal, cotton, cotton-seed oil, onions, limes and its products, sugar, tomatoes and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709. There is a wireless station in the island.

(G) THE VIRGIN ISLANDS.

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar cane and coco-nuts are grown; fishing and poultry-rearing are also carried on. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3'—10° 50' N. lat and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,862 square miles, and a population at the Census of 1931 (including Tobago) of 412,783, estimated at 414,572, on Dec. 31, 1931. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 70,641), is one of the finest towns in the West Indies with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 14,416), about 30 miles south of the capital, Princetown (pop. 5,089), and Arima (pop. 5,072). A remarkable phenomenon is the asphalt lake, 120 acres in extent, near the village of La Brea, from which (1931) 94,584 tons of asphalt (£226,597) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1931) were petroleum £1,949,455, cocoa £957,837, and sugar £502,993. On Dec. 31, 1931 there were 14 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being £84,547. Coal, iron, graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1931, there were 200 Elementary and Intermediate Schools, 44 being Government and 246 Assisted, Trinidad having 254 and Tobago 26, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 118 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

	1930.	1931.
Revenue	£1,860,731	£1,641,444

Tobago lies between 11° 8' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S. S. W. of Barbados. The island is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population estimated (1931) at 25,468. It is one of the healthiest of the West Indies, the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 833) and Plymouth (pop. 387).

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total

area is 508 square miles, with a population (1921) of 166,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir

Thomas Alexander Vaux Beut, K.C.M.G.,

K.B.E. (1930) £3,000

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of 12° 30'–11° 58' N. lat. and 61° 20'–61° 25' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 66 miles north of Trinidad, 68 miles S.E.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres, population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carracou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA

the largest and most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 59' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 233 square miles with a population (Dec. 31, 1921) of 59,676. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the

French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1931) are sugar, cocoa, coco-nuts, copra, lime, lime-juice, lime-oil, charcoal, bay rum, molasses, syrup, and fruit. The chief places are Castries, the capital (pop. 1921 5,899), and Soufrière (pop. 1921 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1931, 268 steamers (tonnage 707,964) entered Port Castries

ST. VINCENT

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 59' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1931) of 47,961. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAMEROONS.

(Cameroons under British Mandate)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914–18.

The approximate geographical limits of the German territory were 2°–12° 30' N. lat. and 8° 30'–16° E. long. and the area was about 87,596 square miles. By the Milner-Banion Agreement of July 10, 1919, the whole area was divided into a British sphere and a French sphere, and in 1922 the territories were placed by the League of

* Includes Imperial Grants of £6 1/2 and £2,400.

† Incl. £5,120 Colonial Development Fund.
†† Do. £1,600 do do

Nations under British and French Mandates. The Cameroons under British Mandate marches the whole distance of the Nigerian Eastern boundary, save for one short break. The total area is 34,336 square miles, and the population is 774,585.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4°-12° 30' N. lat. and 8° 30'-14° 45' E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922. The mandated territory is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa and Bornu, the Southern section forms a separate Province, known as the *Cameroons Province*, with headquarters at Buea on the slopes of the Cameroon Mountain. Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province, are mostly primitive hillmen whose chief occupation is agriculture.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. The chief exports of the Province are cocoa, palm oil and kernels, rubber and bananas (fresh and dried), the banana industry being recently established with marked success; the chief imports are textiles, salt, iron-ware, dried fish and other provisions, motor spirit and tobacco.

The ports are Victoria and Tiko, and are connected with Buea by motor road. 118 ships (203,744 tons) arrived in Victoria in 1931 and 102 ships (70,329 tons) entered Tiko.

CEYLON.

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55'-9° 50' N. lat. and 79° 41'-81° 53' E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1931) was 5,322,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and

annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1931, in acres, were.—Rice, 1,000,000; other grain, 105,000; tea, 400,000; coconuts, 1,000,000; rubber, 500,000; cinnamon, 26,000; cacao, 34,000; citronella, 23,000, and tobacco, 14,000. The live stock in 1931 included 1,580,000 horned cattle, 65,000 sheep, 194,000 goats, 41,000 pigs, and 1,100 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c., and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 95½ miles of railway open, 834 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 843 post offices, 401 money order offices, and 260 telegraph offices, with 13,025 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by a *State Council* consisting, at its full strength, of 50 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees: (1) Home Affairs, (2) Agriculture and Lands, (3) Local Administration, (4) Health, (5) Labour, Industry and Commerce, (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards, and in the country districts the Ceylonee retain their village councils and tribunals for matters of minor importance.

The MALDIVES ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut oil, and tortoiseshell.
Colombo, distant from London (overland) 5,868 miles, transit 17 days.

THE CHANNEL ISLANDS.
situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,662 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 47,083 acres, or 73 4 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,666 (Guernsey 40,470, Alderney 1,506, Sark 575, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1926 was 49,678 vergées (2½ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and oats, fruits tomatoes and flowers. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands possess a very large trade, the principal imports being coal and coke, and the chief exports being potatoes, tomatoes, flowers, and stone and granite. The chief town of Jersey is St. Helier, on the south side, the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 32° 20' and 34° 33'. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 128 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1931 was 347,959, of whom about 18 per cent were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra gypsum, salt, pyrites, and chrome. In 1931 the wine export was 1,014,513 gals., and that of spirits 8,955 gals., the wine going to Egypt, the U.K., Malta, Syria, and the Dodecanese, and spirits to Egypt, Syria and Castellorizo. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. From March 10, 1925, until Nov. 12, 1931, the Government was administered by a Governor, aided by an Executive and Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances which occurred in the island during the autumn of 1931, the clauses (in the Letters Patent of March, 1925) dealing with the constitution of the Legislative Council were revoked, power to legislate being vested in the Governor pending a review of the constitutional future of the island.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided

into three judicial districts. The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges' courts. In all the courts Cypriot judges (Christian and Moslem) take part. There are also 3 Mussulman religious tribunals, styled *Sheri Courts*, and a *Sheri Tribunal of Appeal*.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 23,507 in 1931; the other principal towns are Larnaca (population 11,725), Limassol (15,065), Famagusta (8,771), Kyrenia (2,049), Paphos (4,067), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and there are 37 miles of railway, and 71 miles of motor road services. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Istanbul, Greece, France and Italy.

FAULKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between $51^{\circ} 15' - 53^{\circ}$ S. lat. and $57^{\circ} 40' - 62^{\circ}$ W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec 8, 1914, a British squadron under Adm. Sir Doveton Starke defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50° , and in summer from 40° to 65° Fahrenheit. The islands are chiefly bog-land, and have proved suitable for sheep, 606,882 being carried in 1930; the output of wool is about four million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief exports are wool, tallow, hides and sheepskins, seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 3 official and 1 unofficial members, and a Legislative Council, of 4 official and 2 unofficial members.

CHIEF TOWN, Port Stanley. Population (1931),
1,213.

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3,000,000 square miles. South Georgia, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is the only part of

* Colony only

the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina $3\frac{1}{2}$ years later. The other dependencies, of which the principal units are the *South Sandwich Islands*, and a part of the *Antarctic*, or *South Polar*, continent known as *Graham's Land*, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1930 amounted to £84,547. The local expenditure was £21,597, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at £3,726,175, and the imports at £1,999,829 in 1930. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Fifteen companies (3 British, 12 Norwegian) caught 10,725 whales in the 1929-30 season, the landed value of the oil being £3,166,450.

In 1928 a claim was made by Norway to *Thomson and Bouvet Islands* in the Antarctic and by Argentina to the *South Orkneys*; these claims were not admitted by the British Government, but Bouvet Island was ceded to Norway in November, 1928, as an act of grace.

Port Stanley is distant about 8,130 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless telegraphy and Monte Video and via Bergen.

FEDERATED MALAY STATES

(See MALAYA).

FILIP

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,500 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between $15^{\circ} 45' - 21^{\circ} 10'$ S. lat. and $176^{\circ} \text{E} - 178^{\circ} \text{W}$ long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans, the average temperature in the shade in the cool season is 72° , rising to 84° in the hot season, extremes lying between 60° and 94° . Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro).

* The total number of whales caught in the world in 1905 was 4,522. In 1920 it was 22,000 (oil production 284,320 barrels); in 1927-8 the catch was 37,674 (oil production 2,799,022 barrels).

ooco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and béche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the chiefs under the Governor's supervision. The estimated population (Dec. 31, 1931) was 185,573 (93,414 native Fijians, 76,772 Indians, 5,058 Europeans, and some Polynesians and others).

	1930	1931

Suva is 11,000 miles from London; transit from London, *via* Vancouver or San Francisco, about 30 days; and *via* Sydney, about 50 days.

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of

the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,122 sq. miles. The population of the Island of St. Mary, at the Census of April 11, 1931, was 14,370, and that of the Protectorate 185,150. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports; they are sent chiefly to France, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, hardware, sugar, tea, wine, and tobacco. A Company of the R.W.A.F.F. (3 officers and 135 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force (numbering 148 officers and men), which performs both civil and military duties. There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 4 official members (besides the Governor) and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

	1930	1931
Public revenue	£216,739	£184,325
Public expenditure	253,228	227,487

Auditor, A. G. Still £600 to 720
 Bathurst is distant from London 2,600 miles, transit about 10 days.

GIBRALTAR,

a rocky promontory, $2\frac{1}{4}$ miles in length and $\frac{1}{4}$ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1931 3,509 vessels (including 63 tourist steamers) entered, with a total tonnage of 6,900,700. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfume. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1931) was 15,428.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

Revenue	1930. £146,847	1931. £151,415
Expenditure	169,182	178,935
Governor and Command-in-Chief, His Excellency General Sir A. J. Godley, G.C.B., K.C.M.G., (with £500 entertainment allowance and £500 from Army funds)		£5,500

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 'W. to 1° '4' E. of Greenwich. It is divided into three parts—Gold Coast Colony, 23,937 sq. miles; Ashanti, 24,379 sq. miles, and the Northern Territories, 30,486 sq. miles—a total area of 78,802 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 12° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland. The population (April 1931) was: Gold Coast Colony, 1,573,770; Ashanti, 578,702; Northern Territories, 717,384; total, 2,869,854, excluding 3,139 Non-Africans. The natives are almost all Pagans, but there are many Urahimadians, and the number of Christians is steadily increasing.

The trade in 1931 was principally with the United Kingdom (51 per cent.), U.S. (15), Germany (11), Netherlands (11) and France (5 per cent.). Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony. The principal exports in 1931 were: cocoa, £5,493,165; gold and gold dust, £1,069,581; manganese £388,963; and diamonds, £440,924. The chief imports are apparel, building materials, cotton goods, provisions, kerosene, hardware, motor spirit, motor cars and motor lorries, beer, ale, stout and porter, sugar, tobacco and cigarettes. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achumta, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba and Tamale are lighted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast, Winneba and Tamale, similar supply is being installed for Kumasi, 4,713 miles of telegraph land wire and 7,921 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 3,633 miles of underground and overhead line wire. There is a wireless station at Takoradi. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (366 miles), with branches (590 miles in all). In 1928 a harbour was opened at Takoradi.

The seat of government is Accra (population 39,895). The other principal towns are: Cape Coast (17,585), Aida (4,450), Elmina (4,797), Sekondi (16,742), Tarkwa (3,321), Keta (6,392), Axim (4,533), Kumasi (36,200), Saltpond (6,369), Koforidua (19,634) and Winneba (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

Total revenue	1930-31	1931-32
Expenditure	4,653,605	5,181,964
Public Debt (Mch. 31, 1932)	4,898,198	3,781,417
	11,791,000	12,561,000

Director of Education, (vacant)	1,200
Conservator of Forests, Capt. R. W. Brent, M.C. (acting)	1,200
Dir. of Agriculture, G. G. Auchinleck, M.Sc.	1,200
Director of Geological Survey, Maj. N. R. Junner, M.C.	1,200

ASHANTI.

Ashanti was placed under British protection on Aug. 27, 1866. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast Colony being appointed Governor of Ashanti, though only some of the laws and ordinances of the Gold Coast Colony apply to the annexed territory. The area is 24,379 square miles, with a population (census of 1931) of 578,702 (Europeans 447). Kumasi, the chief town, has about 36,284 inhabitants. In 1931 there were 1,253 children in the Government schools, and 3,906 in the mission schools; 41 students were in residence (1931-32) at the Agricultural and Forestry Training centre. Police force (1931-32) 256; prosecutions (1931-32) 3,922, but there is little serious crime. There are 1,284 miles of motor roads. Agriculture is extending; large areas are under cacao, and coffee and cola are also cultivated. In 1931-32 the export by rail of cacao was 63,192 tons, and the gold output £739,654 (174,118 oz.). In the western parts of the colony are rich forests of mahogany, cedar, &c., and trees yielding oil, kola and rubber. Practically the whole of Ashanti is now connected by motor road with Kumasi and with the main trade routes to the north. The country is well watered, and with proper restraint it could contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, ground-nuts, and cacao, the plantations of which are rapidly extending.

Chief Commissioner (vacant) £1,600
 Asst. Chief Commissioner, F. W. Apple-gate 1,200

Circuit Judge (Ashanti and Northern Territories) C. M. Barton 1,200

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. By the census taken in 1931 the population was 717,365. The Muhammadans have substantial mosques; there is a White Father's mission in the north of the Protectorate and an American Protestant mission and a Roman Catholic mission in the Mandated Territory. Government schools have been established at Tamale, Gambaga, Salaga, and Wa. There are 2,158 miles of permanent motorable roads. The Northern Territories are capable of producing various agricultural crops (cereals, Shea-butter, ground-nuts, indigo, tobacco), also cattle, sheep and goats, and are said to contain wide auriferous areas.

Chief Commissioner, Maj. F. W. F. Jackson, C.M.G., D.S.O. £1,600
 Assistant Chief Commissioner, A. C. Dunn-can Johnston 1,200

Accra is distant from Liverpool, 3,920 miles, transit, 14 to 30 days.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the

mainland, situated off the south-eastern coast of China, at the mouth of the Canton River, in $22^{\circ} 9' N.$ lat and $113^{\circ} 52' - 114^{\circ} 30' E.$ long, and bounded on the N. by the Shum Chun River.

Hong Kong is an island about 21 miles long and from 2 to 5 miles broad, with a total area of 32 square miles. It lies close to the mainland, being separated at one point by a narrow strait (Lyce-moon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842. British Kowloon was subsequently acquired by the Peking Convention of 1860, and the New Territories, being a peninsula in the southern part of the Kwantung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 392 square miles, with a population (Census, 1931) of 840,473. The non-Chinese residents, excluding naval and military, numbered 19,369.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor, tobacco and motor spirit the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1930) 21,095,306 tons, (1931) 22,075,010 tons. A railway, of which $22\frac{1}{4}$ miles belong to the Government, runs from Kowloon to Canton; the length north of the Shum Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,809 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 86 in., of which no less than 75 per cent falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1931 there were 1,072 schools subject to Government supervision, attended by 69,593 pupils. The University (opened in 1922) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

CAPITAL, Victoria; population (1930), 356,351.

	1930	1931
Public revenue	\$27,818,473	\$33,146,724

Hong Kong, 9,834 miles, *via* Suez (annual); transit, 29 days, or *via* Siberia, 18 to 23 days

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N.$ and long. $4^{\circ} 18' - 4^{\circ} 47' W.$, nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1931) of 49,308 (22,459 males, 26,849 females). In 1931 the births numbered 679 and the deaths 743. The cultivated area (1932) was 80,785 acres, and the live stock included 3,564 horses, 20,169 cattle, 101,995 sheep, and 4,379 pigs. The Island's main industry is catering for holiday makers (numbering about 500,000 in the year) from all parts of the British Isles.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Forty-seven miles of railway have been constructed, and about 25 miles of electric tram road.

Government, etc.—In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 890 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £427,144.

Man is now governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keuse*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six *sheadings*, 5 from Douglas, and 2 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1922 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War. The chief source of revenue is found in the customs duties, the only direct taxation being income tax, which ranges from 1s. for incomes under

£500 to 3s. 6d. for incomes over £5,000. There are 38 elementary and 4 secondary schools in addition to King William's College; the gross expenditure on elementary education in 1931-32 was £68,491 and on higher education £27,742.

CAPITAL, Douglas. Pop. (1931), 19,265 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

	1920-30	1930-31	1931-32
Public revenue	£407,187	£405,036	£401,381

JAMAICA.

(See BRITISH WEST INDIES.)

KENYA.

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925, and on the north by an agreement with Ethiopia in 1908. On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zulu (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate. On the south Kenya adjoins the mandated Tanganyika Territory. Kenya Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. The total area is 224,960 sq. miles and the population is estimated at 3,040,940 (Europeans 16,812, Indians 39,644, Goans 3,959, Arabs 12,166, Africans 2,966,993, and others 1,366).

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 9 provinces, which are subdivided into districts, those most suitable for settlement by Europeans being Kyambu, North Nyeri, Laikipia, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans-Nzoia. There is also a considerable region still undeveloped.

The telegraph and telephone systems of Kenya have 13,919 miles of wire. Telegraph lines connect Mombasa with Lamu and Witu, Mombasa with Gazi and Tanganyika Border along the coast and inland between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Meru, Isolo, Narok, Rumuruti, Kericho, Chemagel Songhor, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endeless, Kiumi and Moiben. Communication between Mombasa and ships at sea and Italian Somaliland is maintained by radio-telegraphy. A short-wave wireless station (owned and maintained under licence from Government) is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain

Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned, the railway, which is metre gauge, has a total route mileage of open lines of 1,628 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 886 miles; *Principal Lines*—Nakuru Junction—Kisumu (123 miles), Tororo—Soroti (100 miles), Voi—Kahia Junction (91 miles); *Minor and Branch Lines*, Rongai—Lake Solai (26), Kisumu—Butere (44), Leseru—Kitale (40), Mbulamuti—Namasagali (18), Kampala—Port Bell (6), Gilgil—Thomson's Falls (49), Nairobi—Nanyuki (145). The Kouza—Lake Magadi Line (91 miles) is worked but not owned by Government. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3,401 miles.

Kenya and Uganda are one administrative unit for purposes of customs, and the principal imports are cotton piece goods and manufactures, textiles and textile manufactures motor cars, parts and accessories, motor spirit, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports are coffee, raw cotton, maize, sisal fibre and sisal tow, hides and skins, carbonate of soda, oil seeds, wheat, ivory, wattle bark and extract, tin ore and butter.

	1930	1931
Revenue	£3,241,600	£3,066,930
Expenditure	3,438,874	3,216,089
Imports (Kenya & Uganda) ..	6,923,665	5,092,026

NAIROBI, the capital of the Colony, and central station of the Kenya and Uganda railways and harbours, has a non-native population of 24,773, of whom 7,164 are Europeans, 14,951 Indians, 271 Arabs, 2,387 Others. The native population of the Nairobi district (including parts of Kiambu and Fort Hall) is 60,949. There are also some 600 European farmers in the immediate neighbourhood of Nairobi. Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population 57,324, of whom 1,215 are Europeans).

<i>Governor and Commander-in-Chief, His Excellency Brigadier-General Sir Joseph Aloysius Byrne, K.C.M.G., K.B.E., C.B. (1931), and Duty Allowance £2,500, and Allowance as High Commissioner for Transport £1,000.</i>	£5,000

LEEWARD ISLANDS. (See BRITISH WEST INDIES.)

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements*, the *Federated Malay States*, and the *Protected States of Johore, Kedah, Kelantan, Trengganu and Perlis*. The total area is 51,000 sq. miles (S.S. 1530, F.M.S. 27,430, other 22,040), and the total population of BRITISH MALAYA (1931) was 4,385,346 (as compared with 3,358,054 in 1921). Of the 1931 total, 2,598,023 were males and 1,787,323 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1931 was 17,768.

Trade of British Malaya. (Merchandise only)

Imports from —	1930	1931
U.K.	£11,414,283	£7,243,849
British Dominions	14,355,438	8,203,928
Foreign Countries	56,629,086	37,449,497
Total	£82,398,807	£52,897,274
Exports to —	1930	1931
U.K.	£9,380,113	£5,260,136
British Dominions	12,191,223	6,280,439
Foreign Countries	55,155,826	35,294,730
Total	£76,727,162	£46,835,325

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies, including the Cocos or Keeling Island and Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca, and Labuan. These Settlements have an entire area of about 1,531 square miles, with an estimated population (1931) of 1,114,015.

Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island.

Resident, C. H. Whitton, M.C.S. (acting).

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The population is 1,121, and the islands export about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 60 square miles and a population of 1,059 (1931). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1931 was 65,849 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales Island (pop. 1931, 198,871), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1931, 121,388), and the territory of Dindings, west of Perak. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 24' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 120 square miles. At the time it was founded, Penang was the only British settlement in further India, now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula.

Province Wellesley is a strip of coast about 45 miles in length with an area of 280 square miles, ceded by the Raja of Kedah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tobacco, rubber, and coconut plantations.

The Dindings Territory, ceded by the State of Perak in 1874 (area 180 square miles, pop. 1931, 19,592) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N.W. of Singapore, comprises an area of about 640 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1824, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Benecoolen in Sumatra. The population in 1931 was 186,711.

SINGAPORE, the capital of the Straits Settlements, is distant from London 8,700 miles; transit, 23 days. Penang, 20 days; and Malacca, 23 days.

(a) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1931 of 1,713,000. The principal towns are Kuala Lumpur (Sel.), pop. 121,738; Ipoh (Pk.), 53,863; Taiping (Pk.), 31,881; Kampar (Pk.), 15,302; Seremban (N.S.), 21,650; Klang (Sel.), 20,913; and Teluk Anson (Pk.), 14,671.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above mentioned control.

The States are peopled by a mixed force of Indians and Malays, officiated by Europeans.

There are 1,073 route miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (222 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 22 hours, and that between Ipoh (Penang) and Bangkok 27 hours (compared with a sea journey of 4 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan, Pahang and Kelantan as far as Tunjap. At Sungel Golok this line is connected with the Royal State Railways of Siam. There are 2,840 miles of metalled roads, 150 miles of unmetalled roads, and 1,771 miles of bridle-paths, while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 10,000 acres have already been planted and nearly 30,000 acres alienated for this cultivation.

Principal exports from the Federated Malay States:—

	1930	1931
Para Rubber.....	Tons 249,675	243,886
Para Latex	Galls 287,511	168,908
Tin and Tin Ore	Tons 62,065	51,250
Copra	71,043	65,583
Firewood, Timber and Planks	45,667	52,831
Rice and Padi	3,517	5,379
Pineapples, Canned ..	4,455	4,643
Taploca	3,219	3,720
Areca-nuts	811	583
Rattans	865	533
Palm Oil	3,288	4,177
Palm Kernels	492	641
Gambier	220	222
Gold	Oz. 25,912	26,881

Climate—Temperature shows little variation throughout the year. The days are sometimes oppressive, owing to the high humidity, the nights are generally cool. The mean maximum shade temperature is about 90° F. inland, and rather lower on the coasts, while the mean minimum is about 72° F., inland and a little higher on the coasts. The average yearly rainfall varies in places from 65 inches to 125 inches. There are no clearly defined wet and dry seasons, but there are well-marked seasonal variations in the rainfall. On the West Coast and inland the months of January, February, June, July and August have considerably less rainfall than the remaining months. The full force of the S.W. monsoon is not felt, owing to the barrier provided by Sumatra, but violent squalls of short duration (known as "Sumatras"), are not infrequent between April and September. On the East coast, during the N.E. monsoon which prevails from November to March, heavy rains and strong winds are experienced, the remainder of the year being comparatively dry.

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (via Penang).

(3) OTHER STATES

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Sovereignty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siam Treaty of March 10, 1909. In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadanism.

JOHORE, with an area of 7,678 square miles and a population (census of 1931) of 505,309, occupies the southern extremity of the Malay Peninsula. In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer. In 1914, following an agreement of that date, a General Adviser was accepted. The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed. The judicial system resembles that of the Federated Malay States. Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and *vice versa*. Johore is primarily an agricultural country producing, as major crops, rubber, coco-nuts, tapioca and pineapples. The cultivation of African oil palm is also making progress. Tin ore and iron ore are exported in considerable quantity. The Johore State Railway runs for 120 miles through the middle of the State. There are 831 miles of metalled road.

	1930	1931
Revenue	\$14,634,966	\$12,102,704
Expenditure	16,671,986	14,778,518
Public Debt	nil.	nil.
Imports	47,125,210	29,449,254
Exports	59,714,461	34,995,441

The Capital, Johore Bahru, has a population of 95,382.

Sultan, H.H. Sir Ibrahim, G.C.M.G., K.B.E. ; born, 1873; succeeded his father, 1895.

General Adviser, R. O. Winstedt, C.M.G., D.Litt.

Chief Minister, Dato A. Hamid bin Yusof.

State Secretary, Dato Mohd. Salleh bin Ali.

Judge, W. Burton.

Legal Adviser, J. W. Jones (acting).

Financial Commissioner, F. T. Tree.

Commissioner, Lands and Mines, H. R. Joynt (acting).

Commissioner, Trade and Customs, E. F. Williams (acting).

Assistant Adviser, Muar, O. H. Grove.

State Engineer, Maj. H. F. Waters.

Principal Medical Officer, G. H. Garlick (acting).

Postmaster General, G. Savage (acting).

Superintendent of Education, H. R. Cheseaman.

Controller of Labour, E. A. Ross (acting).

Protector of Chinese, F. L. Williams.

Warden of Mines, F. C. Marshall.

Commissioner of Police, W. A. C. Hains (acting).

Superintendent of Surveys, C. E. Nugent.

Conservator of Forests, C. Smith (acting).

KEDAH, between $5^{\circ} 5' - 6^{\circ} 35' N.$, lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1932 was 478,285, and the approximate area 3,150 sq miles. Rice is the principal crop in North Kelah, while coco and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 19,032. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 49 British officials, employed in the Public Works, Survey, Police, and Medical departments.

	1930-31 (A.H. 1348)	1931-32 (A.H. 1349)
Revenue	\$5,086,692	\$5,180,244
Expenditure	7,198,036	5,722,757
Public Debt	nil	nil

Sultan, H.H. Sir Abdul Hamid Halmishah, K.C.M.G.

Regent, H. H. Tunku Ibrahim, C.M.G., C.V.O.

British Adviser, J. D. Hall, M.C.S.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 216 sq miles, and the population is about 49,300, of whom 40,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but H. H. the Raja lives at Arat, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909.

	1929-30 (A.H. 1348)	1930-31 (A.H. 1349)
Revenue	\$487,436	\$349,189
Expenditure	577,738	471,011
Public Debt	nil	nil

Raja, H. H. Tuan Syed Alwi, C.B.E., C.M.G.

British Adviser, O. E. Venables, M.C.S.

KELANTAN lies between $4^{\circ} 35' - 6^{\circ} 15' N.$ and $101^{\circ} 22' - 102^{\circ} 37' E$ on the east coast of the peninsula, with a total length of about 115 miles and a breadth of 60 miles. The total area is 5,773 square miles; population (1931 Census) 362,517. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is in parts mountainous, but a railway (through to Singapore) has been constructed

through the flatter part and good land is thus made accessible for planting. There are many rubber estates and the African oil palm is also cultivated. Tin and gold are found. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 14,843. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Puteh of the Eastern.

	1930	1931
Revenue	\$2,182,905	\$1,524,139
Expenditure	2,426,079	1,961,124
Public Debt	4,980,684	5,430,684

Sultan, H. H. Sir Ismail, K.C.M.G.

British Adviser, A. S. Haynes, M.C.S.

TRENGGANU, between 4° and $5^{\circ} 55' N.$ and $102^{\circ} 15' - 103^{\circ} 30' E$, lies south of Kelantan on the east coast of the peninsula. Area, about 5,000 square miles. Population (1931), 179,664. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports are Para rubber, tin ore, dried fish, cotton and silk, sagoes, gambier, areca nuts, copra, iron ore and wolfram. The capital, Trengganu, on the river of that name, contains 13,972 inhabitants.

	1930-31 (A.H. 1349)	1931-32 (A.H. 1350)
Revenue	\$1,235,230	\$983,675
Expenditure	1,445,799	1,163,693
Public Debt	3,250,000	3,500,000

Sultan, H.H. Sir Suleiman Badrul-alam Shah, K.C.M.G.

British Adviser, G. L. Ham

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of $91\frac{1}{2}$ square miles. The colony includes also the adjoining island of Gozo, with an area of $24\frac{1}{2}$ square miles, COMINO—the site of the *Sultan's* disaster in 1889 and several islets. The civil population of the whole group, on April 26, 1931, was 221,621. In religion the Maltese are Roman Catholics. The lower orders are mainly Punie in race. The Maltese language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1930 (June, July, August and September) was 81°⁵. In winter the mean temperature was 51°⁵. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes, figs and honey are plentiful. The principal occupation of the people is in connexion with shipping.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary, its population has now dwindled to 982, but its suburb, Iqabat, has 9,050 inhabitants. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 89 elementary and infant schools, 6 central schools, 2 secondary schools, and 60 night schools; in addition there are garrison schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry. The Constitution, which was temporarily suspended by an Order in Council (June 26, 1930) empowering the Governor to make laws for the peace, order and good government of Malta, was restored to the Island in 1932.

In 1931 the Port of Valletta was entered by 2,328 vessels (tonnage, 3,839,918).

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17' 57" 46' E long, and 8 lat. 19° 58' 20' 33'; and comprising an area of 720 square miles. The permanent population at the Census of 1931 was 323,418, made up of Indians, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1770 they abandoned the island, and in 1775 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name Mauritius, was restored.

Of the total cultivated area of 170,165 acres, 134,925 are under sugar, 20,000 under fibre, and 15,250 under other crops, the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and elsewhere. 82 per cent trade of the island is with Great Britain and British Dominions. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe; a cyclone lasted from March 5 to 7, 1930, and did considerable damage to sugar plantations and buildings.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1931, amounted to 1,062,466 tons. In 1931 there were 144 miles of railway (120 of 4 ft 8½ in. gauge and 24 of 2 ft. 6 in.) 59 post-offices, 49 telegraph offices and 10 telephone offices in the island, with 438 miles of telegraph, including block telegraph for the railway, and 230 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1932-33 is Rs. 1,348,759.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles north-east of Mauritius. Population (Census 1931), 8,202. Area, 40 square miles. Cattle, beans, salt fish, and gums are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, R. Brouard (acting) Rs 7,200.

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1922, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour. The total population of the "Other Dependencies" (1931) is 1,457.

Transit from London to Mauritius, 30 to 35 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benue, between Dahomey on the west and the Cameroons on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern and Southern Provinces, coinciding with the former Protectorates of Northern and Southern Nigeria. The area of the whole territory (including the portion of the Cameroons under British Mandate) is about 372,674 sq. miles, and the population is 18,765,790.

By Order in Council of Nov. 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as

President, 27 official members, 3 nominated official members, 3 elected members representing the municipal area of Lagos (Dr. C. C. Adeniyi Jones, Eric O. Moore, and T. A. Doherty), 1 elected member representing Calabar (C. W. Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground nuts, cocoa, cotton lint, and tin. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (704½ miles), crossing the Niger by bridge at Jebba, with branches from Kano to N'Guru (143 miles, Minna to Baro (111 miles), from Zaria to the Bauchi tin fields (Jos) (133 miles, light railway), from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles) (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue by train ferry at Makurdi with a branch line connecting from Kafauchau junction (mile 458¼) with the tinfields (Jos) 62½ miles. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports (1931) were cotton goods (£1,556,308), provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, motor-cars and lorries, motor spirit, cement and bags and sacks; the principal exports were palm kernels (£2,132,345), palm oil (£1,541,681), tin ore (£906,185), cocoa (£1,093,254), ground nuts (£1,510,691), hides and skins (£725,665) and cotton lint (£152,812). The total imports from the British Empire were £4,999,155 in 1931, and from U.S.A. £584,490

Chief Veterinary Officer , Capt. W. W. Henderson	1,200
Transit to Lagos from Liverpool, 14 to 15 days.	
Cable communication to Lagos. Inland telegraphs to all important places.	

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec. 31, 1931) was 1,502,283, including 1,910 Europeans and 1,537 Asiatics, and it has a total land area of 37,596 square miles.

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable; tea, cotton and fibre are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are three steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans-Zambesia Railway, from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Lake Nyasa is under construction. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 2,666. A road from Salisbury to Blantyre via Tete (Portuguese E. Africa) is open and is freely used during the dry season.

Mails to and from England are despatched every week via Cape Town and Beira. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line via Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape via Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika.

The chief towns are Blantyre (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government.

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir A. G. M. Fletcher, K.C.M.G., C.B.E. £1,200

(In addition to £3,500 as Governor of Fiji, and allowance of £150 as Consul General for Western Pacific)

Secretary to High Commission, H. H. Vassess (House Allowance £75) £700 to 800

Chief Judicial Commissioner, Capt M. H. Anderson, O.B.E., K.C., R.N. (ret.) 400

(In addition to £1,200 as C. J. of Fiji)

(1) The British Solomon Islands, protected since 1893, consist of Guadalcanal, Malaita, San Cristobal, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 15,000 square miles, and a population (1931) of 478 Europeans, 173 Asiatics, and 93,415 natives. The Santa Cruz Group and several other islands were incorporated in the

Protectorate in 1898 and 1899; and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's Group, were transferred by treaty from Germany. The revenue in 1930-31 was £64,728, and the expenditure £67,816; exports 1930-31 £304,310; imports, £215,269. The seat of government is Tulagi.

Resident Commissioner, Francis Noel Ashley (and £150 allowances) £1,200 to £1,400

Secretary to Govt., N. S. B. Kidson. £500 to £600

(2) The Gilbert and Ellice Islands, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them, and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanapa), in lat. 0° 52' S. and long. 166° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles. Population (1931) 266 Europeans, 730 Asiatics (698 on Ocean Island), and 32,813 Pacific Islanders. Revenue (1929-30), £67,105; expenditure, £59,324; imports (1929-30), £148,777; exports, £213,328.

Fanning Island, in lat. 3° 30' N., long. 150° 13' W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop. 37 Europeans, chiefly in connexion with Pacific cable station, and 399 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916, and Christmas Island was included in 1919.

Resident Commissioner, A. F. Gumble, O.M.G., M.A. (and £100 allowances) £800 to £1,000

(3) The Tonga or Friendly Islands.—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 300 miles therefrom, with an area of 385 square miles, and population (1931) of 482 Europeans 265 half castes, 27,700 Tongans, and 392 others—total 28,839. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tupou II in 1918. Soil generally is fertile, the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1919. Revenue 1930-31, £71,672; expenditure, £78,660; imports (1930), £148,306; exports, £169,610. The total shipping entered and cleared in 1930 was 163,023 tons.

Agent and Consul, J. A. Neill, B.A., B.L. £800 to £1,000 (and duty allowance £200)

(4) The Phoenix Islands (McKean, Gardner Pinn, Hull, Enderbury, Phoenix, Canton, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) Pitcairn Island, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (1931) 200, descendants of the mutineers of H.M.S. *Bounty*.

Chief Magistrate, Richard Edgar Christian.

(6) The New Hebrides Group, about 500 miles west of Fiji and 250 miles north-east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of

1924. The population is estimated at 56,564 (British Nationals 227, French Nationals 797, Foreigners 30, Asiatics and Protected French Subjects 5,350, Natives, 50,000). Principal products, copra, coffee, cotton, cocoa, maize, sandalwood and shell. Joint revenue, 1930, £20,152, expenditure, £28,140. Total imports, 1930, £157,541; total exports, £250,520. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia, there is a two-monthly service with France, via Panama.

British High Commissioner, Sir A. G. M. Fletcher, K.C.M.G., C.B.E.

President of Joint Court, Count de Buena

Espezanza, K.C.M.G.

British Judge, A. de J. Caicy.

French Judge, M. Sachon

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the E., the depression through which the Jordan winds its way from the Sea of Galilee (Tiberias) to the Dead Sea. The Dead Sea, 1,292 feet below the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet above mean sea-level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (census Oct. 23, 1922), of 737,182, of whom 590,890 are Muhammadans, 75,024 Christians, 83,794 Jews, and 9,474 members of other faiths. The estimated population on July 1, 1929, was 826,664, not including Beduin, who are about 203,000 in number. The 1929 estimate includes 80,205 Christians, 572,443 Moslems, 154,330 Jews and 9,666 others. Since 1919 about 60,000 immigrants (mostly Jews) have settled in the country: in 1927 the Jewish immigrants came principally from Poland (35 per cent.), Russia (20 per cent.), Rumania (6 per cent.). In 1927, 2,713 Jews (956 men, 1,240 women, and 673 children) entered Palestine as immigrants; in the same period, 5,472 emigrated from Palestine, the net decrease thus being 2,759.

Palestine is divided into 2 administrative districts, under District Commissioners, and the Jerusalem Division under a Deputy District

Commissioner. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 66,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. A conflict of claims, Jewish and Arab, as to rights at the *Wailing Wall* of the Haram al-Sharif at Jerusalem has provided opportunities for disorder, and the Government submitted proposals to the Council of the League of Nations for a Commission to define and determine the rights and claims. In Jan., 1930, the Council appointed a Commission, as requested by the British Government. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Tel-Aviv (40,000), Gaza (17,480), Acre (6,420), and Haifa (24,634). An archaeological museum, constructed, equipped and endowed at the cost of Mr John D. Rockefeller, Jr., is in course of erection at Jerusalem.

The railway system of Palestine consists of five sections. *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara, *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria, *Jaffa-Lydda-Jerusalem*, and *Nablus-Afula-Tulkarem*. The main junction of the Government Railways is at Lydda, the general offices being at Haifa. In 1929 the kilometrage operated (excluding 113 kilometres Ma'an-Mudawara section) was 1,104 kilometres, the freight handled amounting to 569,285 tons, and the passengers carried numbering 1,329,475. The gross railway revenue was £165,143 and the working expenses £158,635.

The chief ports are Jaffa, Haifa and Acre. Harbour construction at Haifa was begun in 1929 and is now in progress. In 1929, 3,663 vessels (1,975,383 tons) engaged in foreign trade entered the ports, and 2,672 (1,999,438 tons) cleared. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1928-29 there were 227 Government schools with 19,449 pupils, 126 Christian schools with 25,139 pupils, and 98 Jewish schools with 9,719 pupils. There are also training colleges

for teachers, technical, trade and agricultural schools, and a Hebrew University (with faculties of Humanities and Science), which draws about half its students from Palestine and the remainder from Poland, Russia and Rumania.

TRANSJORDAN.

Emir, H. H. Abdullah, G.B.E., K.C.M.G., second son of King Hussein of Hejaz, appointed April, 1921.

Transjordan consists of the 4 Districts of *Mann*, *Karak*, *Balqa*, and *Ajlun*, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea at Akaba. No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120,000 semi-nomads, and 50,000 nomads; the great majority are Moslems. The area is unknown, as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception

of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudowwara, where it enters Hejaz territory and continues to Medina. There is a Legislative Council of 6 official and 16 elected members, constituted in 1929.

RHODESIA.

The total area of Rhodesia is about 440,000 square miles, and the total population is nearly 2,500,000 (1931). The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north to the Limpopo River in the south.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S and W.; and Portuguese East Africa on the E. The total area is 150,344 square miles, and the population (1931) 1,109,012 of whom 49,910 are Europeans. The native population is 1,059,000, with 4,102 Asiatics and other coloured persons, including those of mixed race. The total number of European births in 1931 was 1,182 (a rate of 23.58 per 1,000) and of deaths 417 (8.32 per 1,000), the marriages numbering 544 (21.72 per 1,000). Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 20, 1897, were adopted for Southern Rhodesia so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesian and the Mashonaland Railways, the total mileage of which at Sept. 30, 1931, was 2,669 miles (including 1,348 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vryburg, via Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,366 miles. A line connecting Bulawayo with Salisbury

(302 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Belra Railway Companies to the port of Berra (Portuguese), a total distance of 374 miles. The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambezi at the Victoria Falls (282 miles). Branch lines primarily constructed in the interests of established mines are—Salisbury-Sinola (83 miles), Mt. Hampden Junction-Shamva (73 miles), Gwelo-Selukwe (24 miles), Bulawayo-West Nicholson (104 miles), Gwelo-Umumba-Victoria (123 miles), and Soma-bula-Shabani (63 miles). There is also a short branch line, Bulawayo-Matopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised. In September, 1932, routes covering 1,552 miles were in operation.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1931, was of the value of £77,372,019. The output for the year ended December 31, 1931, was valued at £2,273,875. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1931 was 437,453 acres (maize 273,372, tobacco 16,145, cotton 8,979). The export of citrus fruit in 1931 was 155,449 boxes. Cattle (5,582,460 on Dec. 31, 1931) thrive well, and the annual shows at Bulawayo and Salisbury are regarded as among the premier shows of beef cattle in South Africa. The exports of cattle in 1931 were 10,280 head. Dairy products sold include butter 1,819,920 lb., milk 1,182,366 gallons, cheese 146,261 lb., and eggs 845,640 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, and many other undertakings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the Government during recent years to increase the number of new settlers. During the years 1925-27 settlers and dependents numbered 941 (396 under Empire settlers scheme, and 545 from High Commissioner's Office, etc.). In addition, a further 1,004 men and youths obtained situations on the land in 1925-27. This scheme is (1931) temporarily in abeyance.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 87 Government and Government-aided schools (1 vocational, 22 secondary and 74 primary). Children in rural areas, where the population is too scanty for a school, are

provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1931 was 9,212. There are seven schools for children of mixed race, with 706 pupils, and native education conducted by mission agencies with Government aid is provided in 1,422 schools, with 107,122 pupils. Grants in aid of native education in 1931-32 amounted to £50,093, the total educational (other than native) expenditure being £278,378 in the calendar year 1931.

(total population, census 1931, 28,800, including 9,637 whites) BULAWAYO, the largest town in Matabeleland, altitude 4,460 ft. (total population of 31,000, including 11,812 whites) Other centres are Umtali, Gwelo, Gatooma, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambezi, its political neighbours being Tanganyika and the Belgian Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 287,950 square miles, and with the exception of the Luangwa, Zambezi and Kafue Valleys the altitude in most places exceeds 4,000 feet. The permanent European population in May, 1931, was computed at 13,846; the native population was estimated (Dec. 31, 1931) at 1,372,235. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, coffee, wheat, oil seeds, and

* Excluding expenditure out of loan funds.

citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 353,062 and European-owned 99,144. Copper, zinc, vanadium, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas. The copper deposits have attracted much capital, the Roan Antelope and the Nkana mines having commenced output, while others are expected to follow. The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply, while zinc and vanadium production are on a considerable scale. Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter, but the areas now open for hunting are somewhat restricted. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 44 post offices, 18 of which are money order offices. The main telegraph and telephone route lies alongside the railway from Victoria Falls Bridge to the Congo border, with branches from Ndola to Luanshya, Ndola to Nehanga, and from Nkana to Mulira. Fort Jameson is connected with the Nyasaland system, and Kasama and Abercorn with the Nyasaland and Tanganyika systems. Aeronautical wireless stations at Mpika and Broken Hill are equipped for communication with aircraft in flight (900 metres wave length) as well as for point to point communication on short wave. Short wave equipment has been installed at Fort Jameson, Livingstone and Mongu-Lealui. All wireless stations maintain a public service, and a licensed station at Kausanshi Mine is open for restricted public service.

The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Livingstone, near the Victoria Falls, on the Zambezi. The country is divided into 9 Provinces for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazaluka, Abercorn, Kasama, Fort Rosebery, Ndola, Luanshya and Mongu-Lealui.

ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America, and 4,477 from South America, in 15° 55' S. lat and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1921) of 3,747. St Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21, 1502 (St Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it in 1645. The English East India Company seized it in 1651, but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II, until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry has been established. St James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (Resident Magistrate, R. A. Willmott), an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S lat and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about

38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 2,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; in 1931 the population was about 150. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand, the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Special Commissioner for Sarawak in England
Bertram Brooke (H. H. the Tuan Muda).
Offices, Millbank House, Westminster, S.W. 1.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 475,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kellengang, and Batang-Lupar mountains, the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 100 miles), the Barun (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 120, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Brunei by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of 1888 the State has been placed under British protection. The country produces sago, gutta-percha, indiarubber, bees-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. The large petroleum field at Miri and Bakong, in the Barun district, is now a valuable asset; oil exports (1928) 592,389 tons, (1929), 734,454 tons, (1930) 645,399 tons.

Revenue	\$6,671,891	\$5,569,034
Expenditure	6,515,757	7,089,993
Imports	22,726,657	16,421,592
Exports	34,689,890	24,894,762

CHIEF TOWN, Kuching. Population (1911), 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 20 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. There is also direct communication with Sibiu and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Frasin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at

156 square miles, of which Mahé occupies nearly 56 square miles; the most important of the dependencies are the Amirantes, Farquhar Islands, Coetivy, Askove and the Aldabra Group. The population was estimated (Dec 31, 1931) at 27,786. At the census of 1931 the population of Mahé was 21,977, Praslin 2,476, La Digue, 1,225, other islands 1,736. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° 8' of the Equator the islands are healthy, the death-rate in 1931 being 13.53 per 1,000. There are 27 Roman Catholic and Church of England primary schools, there are also a secondary schools.

The principal exports are copra, vanilla, coconuts, coconut-oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coconut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 members (2 *ex-officio* and 2 nominated official and 1 unofficial), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 220 miles, with an estimated area of 4,000 square miles, and a population (1931) of 96,422, of whom 420 were resident Europeans.

Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 30,000 sq. miles, and the total population about 1,770,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 220 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 208 miles, between 20° 15' and 23° 16' of W. long. Its estimated area is 25,925 sq. miles, and its population about 1,692,736. For administrative purposes the Protectorate is divided into 2 Provinces, under Provincial Commissioners, assisted by a Senior District Commissioner, and 28 District and Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Femnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger, piasava, hides, and rice are also exported. The value of the palm kernels exported in 1931 reached £449,732. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Baiya to Makenti. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1931) 1,200 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.*(The Somaliland Protectorate)*

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia. The British Protectorate, declared in 1884, contains about 68,000 sq miles, its boundaries being defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 550, the Dervish power having been finally broken in 1920. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

<i>High Commissioner for South Africa,</i> His Excellency Sir H. J. Stanley, G.C.M.G.	£3,000
<i>Private Secretary & A.D.C., Capt. L. Holbech, D.S.O., M.C.</i>	
<i>Imperial Secretary and Accountant, (vacant)</i>	2,000

<i>Asst. Imperial Secretary, Shiley Eales,</i> C.B.E.	£1,190
<i>Chief Clerk, H. L. Smith</i>	750
<i>Auditor, T. A. Williams</i>	1,100

The Office of High Commissioner in and for South Africa was created by Letters Patent in 1878. In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; but this arrangement ceased in 1882, when a Special Commissioner for Zulu affairs was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who, under the Commission of 1882, was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa beyond the limits of the Union and of Southern and Northern Rhodesia. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. Prior to October 1, 1923, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898. Upon the establishment of responsible government the Order in Council 1898 lapsed, but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect. On April 1, 1924, the functions which the High Commissioner had exercised in Northern Rhodesia during the British South Africa Company's administration of that Territory were, with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia.

The Office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6, 1900, vested in Lord Milner, and by a similar Commission, dated March 15, 1905, in Lord Selborne. During the years 1910-1930 the Office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa. This arrangement ceased upon the termination of the period of office of Major-General the Earl of Athlone, K.G. Sir Herbert Stanley, G.C.M.G., was then appointed by His Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the office of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom.

BASUTOLAND.*(The Territory of Basutoland.)*

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense

herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the *Maletsunyane Falls* (670 feet).

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Butha Buthe, Leribe, Peka, Teyateyaneng, Maseru, Morija, Mafeteng, Mokane's Hoek, Quthing and Qacha's Nek. There are 597 native schools, with an average attendance (1931) of 41,366, a large proportion being in the schools of the French Protestant Mission; there are also 9 white schools. The education vote for 1931-32 was £48,925. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

BECHUANALAND.

(The Bechuanaland Protectorate.)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south

and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles, the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S.W. Africa, Sept. 1, 1929. The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year. Malarial fever is prevalent during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tshekedi, Regent during the minority of Setotse (Bamangwato), of Molefi Pilane (Bakgatla), of Kgari Sechele (Bakwena), of Bathoen (Bangwaketse), of Seboko Mokgosi (Bamalele), and of Mathibe (Bakwena).

The railway from Kimberley, to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaberone and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberone, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (1921) 112,952, of whom 2,205 are whites, the remainder being

Amo-Swazi Bantus (or Swazis). Estimated European population (1930) 2,725. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 35 inches, the mean temperature being 65° Fahr. (30°-90°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 372,400 head of cattle in the Territory at the end of 1932. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal.

The agricultural products are, maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes. Cotton growing from jassid resistant seed is becoming important. The country possesses considerable mineral wealth, including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1932, 77 tons of cassiterite in, valued at £8,875 were exported.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Brenersdorp, Hlatikulu, Stegi and Goedgegun. There are schools for Europeans at various centres.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Brenersdorp and Stegi (43 miles); Piet Relief and Hlatikulu (57 miles), and Goedgegun to Hluti (33 miles). There are post offices, and telegraph and telephone offices at all the chief centres.

STRAITS SETTLEMENTS.

(See MALAYA.)

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 35' N. lat., and reaches from the French Sahara about 19° 10' E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial

Africa. The total area is about 1,008,000 sq. miles, with a population of about 5,600,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 2,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambia enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The Nile enters at Nimule, in Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government—The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports via the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 14 provinces (*Mudrias*) under governors (*Mudurs*). Each province is subdivided into districts with one (or more) District Commissioners in charge of each. Native administrative officials are employed under the District Commissioners. *Civil Justice* is administered by a Chief Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Managers of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercises powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Courts of Sheiks or Chiefs in all parts of the country have varying powers of

limited jurisdiction in accordance with native customs. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

Education.—In addition to *khatwas* there are 87 *kullabs* (vernacular schools) attended by 8,943 pupils, and 10 *primary schools*, where instruction is given in English as well as Arabic, attended by about 1,200 pupils, a *secondary school* at Khartoum (Gordon College), a *teachers' training school* and *technical or trade schools*, at Omdurman, and Atbara. There are also 22 *elementary vernacular schools for girls*, and a *training college for gulf teachers*.

Production.—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The *Gezira Irrigation Scheme* at present (1930) enables an area of 630,000 acres to be cultivated between the Blue and White Niles, one-third of which is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton-growing schemes in the world (198,000 feddans in 1930). The Sudan is the chief source of the world's supply of gum arabic. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and maintain an export trade with Abyssinia. Work has been commenced on a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, and gold.

Communications.—The railways and steamers throughout the country are administered by a Government department. During the past few years nearly 500 miles of new railways have been built, while other transport has been revolutionised by the opening up of a network of motor roads spreading all over the country during the dry season. In 1931 there were 1,597 miles of railways open for traffic. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed northwards. A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 miles W. of Port Sudan. There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September, but communication with the Kenya and Uganda Railways is maintained throughout the year by means of a motor service over the Juba-Nimule road, which connects with the regular fortnightly sailings of the Sudan Nile Service and the Uganda Lake Albert Service. Frequent services are also provided by private enterprise over the Juba-Aba Road, connecting with the road system of the Belgian Congo. During the dry season (December to March) private enterprises

also operate motor car services between Juba and Kampala (600 miles) and Juba and Nairobi (800 miles). In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationary and 16 travelling Post and telegraph offices, and 10 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

	1930	1931
Revenue . . .	* £4,693,623	* £4,398,618
Expenditure . . .	4,693,623	4,398,618
Total Exports . .	4,953,282	1,733,795
Total Imports . .	6,177,410	3,761,013
Imports from U.K.	2,201,956	1,164,485
Exports to U.K.	3,289,780	787,327

The principal export is cotton, the value of which, together with cotton seed, amounted to £1645,449 or 37·2 per cent. of the value of the total exports. Gum arabic, £1602,753. Other exports are sesame, cattle, hides and skins, dates, ground-nuts, dom-nuts, *dura*, salt, senna, ivory and gold.

Governor-General, His Excellency Sir John Loder, Mafey, K.C.M.G., K.C.V.O., C.S.I., C.I.E. (1926)

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon College, with extensive Government buildings. Population 42,240. Opposite Khartoum, on the Blue Nile, is Khartoum North (102,512), and on the White Nile is Omdurman (102,983), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about 500 miles and an estimated area of 373,500 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (April, 1921) at 4,107,000, the coloured population (other than native) being 14,991. In 1921, the native population of Tanganyika Territory was estimated at 5,022,640. The total white population is about 6,226. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

The amount allocated to education in 1921 was £127,212, further sums being contributed by native administrations. In 1921 there were 94 Government schools for Africans, with 6,105 children in average attendance, and 3,345 Mission schools with average attendance of 105,791 pupils. Two schools are maintained by the Government for the education of European children, one a day school at Dar-es-Salaam, and the other a boarding school at Ngara Nairobi, in the Northern Province. Assistance is given to 4 kindergarten schools at Tabora, Dodoma, Mpwapa and Tanga; to 3 Dutch schools in the Arusha district, to a Roman Catholic schools in Dar-es-Salaam and Tabora; and to German schools in Northern Tanga and Ilunga Provinces. 45 Indian schools, with enrolment of 2,399 pupils, are in receipt of financial assistance. The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,128 square miles, of which 4,075 square miles are included in the Government Forest Reserves, and about 63 square miles are privately owned. Non-native plantations are mainly for the production of sisal fibre and coffee, with small areas under tea and tobacco, minor crops being cotton, maize and coconuts. Native production consists chiefly of coffee, bananas, cotton, ground-nuts, rice, millet, maize, cassava and pulses.

In 1921 there were 5,099,438 cattle, 2,233,287 sheep and 3,250,783 goats in the territory. The value of minerals produced in 1921 was—diamonds £9,698, gold £60,183, salt £36,524, mica £2,500 and tin £1,987. Companies desiring to investigate the mineral resources can obtain information and assistance from the Mines Department, Dar-es-Salaam.

The chief exports are sisal, cotton, coffee, ground-nuts, hides, skins, copra, grain, muslin, bees-wax, ghee, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

	1920-21	1921-22
Revenue	£1,749,478	£1,522,368
Expenditure	2,102,501	1,800,928
	1920	1921
Imports	£3,982,605	£2,495,596
Exports	2,897,938	1,890,722

The Southern Brigade headquarters, Signal Section and S & T. Corps, one company of 1st (Nyassaland) Bn, the 2nd (Nyassaland) Bn., and 6th (Tanganyika) Bn of the King's African Rifles, are stationed in Tanganyika Territory. There is a Police Force of 1,840 of all ranks.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels. In 1921, 478 steamers, exclusive of coastal boats) of 2,075,815 tons, and 3,906 dhows of 98,429 tons entered and cleared at the various ports from places beyond the Territory. There are two railways of metre gauge in the Territory. The Tanga Railway from Tanga to Arusha via Moshi (272 miles). The Kenya and Uganda Railways connect with this railway at Kahe Junction. The Central Railway from Dar-es-Salaam to Kilgoma (772 miles), with a branch line from Tabora to Mwanza (235 miles). There is also a branch line from Manyoni to

Kinyangiri (93 miles) via Singida. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nysaland, Kenya, Uganda and Northern Rhodesia. Cable communication exists between Dar-es-Salaam and Zanzibar, and communication with the Belgian Congo is effected by wireless between Kikoma and Albertville. There is a wireless station at Dar-es-Salaam for communication with shipping, and stations for dealing with aircraft are installed at Mbeya, Dodoma and Moshi, which are ports of call for Imperial Airways Mail Service, London to Capetown. There are 131 post offices and postal agencies (102 of which have telegraphic facilities), and 142 telegraph offices. Telegraph Money Order and savings bank business is conducted at 23 head offices, and postal order and ordinary money order business at 21 sub-offices. Telephone exchanges are established and trunk telephone communication is in operation between 30 inland centres, and also with Mombasa.

CAPITAL, Dar-es-Salaam.

TOGOLAND.

(Joint Franco-British Administration)

The total area is about 43,040 square miles, with an estimated population of 920,000. The British sphere consists of an area of about 13,041 sq. miles with a population estimated (1932) at 293,714, excluding 43 Non Africans. The mandated sphere adjoins the eastern frontier of the Gold Coast and is administered as part of it.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Trisao da Cunha), after whom they are named. The main island is about 2,000 miles W. of the Cape of Good Hope, 4,000 miles N.E. of Cape Horn, and about 1,500 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn after a few months. Corporal William Glass (*died 1853*) remaining at his own request, with his wife and two children. This party, with two masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the upsetting of a boat, and in 1886 a grant of stores and provisions was made by Parliament. In 1922 the inhabitants numbered 127 and they are stated to be very long lived. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs. The oldest inhabitant acts as governor. Communication with the outside world is infrequent and the occasional visits of steamers are the only opportunities afforded to the inhabitants for the replenishment of comforts. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length, the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¼ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.E. of Tristan

da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1886. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary, on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudan commences. Total area, 94,204 square miles, including 13,616 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, Luogo, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been repatriated.

The whole Protectorate is under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H. H. Sir Daudi Chwa, K.C.M.G., grandson of the celebrated Muteesa). He is assisted in the government by three native Ministers and a *Lukiko*, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils)

makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a battalion of the King's African Rifles stationed in the Protectorate.

The total population of Uganda (Census of May 1931) is given as 3,553,534, composed as follows: Natives, 3,536,267; Asiatics, 14,150; Europeans, 2,002, and others, 1,116. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala. About 2,000,000 natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely spoken. There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic, Hamitic and Sudanese groups.

	1930	1931
Revenue	£1,412,242	£1,399,913
Poll-tax	522,972	516,808
Customs	324,763	304,128
Expenditure (excl. loans)	2,040,294	1,451,564
Total Exports	2,060,453	1,976,262
Special Imports	1,614,164	1,308,726

The Customs Services are now merged in those of Kenya (q.v.). The export trade is mainly in cotton (£1,503,307 in 1931), coffee, chillies, oilseeds, rubber, ivory, tin ore and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Juba, which is connected by a motor road with Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. Passengers are transported between these two places by the Sudan Government Railways motor service. A regular steamer service is maintained by the *Kenya and Uganda Railway Administration* on Lake Kioga, between Masindi Port and Namagali, the terminus of the Busoga railway; and on Lake Victoria between Kisumu and Mtebwa and Port Bell and the other Uganda ports. The Lake Albert Marine, which has already been mentioned, provides a weekly service on the Nile between Butiaba and Nimule during the season (Oct.-Feb.), and a fortnightly service on Lake Albert between Butiaba and the Belgian port of Kasouyi. The Railway Administration therefore provides a through service from Jinja and Kisumu to the Sudan and the Belgian Congo. The *Busoga Railway*, from Jinja (on Lake Victoria) to Namagali, a point on the Nile below the rapids, which was completed in 1922, has recently been merged in the main line of the K & U. Ry., which now runs from Kampala via Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been completed, and a further extension from Tororo Junction to Soroti and Mbale was opened in 1929. There is a railway from Port Bell to Kampala,

7½ miles in length. There is a fleet of Government motor vans, and there are aeroplane landing grounds at Entebbe, Tororo and Jinja. Good all-weather motor-roads connect the principal administrative centres. Hotels exist at Kampala, Jinja, Tororo, Masindi, Fort Portal and Masaka.

The unit of currency is the shilling, and the lower coinage is on a cental basis.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan., 1921. The former consists of 6 appointed members and the latter includes the former, with the addition of unofficial members, and is presided over by the Governor. The headquarters of the British administration is at ENTebbe; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province).

Governor and Commander-in-Chief, His Excellency Sir Bernard Henry Bourdillon, K.B.E., C.M.G. (1932) (and £1,500 duty) £3,500

Chief Secretary, * E. L. Scott, O.B.E., M.C. 1,800

CAPITAL (Administrative Hdqs.), Entebbe

ZANZIBAR.

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E., succeeded Dec 9, 1911.

The Zanzibar dominions became independent in 1866 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tungi Bay and north as Wai-

sheikh, but since the cession of the coast-line from Ruwuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1904 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboi (Dick's Head), the islands of Lamu, Manda, Patta, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

The population of Zanzibar and Pemba (Census of 1931) was 235,428, the area of the former being 640 square miles, and of the latter 380 square miles.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at Rs 97,83,967 in 1931) and produce quantities of copra (exports in 1931, Rs 19,95,690). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed. Of late years its importance as a port of transhipment and distributing centre has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast. There are 221 miles of roads throughout the Protectorate suitable for motor traffic.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, petroleum and piece-goods, the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally.

Tonnage of ocean-going steamers which entered the port in 1931, 2,770,998, and 3,568 dhows (69,886 tons). Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

	1930	1931
Revenue	£494,461	£536,389
Expenditure	507,500	530,061
Imports	1,454,487	1,166,854

* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races," and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40 per cent. of the total population, and in 1930 65 per cent. The birth registration area was established in 1915; it included at that time 31 per cent. of the total population, and in 1930, 94 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1923 to 1930—

CALENDAR YEAR.	BIRTHS *		DEATHS *	
	Number	Rate ¹ 1,000.	Number.	Rate ² 1,000.
1923	1,792,646	22.2	1,193,017	12.2
1924	1,930,614	22.4	1,173,990	11.7
1925	1,878,880	21.5	1,119,019	11.8

1930	2,203,917	18.9	1,431,515	11.3

* Exclusive of still-births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1932, 37,894,727 alien immigrants landed in the United States. In the fiscal year ended June 30, 1932, 35,576 immigrant and 139,295 non-immigrant aliens were admitted, a total of 174,871. During the same year, 103,295 emigrant and 184,362 non-migrant aliens departed, a total of 287,657. The net decrease for the year was 112,786.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

YEAR.	MARRIAGES	DIVORCES GRANTED.		
	Total.	To Wife	To Husband	* Total.
1916	1,040,684	74,893	33,809	112,036

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water basins have been estimated as follows.—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feet above sea level, and the lowest point of dry land is in Death Valley, 276 feet below sea level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession as shown below, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.*

President of the United States (1929-1933), Herbert Clark Hoover, of California, born at West Branch, Iowa, Aug. 10, 1874, graduated mining engineer, Leland Stanford Jr. University, 1895; Chairman of the American War Relief Committee, London, Eng., 1914-15; Chairman of Commission for Relief in Belgium, 1914-19; U.S. Food Administrator, 1917-19; Secretary of Commerce, 1921-28. Republican.

1. *Vice-President, Charles Curtis, of Kansas (born Jan. 25, 1860), elected Vice-President Nov. 6, 1928. Republican.*

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State, Henry Lewis Stimson, of New York, (born 1867), appointed March 5, 1929*

3. *Secretary of the Treasury, Ogden L. Mills, of New York (born 1884), appointed Feb. 10, 1932.*

4. *Secretary of War, Patrick Jay Hurley, of Oklahoma (born 1883), appointed Dec. 9, 1929.*

5. *Attorney-General, William De Witt Mitchell, of Minnesota (born 1874), appointed March 5, 1929.*

6. *Postmaster-General, Walter Folger Brown, of Ohio (born 1869) appointed March 5, 1929.*

7. *Secretary of the Navy, Charles Francis Adams, of Massachusetts (born 1866), appointed March 5, 1929. [March 5, 1929.]*

8. *Secretary of the Interior, Ray Lyman Wilbur, of California (born 1875); appointed Secretary of Agriculture, Arthur M. Hyde, of Missouri (born 1877), appointed March 5, 1929.*

Secretary of Commerce, Roy D. Chapin, of Michigan (born 1880), appointed Aug. 8, 1932.

Secretary of Labour, William Nuckles Doak (born 1882), Dec. 9, 1930.

* The Presidential Election, Nov. 8, 1932 resulted as shewn on p. 869

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote, and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for \$5,000. The Senate consists of 96 members. The salary of a Senator is \$10,000 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, a resident commissioner from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is \$10,000 per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

LIBRARY OF CONGRESS

(National Library),

Capitol Hill, Washington, D C

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1852. Since that date increased (1) by regular annual appropriations by Congress (now \$125,000), (2) by deposits under the copyright law; (3) by gifts and exchanges, (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (then 40,000 volumes, now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 4,477,431 volumes (gained in 1897, and in 1931 it contained about 627,674 square feet (nearly 144 acres) of floor space. A considerable addition to the building is now under construction. The total cost to June 30, 1931, is approximately \$7,869,000. The book stacks, including the new stack built over the south-east and north-east interior courts, contain a little over 1621 miles of shelving. The library is maintained by Congress, the appropriation for 1932-33 being \$2,150,647. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*
Members, Ezra Winter, *N.Y.*, John W. Cross, A. Y. Adolph A. Weinman, *A.Y.*; John L. Mauran, *Mo.*, Egerton Swatwout, *N.Y.*; Gilmore D. Clarke, *N.Y.*

Secretary and Executive Officer H. P. Caemmerer.

THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight *Justice* Judges, with original jurisdiction in cases affecting Ambassadors, &c, or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal

Courts and from decisions of the highest Courts of the States. (a) The Circuit Courts of Appeal, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The District Courts, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D.C.)

Chief Justice, Charles Evans Hughes,
N.Y., born 1862, apptd. 1930 \$20,500
Associate Justices (each \$20,000).

Name.	Born.	Apptd.
William Van Devanter, Wyo.	1859	1910

Marshal, Frank K. Green, D.C. 5,500
Reporter, Ernest Knaebel, Colo. 5,500

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

The present authorised strength of the Regular Army is: Commissioned officers 12,402; warrant officers 973; enlisted men (approximately) 118,750, exclusive of the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1932, including retired personnel on active duty at the time, was 133,300, of whom 12,324 were commissioned officers, 973 warrant officers, and 119,923 were enlisted men. These figures include the 6,472 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War.	Troops Engaged.
War of Independence, 1775-1784 (est. 250,000 to 300,000)	396,000

U.S. WAR PENSIONS.

(Civil War, and War with Spain &c., but exclusive of World War Pensions.)

Year	Number of Pensioners on Roll			Total Payments.
	Soldiers.	Widows, &c.	Total.	
1900	752,510	242,019	993,529	\$ 138,462,130
1906	245,879	255,844	501,723	207,844,348
1907	246,194	243,718	489,912	230,152,712
1908	259,030	232,164	491,194	228,965,672
1909	259,580	218,335	477,915	229,889,586
1930	256,988	207,269	464,257	219,203,541
1931	255,033	196,400	451,433	234,429,782
1932	251,144	186,797	437,941	232,509,429

The total disbursement in pensions since the War of Independence to June 30, 1932, is \$8,636,487,623, of which \$7,600,321,525 has been paid on account of the Civil War.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals. (See "Ordinary Expenditures" under "Finance," post)

By Executive Order of July 21, 1930, the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the Veterans' Administration, under the direction of Brigadier-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs.

THE NAVY OF THE U.S.

On October 1, 1932, the Navy of the United States consisted of the following seagoing vessels: 24 battleships, not "over-age"; 1 battleship, "over-age"; 8 heavy cruisers, not "over-age"; 1 heavy cruiser, "over-age"; 10 light cruisers; 3 aircraft carriers; 28 destroyers, not "over-age"; 194 destroyers "over-age"; 12 light mine layers; 4 mine layers; 37 mine sweepers; 54 submarines, not "over-age"; 28 submarines "over-age"; 23 eagles; 24 submarine chasers; 4 gunboats; 6 river gunboats; a converted yacht; 8 destroyer tenders; 7 submarine tenders; a aircraft tenders; 3 repair ships; 5 store ships; 3 colliers; 19 oilers; a ammunition ships; 6 cargo ships; a transports; a hospital ships; 34 tugs; 6 submarine rescue vessels; 7 miscellaneous auxiliaries, and 27 unclassified vessels.

On the above-mentioned date there were under construction: 7 heavy cruisers; 1 aircraft carrier; a submarines and 8 destroyers. In addition to the foregoing new construction, there have been authorized: 8 cruisers; 4 destroyers; 1 Neff submarine; and 1 transport, the construction of which has not been begun.

Information as to characteristics, costs, &c., available for publication concerning naval vessels mentioned above, may be found in the Ships' Data Book.

EDUCATION.

State School Systems, 1899-1930.

In 1929-30 the total number of children in the United States 5 to 17 years of age was 31,577,322.

of whom 25,678,015 (12,957,487 boys and 12,720,528 girls) were enrolled in public elementary and secondary schools, and (1928-30) 2,776,344 were enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 21,264,886, the average length of school term was 172.7 days, and the average number of days attended by each pupil enrolled was 143.0 days. In 1929-30, 854,263 teachers (421,771 men and 432,492 women) were employed. The average annual salary of all teachers was \$2,420. The total number of buildings used as school houses was 247,289, and the estimated value of all public school property was \$6,211,327,040.

The total money received for school purposes, excluding balances on hand, was \$2,088,556,837. Of this amount, \$275,517 was received from permanent school funds and from the rent of school lands, \$229,312,434 from State taxes or State appropriation, \$1,645,687,651 from local tax or appropriation, and \$26,040,235 from all other sources, State and local. The total payments, excluding payments of bonds, were \$2,316,790,384. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, \$370,877,969; for salaries of superintendents, supervisors, principals and teachers, \$1,295,201,424, and for all other purposes, \$650,710,991.

Compulsory Attendance Laws, 1930.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1929-30.

Of the 1,078 universities, colleges, and professional schools, 246 are public institutions and 832 under private control or management. The total number of instructors in both private and public institutions was 71,722 (35,861 men and 35,861 women). The public institutions enrolled 392,327 undergraduate and graduate students (244,764 men and 147,563 women). The private institutions enrolled 581,187 undergraduate and graduate students (359,459 men and 221,728 women). In general engineering, 8,506 students were enrolled; in chemical engineering, 6,474; in civil engineering, 11,553; in electrical engineering, 12,647; in mechanical engineering, 11,597; and in mining engineering, 1,459.

The total number of baccalaureate degrees conferred in 1929-30 was 91,623 (51,160 men and 40,463 women); altogether 26,322 graduate degrees were conferred (10,623 men and 15,699 women); 1,327 honorary degrees were conferred.

The schools of theology enrolled 13,045 students and reported 1,221 graduates; law schools, 41,426 students and 2,874 graduates; schools of medicine, 21,664 students and 4,709 graduates; schools of dentistry, 7,816 students and 1,798 graduates; schools of pharmacy, 10,906 students and 2,599

graduates; and schools of veterinary medicine, 284 students and 135 graduates.

Teachers' Colleges and Normal Schools, 1929-30.

In 1929-30, 331 teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 273 are public institutions, and 58 are private institutions; 120 are teachers' colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools, 26 are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,473. The total number of students enrolled was 279,195 (160,935 men and 118,260 women). Of this total enrollment, 264,257 students are in normal training courses. The number of graduates from the normal training courses was 7,038 men and 42,189 women, making a total of 49,227. 12,073 bachelor's degrees were also conferred, 3,603 on men and 7,464 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrollment in these model schools, so far as reported, was 90,602. The total receipts for normal schools (1929-30) were \$56,683,932. The total number of volumes in the libraries was 4,005,076.

Nurse Training Schools, 1928-27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Office of Education. In 1930-31 the number of such schools reporting was 1,844. The number of pupils enrolled in these schools in 1930-31 was 100,419 and the number graduated 18,623. Of the schools reporting, 66 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 428,472 beds, and the average daily number of patients is 325,319. In 1930-31 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals two-thirds of the schools required 8 hours of duty daily in 1930-31. In hospitals for the insane, about a fourth required 12 hours duty, a fourth 10 hours, and less than a third, 8 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 45 per cent. of the schools pay less than \$10 per month, and more than 50 per cent. pay from \$10 to \$15 per month during the second and third years. About 15 per cent. pay no remuneration at all. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 48 per cent. of the schools pay between \$25 and \$50 a month.

More than 89 per cent. of all the nurse training schools in general hospitals offer a three-year course. In hospitals for the insane, about 80 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. 87 per cent. of the general nurse training schools require four years of high school work for admission.

Of the nurse training schools reporting, about 20 per cent. are affiliated with colleges or

universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1929-30.

In 1929-30, 22,237 public high schools reported to the Office. The total number of teachers in these secondary schools was 213,306* (74,532 men and 138,774 women). The total number of pupils enrolled in these schools was 4,145,660 (1,991,202 boys and 2,154,457 girls). The total number of coloured pupils included in the preceding figures is 112,897. In the first year of the course 1,460,459 pupils were enrolled, in the second year 1,132,061, in the third year 852,012 and in the fourth year 684,985 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organized as a part of junior high schools, 1,066,520 pupils were enrolled. The number of graduates reported was 592,719 (267,298 boys and 324,421 girls).

There were 16,460 regular high schools that reported a four-year curriculum. In these four-year high schools there are 2,652,471 pupils enrolled (1,270,199 boys and 1,382,272 girls). In addition, there are 1,842 junior high schools, with 1,036,919 pupils (517,255 boys and 519,664 girls); 1,227 junior-senior high schools, with 979,176 pupils (471,101 boys and 508,075 girls), and 648 senior high schools, with 543,813 pupils (264,261 boys and 279,552 girls).

Private High Schools and Academies, 1929-30.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797. In 1929-30 the number enrolled was 269,249. The number of schools reporting in 1900 was 1,978, and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1929-30 was 22,003 (8,577 men and 13,426 women). In this group of schools, more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only. Altogether, 116 of the schools had military drill in 1928, enrolling 16,528 students.

* Includes 9,277 men and 30,755 women teachers in junior high schools.

FIRE LOSSES IN THE UNITED STATES.

(Estimated by the *Journal of Commerce*)

In the following table the losses for 1906 include the losses from fires following the disastrous earthquake in San Francisco. In 1923 the *Loss of Life* caused by fires was stated to amount to 15,000 persons. The Fire Losses in New York (1930) are stated at \$18,116,305; Chicago (1928) \$12,999,899; Montreal (1927) \$2,599,603; in London, Eng (1927) \$1,773,900.

1917	37,870,464	37	64,678,782	63	1930	64,233,114	39	100,679,137	61
1918	38,489,763	42	52,980,156	58	1931	59,007,223	38	96,519,327	60
1919	41,020,746	44	51,855,601	56	1932	52,811,121	37	88,023,692	63

The lowest American port tonnage was 29 in 1880, 1881 and 1882, the highest was 44 in 1928.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding inland possessions and Alaska, is 2,903,216,640 acres, of which in 1930 986,771,016 were farms (222,395,804 acres improved). The total number of farms in 1930 was 6,288,622, of which 2,314,858 are between 100 and 300 acres, 1,374,965 between 30 and 100 acres, and 1,440,388 between 10 and 30 acres. The gross value of farm products of the United States in 1930 was \$9,401,939,000, as compared with \$12,983,258,000 in 1929. Crops in 1929 were valued at \$6,904,022,000, live-stock products (including animals sold or slaughtered) at \$5,514,038,000.

Principal crops in 1929 and 1930:—

Crop.	Gross Value.	
	1929.	1930.
Corn (Maize).....	\$2,089,565,000	\$1,258,313,000
Wheat.....	849,541,000	566,231,000
Oats.....	524,783,000	463,708,000
Barley.....	164,860,000	133,674,000
Cotton Lint.....	1,245,084,000	656,381,000
" Seed.....	200,533,000	134,122,000
Tobacco.....	222,743,000	226,895,000
Potatoes.....	470,667,000	348,362,000
" Sweet	97,733,000	71,008,000
Truck Crops.....	363,893,000	336,117,000
Hay.....	1,243,048,000	1,054,388,000
Apples.....	198,424,000	167,845,000
Farm Gardens	285,383,000	245,402,000

Animal Products

Cattle and Calves	1,172,526,000	990,023,000
Hogs.....	1,422,941,000	1,354,030,000
Sheep and Lambs	195,321,000	144,342,000

Milk.....	2,178,449,000	1,853,756,000

* Revised figures

† Preliminary figures.

Minerals.—The total value of all mineral products of the U.S. in 1931 was \$3,180,000,000; the value of metallic minerals produced was \$267,200,000 (pig iron, \$228,147,196; copper, \$28,527,000; gold, \$49,527,200, and silver \$8,970,204), and of non-metallic minerals the total value was \$2,312,800,000 (bituminous coal, \$515,000,000; Pennsylvania anthracite, \$304,203,000; petroleum, \$51,028,000 barrels of 42 gallons, value \$550,630,000; natural gas, \$350,000,000; cement, \$124,528,769).

MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1929 numbered 210,959, the value of their products being \$70,434,863,443, as compared with a value in 1927 of \$62,718,347,289. The leading manufacturing States ranked according to value of products, are New York, Pennsylvania, Illinois, Ohio, Michigan, and New Jersey. Cities Ranked by the Value of their Manufactured Products for 1927 and 1929.

Leading Industries (Ranked by Value of Products) in Principal Industrial Cities for 1929.

New York.—Clothing, women's, not elsewhere classified; Printing and publishing, newspaper and periodical; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Printing and publishing, book and job; Fur goods; Bread and other bakery products; Meat packing, wholesale; Millinery; Perfumes, cosmetics, and other toilet preparations; Foundry and machine-shop products, not elsewhere classified; Electrical machinery, apparatus and supplies; Knit goods. Cane sugar refining and Gas manufacturing (illuminating and heating) are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Chicago.—Meat packing, wholesale; Foundry and machine-shop products, not elsewhere classified; Printing and publishing, book and job; Steel works and rolling mills; Printing and publishing, newspaper and periodical; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Bread and other bakery products, Confectionery; Furniture, including store and office fixtures. Electrical machinery, apparatus and supplies is one of the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Detroit.—Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Nonferrous metal alloys and products, not including aluminum products; Foundry and machine-shop products, not elsewhere classified; Meat packing, wholesale; Machine-tool accessories and small metal-working tools, not elsewhere classified.

Philadelphia.—Electrical machinery, apparatus and supplies; Printing and publishing, newspaper and periodical; Knit goods; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Sugar refining, cane; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products; Worsteds goods; Clothing, women's, not elsewhere classified; Cigars and cigarettes. Petroleum refining is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Cleveland.—Motor vehicle bodies and motor vehicle parts; Steel works and rolling mills; Foundry and machine-shop products, not elsewhere classified; Electrical machinery, apparatus and supplies; Meat packing, wholesale, Paints and varnishes; Blast furnaces; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified. Motor vehicles, not including motor-cycles, is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

St. Louis.—Motor vehicles, not including motor-cycles; Meat packing, wholesale; Boots and shoes, other than rubber; Boot and shoe

cut stock, not made in boot and shoe factories; Tobacco, chewing and smoking, and snuff; Electrical machinery, apparatus and supplies; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products. Motor vehicle bodies and motor-vehicle parts, and Patent or proprietary medicines and compounds are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Baltimore.—Smelting and refining, copper; Meat packing, wholesale; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Nonferrous metal alloys and products, not including aluminum products; Tin cans and other tinware, not elsewhere classified; Sugar refining, cane; Fertilizers; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products.

Los Angeles.—Petroleum refining; Motion pictures, not including projection in theatres; Rubber tyres and inner tubes, Meat packing, wholesale, Foundry and machine-shop products, not elsewhere classified; Printing and publishing, newspaper and periodical; Bread and other bakery products.

Buffalo.—Motor vehicles, not including motor-cycles, Flour and other grain-mill products; Meat packing, wholesale, Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products, not elsewhere classified; Feeds, prepared, for animals and fowls; Nonferrous metal alloys and products, not including aluminum products.

Milwaukee.—Motor vehicle bodies and motor vehicle parts; Motor vehicles, not including motor-cycles; Meat packing, wholesale; Engines, turbines, tractors and water-wheels; Foundry and machine-shop products, not elsewhere classified; Boots and shoes, other than rubber; Knit goods, Leather, tanned, curried and finished, Bread and other bakery products.

Boston.—Boot and shoe findings, not made in boot and shoe factories; Printing and publishing, newspaper and periodical; Sugar refining, cane, Clothing, women's, not elsewhere classified, Printing and publishing, book and job; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified. Confectionery, Bread and other bakery products. Foundry and machine-shop products, not elsewhere classified, and Cutlery (not including silver and plated cutlery) and edge tools are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Pittsburgh.—Steel works and rolling mills; Bread and other bakery products; Foundry and machine-shop products, not elsewhere classified; Canning and preserving, fruits and vegetables, pickles, jellies, preserves and sauces; Meat packing, wholesale; Printing and publishing, newspaper and periodical. The blast furnaces industry is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Akron.—Rubber tyres and inner tubes.

Newark.—Electrical machinery, apparatus and supplies; Paints and varnishes; Leather, tanned, curried and finished; Meat packing, wholesale; Foundry and machine-shop products, not elsewhere classified; Chemicals, not elsewhere classified; Jewelry; Bread and other bakery products. Gold, silver, platinum, reducing and refining, not from the ore, is among the leading industries in this city, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Cincinnati.—Meat packing, wholesale; Clothing (except work clothing), men's, youths' and boys', not elsewhere classified; Foundry and machine-shop products, not elsewhere classified; Bread and other bakery products; Printing and publishing, newspaper and periodical. The following industries are among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments: Machine tools, Motor vehicles, not including motor-cycles; Electrical machinery apparatus and supplies.

San Francisco.—Coffee and spice, roasting and grinding; Motor vehicles, not including motor-cycles; Cigars and cigarettes; Printing and publishing, newspaper and periodical; Canning and preserving, fruits and vegetables, pickles, jellies, preserves and sauces; Printing and publishing, book and job; Meat packing, wholesale; Bread and other bakery products; Foundry and machine-shop products, not elsewhere classified; (ane sugar refining, and Bags, other than paper, not made in textile mills are

among the leading industries in this city, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

Motor Vehicle Industries.—The value of the complete passenger cars and business vehicles manufactured in 1929 was \$3,113,208,531; of parts and accessories, \$1,393,487,573, and of tyres and tubes \$672,050,001. The number of complete passenger cars produced was 4,388,315 and of complete business vehicles 393,553, while 70,354,787 tyres and 74,043,041 inner tubes were also manufactured in 1929. The motor vehicle and tyre factories gave employment to 530,711 wage earners, who received \$860,164,593 in wages in 1929. The number of motor vehicles registered in 1929 in the U. S. A. was 26,501,443. The gasoline produced in 1929 amounted to 18,138,122,000 gallons, and that consumed to 15,617,784,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1929 amounted to \$928,155,062. The number of motor vehicles, exclusive of those shipped as "parts for assembly," exported in 1929 was 545,202.

PUBLIC ROADS—On Dec. 31, 1930, the total length of public roads was 3,009,066 miles, approximately 693,559 miles of which were surfaced roads. In 1930 the total expenditures for highways were approximately \$1,680,493.095.

SHIPPING—On June 30, 1932, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 350 sailing vessels of 480,289 gross tons; 1,867 steam and motor vessels of 9,653,333 gross tons, a total of 2,217 vessels of 10,133,622 gross tons. In the year ended June 30, 1932, sailing and steam vessels of 70,393,499 tons entered at the various ports of the U.S.; of this total 26,465,860 tons were American and 43,927,639 tons foreign. The tonnage cleared from the various seaports was 70,441,374, of which 26,345,321 tons were American and 44,096,053 tons foreign.

POSTS AND TELEGRAPHS—On June 30, 1932, there were 48,159 post offices in the U.S. handling 26,544,351.951 "pieces" of mail matter, of which amount 26,186,137,125 were domestic and 358,214,826 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are shown on page 560. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 548.

INDIAN POPULATION

In 1930 the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 340,541 by blood (Oklahoma containing 121,684, Arizona 47,072, New Mexico 28,113, S. Dakota 23,726, California 19,197, Montana 14,238, North Dakota 10,794, Washington 12,572, Wisconsin 11,705, and Minnesota 15,767, and the 38 remaining States less than 10,000 each). Total disbursements authorized for the fiscal year ended June 30, 1932, for Indian Service are \$23,162,400. In addition to this the sum of about \$5,000,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total

wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to \$1,716,815,123, of which \$200,106,386 was tribal, and \$796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F. N.W., Washington, D.C. Employees: Washington Office, 55; Field, 1,500 to 2,000. Expenditure per year about \$10,000,000.

The Bureau of Reclamation was organized as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in 15 arid and semi-arid States of the far West. Twenty-seven projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs. The funds for this work have come chiefly from repayments by the water users, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 17,623 miles of canals, ditches and drains (including 167,985 canal structures). There have been constructed 140 storage and diversion dams with an aggregate volume of 23,202,000 cubic yards, including the *Owyhee Dam* (405 feet high), Oregon, on the Owyhee River, the highest dam in the world; *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 124 tunnels, 1,477 miles of road, 120 miles of railroad, 4,044 miles of telephone line, 22 power plants, and 3,308 miles of transmission lines. The construction cost to June 30, 1932, was \$213,296,710. This work has involved the excavation of 311,466,000 cubic yards of materials, and the Bureau has used 5,862,000 barrels of cement.

Nearly 650,000 persons are living on the 42,568 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, 1,553,000 acres were irrigated and 1,500,000 acres were harvested in 1932, producing crops worth \$40,554,037, or an average of \$26.70 per acre. The 1,893,889 acres of additional lands using stored water yielded crops worth \$33,406,340 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "Reclamation Era," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers, and numerous settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation

of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development.

GOVERNMENT PRINTING OFFICE, North Capitol and G Streets, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and together with the machinery and equipment which they contain, represent an expenditure of approximately \$10,000,000. The annual cost of operation and maintenance is over \$14,700,000, including the Public Documents Division. There are over 4,600 persons annually employed in the various divisions of the office, which now operates on the 5-day week plan, at a total yearly compensation of over \$10,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest

battery of type-setting machines in the world, including 174 linotype machines, 2 Ludlows, 2 material casters, 200 monotype key-boards and 130 monotype casting machines, which produced about 2,750,000,000 ems of type in fiscal year 1932. The 192 presses of the office are credited with 2,190,000,000 chargeable impressions, not including 222,000,000 on money order forms and 1,366,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,167,000 square inches of electrotypes and stereotypes, and 702,000 square inches of half-tones and linecuts, supplied blank paper to other Government establishments at a cost of \$725,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H. Carter, Iowa* \$10,000
Deputy Public Printer, John Greene, Mass. 7,500
Production Manager, Elwood S. Moorhead, Pa. 5,600

* During the fiscal year 1932-33 the salaries are subject to a reduction of nine and one-eighth per cent. under the provisions of the Legislative Appropriation Act, approved June 30, 1932, Public 212

COTTON REPORT AS OF JULY 1, 1932.

The Crop Reporting Board of the United States Department of Agriculture, from the reports and data furnished by crop correspondents, field statisticians, co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges, makes the following estimate of cotton acreage in cultivation on July 1, 1932.

U.S. Acreage in cultivation compared with last year, 90 5 per cent.

U.S. Acres in cultivation, Total, 37,250,000 acres.

Estimate of Cotton Acreage, by States.

State.	Area in Cultivation.			10-year average abandonment 1922-1931.

Dependencies of the U.S.A.

HAWAII.

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 50 islands in the N. Pacific Ocean between $18^{\circ} 55'$ — $22^{\circ} 16'$ N lat. and $154^{\circ} 4'$ — $160^{\circ} 30'$ W long. The nine inhabited islands are:—

Island	Sq. miles	Pop. (1930)
Hawaii	4,016	73,325
Oahu	598	202,887
Mauī	728	48,756
Kauai	547	35,806
Molokai	261	5,032
Lanai	140	2,356
Nihoa	97	136
Kahoolawe	69	2
Molokini	3	

The total population (Census of 1930) was 368,336, an increase of 112,444 since 1920; of the total 121,072 were aliens.

The islands were discovered by Capt. Cook in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893, a republic being proclaimed in 1894. In 1897 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending a Delegate to Congress at Washington, D.C.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilanea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

Revenue (1929-1930) ..	\$12,530,357
Expenditure (1929-1930) ..	11,666,956
Debt (June 30, 1930) ..	31,705,000
Total Exports (1930-1931) ..	115,829,180
Total Imports ..	90,962,311
Exports to U.S. ..	106,098,975
Imports from U.S. ..	82,469,322

Governor (1929-1933), Lawrence M. Judd, assumed office, July 5, 1929.

CAPITAL, Honolulu, on the island of Oahu, population (1920) 137,582. Hilo, on the island of Hawaii, has a population of 19,468.

THE PHILIPPINE ISLANDS

are situated between $4^{\circ} 40'$ — $21^{\circ} 10'$ N. lat. and $116^{\circ} 40'$ — $126^{\circ} 34'$ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom (in 1928) 8,724,965 are Roman Catholic, 4,000,000 are Aglipayan, 200,000 are Protestant, (and 1918) 443,037 are Muhammadan, 508,566 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who

was slain by the natives of Mactan. In 1565 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898.

On Aug. 31, 1902, the Philippine Scouts, which form a part of the United States regular Army, consisted of 88 officers and 6,239 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3,788 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Oct., 1928, consisted of 397 officers and 6,119 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1927 the income of the Philippine Government was \$39,842,988 and the bonded indebtedness \$74,800,000. The expenditure on education in 1927 amounted to \$13,809,753 for public schools only, the University had an enrolment of 7,533 students, and there were 2,099,306 pupils enrolled in the public schools. The principal exports are sugar, abaca (Manila Hemp), coconut oil, copra, tobacco, embroideries, desiccated coconut, lumber and timber, copra meal and maguay, the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and dairy products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures and coal.

Total Imports	\$146,326,859
Total Exports	169,119,397
Imports from U.S.	87,362,503
Exports to U.S.	122,275,672

Towns.—Capital, Manila, in the island of Luzon, population (1928), 324,522. The next largest towns are Cebu (86,154), Legaspi (32,670), Iloilo (67,147), and Zamboanga (47,302); there are several others with populations from 25,000 to 40,000.

Governor General, Col. Dwight F. Davis, assumed office at Manila, July 8, 1929.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in $13^{\circ} 25'$ N. lat. and $144^{\circ} 30'$ E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval

station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population of 20,857, of whom 19,611 are classed as native, 485 of the naval station, and 761 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about 1 sq mile and lies in the N. Pacific about 2,000 miles from Hawaii on the direct route to Hong Kong.

Midway Islands, with a total area of 28 sq miles and a population (1930) of 25, lie in the N. Pacific about 1,200 miles from Hawaii. The group is administered by the U.S. Navy Dept.

PUERTO RICO.

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat and 65° 30'–67° 15' W. long., with a total area of 3,435 square miles and a population of 1,543,913 at the census of 1930. Three fourths of the population are of Spanish descent and about one fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 98 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a Spanish possession until Oct. 12, 1898, when it was ceded to the United States as a result of the Spanish-American War. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 344 miles of railroad were in operation in June, 1931, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 25 representative districts and 4 elected at large). The term of the Legislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the island during the present century—the island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 124,715 inhabitants in 1930, other towns being Ponce (53,430), Mayaguez (37,060), Arecibo (12,863), Bayamon (12,986), and Caguas (19,792).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Anunu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 10,055 in 1930, distributed (1930) as follows—Tutuila and Anunu 'u, 7,809; Ta'u, 1,243; Olosega, 438; Ofu, 466; Rose Island, uninhabited; and Swain's Island (annexed May 13, 1925), 99.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq miles, with a population in 1930 of 22,012. *St. Thomas* (28 sq miles) has a population of 9,834. *St. Croix* (84 sq miles) has a population of 11,413, the capital being Christiansted (or Bassin). *St. John* (20 sq miles) has a population of 765, the capital being Cruz Bay. St. Croix exports sugar; St. Thomas is famous for its bay rum.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Paul M. Pearson.

Government Sec., Boyd J. Brown.

THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Harry Buggess, U.S.A.) at its head.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the

territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1904 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1931, were \$532,387,285. The net revenue from tolls and other revenues (including business operations), to June 30, 1931, aggregated \$151,636,476.

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year	No of Transits.	Canal Net Tons	Cargo Tons.
1915	1,075	2,792,572	4,888,454
1916	2,758	2,396,168	3,094,114
1917	1,803	5,798,557	7,058,563
1918	2,069	6,574,073	7,532,031

1928	6,455	29,752,637	29,630,709
1929	6,413	29,837,794	30,663,006
1930	6,185	29,980,614	30,030,232
1931	5,587	27,792,146	25,088,800

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies 10 to 12 hours (passage through locks 5 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 25 feet above sea-level varies from 25 feet in some parts of Gatun Lake to 41 feet in the

Atlantic entrance. The depth through Culebra Cut is 45 feet.

THE PRESIDENTIAL ELECTION OF 1932.

The Presidential Election of 1932 was held on Nov 8 (being the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires). The Republican candidate was Herbert Clark Hoover, of California, who was standing for a second time (having been elected President in November, 1928), the Democratic candidate being Franklin Delano Roosevelt, of New York, who was born in New York in 1882, entered the New York State Legislature as a Senator in 1910, and was appointed Assistant Secretary of the Navy in Woodrow Wilson's Administration (1913-1921). At the Presidential Election of 1920 Senator Roosevelt was nominated for Vice-President; in 1928 he was elected Governor of New York State, and in 1930 he was re-elected Governor. At the Presidential Election of 1932 Governor Roosevelt was elected President of the United States by a very large majority, and the biennial elections for the Senate and for the House of Representatives holden on the same day returned a large number of Democrats, so that in both Houses of the Legislature the new President's party will be in the majority. The composition of President Roosevelt's Cabinet had not been officially announced at the time of going to press.

Vice Consuls	300-600	50-150	100-200

AFGHANISTAN

King of Afghanistan, H.M. Muhamed Nadir Shah Ghazi, born 1880, acceded Oct. 16, 1929

Minister in London, H. E. Sardar Ahmad Ali Khan, 31 Princes Gate, S.W. 7

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 6,380,500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1866-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamnab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Panjirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Durans have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan (now

Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimana, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of rifles and artillery have been purchased in Europe and the army now consists of about 35,000 to 40,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are based on the "Shariat," or Islamic law and tribal custom. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (210 miles), and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The exports to India are mainly fruits and nuts, raw wool, skins and *ghis*; while the imports therefrom are chiefly cotton yarn and piecegoods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £2,000,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrullah Khan seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanullah Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were

made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose moderate reforms had brought on him the charge of infidelity, was expelled. After a usurpation of some months by a local free-booter Kabul was captured (Oct. 1929) by Nadir Shah.

CAPITAL, Kabul (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Herat (30,000), Mazari-Sharif (46,000), and Khanabad (5,000).

FLAG: Black, red, green.

British Envoy Extraordinary and Minister Plenipotentiary, Sir Richard Roy Maconachie, K.B.E., O.I.E. (1929).

Counsellor, Maj. W. K. Fraser-Tytler, M.C.

Military Attaché, Maj. A. E. Farwell.

Surgeon, Maj. H. H. Elliot, M.B.E., M.C.

Secretary, Capt. A. E. H. Macann.

Oriental Secretary, Khan Sahib Sikander Khan.

British Consul at Jelalabad, Mufti Abdul Latif Khan.

British Consul at Kandahar, Khan Bahadur

Saiyyid Siddiq Hassan.

ALBANIA.

(Shqipëria.)

King of the Albanians, Zog I. b. 1895; elected President, Jan. 31, 1925; proclaimed King, Sept. 1, 1928.

Prime Minister (Mch. 4, 1930), Pandell Evangjeli.

Minister for Foreign Affairs, Hussein Bey Vrioni.

Minister in London, His Excellency Djemil Bey Dino.

Legation, 22, Pont Street, S.W.1. [Sloane 6689].

Sec. of Legation, Çatin Saraçi.

Consul-General in London, Edwin Cripwell, 119, Finsbury Pavement, E.C.2. [Met. 8615.]

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yania) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 11,000 to 12,500 sq. miles; total population (Census of 1920) 1,003,104. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the Treaty of London of Dec. 30, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great

War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 22, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albanians; the Senate then ceased to exist, and a High Council of State was formed of 20 members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products; but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 7 metres draft alongside the quays and 4 metres elsewhere, is expected to be completed in the summer of 1933.

Gold Francs.

	1931-32.	1932-33.

CAPITAL, Tirana (pop. 30,806); other centres are Sentari (pop. 29,209); Elliasan (pop. 13,796); Gjinokastro (10,836); Berat (pop. 10,403); Korytza or Korchia (pop. 22,787); Durazzo (pop. 9,739); and Valona (pop. 9,106).

BRITISH LEGATION.

(Rruga Tomorica, Durazzo.)

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir R. M. Hodgson, K.B.E., O.M.G. (1928) 25,425

Naval Attaché, Captain R. B. Ramsay, M.V.O., R.N.

Asst. Naval Attaché, Eng.-Com. G. Villar, R.N.

Military Attaché, Col. H. R. G. Stevens, D.S.O.

Air Attaché, Group Capt. T. G. Hetherington, C.B.E.

Archivist, F. W. Borman.

Albanian Secretary (local rank), Triphoni Toni.

BRITISH CONSULAR OFFICERS.

Durazzo—Vice-Consul (local rank of 2nd Secretary), Edward H. L. Hadwen.

„ **Pro-Consul,** F. W. Borman.

* In July, 1932, the Albanian Government accepted the offer of the Italian Government of annual loans of 20,000,000 Gold Francs, maximum for 20 years, making a total maximum of 200,000,000 Gold Francs, from 1932.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a Judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between $30^{\circ} 30'$ — 60° E. long and $12^{\circ} 45'$ — $34^{\circ} 50'$ N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below.—

THE KINGDOM OF SAUDI ARABIA.

King of Saudi Arabia (Jan. 11, 1926), H. M. Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud, 6 C.I.E., born 1880.

Minister in London, His Excellency Sheikh Hafiz Wahba, 42 Eaton Place, S.W. 1 (Sloane, 389.)
1st Sec., M. Mahmood Riyad Zada.
and Sec., M. Youssef Salama.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rasid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir, the whole of which is now *de facto* part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahhabite movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000),

Shaqra, Analsah, Buraida, Ha'il and Hauta (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Ojair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahhabis.

The *Hejaz* extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambo, Rabigh and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind", and inland are many settlements through which runs the course of the Hejaz Railway. The *Oasis of Khabar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*Al Medina*, "The City"), 800 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Jeddah, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

Asir extends, geographically, from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat. $12^{\circ} 15'$ N.) and includes the seaboard down to lat. 16° . Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asir is part of Al Yemen. The territory includes the Farsan Islands. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

The total cost to the British Government of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £525,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later payments were made subject to the following conditions—

(1) That Ibn Saud refrained, and restrained his adherents from aggressive action against the Hejaz, Kuwait, and Iraq.

(a) That he afforded co-operation in the matter of the Hajj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties

No terms of repayment were suggested

By the *Treaty of Jadda* (May 20, 1927) Great Britain recognised Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

CAPITAL OF NEJD. Riyadh, OF HEJAZ, Mecca.

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir Andrew Ryan, K.B.E., C.M.G. (1920).

Jedda—Vice-Consuls, C. G. Hope Gill, T. Wikeley; G. W. Furlonge, F. H. Gamble (acting), Munshi Ihsanullah, 1st Consul, Basil W. Sanger.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabu as-Subah, K.O.I.E., C.S.I., acceded March, 1921.

Kuwait (on Kowf) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903. The trade of Kuwait (1929-30) was valued at £71,825 for imports, and £182,900 for exports.

British Political Agent, Lt. Col. H. R. P. Dickson, C.I.E.

THE SULTANATE OF OMÂN.

Sultan, H. H. Saiyid Said bin Taimur, born Aug. 13, 1910, suc. Feb. 10, 1932.

Omân (area undivided; estimated pop. 550,000) is a Muhammadan State in S.E. Arabia. Its seaboard is nearly 900 miles long, and extends from Tibhat (on the W. side of Cape Musandam) round Ras Bajir (200 miles N. of Socotra) with the exception of a small strip of the E. coast of the Musandam Peninsula from Dibbah to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Great Desert, but of late years the Omanis have become autonomous and are now subject to the Imam of Oman.

The interior is for the most part mountainous, the high country extending down to the sea coast in a series of arid rocky heights, though vegetation exists on the higher mountains N.W. of Muscat the sea coast littoral tract is fertile and prosperous, and date groves extend along it for over 100 miles. This strip is known as the Batinah Coast. The remainder of the coast, with one notable exception, is barren and forbidding and rarely visited by Europeans.

Gwadar, a port on the Makran Coast, and a small tract of country round it, also owns allegiance to Muscat. It is the last remnant of the Omân possessions on the Persia side of the Gulf. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent

at his capital. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1931-32 to Rs. 5,444,445. Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 22,500.

Muscat—British Consul and Political Agent, Major Gerald P. Murphy, per annum Rs. 2,400.

THE IMAMATE OF YEMEN.

Imam, Yahya Muhammad Hamid-ud-din, born 1869

Yemen occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. Under Turkish rule, it was divided into the vilayet of Sana, Talz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zaidi sect of the Shi'ah Division of the Muhammadan religion; about half of his subjects are Zaidis, the remainder being Shafais, over whom he rules by *force majeure* alone. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tihama, or coast lands, from S. of Hodeida to Sheikh Said. Since 1920 the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1925, the Imam occupied Hodeida, which had been evacuated by the Idrisi, and later took the ports of Midl and Loheya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. About 60 miles to the south of Sani is the town of Dhammar, an ancient seat of learning.

CAPITAL, Sana, population, about 40,000.

BAHRAIN

Ruler, H. E. Sir Isa bin Ali Al Khalifah, K.O.I.E.

Her Apparent and Regent, H. E. Shaikh Hamid bin Isa Al Khalifah, C.S.I.

Financial Adviser, C. Dalrymple Belgrave.

Political Agent, Capt. C. G. Prior, I.A.

Asst. to do, Khan Bahadur Abdul Hafiz Alhashini.

Bahrain is the largest of a group of islands (Bahrain, Maharaj, Sitra, Nabi Saleh and some uninhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa). Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland.

Pearls are the principal export, varying in value from 1 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The people (about 115,000) are Muhammadans. Bahrain has been in treaty relations with the Government of India since 1880. In 1880 the ruler engaged not to make treaties with any other state and in 1903 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 25,000.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Duhna Desert, contains a coastal strip of some 500 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Salih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 80,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shehr and Mokalla* (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiwun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Qa'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-el-Kheima to Omdel, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1825 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India via Lingah and Bahrain.

ARGENTINE REPUBLIC.

(República Argentina.)

President. General Augustin P. Justo, assumed office, Feb. 20, 1932.

Vice-President. Dr. Julio Roca.

Min. for Foreign Affairs. Dr. Carlos Saavedra Lamas.

Interior. Dr. Leopoldo Melo.

Finance. Dr. Alberto Hueyo.

Justice and Public Instruc., Dr. Manuel de Iriondo.

Agriculture. Dr. Antonio A. de Tomaso.

War. Col. Manuel A. Rodríguez.

Marine. Capt. Pedro S. Casal.

Public Works. Dr. Manuel R. Alvarado.

Ambassador in London. His Excellency Señor Dr. Don Manuel Mallbrán, 11 Lowndes Square, S.W. 1.

Counsellor. Señor Don Carlos Miguens.

First Secretary. Señor Dr. Don Pablo Santos Muñoz.

2nd Secretary. Señor Dr. Don Mariano A. Barrenechea.

Military Attaché.

Naval Attaché.

Air Attaché.

Civil Attaché. Señor Don Julián Duggan.

Agricultural & Commercial Counsellor. Señor Dr. Don Anebal Fernandez Beryó.

Consul-General. Señor Don Mario Molino Salas,

7 Gower Street, W.C. 1.

There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swansea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 3,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer see Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 11,628,717 in 1932. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1929, requires intending immigrants to produce certificates of good character and ability to work. In 1932 the immigrants numbered 353,829, and the emigrants numbered 337,112. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1820 (May 25) Spanish rule was defied, and in 1816 (July 9) the independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 158 members. Members of Congress receive \$18,000 (paper) per annum.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 32,211,855 cattle, 44,473,221 sheep, 9,828,111 horses, 1,039,420 mules (1930), 5,647,396 goats (1930), and 3,768,738 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1932 the exports of wheat were 6,638,682 metric tons, oats 644,766, caseln (1930) 13,990, cotton (1932) 25,028 tons, linseed 1,880,274, maize 9,767,201 metric tons, butter (1932) 23,009 tons, wool (1932) 129,838 tons, sheepskins (1932) 21,673 tons, chilled meat (1932) 352,227 tons, frozen meat (1932) 83,682 tons, frozen mutton and lamb (1932) 83,043 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 873,582 cubic metres in 1932; the output of private companies was approximately 987,822 cubic metres in 1932.

Communications.—There were (1932) 24,787 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £24,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres, neighbouring Republics and Europe and North America. The principal ports are Buenos Aires, Rosario, La Plata, and Bahía Blanca. In 1932, 3,226 vessels (21,547,715 net tons) entered at all ports; of the total, 5,126,496 net tons (43.38 per cent.) were British.

Defence.—The Navy consists of a super-Dreadnought battleships (reconstructed in 1925), 5 destroyer leaders, 4 destroyers, 4 coast defence ships and auxiliary vessels, a light cruiser, and 3 submarines. Strength about 800 officers and 14,000 men. The principal naval base is at Puerto

Belgrano, near Bahía Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine base is being built at Mar del Plata. The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. Each division would consist of about 40,000 men on a war footing.

Education.—Primary Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. Secondary Education is controlled by the National Government in National Colleges, numbering 51 in 1929, with 17,600 students, average annual fees \$45 (paper); in Normal Schools, numbering 86 in 1929, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, La Plata, and Tucumán, and Faculties at Santa Fé, Rosario and Paraná.

	1930	1932.
